ADMINISTRATIVE INSTRUCTIONS  
UNDER THE PATENT COOPERATION TREATY  
(SECOND REVISED DRAFT)

prepared by the International Bureau

SUMMARY

This document contains the second revised draft of the PCT Administrative Instructions. The provisions relate primarily to the procedures under Chapters I and II; however, some matters under other Chapters of the PCT are also covered.

INTRODUCTION

Relevant Provisions of the PCT Relating to the Administrative Instructions

1. Article 58(4) of the Patent Cooperation Treaty (PCT) stipulates that: "The Regulations provide for the establishment, under the control of the Assembly, of Administrative Instructions by the Director General."

2. Rule 89 of the Regulations under the PCT, which is entitled "Administrative Instructions," reads as follows:

"89.1 Scope

(a) The Administrative Instructions shall contain provisions:

(i) concerning matters in respect of which these Regulations expressly refer to such Instructions,

(ii) concerning any details in respect of the application of these Regulations.

(b) The Administrative Instructions shall not be in conflict with the provisions of the Treaty, these Regulations, or any agreement concluded by the International Bureau with an International Searching Authority, or an International Preliminary Examining Authority.

"89.2 Source

(a) The Administrative Instructions shall be drawn up and promulgated by the Director General after consultation with the receiving Offices and the International Searching and Preliminary Examining Authorities.

(b) They may be modified by the Director General after consultation with the Offices or Authorities which have a direct interest in the proposed modifications.

(c) The Assembly may invite the Director General to modify the Administrative Instructions, and the Director General shall proceed accordingly.

"89.3 Publication and Entry Into Force

(a) The Administrative Instructions and any modification thereof shall be published in the Gazette.

(b) Each publication shall specify the date on which the published provisions come into effect. The dates may be different for different provisions, provided that no provision may be declared effective prior to its publication in the Gazette."

Background to this Document

3. A first draft of the Administrative Instructions under the PCT was submitted as document PCT/AAQ/III/2 to the PCT Interim Advisory Committee for Administrative Questions (hereinafter referred to as "the Interim Committee") at its third session, held at Geneva in October 1972.

4. The comments made by the members of the Interim Committee at that session were taken into consideration by the International Bureau in preparing a revised draft, which was submitted as document PCT/AAQ/IV/2 to the fourth session of the Interim Committee, held at Tokyo in October 1973.

5. The members of the Interim Committee discussed the revised draft in detail at the Tokyo session and agreed that the International Bureau should continue its efforts in the elaboration of the Administrative Instructions in light of the comments made.

Contents of this Document

6. This document contains the second revised draft of the Administrative Instructions. It incorporates the changes agreed upon at the fourth session of the Interim Committee as well as the results of further study and examination by the International Bureau.

Forms to be Annexed to the Administrative Instructions

7. In order to facilitate the practical implementation of the PCT, the Administrative Instructions will be supplemented by Forms for use by applicants and by the various PCT Authorities in effecting the required communications. The drafts of such Forms have been submitted for review to the September 1974 session of the Working Group on Forms established by the Interim Committee. Subject to the results of that session of the Working Group on Forms, it is to be expected that the Forms will be submitted for the consideration of the Interim Committee in its 1975 session. It might be preferable to defer discussion on Sections 102 and 103 of the present draft Administrative Instructions until the said session.

8. In drafting both the Administrative Instructions and the Forms, consideration was given to the question whether the particulars in respect of the contents of the Forms should be set forth in provisions (called Sections) of the Administrative Instructions in addition to being set forth in the Forms themselves, and whether the Forms would be annexed to the Administrative Instructions. The system followed in the draft Administrative Instructions is based on two principles, namely: (i) that as much as possible of the said particulars should go into the draft Forms themselves, (ii) that the Forms would be annexed to the Administrative Instructions and the particulars contained in the

Forms would not be repeated in the provisions of the Administrative Instructions. The reason for the first principle is that a Form is more easy to understand than the text of a provision since a Form not only contains, but to a great extent also illustrates, the practical application of any provision. The reason for the second principle is that duplication should be avoided as much as possible. It would be impossible to avoid considerable duplication if the texts of the provisions were to set forth the particulars of what each Form must contain.

9. The Interim Committee is invited to comment on the draft Administrative Instructions, including the Annexes, contained in this document.

