B60 VEHICLES IN GENERAL

Note(s)

In this class, the following term is used with the meaning indicated:

"vehicle" means all vehicles except those restricted to one of the following types of vehicles: rail vehicles, waterborne vessels, aircraft, space vehicles, hand carts, cycles, animal-drawn vehicles, and sledges, which are covered by the relevant subclasses of B61-B64.

Thus the term "vehicle" includes:

- vehicular characteristics which are common to more than one of the above-listed types;
- certain characteristics restricted to automobiles, road or cross-country trailers.
- The following exceptions to the above should be noted:
 - a. subclass B60B or B60C embrace all vehicle wheels and tyres, except wheels for roller skates A63C 17/22, wheels for model railway vehicles A63H 19/22, and special adaptations of wheels or tyres for aircraft B64C 25/36;
 - b. subclass B60C embraces the connection of valves to inflatable elastic bodies in general, and in this respect it is not limited to vehicles;
 - c. subclass B60L embraces certain electric equipment of all electrically-propelled vehicles;
 - d. subclass B60M embraces certain power supply equipment for, but external to, any kind of electrically-propelled vehicle;
 - e. subclass B60R embraces safety belts or body harnesses used in all types of land vehicles;
 - f. subclass B60S relates to all kinds of vehicles, except the servicing of rail locomotives B61K 11/00, ground equipment for aircraft B64F, or cleaning apparatus peculiar to waterborne vessels B63B 57/00, B63B 59/00;
 - g. subclass B60T includes brake control systems of general applicability, and in this respect it is not limited to vehicles. It also includes rail-vehicle power-brake systems and some other features of rail-vehicle brake systems;
 - h. subclass B60V embraces air-cushion vehicles <u>per se</u> and land vehicles, waterborne vessels or aircraft combined with features allowing them to alternatively operate as air-cushion vehicles or to be partially supported by an air cushion.

B60B VEHICLE WHEELS (making wheels or wheel parts by rolling B21H 1/00, by forging, hammering or pressing B21K 1/28); **CASTORS; AXLES; INCREASING WHEEL ADHESION**

Note(s)

Attention is drawn to the Note following the title of class B60.

Subclass index

WHEELS	
General structure	1/00, 3/00
Characterised by the material	5/00
Ornamental characteristics	
Particular structures: highly- resilient; multiple or multi-tyred; adhesion-increasing; rail-engaging	9/00, 11/00, 15/00, 17/00
Component parts	
spokes; rims	1/00, 21/00, 23/00, 25/00
hubs	27/00
Other wheels	19/00
AXLES; WHEEL-AXLE COMBINATIONS	35/00, 37/00
INCREASING WHEEL ADHESION, OTHERWISE THAN BY WHEEL STRUCTURE	39/00
MOUNTING, HOLDING OR ASSEMBLING WHEELS	29/00, 30/00, 31/00
CASTORS IN GENERAL	33/00

<u>Wheels</u>		1/04 • • Attaching spokes to rim or hub
1/00	Spoked wheels; Spokes thereof (non-metallic B60B 5/00) [2]	 Wheels with compression spokes (wheels of high resiliency B60B 9/00) 1/08 • formed by casting
1/02	 Wheels with wire or other tension spokes 	

B60B

1/10	• • fabricated from sheet metal (B60B 1/12,
	B60B 3/08 take precedence)
1/12 1/14	with tubular spokes (B60B 1/08 takes precedence)Attaching spokes to rim or hub
1/14	Attaching spokes to rim or hub
3/00	Disc wheels, i.e. wheels with load-supporting disc body (non-metallic B60B 5/00; wheel cover discs B60B 7/00)
3/02	 with a single disc body integral with rim
3/04	• with a single disc body not integral with rim
3/06	 formed by casting
3/08	• with disc body formed by two or more axially-
	spaced discs
3/10	apertured to simulate spoked wheels
3/12	Means of reinforcing disc bodies
3/14	• Attaching disc body to hub (resiliently B60B 9/00;
	attaching rim to wheel body B60B 23/00)
3/16	• • by bolts or the like
3/18	• • by circlips or the like
5/00	Wheels, spokes, disc bodies, rims, hubs, wholly or
	predominantly made of non-metallic material (wheel cover discs B60B 7/00; wheels of high resiliency
	B60B 9/00)
5/02	made of synthetic material
5/04	made of wood
7/00	Wheel cover discs, rings, or the like, for
	ornamenting, protecting, or obscuring, wholly or in
7/01	part, the wheel body, rim, hub, or tyre sidewall [2, 5]
7/01	• Rings specially adapted for covering only the wheel rim or the tyre sidewall, e.g. removable tyre sidewall
	trim rings [5]
7/02	 made essentially in one part (B60B 7/01 takes
7702	precedence) [5]
7/04	 built-up of several main parts (B60B 7/01, B60B 7/20
//04	take precedence) [5]
7/06	 Fastening arrangements therefor (B60B 7/01,
//00	B60B 7/16 take precedence) [5]
7/08	having gripping elements consisting of formations
	integral with the cover [5]
7/10	• • comprising a plurality of spaced spring clips
	individually mounted on the cover, e.g. riveted,
	welded or readily releasable [5]
7/12	• • comprising an annular spring or gripping element
	mounted on the cover (B60B 7/08 takes
	precedence) [5]
7/14	 comprising screw-threaded means [5]
7/16	Anti-theft devices [5]
7/18	 simulating spoked or wire wheel [5]
7/20	 having an element mounted for rotation
	independently of wheel rotation [5]
9/00	Wheels of high resiliency
9/02	 using springs (wheels comprising resilient spokes
5702	B60B 9/26)
9/04	• • in leaf form
9/06	 in helical form
9/08	 in flat coiled form
9/10	 of rubber or the like
9/10 9/12	 • • in the form of sleeves or rings concentric with
5/12	wheel axis
9/14	• • • with means limiting relative lateral movements
	between hub and remainder of wheel
9/16	• • • modified to ensure electric conductivity
9/18	• using fluid (within spokes B60B 9/26)
9/20	• • in rings concentric with wheel axis
	-

9/22	• • • inflatable
9/24	 with pistons and cylinders
9/26	 comprising resilient spokes
9/28	with telescopic action
11/00	Units comprising multiple wheels arranged side by side; Wheels having more than one rim or capable of carrying more than one tyre
11/00 11/02	side; Wheels having more than one rim or capable of

- tyre 11/06• Wheels with more than one rim mounted on a single wheel body
- 11/08• Arrangements of balancing mechanisms enabling a uniform distribution of load to the tyres
- 11/10• Emergency wheels (tyres collapsible into storage or non-use condition B60C 3/08; tyres characterised by means enabling restricted operation in damaged or deflated condition B60C 17/00) **[5]**

15/00	Wheels or wheel attachments designed for increasing traction (vehicle tyres B60C; non-skid devices temporarily attachable to resilient tyres or resiliently-tyred wheels B60C 27/00)
15/02	Wheels with spade lugs
15/04	• • with resiliently-mounted spade lugs
15/06	 with pivotally-mounted spade lugs
15/08	• • with spade lugs axially displaced relatively to the tread surface of the tyre
15/10	 with radially-adjustable spade lugs; Control mechanisms therefor
15/12	 • involving cams or eccentric hoops
15/14	 • involving an axially-displaceable cone
15/16	• • involving gearing, e.g. gear pinions acting upon threaded shafts on the spade lugs
15/18	 Wheels with ground-engaging plate-like shoes
15/20	• • with resiliently-mounted shoes, e.g. on a spider
15/22	 connected by links to the hub
15/24	• Tread bands or rings for fairing lugs when travelling on the road
15/26	 Auxiliary wheels or rings with traction-increasing surface attachable to the main wheel body
15/28	Wheel-ballasting weights; Their attachment
17/00	Wheels characterised by rail-engaging elements (of model railways A63H 19/22) [2]
17/02	with elastic tyres
19/00	Wheels not otherwise provided for or having characteristics specified in one of the subgroups of this group
19/02	 convertible, e.g. from road wheel to rail wheel; Wheels specially designed for alternative use on road and rail
19/04	expansible
19/06	 with compartments for fluid, packing, or loading material; Buoyant wheels
19/08	 with lubricating passages, channels, or reservoirs
19/10	with cooling fins
19/12	Roller-type wheels (B60B 19/06 takes precedence)
19/14	Ball-type wheels (B60B 19/06 takes precedence)

