### G06 COMPUTING; CALCULATING; COUNTING

**G06T IMAGE DATA PROCESSING OR GENERATION, IN GENERAL** (specially adapted for particular applications, see the relevant subclasses, e.g. G01C, G06K, G09G, H04N) [6, 2006.01]

#### Note(s)

- This subclass covers:
  - arrangements for geometrically modelling objects, whether the final model is used for display of an image of the object or for some other purpose, such as manufacture of a corresponding object;
  - arrangements for analysing the geometric attributes of an image of an object.
- This subclass does not cover:
  - photogrammetry or videogrammetry, which are covered by subclass G01C;
  - reading or recognising printed or written characters or recognising patterns, e.g. fingerprints, which is covered by subclass G06K;
  - modification of image data to allow display using multiple viewports, which is covered by subclass G09G;
  - circuits for generating functions for visual indicators, which are covered by subclass G09G;
  - scanning of documents or the like in pictorial communication, which is covered by subclass H04N.
