

## SECTION H — ELECTRICITY

## H04 ELECTRIC COMMUNICATION TECHNIQUE

**H04S STEREOPHONIC SYSTEMS** (information storage on discs or tapes G11B; broadcast systems for the distribution of stereophonic information H04H 20/88; multiplex systems in general H04J) [3]

**Note(s)**

In this subclass, the following expression is used with the meaning indicated:

- "stereophonic systems" covers quadraphonic or similar systems.

**1/00 Two-channel systems** (H04S 5/00, H04S 7/00 take precedence) [3]

**3/00 Systems employing more than two channels, e.g. quadraphonic** (H04S 5/00, H04S 7/00 take precedence) [3]

**3/02** • of the matrix type, i.e. in which input signals are combined algebraically, e.g. after having been phase shifted with respect to each other [3]

**5/00 Pseudo-stereo systems, e.g. in which additional channel signals are derived from monophonic signals by means of phase shifting, time delay or reverberation** (arrangements for producing a reverberation or echo sound G10K 15/08) [3]

**5/02** • of the pseudo four-channel type, e.g. in which rear channel signals are derived from two-channel stereo signals [3]

**7/00 Indicating arrangements; Control arrangements, e.g. balance control** [3]