B60B

Rims;]	Hubs
---------	------

<u>Rims; Hu</u>	<u>bs</u>
21/00	Rims (non-metallic B60B 5/00; of high resiliency B60B 9/00; capable of carrying more than one tyre B60B 11/04; multiple rims on single wheel body B60B 11/06; of multi-part type B60B 25/00; metal tyres B60C)
21/02 21/04	 characterised by transverse section with substantially-radial flanges (with rail- engaging flanges B60B 17/00)
21/06	 characterised by means for attaching spokes
21/08	characterised by having braking surfaces
21/10 21/12	 characterised by the form of tyre-seat or flange, e.g. corrugated (B60B 21/02 takes precedence) Accessories, e.g. lining bands
21/12	Accessories, e.g. minig bands
23/00	Attaching rim to wheel body (attaching spokes to rim B60B 1/04, B60B 1/14; attaching rims resiliently to wheel body B60B 9/00)
	<u>Note(s)</u>
	Group B60B 23/12 takes precedence over groups B60B 23/02-B60B 23/06.
23/02	 by split or other expansible ring devices
23/04	• by bayonet-joint, screw-thread, or like attachments
23/06	• by screws, bolts, pins, or clips
23/08	• • arranged radially
23/10	• arranged axially
23/12	 by devices arranged to permit variation of axial position of rim relative to wheel body for track- width adjustment
25/00	Rims built-up of several main parts (tools for assembling divided rims B60B 31/04)
25/02	 Segmented rims, e.g. with segments arranged in sections; Connecting equipment, e.g. hinges; Insertable flange rings therefor
25/04	Rims with dismountable flange rings, seat rings, or lock rings
25/06	• • Split flange rings, e.g. transversely split; Connecting equipment for overlapping the slot
25/08	• Continuous flange rings; Arrangement of recesses enabling the flange ring to be slipped over the rim body
25/10	• • Seat rings for the tyre bead part, e.g. split
25/12	• • with integral flange part
25/14	Locking means for flange rings or seat rings
25/16	Arrangement of bayonet catches
25/18	• • • Arrangement of split rings
25/20	• • Arrangement of screw, bolts, or shouldered pins
25/22	• Other accessories, e.g. for sealing the component parts enabling the use of tubeless tyres
27/00	Hubs (non-metallic B60B 5/00; of high resiliency B60B 9/00)
27/02	 adapted to be rotatably arranged on axle
27/04	• • housing driving means, e.g. sprockets
27/06	 adapted to be fixed on axle
<u>Apparatu</u>	<u>is or tools for mounting, holding or assembling wheels</u>
29/00	Apparatus or tools for mounting or dismounting

^{29/00} Apparatus or tools for mounting or dismounting wheels (characterised by the means for holding the wheels B60B 30/00) [5]

30/00	Means for holding wheels or parts thereof (spare wheel stowing, holding or mounting arrangements on vehicles B62D 43/00) [5]				
30/02	 engaging the tyre, e.g. the tyre being mounted on the wheel rim [5] 				
30/04	 the tyre not being mounted on a rim, i.e. holders or supports for tyres alone [5] 				
30/06	 engaging the wheel body, e.g. the rim [5] 				
30/08	 the central part of the wheel body [5] 				
30/10	 characterised by being provided on a dolly [5] 				
31/00	Apparatus or tools for assembling or disassembling				
21/02	wheels				
31/02	• for tightening or straightening wire spokes <u>in situ</u> ; for extracting spokes from wheels				
31/04	for assembling divided rims				
31/06	 for removing or attaching cover discs, hub caps, or the like [2] 				
33/00	Castors in general (castors for large containers B65D 90/18)				
33/02	 with disengageable swivel action 				
33/04	• adjustable				
33/06	mounted retractably				
33/08	Ball castors				
35/00	Axle units; Parts thereof (resilient suspension of a rigid axle or axle housing B60G 9/00; steerable vehicle stub-axles B62D)				
35/02	 Dead axles, i.e. not transmitting torque (axle housings for torque transmitting elements B60B 35/16) 				
35/04	• • straight				
35/06	• • cranked				
35/08	of closed hollow section				
35/10	 adjustable for varying track 				
35/12	Torque-transmitting axles				
35/14	 composite or split, e.g. half-axles; Couplings between axle parts or sections (B60G 3/24 takes precedence) 				
35/16	• characterised by the axle housings for the torque transmitting elements, e.g. for shafts				
35/18	• characterised by the arrangement of the bearings for the torque transmitting elements in the axle housings				
37/00	Wheel-axle combinations, e.g. wheel sets (units comprising multiple wheels arranged side by side B60B 11/00; rail-vehicle axle-boxes B61F)				
37/02	• the wheels being integral with solid axles				
37/04	• the wheels being rigidly attached to solid axles				
37/06	• the wheels being integral with, or rigidly attached to, hollow axles				
37/08	• • the hollow axles being rotatable around fixed axles				
37/10	 the wheels being individually rotatable around the axles 				
37/12	• Axles with a fixed wheel and a loose wheel				
39/00	Increasing wheel adhesion (wheels or wheel				
	attachments designed for increasing traction				
	B60B 15/00; vehicle tyres B60C; non-skid devices				
	temporarily attachable to resilient tyres or resiliently- tyred wheels B60C 27/00; road surface conditioning to				

39/02 • Vehicle fittings for scattering or dispensing material in front of its wheels

B60B

39/04	••	the material being granular, e.g. sand (combined control of sanding apparatus and brakes of rail vehicles B61H)					the dispensing being effected by fluid means the dispensing being controlled electrically or electromagnetically
39/06	• •	 the dispensing being effected by mechanical 	39/12	•	•	t	he material being sheet-like or web-like

B60C VEHICLE TYRES (manufacture, repairing B29); TYRE INFLATION; TYRE CHANGING; CONNECTING VALVES TO INFLATABLE ELASTIC BODIES IN GENERAL; DEVICES OR ARRANGEMENTS RELATED TO TYRES (testing of tyres G01M 17/02) [5]

<u>Note(s)</u>

- 1. In this subclass, the following term is used with the meaning indicated:
 - "tyre" means a separate ground-engaging, continuous element outside the periphery of the wheel rim and includes the tyre casing, cover, or jacket and any insert, e.g. inner tube. In group B60C 29/00, relating to connection of valves, the term "tyre" also includes inflatable elastic bodies other than tyres or inner tubes.
- 2. Attention is drawn to the Note following the title of class B60.

means

Subclass index

TYRES

Characterised by material	
Characterised by transverse section	
General structure	
Parts; reinforcements; treads; walls; beads; other parts	
Particular devices	
MOUNTING, INFLATION	
Inflating devices, pressure or temperature control	
Apparatus or tools	
SUBJECT MATTER NOT PROVIDED FOR IN OTHER GROUPS OF THIS SUBCLASS	

1/00	Tyres characterised by the chemical composition or the physical arrangement or mixture of the composition [4]	5/12	• without separate inflatable inserts, e.g. tubeless tyres with transverse section open to the rim (B60C 5/20 takes precedence) [4]
	Note(s)	5/14	• • with impervious liner or coating on the inner wall of the tyre [4]
	Tyres characterised by the compositions only, i.e. having no significant tyre structure, are classified only with the compositions, e.g. in C08K, C08L.	5/16 5/18	 Sealing means between beads and rims, e.g. bands Sectional casings, e.g. comprising replaceable arcuate parts
3/00	Tyres characterised by transverse section (characterised by rail-engaging elements B60B 17/00) [4]	5/20	 having multiple separate inflatable chambers (with additional tubes which become load supporting in emergence B60C 17/02) [4]
3/02	Closed, e.g. toroidal, tyres [4]	5/22	• • the chambers being annular [4]
3/02	 characterised by the relative dimensions of the section, e.g. low profile (B60C 3/06 takes 	5/24	• • the walls of the chambers extending transversely of the tyre [4]
	precedence) [4]	7/00	Non-inflatable or solid tyres (B60C 1/00 takes
3/06 3/08	asymmetric [4]collapsible into storage or non-use condition, e.g.		precedence; tyres or rims characterised by rail-engaging elements B60B 17/00) [2]
	space-saving spare tyres (run-flat tyres	7/02	 made from ropes or bristles
	B60C 17/08) [4]	7/04	 made of wood or leather
5/00	Inflatable pneumatic tyres or inner tubes (B60C 1/00,	7/06	made of metal
5/00	B60C 9/00-B60C 17/00 take precedence) [4]	7/08	 built-up from a plurality of arcuate parts
5/01	 without substantial cord reinforcement, e.g. cordless tyres, cast tyres [4] 	7/10	 characterised by means for increasing resiliency (highly resilient wheels B60B 9/00)
5/02	 having separate inflatable inserts, e.g. with inner tubes; Means for lubricating, venting, preventing 	7/12	• • using enclosed chambers, e.g. gas-filled (inflatable tyres B60C 5/00) [4]
	relative movement between tyre and inner tube	7/14	• • using springs
	(B60C 5/20 takes precedence) [4]	7/16	• • • of helical or flat coil form
5/04	Shape or construction of inflatable inserts	7/18	• • • • disposed radially relative to wheel axis
	(B60C 5/10 takes precedence) [4]	7/20	• • • disposed circumferentially relative to wheel
5/08	• • • having reinforcing means		axis
5/10	 formed as a single discontinuous ring with contiguous ends which may be connected together [4] 	7/22	• having inlays other than for increasing resiliency, e.g. for armouring