## ANNEX C

STANDARD CODE FOR IDENTIFICATION OF DIFFERENT KINDS OF PATENT DOCUMENTS \*Introduction

1. The recommendation provides for groups of letter codes in order to distinguish patent documents. The letter codes also facilitate the storage and retrieval of such documents.
2. If any Office wants to amplify the information contained in the letter code, this letter code may be optionally associated with a numerical code. The meaning of such numerical code should then be defined by each Patent Office availing itself of this option.
3. The code also provides for a letter for non-patent literature documents (N) and for documents to be restricted to the internal use of Patent Offices (X) (e.g. confidential documents, not to be disclosed outside the Office). See in this respect also SI.1 (ICIREPAT Manual pages 4.3.1.1 to 4.3.1.4).

Definitions

4. For the purposes of this recommendation, the expression "patent documents" includes patents for inventions, inventors' certificates, utility certificates, utility models, patents or certificates of addition, inventors' certificates of addition, utility certificates of addition and published applications therefor.
5. For the purposes of this recommendation, the term "entry in an official gazette" means at least one comprehensive announcement in an official gazette regarding the making available to the public of the complete text, claims (if any) and drawings (if any) of a patent document.
6. For the purposes of this recommendation, the terms "publication" and "published" are used in the sense of
  - (i) making available to the public for inspection or copying on request
  - (ii) reproducing in multiple copies
  - (iii) printingof a patent document.

Explanation: If, at a particular procedural stage, a copy of the document is first made available to the public for inspection or copying and is then, at the same procedural stage, printed or reproduced in multiple copies, only a single publication is considered to have occurred. If, on the other hand, printing or multiple reproduction results from a new procedural stage, this printing is considered to be a further publication of the document, even if the texts at the two stages are identical.

7. According to certain national patent laws or regulations, the same patent application may be published at various procedural stages. For the purposes of this recommendation, a publication level is defined as the level corresponding to a procedural stage at which normally a document is published under a given national patent law.

Recommendation

8. It is recommended that the code:
  - (a) be used for the recording of the "kind of document" in machine-readable data carriers, such as 80-column punched cards, magnetic tapes, aperture cards, etc.;
  - (b) be used on the first page of patent documents, preferably near the document number, if these have been published in the sense of paragraph 6;

---

\* Recommendation adopted by Plenary Committee of ICIREPAT (document IC/PLC/V/11).

(c) be used in entries in official gazettes or, if all entries in a section of the Gazette relate to the same kind of a document at the beginning of such a section.

#### 9. Code

The code is subdivided into mutually exclusive groups of letters. The groups characterize patent documents and documents specified in paragraph 3. Groups 1 - 5 comprise one or several letters enabling identification of documents pertaining to different publication levels.

- Group 1 Use for primary or major series of patent documents
  - A First publication level
  - B Second publication level
  - C Third publication level
- Group 2 Use for secondary series of patent documents
  - E First publication level
  - F Second publication level
  - G Third publication level
- Group 3 Use for further series of patent documents, as the special requirements of each Office may be
  - H
  - I
- Group 4 Use for medicament patent documents
  - M
- Group 5 Use for utility model documents having a numbering series other than the documents of Group 1
  - U First publication level
  - Y Second publication level
  - Z Third publication level
- Group 6 Other (see paragraph 3)
  - N Non-patent literature documents
  - X Documents restricted to the internal use of Offices

10. It is understood that documents resulting from a patent application and being identified as the major series will fall under Group 1 (e.g. DT Offenlegungsschrift, Auslegungsschrift and Patentschrift). However, documents identified as a secondary series will fall under Group 2 (e.g. FR patent of addition under old law, US reissue). In exceptional cases of need for a further series, Group 3 is reserved for such purposes (e.g. US defensive publication). Group 4 applies only, at present, to special documents concerning the medicament patents published in France. If any country would publish similar documents, Group 4 should then be used.

11. As indicated in paragraph 2, the above letter code may optionally be associated with a numerical code to amplify the information represented by the letter code. For this numerical code only digits 1 to 9 should be used. The significance of this code will be defined by any national Office applying such code and communicated to the International Bureau, which will publicize this information. The numerical code must always be interpreted in conjunction with the country code and the above letter code.

12. As an appendix to this recommendation a list of patent documents, past and currently published, and intended to be published in the future, divided in accordance with the code, is given.

## (57) ABSTRACT

A chain saw device, comprising a cutting tooth having a planar base plate(1) with an aperture(2) therein for attachment to a power-driven chain. A pilot block(11) depends from the leading edge of the plate and a cylindrical member(6) depends from the trailing edge of the plate with its longitudinal axis inclined upwardly and rearwardly. The cylindrical member has a sharpened, arcuate, forward edge(9) for cutting a kerf. A bore(7) extends through the cylindrical member for passage of chips therethrough and a heel portion(10) follows the forward cutting edge(9) for engaging and finishing the kerf. The chain saw device, while particularly designed for use in cutting wood, is also adapted for cutting minerals and other materials.
