WIPO-SIPO Award for Outstanding Inventor

**Title of award :**

WIPO Gold Medal

**Occasion of award:**

WIPO-SIPO Gold Medals Awards for Outstanding Inventors of 2008

Place: Beijing, China

Date: 2008

**Invention :**

**The Process for Disproportionation and Transalkylation of Toluene and C9 and Heavier Aromatic Hydrocarbons**

**Organizer :**

State Intellectual Property Office of the People's Republic of China

**Other information :**

**China**

Name :

**Guoqing Yuan**

Date of birth: October 11, 1951

**Qingli Qian**

Date of birth: April 29, 1977

**Mrs. Pinglai Pan**

Date of birth: November 23, 1954

Date of birth: April 4, 1968

Category :

WIPO-SIPO Award for Outstanding Inventor

Title of award :

WIPO Gold Medal

Occasion of award:

WIPO-SIPO Gold Medals Awards for Outstanding  
Inventors of 2008

Place: Beijing, China

Date: 2008

Invention :

**A catanionic bimetallic catalyst and its  
preparation method and application**

Organizer :

State Intellectual Property Office of the People's  
Republic of China

Other information :

**China**

Name :

**Guoliang Jiang**

Date of birth: May, 1925

**Wanchun Liu**

Date of birth: February, 1956

Category :

Best Woman Inventor

Title of award :

WIPO Gold Medal

Occasion of award:

6<sup>th</sup> International Exhibition of Inventions (Su Zhou)  
(IEIS 2008)  
Place: Su Zhou, China  
Date: October 16 to 20,2008

Invention :

**N.A.**

Organizer :

China Association of Inventions (CAI)

Other information :

## China

Name: **Zezen Hua**  
Date of birth: November 4, 1970

Category: WIPO – SIPO Award for Outstanding Inventor

Title of award: WIPO Gold Medal

Occasion of award: WIPO – SIPO Gold Medals Awards for Outstanding Inventors of 2006  
Place: Beijing, China  
Date: 2006

Invention: **Counter-rotation wash method and washing machine**

Organizer: State Intellectual Property Office of the People's Republic of China (SIPO)

Other information: Awarded the WIPO Gold Medal together with four other inventors

## China

Name: **Manli Jiang**  
Date of birth: April 1954

Category: WIPO – SIPO Award for Outstanding Inventor

Title of award: WIPO Gold Medal

Occasion of award: WIPO – SIPO Gold Medals Awards for Outstanding Inventors of 2006  
Place: Beijing, China  
Date: 2006

Invention: **A kind of complex metal oxidation catalyst and the method of preparation**

Organizer: State Intellectual Property Office of the People's Republic of China (SIPO)

Other information: Awarded the WIPO Gold Medal together with five other inventors

## China

Name: **Yuefang Jiang**  
Date of birth: 1957

Category: WIPO – SIPO Award for Outstanding Inventor

Title of award: WIPO Gold Medal

Occasion of award: WIPO – SIPO Gold Medals Awards for Outstanding Inventors of 2006  
Place: Beijing, China  
Date: 2006

Invention: **Pulsed high-power Xenon flashlamp and process for manufacture thereof**

Organizer: State Intellectual Property Office of the People's Republic of China (SIPO)

Other information: Awarded the WIPO Gold Medal together with five other inventors

Place: Beijing, China  
Date: 2006

Invention: **A kind of complex metal oxidation catalyst and the method of preparation**

Organizer: State Intellectual Property Office of the People's Republic of China (SIPO)

Other information: Awarded the WIPO Gold Medal together with five other inventors

## CHINA

Name: **Jinhang Xu**  
Date of birth: 1935

Category: Outstanding Woman Inventor

Title of award: WIPO Gold Medal

Occasion of award : On the occasion of the establishment of the China Association of Inventions, First National Exhibition of Inventions  
Place: Beijing, China  
Date: October 1985

Invention: **All-purpose monolithic catalyst for exhaust gas purification**

Organizer: China Association of Inventions (CAI), Beijing, China

Other information: The new all-purpose catalyst may be used in the production of varnished wires or in equipment for purification of industrial and exhaust gases. The monolithic catalyst consists of a honeycomb made of an alloy of rare earth petrovskite type metal and recycled metal, and its manufacturing costs are considerably lower when compared with those of common catalysts. As the new type catalysts may be heated directly by electric current, no exhaust preheater is needed, which allows for a reduction in the size and weight of catalysts, as well as a reduction in operating costs. It can also be used to increase the sensitivity of mass spectrometers.