7/74	a characterized by means for accuring types on rim or	11/04
7/24	 characterised by means for securing tyres on rim or wheel body 	11/04
7/26	• using bolts	
7/28	• using straps or the like, e.g. vulcanised into the tyre	11/11
9/00	Reinforcements or ply arrangement of pneumatic tyres (inserts having reinforcing means B60C 5/08; bead structure, e.g. turnup or overlap construction, B60C 15/00; tyre cords <u>per se</u> D02G 3/48; fabrics <u>per se</u>	11/113
	D03D, D04H; metal ropes or cables, <u>per se</u> D07B 1/06) [4]	11/117
	Note(s)	11/12
	When classifying in this group, classification is also made in subclass B32B insofar as any layered product is concerned.	11/13
9/02	Carcasses	11/1/
9/04	• • the reinforcing cords of each carcass ply arranged	11/14 11/16
	in a substantially parallel relationship	11/18
9/06	 the cords extend diagonally from bead to bead and run in opposite directions in each successive carcass ply, i.e. bias angle ply 	
	(B60C 9/07, B60C 9/09 take precedence) [4]	11/20
9/07	• • • the cords curve from bead to bead in plural	11/22 11/24
0 / 00	planes, e.g. S-shaped cords [4]	11/24
9/08	• • • the cords extend transversely from bead to bead, i.e. radial ply (B60C 9/07 takes precedence) [4]	13/00
9/09	• • • combined with other carcass plies having	
	cords extending diagonally from bead to	13/02
	bead, i.e. combined radial ply and bias angle ply [4]	13/04
9/10	• • the reinforcing cords within each carcass ply	
	arranged in a crossing relationship	15/00
9/11	• • • Woven, braided, or knitted plies [4]	15/02
9/12	built-up with rubberised layers of discrete fibres or filaments	
9/13 9/14	 • with two or more differing cord materials [4] • built-up with sheets, webs, or films of 	15/024
5/14	homogeneous material, e.g. synthetics, sheet metal, rubber	15/024 15/028
9/16	• built-up with metallic reinforcing inlays	15/032
9/17	• • asymmetric to the midcircumferential plane of the tyre [4]	15/036
9/18	 Structure or arrangement of belts or breakers, crown- reinforcing or cushioning layers 	15/04
9/20	 built-up from rubberised plies each having all cords arranged substantially parallel 	15/05
9/22	• • • the plies being arranged with all cords disposed along the circumference of the tyre	15/06
9/24	• • built-up of arcuate parts	17/00
9/26	• • Folded plies [4]	
9/28	 characterised by the belt or breaker dimensions or curvature relative to carcass (B60C 9/30 takes precedence) [4] 	17/01
9/30	 asymmetric to the midcircumferential plane of the 	,
5750	tyre [4]	17/02
11 /00		17/04
11/00 11/01	Tyre tread bands; Tread patterns; Anti-skid insertsShape of the shoulders between tread and sidewall,	17/00
11/01	e.g. rounded, stepped, cantilevered (arrangements of	17/06 17/08
	grooves or ribs on the sidewalls B60C 13/02) [4]	1//00
11/02	Replaceable treads	17/10
11/03	Tread patterns [4]	
		19/00

11/04	 in which the raised area of the pattern consists only of continuous circumferential ribs, e.g. zig- zag (B60C 11/12, B60C 11/13 take precedence) [4, 6]
11/11	• • in which the raised area of the pattern consists only of isolated elements, e.g. blocks
11/113	 (B60C 11/12, B60C 11/13 take precedence) [4] in which the raised area of the pattern consists only of projections extending continuously across the tread from one edge to the other [6]
11/117	 formed only by isolated recesses, e.g. grooves, slots or holes (B60C 11/12, B60C 11/13 take precedence) [6]
11/12	• • characterised by the use of narrow slits or incisions, e.g. sipes [4]
11/13	• characterised by the groove cross-section, e.g. for buttressing or preventing stone-trapping [6]
11/14	• Anti-skid inserts, e.g. vulcanised into the tread band
11/16	• • of plug form, e.g. made from metal, textile
11/18	• • or strip form, e.g. metallic combs, rubber strips of different wear resistence (B60C 11/20 takes precedence)
11/20	• • in coiled form
11/22	• Tread rings between dual tyres [4]
11/24	Wear-indicating arrangements [4]
13/00	Tyre sidewalls; Protecting, decorating, marking, or the like, thereof (B60C 17/08 takes precedence; tyre
	shoulders B60C 11/01; removable tyre sidewall trim rings B60B 7/01) [4, 5]
13/02	Arrangement of grooves or ribs [4]
13/04	 having annular inlays or covers, e.g. white sidewalls [4]
15/00	Tyre beads, e.g. ply turn-up or overlap
15/00 15/02	• Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24;
15/02	• Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4]
15/02 15/024	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4]
15/02 15/024 15/028	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4]
15/02 15/024 15/028 15/032	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4]
15/02 15/024 15/028 15/032 15/036	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4]
15/02 15/024 15/028 15/032 15/036 15/04	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4]
15/02 15/024 15/028 15/036 15/04 15/05	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4]
15/02 15/024 15/028 15/032 15/036 15/04	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each
15/02 15/024 15/028 15/036 15/04 15/05	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4]
15/02 15/024 15/028 15/036 15/036 15/04 15/05 15/06	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4] Flipper strips, fillers, or chafing strips Tyres characterised by means enabling restricted operation in damaged or deflated condition; Accessories therefor (having multiple separate
15/02 15/024 15/028 15/032 15/036 15/04 15/05 15/06 17/00	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4] Flipper strips, fillers, or chafing strips Tyres characterised by means enabling restricted operation in damaged or deflated condition; Accessories therefor (having multiple separate inflatable chambers B60C 5/20) utilising additional inflatable supports which become
15/02 15/024 15/032 15/036 15/04 15/05 15/06 17/00 17/01	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] • inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] • multiple, i.e. with two or more cores in each bead [4] Flipper strips, fillers, or chafing strips Tyres characterised by means enabling restricted operation in damaged or deflated condition; Accessories therefor (having multiple separate inflatable chambers B60C 5/20) utilising additional inflatable supports which become load-supporting in emergency [4]
15/02 15/024 15/032 15/036 15/04 15/05 15/06 17/00 17/01 17/01	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4] Flipper strips, fillers, or chafing strips Tyres characterised by means enabling restricted operation in damaged or deflated condition; Accessories therefor (having multiple separate inflatable chambers B60C 5/20) utilising additional inflatable supports which become load-supporting in emergency [4] inflated or expanded in emergency only [4]
15/02 15/024 15/032 15/036 15/04 15/05 15/06 17/00 17/01 17/02 17/04 17/06 17/08	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4] Flipper strips, fillers, or chafing strips Tyres characterised by means enabling restricted operation in damaged or deflated condition; Accessories therefor (having multiple separate inflatable chambers B60C 5/20) utilising additional inflatable supports which become load-supporting in emergency [4] inflated or expanded in emergency only [4] Weans facilitating folding of sidewalls, e.g. run-flat sidewalls (for storage purposes B60C 3/08) [4]
15/02 15/024 15/032 15/036 15/04 15/05 15/06 17/00 17/01 17/02 17/04 17/04	 Seating or securing beads on rims (sealing means between beads and rims of tubeless tyres B60C 5/16; means for securing solid tyres on rims B60C 7/24; rims B60B 21/00) [4] Bead contour, e.g. lips, grooves, or ribs [4] Spacers between beads (emergency load-supporting means B60C 17/00) [4] inflatable [4] Tyres permanently fixed to the rim, e.g. by adhesive, by vulcanisation [4] Bead cores (producing bead-rings or bead-cores for tyres B29D 30/48) [4] multiple, i.e. with two or more cores in each bead [4] Flipper strips, fillers, or chafing strips Tyres characterised by means enabling restricted operation in damaged or deflated condition; Accessories therefor (having multiple separate inflatable chambers B60C 5/20) utilising additional inflatable supports which become load-supporting in emergency [4] inflated or expanded in emergency only [4] utilising additional non-inflatable supports which become load-supporting in emergency resilient [4]

