# **HAGUE WEB SERVICES**

A new machine-to-machine bi-directional data exchange channel  
for Hague Offices

Kim Miles, Hague IS Division

**December 2021**

# STANDARDIZED DATA AND SERVICES

## Hague online services

- New machine-to-machine bi-directional data exchange channel for Hague Offices
- Based on data granularization and standardization (ST.96)

## Automation

- Automated acknowledgements of receipt for Offices
- Automated processing of some decision types (grants of protection)

# NEW HAGUE WEB SERVICES

- Launch in early 2022
- Machine-to-machine bi-directional data exchange channel

## Features:

- Secure
- Highly-available and reliable
- Standard HTTPS/REST API-based protocol

# OFFICE USE CASES

- Send indirect applications to the Hague system
- Send decisions
- Query processing status  
note: exclusively for what has been sent by the specific Office concerned
- Receive confidential copies
- Receive/access the Hague Bulletin

# WHEN AND HOW

- Go live expected **March 2022**
- Hague's preferred data exchange channel
- Other data exchange channels (eg: EDI or ftp)

# HAGUE TECHNICAL WEBINARS

- Timing: March and April 2022.
- Conducted by Hague IT technical experts
- In each of the 3 Hague working languages:
  - ✓ English
  - ✓ French
  - ✓ Spanish

# HAGUE IT TECHNICAL EXPERTS

- Demos
- Technical documentation
- Sample code
- Tests

Please contact us directly on this or any other Hague IT technical support matter:

The screenshot shows an API documentation interface for the endpoint `/publication/bulletin/{weekId}`. The page includes a 'Request' tab with the following details:

- URI Parameters:**
  - weekId:** *required(string)*  
Unique string used to identify the bulletin week.  
The format must be YYYYWW. For instance: 202010
    - YYYY represents the year
    - WW represents the week of the year

The 'Response' tab shows the following information:

- HTTP status code:** 302
- URL redirection:** to access the bulletin information for a week in ST.96.