B60C

19/04	• Tyre with openings closeable by means other than the					
	rim; Closing means therefor					
19/08	 Electric-charge-dissipating arrangements 					
19/12	Puncture preventing arrangements (B60C 9/00 takes					
	precedence; inflatable inserts having reinforcing means B60C 5/08) [4]					
	means Bool 3/06) [4]					
23/00	Devices for measuring, signalling, controlling, or					
	distributing tyre pressure or temperature, specially					
	adapted for mounting on vehicles (measuring in general G01, e.g. G01L 17/00; remote signalling in					
	general G08); Arrangement of tyre inflating devices					
	on vehicles, e.g. of pumps, of tanks (air pumps per se					
	F04; tanks <u>per se</u> F17C); Tyre cooling					
	arrangements [3]					
23/02	 Signalling devices actuated by tyre pressure 					
23/04	mounted on the wheel or tyre					
23/06	• Signalling devices actuated by deformation of the					
23/08	tyre (wear-indicating arrangements B60C 11/24)by touching the ground					
23/08	 Arrangement of tyre-inflating pumps mounted on 					
23/10	vehicles					
23/12	 operated by a running wheel 					
23/14	• • operated by the prime mover of the vehicle					
23/16	Arrangement of air tanks mounted on vehicles					
23/18	• Tyre cooling arrangements [3, 4]					
23/19	• • for dissipating heat [4]					
23/20	Devices for measuring or signalling tyre					
	temperature [3]					
25/00	Apparatus or tools adapted for mounting, removing					
	or inspecting tyres (apparatus or tools characterised by					
or inspecting tyres (apparatus or tools characterised by the means for holding wheels or parts thereof						
05/04	B60B 30/00) [5]					
25/01	 for removing tyres from, or mounting tyres on, wheels [5] 					
25/02	 Tyre levers or the like, e.g. hand-held (machine 					
25/02	operated B60C 25/05) [5]					
25/04	• • • pivotal about the wheel axis, or movable along					
	the rim edge, e.g. rollable [5]					
25/05	• • Machines [5]					
25/12	• • • for only seating the beads [5]					
25/122	• • • • acting on the tyre tread [5]					
25/125	• • • for only breaking the beads [5]					
25/128	• • • acting axially on the whole circumference of					
	the bead or side wall [5]					

25/13	•••• acting axially at localised regions of the bead or side wall [5]
25/132	 for removing and mounting tyres (for only seating the beads B60C 25/12; for only breaking the beads B60C 25/125) [5]
25/135	• • • having a tyre support or a tool, movable along wheel axis [5]
25/138	• • • • with rotary motion of tool or tyre support [5]
25/14	 Apparatus or tools for spreading tyre beads (B60C 25/12 takes precedence) [5]
25/15	• • with means for inverting the tyre [5]
25/18	Tools for mounting or demounting air valves
25/20	• Tools for attaching metallic tyres, e.g. iron tyres upon
	wooden rims
27/00	Non-skid devices temporarily attachable to resilient
	tyres or resiliently-tyred wheels
27/02	 extending over restricted arcuate part of tread (B60C 27/20 takes precedence)
27/04	• • the ground-engaging part being rigid
27/06	• extending over the complete circumference of tread,
	e.g. made of chains (B60C 27/20 takes precedence)
27/08	 involving lugs or rings taking up wear
27/10	 having tensioning means
27/12	• • • resilient
27/14	• automatically attachable
27/16	• • formed of close material, e.g. leather
27/18	• • • the material being fabric, e.g. woven wire
27/20	having ground-engaging plate-like elements
27/22	• for tandem tyres (endless-track features B62D)
29/00	Arrangements of tyre-inflating valves to tyres or rims; Accessories for tyre-inflating valves, not otherwise provided for (tools for mounting or
	demounting valves B60C 25/18; valves <u>per se</u> , valve dust caps F16K) [4, 5]
29/02	Connection to rims [4]
29/04	Connection to tyres [4]
29/06	 Accessories for tyre-inflating valves, e.g. housings,
	guards, covers for valve caps, locks, not otherwise provided for [5]
99/00	Subject matter not provided for in other groups of

this subclass [2006.01]

B60D VEHICLE CONNECTIONS (components of brake systems B60T 17/04)

Note(s)

Attention is drawn to the Note following the title of class B60.

1/00	Traction couplings; Hitches; Draw-gear; Towing devices (devices specially adapted for connection between tractors and agricultural machines or implements A01B 59/00; fifth-wheel couplings	 1/07 • Multi-hitch devices, i.e. comprising several hitches of the same or of a different type; Hitch-adaptors, i.e. for converting hitches from one type to another [5]
	B62D) [2]	1/14 • Draw-gear or towing devices characterised by their
1/01	 Traction couplings or hitches characterised by their 	type [4]
	type [5]	1/145 • • consisting of an elongated single bar or tube [5]
1/02	 Bolt or shackle-type couplings [5] 	1/155 • • • comprising telescopic or foldable parts [5]
1/04	 Hook or hook-and-hasp couplings [5] 	1/167 • • consisting of articulated or rigidly assembled bars
1/06	• • Ball-and-socket hitches [5]	or tubes forming a V-, Y- or U-shaped draw gear (B60D 1/173 takes precedence) [5]

1/173	• • consisting of at least two bars which are not connected or articulated to each other [5]	1/52	 removably mounted (B60D 1/56 takes precedence) [5]
1/18	• • Tow ropes, chains, or the like	1/54	• • collapsible or retractable when not in use, e.g.
1/24	 characterised by arrangements for particular functions [5] 		hide-away hitches (B60D 1/52 takes precedence) [5]
1/26	• • for remote control, e.g. for releasing [5]	1/56	• • securing to the vehicle bumper [5]
1/28	• • for preventing unwanted disengagement, e.g.	1/58	Auxiliary devices [5]
	safety appliances [5]	1/60	• • Covers, caps or guards [5]
1/30	• • for sway control [5]	1/62	• • involving supply lines, electric circuits, or the
1/32	• • • involving damping devices [5]		like [5]
1/34	• • • involving springs [5]	1/64	• • • Couplings or joints therefor [5]
1/36	• • for facilitating connection, e.g. hitch catchers [5]	1/66	• • Props [5]
1/38	• • • involving auxiliary cables for drawing the trailer to the tractor before coupling [5]	3/00	Fittings to facilitate pushing (B60D 1/00 takes
1/40	 • involving a temporarily extensible or alignable member (B60D 1/38 takes precedence) [5] 		precedence; vehicle bumpers B60R 19/02; steering arrangements for backing a normally-drawn trailer B62D 13/06)
1/42	 for being adjustable [5] 		B02D 15/00)
1/44	• • • horizontally [5]	5/00	Gangways for coupled vehicles, e.g. of concertina
1/46	• • • vertically [5]		type
1/48	 characterised by the mounting [5] 		
1/50	 resiliently mounted (B60D 1/30 takes precedence) [5] 	99/00	Subject matter not provided for in other groups of this subclass [2009.01]

B60F VEHICLES FOR USE BOTH ON RAIL AND ON ROAD; VEHICLES CAPABLE OF TRAVELLING IN OR ON DIFFERENT MEDIA, e.g. AMPHIBIOUS VEHICLES (air-cushion vehicles B60V)

- 1/00 Vehicles for use both on rail and on road; Conversions therefor
 1/02 • with rail and road wheels on the same axle
 1/04 • with rail and road wheels on different axles
- 3/00 Amphibious vehicles, i.e. vehicles capable of travelling both on land and on water; Land vehicles capable of travelling under water (buoyant wheels B60B)
- 5/00 Other vehicles capable of travelling in or on different media (vehicles having alternatively-usable runners and wheels B62B 13/18; flying-boats or seaplanes B64C 35/00)
- 5/02 convertible into aircraft
- **B60G VEHICLE SUSPENSION ARRANGEMENTS** (air-cushion vehicles B60V; connections between vehicle bodies and vehicle frames B62D 24/00) [5]

Note(s)

Attention is drawn to the Note following the title of class B60.

Subclass index

RIGID SUSPENSION RESILIENT SUSPENSION General structures	1/00
for single wheels; single sets of tandem wheels; pivoted suspension arms and accessories therefor	3/00, 5/00, 7/00
for rigid axle or axle housing for two or more wheels Characterised by arrangement, location, or kind of: springs; vibration-dampers; or combined springs	9/00
and dampers	11/00, 13/00, 15/00
Characterised by adjustment	17/00
SUSPENSIONS WITH MEANS FOR SENSING GROUND UNEVENNESS	23/00
INTERCONNECTED SYSTEMS FOR RESILIENTLY-SUSPENDED WHEELS	21/00
OTHER SUSPENSION ARRANGEMENTS	99/00

1/00	Suspensions with rigid connection between axle and
	frame
1 (00	• .1

1/02 • with continuous axle

1/04 • with divided axle

3/00 Resilient suspensions for a single wheel (pivoted suspension arms <u>per se</u>, attachment thereof to sprung part of the vehicle, buffer means for limiting movement of arms B60G 7/00; characterised by arrangement, location, or type of springs B60G 11/00)

B60G

3/01	• the wheel being mounted for sliding movement, e.g.				
	in or on a vertical guide (camber maintaining means				
	B60G 3/26) [5]				
3/02	 with a single pivoted arm 				
3/04	• • the arm being essentially transverse to the				
	longitudinal axis of the vehicle				
3/06	• • • the arm being rigid				
3/08	• • • the arm forming the axle housing				
3/10	• • • the arm itself being resilient, e.g. leaf spring				
3/12	the arm being essentially parallel to the longitudinal axis of the vahiale				
3/14	longitudinal axis of the vehicle• • the arm being rigid				
3/14	 • • • the arm itself being resilient, e.g. leaf spring 				
3/18	 with two or more pivoted arms, e.g. parallelogram 				
3/20	 • all arms being rigid 				
3/22	 • • a rigid arm forming the axle housing 				
3/24	 • a rigid arm being formed by the live axle 				
3/26	• • • Means for maintaining substantially-constant				
	wheel camber during suspension movement				
3/28	• • at least one of the arms itself being resilient, e.g.				
	leaf spring				
5/00	Resilient suspensions for a set of tandem wheels or				
5/00	axles having interrelated movements				
5/01	 the set being characterised by having more than two 				
	successive axles [5]				
5/02	 mounted on a single pivoted arm 				
5/03	• • the arm itself being resilient, e.g. a leafspring				
	(B60G 5/053 takes precedence) [5]				
5/04	 with two or more pivoted arms, the movements of 				
F/047	which are resiliently interrelated				
5/047	 at least one arm being resilient, e.g. a leafspring (B60G 5/053 takes precedence) [5] 				
5/053	 a leafspring being used as equilibration unit 				
87088	between two axle-supporting units [5]				
5/06	• • the arms turning on a common pivot				
7/00	2				
7/00	voted suspension arms; Accessories thereof (means r maintaining substantially-constant wheel camber				
	during suspension movement B60G 3/26)				
7/02	Attaching arms to sprung part of vehicle				
7/04	Buffer means for limiting movement of arms				
	Desilient suspensions for a visid avia or avia housing				
9/00	Resilient suspensions for a rigid axle or axle housing for two or more wheels				
9/02					
9/02	 the axle or housing being pivotally mounted on the vehicle 				
9/02 9/04	 the axle or housing being pivotally mounted on the vehicle 				
	• the axle or housing being pivotally mounted on the				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle 				
	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) Note(s) 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) Note(s) In this group, the following terms or expressions are 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) Note(s) 				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) Note(s) In this group, the following terms or expressions are used with the meanings indicated:				
9/04	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) Note(s) In this group, the following terms or expressions are used with the meanings indicated:				
9/04 11/00	 the axle or housing being pivotally mounted on the vehicle the axle or housing not being pivotally mounted on the vehicle Resilient suspensions characterised by arrangement, location, or kind of springs (single-wheel suspension by pivoted arm resilient in itself B60G 3/00; adjusting spring characteristic B60G 17/00; springs per se F16F) Note(s) In this group, the following terms or expressions are used with the meanings indicated: "torsion bar" includes torsion tube or the like; "rubber" includes synthetic substitutes of a similar nature.

11/08	• • arranged substantially transverse to the
11/00	longitudinal axis of the vehicle
11/10	• • characterised by means specially adapted for
	attaching the spring to axle or sprung part of the vehicle
11/107	 • • Sliding or rolling mountings [5]
11/10/	 Mountings on the axle (B60G 11/107 takes
11/110	precedence) [5]
11/12	• • • Links, pins, or bushes
11/14	 having helical, spiral, or coil springs only
11/15	• • Coil springs resisting deflection by winding up [5]
11/16	 characterised by means specially adapted for
	attaching the spring to axle or sprung part of the vehicle
11/18	 having torsion-bar springs only
11/20	 characterised by means specially adapted for
	attaching the spring to axle or sprung part of the
	vehicle
11/22	 having rubber springs only
11/23	• • of the torsional-energy-absorption type [5]
11/24	characterised by means specially adapted for
	attaching the spring to axle or sprung part of the vehicle
11/26	 having fluid springs only, e.g. hydropneumatic
11/20	springs (B60G 15/12 takes precedence)
11/27	• • wherein the fluid is a gas [5]
11/28	• • characterised by means specially adapted for
	attaching the spring to axle or sprung part of the
11/20	vehicle
11/30	having pressure fluid accumulator therefor, e.g. accumulator arranged in vehicle frame
11/32	 having springs of different kinds
11/34	 including leaf springs
11/36	 • • and also helical, spiral, or coil springs
11/38	 • • and also rubber springs
11/40	• • • • the rubber springs being attached to the axle
11/42	• • • • the rubber springs being attached to sprung
	part of the vehicle
11/44	• • • and also torsion-bar springs
11/46	• • • and also fluid springs
11/48	not including leaf springs
11/50	• • • having helical, spiral, or coil springs, and also torsion-bar springs
11/52	• • having helical, spiral, or coil springs, and also
	rubber springs
11/54	• • • with rubber springs arranged within helical,
11/50	spiral or coil springs
11/56	• • having helical, spiral or coil springs, and also fluid springs
11/58	• • • arranged coaxially
11/60	• • having both rubber springs and torsion-bar
	springs
11/62	• • having both rubber springs and fluid springs
11/64	• • • having both torsion-bar springs and fluid springs
13/00	Resilient suspensions characterised by arrangement,
	location, or type of vibration-dampers (adjusting damping effect B60G 17/06; vibration-dampers <u>per se</u>
	F16F)
13/02	having dampers dissipating energy, e.g. frictionally
13/04	• • mechanically, e.g. having frictionally-engaging
	springs as damping elements
13/06	• • of fluid type
13/08	• • • hydraulic
13/10	• • • pneumatic

13/12	• • • quasi-fluid, i.e. having powdered medium
13/14	 having dampers accumulating utilisable energy, e.g. compressing air
13/16	 having dynamic absorbers as main damping means, i.e. spring-mass system vibrating out of phase
13/18	combined with energy-absorbing means
15/00	Resilient suspensions characterised by arrangement, location, or type of combined spring and vibration- damper, e.g. telescopic type (combined spring and
	vibration-dampers <u>per se</u> F16F) [5]
15/02	having mechanical spring
15/04	and mechanical damper
15/06	• • and fluid damper
15/07	 the damper being connected to the stub axle and the spring being arranged around the damper [5]
15/08	 having fluid spring
15/10	• and mechanical damper
15/12	• and fluid damper
15/14	• • • the damper being connected to the stub axle and the spring being arranged around the damper [5]
	Resilient suspensions having means for adjusting the spring or vibration-damper characteristics, for regulating the distance between a supporting surface
	and a sprung part of vehicle or for locking suspension during use to meet varying vehicular or surface conditions, e.g. due to speed or load [5]
17/005	 suspension during use to meet varying vehicular or surface conditions, e.g. due to speed or load [5] Suspension locking arrangements [5]
17/005 17/015	 suspension during use to meet varying vehicular or surface conditions, e.g. due to speed or load [5] Suspension locking arrangements [5] the regulating means comprising electric or electronic elements (B60G 17/005 takes

7/16 7/185 7/19 7/20 7/22	 non-foldable (B60J 7/10 takes precedence) Locking arrangements (locks in general E05B) [4] for rigid panels [4] Vehicle storage compartments for roof parts Wind deflectors for open roofs 	11/00	Removable external protective coverings specially adapted for vehicles or parts of vehicles, e.g. parking covers (covering of load on vehicles B60P 7/00; guard strips for body finishing, identifying or decorating B60R 13/04; tents for use as garages E04H 15/00) [1, 2006.01]
9/00	Devices not provided for in one of main groups B60J 1/00-B60J 7/00 (B60J 10/00 takes precedence) [3, 5]		Note(s) [2006.01] In groups B60J 11/02-B60J 11/06, the first place priority rule is applied, i.e. at each hierarchical level,
9/02	• Entrance or exit closures other than windows, doors, or in roofs, e.g. emergency escape closures in vehicle bottom	11/02 11/04	 classification is made in the first appropriate place. Covers wound on rollers [2006.01] for covering at least the roof of the vehicle, e.g. for
9/04	Air curtains (in general F24F)		covering the whole vehicle [2006.01]
10/00 10/02 10/04 10/06 10/08	 Sealing arrangements (sealings in general F16J 15/00) [5] for windows or windscreens [5] for sliding window panes, e.g. sash guides [5] for flush-glass windows [5] for doors [5] 	11/06	 for covering only specific parts of the vehicle, e.g. for doors (covers or guards for traction couplings, hitches, draw-gear or towing devices B60D 1/60; guards for wheels, radiators or bumpers B60R 19/00) [2006.01] for windows or windscreens (antiglare equipment
10/08 10/10 10/12	 for non-fixed roofs [5] for movable panels in roofs [5] 	11/10	 B60J 3/00) [2006.01] for wheels (hub caps or the like B60B 7/00; external spare wheel stowing, holding or mounting arrangements B62D 43/02) [2006.01]

B60K ARRANGEMENT OR MOUNTING OF PROPULSION UNITS OR OF TRANSMISSIONS IN VEHICLES; ARRANGEMENT OR MOUNTING OF PLURAL DIVERSE PRIME-MOVERS; AUXILIARY DRIVES; INSTRUMENTATION OR DASHBOARDS FOR VEHICLES; ARRANGEMENTS IN CONNECTION WITH COOLING, AIR INTAKE, GAS EXHAUST, OR FUEL SUPPLY, OF PROPULSION UNITS, IN VEHICLES [1, 2006.01]

<u>Note(s)</u>

2.

1. In this subclass, the following terms or expressions are used with the meanings indicated:

- "auxiliary drives" means drives of auxiliary or external machines or devices from the propulsion unit, transmission, or other parts of the vehicle, and includes the control of such drives;
- "transmission" means all propulsion parts linking propulsion units, e.g. engines, to ultimate propulsive elements, e.g. wheels.
- Attention is drawn to the Note following the title of class B60.

Subclass index

ARRANGEMENTS OF PROPULSION UNITS	
Electric; steam or gas; internal-combustion or jet-propulsion; plural diverse prime-movers	
Motor incorporated in, or adjacent to, traction wheel	7/00
Other kinds	
Arrangements of control devices	26/00
Safety devices	28/00
ARRANGEMENT OF TRANSMISSIONS OR OF THEIR CONTROL DEVICES	17/00, 23/00
ARRANGEMENT OF CHANGE-SPEED GEARING CONTROL DEVICES	20/00
ARRANGEMENT IN CONNECTION WITH COOLING, AIR INTAKE, GAS EXHAUST, OR FUEL	
SUPPLY, OF PROPULSION UNITS	11/00, 13/00, 15/00
ARRANGEMENTS IN CONNECTION WITH POWER SUPPLY FROM FORCE OF NATURE	16/00
AUXILIARY DRIVES	25/00
KINDS OF CONTROL	
Fittings for automatically controlling vehicle speed	31/00
INSTRUMENTATION, DASHBOARDS	35/00, 37/00

Arrangement or mounting of propulsion units in vehicles [2]

- 1/00 Arrangement or mounting of electrical propulsion units (B60K 7/00 takes precedence; arrangement or mounting of plural diverse prime-movers for mutual or common propulsion B60K 6/00; electric transmission arrangements B60K 17/12; electric equipment or propulsion of electrically-propelled vehicles <u>per se</u> B60L; current-collectors for power supply lines of electrically-propelled vehicles B60L 5/00) [5]
- 1/02 comprising more than one electric motor
- 1/04 of the electric storage means for propulsion (for auxiliary purposes only B60R 16/04; supplying batteries to, or removing batteries from, vehicles B60S 5/06) [6]
- 3/00 Arrangement or mounting of steam or gaseouspressure propulsion units (B60K 7/00 takes precedence; arrangement or mounting of plural diverse prime-movers for mutual or common propulsion B60K 6/00; gaseous-pressure transmission arrangements B60K 17/10) [5]
- 3/02 of piston type
- 3/04 of turbine type
- 5/00 Arrangement or mounting of internal-combustion or jet-propulsion units (B60K 7/00 takes precedence; arrangement or mounting of plural diverse primemovers for mutual or common propulsion B60K 6/00) [5]
- 5/02 with the engine main axis, e.g. crankshaft axis, substantially in, or parallel to, the longitudinal centre line of the vehicle
- 5/04 with the engine main axis, e.g. crankshaft axis, transversely to the longitudinal centre line of the vehicle
- 5/06 • with the engine main axis substantially vertical
- 5/08 comprising more than one engine
- 5/10 providing for ready detachment of engine
- 5/12 Arrangement of engine supports
- 6/00 Arrangement or mounting of plural diverse primemovers for mutual or common propulsion, e.g. hybrid propulsion systems comprising electric motors and internal combustion engines [5, 2007.10]

Note(s) [2007.10]

In this group, the following expressions are used, with the meaning indicated:

- "prime-mover" means a propulsion unit or source of motive power providing a mechanical output, e.g. via a rotating shaft;
- "hybrid electric vehicle" [HEV] means a vehicle having an electric prime-mover and a combustion engine, in which the electrical prime-mover and the combustion engine either singly or in combination, drive the ultimate propulsive elements, e.g. wheels;
- "energy storing means" means apparatus for storing propulsive energy and providing stored energy to drive the prime-mover or the ultimate propulsive elements, e.g. wheels;
- "motor-generator" means an electric machine, such as a motor or a generator, or a mechanical combination thereof, which can provide positive mechanical output force or torque and which can function at other times as an electric generator.

- 6/08 Prime-movers comprising combustion engines and mechanical or fluid energy storing means **[5]**
- 6/10 by means of a chargeable mechanical accumulator, e.g. flywheel [5]
- 6/12 • by means of a chargeable fluidic accumulator [5]

6/20 • the prime-movers consisting of electric motors and internal combustion engines, e.g. HEVs [2007.10]

<u>Note(s)</u>

	11	010	:(5)

7/00 Disposition of motor in, or adjacent to, traction wheel (roller-skate driving mechanisms A63C 17/12) 8/00 Arrangement or mounting of propulsion units not provided for in one of main groups B60K 1/00-B60K 7/00 [5]

<u>Arrangements in connection with cooling, air intake, gas</u> <u>exhaust, fuel supply, or power supply of propulsion units in</u> <u>vehicles</u>

11/00	Arrangement in connection with cooling of propulsion units (heating the interior space B60H;		
	cooling internal combustion engines per se F01P)		
11/02	 with liquid cooling 		
11/04	 Arrangement or mounting of radiators, radiator 		
	shutters, or radiator blinds		
11/06	• with air cooling		
11/08	• Air inlets for cooling; Shutters or blinds therefor		
13/00	Arrangement in connection with combustion air intake or gas exhaust of propulsion units (extensions for melting snow or ice on roads or like surfaces E01H 5/00, E01H 6/00; forming part of the engine F01N; supplying combustion engines with combustible mixtures or constituents F02M)		
13/02	concerning intake		
13/04	 concerning exhaust (exhaust silencers for internal- combustion engines <u>per se</u> F01N) 		
13/06	• using structural parts of the vehicle as ducts, e.g. frame parts		
15/00	Arrangement in connection with fuel supply of combustion engines; Mounting or construction of fuel tanks (tanks in general B65D, F17C; supplying combustion engines with combustible mixtures or constituents F02M) [5]		
15/01	Arrangement of fuel conduits (chassis frame forming		
13/01	fluid conduit means B62D 21/17) [5]		
15/03	 Fuel tanks (chassis frame comprising fluid storage compartment B62D 21/16) [5] 		
15/035	 characterised by venting means [5] 		
15/04	 Tank inlets (B60K 15/077 takes precedence) [5] 		
15/05	• • • Inlet covers [5]		
15/06	• • characterised by fuel reserve systems [5]		
15/063	Arrangement of tanks [5]		
15/067	• • • Mounting of tanks [5]		
15/07	• • • • of gas tanks [5]		
15/073	 Tank construction specially adapted to the vehicle (B60K 15/077 takes precedence) [5] 		
15/077	• • with means modifying or controlling distribution or motion of fuel, e.g. to prevent noise, surge, splash or fuel starvation [5]		
15/10	 concerning gas-producing plants (gas-producing plants per se C10J) 		
16/00	Arrangements in connection with power supply from force of nature, e.g. sun, wind (electric propulsion with power supply from force of nature, e.g. sun, wind, B60L 8/00; effecting propulsion by wind motors driving water-engaging propulsive elements B63H 13/00) [5]		

water-engaging propulsive elements B63H 13/00) [5]

<u>Arrangement or mounting of transmissions or their control in</u> <u>vehicles</u>

17/00	Arrangement or mounting of transmissions in vehicles (torque-transmitting axles B60B 35/12; combined transmission and steering gear for steering		
	non-deflectable wheels B62D 11/00; clutches <u>per se</u> , e.g		
	construction thereof, F16D; gearing <u>per se</u> , e.g. construction thereof, F16H) [2]		
17/02	 characterised by arrangement, location, or kind of 		
	clutch		
17/04	 characterised by arrangement, location, or kind of gearing (electric equipment or propulsion of electrically-propelled vehicles B60L) 		
17/06	of change-speed gearing (B60K 17/10- B60K 17/16 take precedence) [2]		
17/08	• • • of mechanical type		
17/10	• • of fluid gearing (of fluid clutches B60K 17/02)		
17/12	 of electric gearing (of electrically-actuated clutches B60K 17/02) 		
17/14	 the motor of fluid or electric gearing being 		
1,,11	disposed in, or adjacent to, traction wheel (B60K 7/00, B60K 17/356 take precedence) [4]		
17/16	 of differential gearing 		
17/22	 characterised by arrangement, location, or type of 		
	main drive shafting, e.g. cardan shaft		
17/24	Arrangement of mountings for shafting		
17/26	 characterised by arrangement, location, or type of freewheel device 		
17/28	 characterised by arrangement, location, or type of power take-off 		
17/30	• the ultimate propulsive elements, e.g. ground wheels,		
17/32	being steerable [4]the ultimate propulsive elements, e.g. ground wheels,		
	being rockable about a horizontal pivot		
17/34	 for driving both front and rear wheels, e.g. four wheel drive vehicles (arrangement or mounting of control devices for changing number of driven wheels B60K 23/08) 		
17/342	 having a longitudinal, endless element, e.g. belt or chain, for transmitting drive to wheels [4] 		
17/344	_		
17/344	 • • • the transfer gear being a differential gear [4] 		
17/348	 having differential means for driving one set of 		
177540	wheels, e.g. the front, at one speed and the other set, e.g. the rear, at a different speeds (B60K 17/346 takes precedence) [4]		
17/35	 including arrangements for suppressing or 		
1,,00	influencing the power transfer, e.g. viscous clutches (differential gearing with locking devices F16H 48/20) [4, 6]		
17/354	 having separate mechanical assemblies for transmitting drive to the front or to the rear wheels 		
	or set of wheels [4]		
17/356	• • having fluid or electric motor, for driving one or		
	more wheels (disposition of motor in, or adjacent to, traction wheel B60K 7/00) [4]		
17/36	for driving tandem wheels		
20/00	Arrangement or mounting of change-speed gearing control devices in vehicles (movable cabs having special adaptations of vehicle control devices		
20/02	 B62D 33/073; such control devices <u>per se</u> F16H) [2, 5] of initiating means (control mechanisms in general 		
	G05G) [2]		
20/04	• • floor-mounted [2]		
20/06	• • mounted on steering column or the like [2]		
20/08	• • dashboard-mounted [2]		

20/08 • • dashboard-mounted [2]

23/00	Arrangement or mounting of control devices for vehicle transmissions, or parts thereof, not otherwise provided for (combined transmission and steering gear for steering non-deflectable wheels B62D 11/00; movable cabs having special adaptations of vehicle control devices B62D 33/073; such control devices <u>per</u> <u>se</u> F16D, F16H) [2, 5]	
23/02	 for main transmission clutches 	
23/04	 for differential gearing 	
23/06	for freewheel devices	
23/08	 for changing number of driven wheels 	
-		
25/00	Auxiliary drives (B60K 16/00 takes precedence; arrangement of tyre-inflating pumps mounted on vehicles B60C 23/10; driving engine auxiliaries F02B) [5]	
25/02	 directly from an engine shaft 	
25/04	 from static or dynamic pressure or vacuum, developed by the engine 	
25/06	• from the transmission power take-off (transmissions	
25/08	having power take-off B60K 17/28)from a ground wheel, e.g. engaging the wheel tread	
∠3/00	 from a ground wheel, e.g. engaging the wheel tread or rim 	
25/10	 directly from oscillating movements due to vehicle running motion, e.g. suspension movement (resilient suspensions having dampers accumulating utilisable energy, e.g. compressing air, B60G 13/14) [5] 	
26/00 26/02	Arrangement or mounting of propulsion-unit control devices in vehicles (movable cabs having special adaptations of vehicle control devices B62D 33/073) [2, 5]	
	• of initiating means or elements [2]	
26/04	 of means connecting initiating means or elements to propulsion unit [2] 	
28/00	Safety devices for propulsion-unit control, specially adapted for, or arranged in, vehicles, e.g. preventing fuel supply or ignition in the event of potentially dangerous conditions (for electrically-propelled vehicles B60L 3/00; road vehicle drive control systems for purposes not related to the control of a particular sub-unit B60W 30/00) [2, 2006.01]	
28/02	 responsive to conditions relating to the driver [4] 	
28/04	 responsive to presence or absence of the driver, e.g. to weight or lack thereof [4] 	
28/06	• • responsive to incapacity of driver [4]	
28/08	 responsive to conditions relating to the cargo, e.g. overload [4] 	
28/10	 responsive to conditions relating to the vehicle [4] 	
28/12	• responsive to conditions relating to doors or doors	
28/14	 locks, e.g. open door [4] responsive to accident or emergency, e.g. deceleration, tilt of vehicle [4] 	
28/16	 responsive to, or preventing, spinning or skidding of wheels (brake control systems for vehicle drive stability B60T 8/1755; arrangements responsive to a speed condition for adjusting wheel braking force B60T 8/32; control of vehicle driving stability otherwise than by controlling the propulsion unit only B60W 30/02; preventing wheel slippage by reducing power in rail vehicles B61C 15/12) [4, 2006.01] 	<u>-</u>

31/00 Vehicle fittings, acting on a single sub-unit only, for automatically controlling vehicle speed, i.e. preventing speed from exceeding an arbitrarily established velocity or maintaining speed at a particular velocity, as selected by the vehicle operator (fittings acting on two or more sub-units B60W 30/14; propulsion-unit control in general, <u>see</u> the relevant classes or subclasses, e.g. F02D; speedometers G01P; systems or devices for controlling speed in general G05D 13/00) [2, 2006.01]

<u>Note(s)</u>

In this group:

the means ordinarily includes a device, e.g. a servomechanism, for operating a velocityaffecting element of the vehicle, e.g. the throttle;

- a means for preventing a vehicle from exceeding a particular speed is often referred to as a "governor", whereas a means for maintaining the vehicle within a relatively narrow speed range is generally designated as "speed control". Since these two functions are frequently interrelated, no attempt has been made to identify such means as being particularly adapted to perform only one, or the other of the functions.
- 31/02 including electrically actuated servomechanism [4]
- 31/04 and means for comparing one electrical quantity, e.g. voltage, pulse, waveform, flux, or the like, with another quantity of a like kind, which comparison means is involved in the development of an electrical signal which is fed into the controlling means [4]
- 31/06 including fluid pressure actuated servomechanism [4]
- 31/08 • and one or more electrical components for establishing or regulating input pressure **[4]**
- 31/10 and means for comparing one electrical quantity, e.g. voltage, pulse, waveform, flux, or the like, with another quantity of a like kind, which comparison means is involved in the development of a pressure which is fed into the controlling means [4]
- 31/12 including a device responsive to centrifugal force [4]

<u>Note(s)</u>

- This subgroup <u>covers</u> also, for example, the pendulum of a curve compensator, i.e. a refinement to the regulating means for automatically adjusting the "set" speed of the means to changes in the course of the roadway along which the vehicle is travelling.
- In this subgroup, rotating weights driven at a speed proportional to that of the vehicle's motor presently predominate.
- 31/14 having an electrical switch which is caused to function by the centrifugal force **[4]**
- 31/16 having means to prevent or discourage unauthorised use or adjusting of the controlling means [4]
- 31/18 including a device to audibly, visibly, or otherwise signal the existence of unusual or unintended speed [4]

Arrangement or adaptations of instruments specially for vehicles; Dashboards

35/00 Arrangement or adaptations of instruments (arrangements on dashboard B60K 37/02)

37/00	Dashboards (as road-vehicle superstructure sub-unit
	B62D)

- Arrangement of fittings on dashboard (of instruments B60K 37/02)
- 37/02 Arrangement of instruments (arrangement of lighting devices for dashboards B60Q 3/04)
- 37/06 of controls, e.g. control knobs
- B60L PROPULSION OF ELECTRICALLY-PROPELLED VEHICLES (arrangements or mounting of electrical propulsion units or of plural diverse prime-movers for mutual or common propulsion in vehicles B60K 1/00, B60K 6/20; arrangements or mounting of electrical gearing in vehicles B60K 17/12, B60K 17/14; preventing wheel slip by reducing power in rail vehicles B61C 15/08; dynamo-electric machines H02K; control or regulation of electric motors H02P); SUPPLYING ELECTRIC POWER FOR AUXILIARY EQUIPMENT OF ELECTRICALLY-PROPELLED VEHICLES (electric coupling devices combined with mechanical couplings of vehicles B60D 1/64; electric heating for vehicles B60H 1/00); ELECTRODYNAMIC BRAKE SYSTEMS FOR VEHICLES IN GENERAL (control or regulation of electric motors H02P); MAGNETIC SUSPENSION OR LEVITATION FOR VEHICLES; MONITORING OPERATING VARIABLES OF ELECTRICALLY-PROPELLED VEHICLES [4]

Subclass index

ELECTRIC PROPULSION With external or internal supply	8/00-11/00
For monorail vehicles, suspension vehicles or rack railways; Magnetic suspension or levitation for	
vehicles	13/00
Control	15/00
CURRENT-COLLECTORS	5/00
ELECTRIC SUPPLY TO AUXILIARY EQUIPMENT	1/00
SAFETY ARRANGEMENTS	
ELECTRODYNAMIC BRAKING	7/00

1/00	Supplying electric power to auxiliary equipment of	5/16	• • Devices for lifting and resetting the collector
	electrically-propelled vehicles (arrangement of signalling or lighting devices, the mounting or	E /10	(B60L 5/34 takes precedence)
	supporting thereof or circuits therefor, for vehicles in	5/18	• using bow-type collectors in contact with trolley wire
	general B60Q) [6]	5/19	using arrangements for effecting collector movement transverse to the direction of vehicle
1/02	 to electric heating circuits 		motion [3]
1/04	 • fed by the power supply line 	5/20	 Details of contact bow
1/06	 • • using only one supply 	5/20	 Supporting means for the contact bow
1/08	 • • • Methods or devices for control or regulation 	5/22	 • • Pantographs
1/10	 • with provision for using different supplies 	5/24 5/26	0 1
1/10	• • • • Methods or devices for control or regulation	5/26	Half-pantographs, e.g. using counter-rocking beams
1/12	 to electric lighting circuits 	5/28	• • • Devices for lifting and resetting the collector
1/14	 fed by the power supply line 	5/20	• • • • Using springs
1/10	• • Ted by the power supply line	5/30	
3/00	Electric devices on electrically-propelled vehicles for		• • • using fluid pressure
5,00	safety purposes; Monitoring operating variables, e.g.	5/34	 with devices to enable one vehicle to pass another one using the same power supply line
	speed, deceleration, power consumption	F /DC	
3/02	Dead-man's devices	5/36	• with means for collecting current simultaneously from more than one conductor, e.g. from more than
3/04	• Cutting-off the power supply under fault conditions		one phase
3/06	Limiting the traction current under mechanical-	5/38	 for collecting current from conductor rails
	overload conditions	5/50	(B60L 5/40 takes precedence)
3/08	 Means for preventing excessive speed of the vehicle 	5/39	 • from third rail [3]
3/10	 Indicating wheel slip 	5/40	 for collecting current from lines in slotted conduits
3/12	Recording operating variables	5/42	 for collecting current from individual contact pieces
		0, 12	connected to the power supply line
5/00	Current-collectors for power supply lines of		1 11 5
	electrically-propelled vehicles	7/00	Electrodynamic brake systems for vehicles in
5/02	 with ice-removing device 		general [4]
5/04	 using rollers or sliding shoes in contact with trolley 	7/02	 Dynamic electric resistor braking (B60L 7/22 takes
	wire (B60L 5/40 takes precedence)		precedence)
5/06	Structure of the rollers or their carrying means	7/04	 for vehicles propelled by dc motors
5/08	Structure of the sliding shoes or their carrying	7/06	 for vehicles propelled by ac motors
	means	7/08	 Controlling the braking effect (B60L 7/04,
5/10	Devices preventing the collector from jumping off		B60L 7/06 take precedence)
5/12	Structural features of poles or their bases	7/10	Dynamic electric regenerative braking (B60L 7/22
5/14	• • • Devices for automatic lowering of a jumped-off		takes precedence)
	collector	7/12	 for vehicles propelled by dc motors

B60L

7/14	 for vehicles propelled by ac motors
7/16	 for vehicles comprising converters between the power source and the motor
7/18	 Controlling the braking effect (B60L 7/12, B60L 7/14, B60L 7/16 take precedence)
7/20	 Braking by supplying regenerated power to the prime mover of vehicles comprising engine-driven generators
7/22	 Dynamic electric resistor braking, combined with dynamic electric regenerative braking
7/24	 with additional mechanical or electromagnetic braking
7/26	 Controlling the braking effect
7/28	Eddy-current braking
8/00	Electric propulsion with power supply from force of nature, e.g. sun, wind [5]
9/00	Electric propulsion with power supply external to vehicle (B60L 8/00, B60L 13/00 take precedence) [5, 6]
9/02	using dc motors
9/04	fed from dc supply lines
9/06	• • • with conversion by metadyne
9/08	fed from ac supply lines
9/10	• • • with rotary converters
9/12	• • • with static converters
9/14	• • fed from different kinds of power supply lines
9/16	 using ac induction motors
9/18	fed from dc supply lines
9/20	• • • single-phase motors
9/22	• • • polyphase motors
9/24	fed from ac supply lines
9/26	• • • single-phase motors
9/28	• • polyphase motors
9/30	• • fed from different kinds of power supply lines
9/32	using ac brush-displacement motors
11/00	Electric propulsion with power supplied within the vehicle (B60L 8/00, B60L 13/00 take precedence;
	arrangements or mounting of prime-movers consisting
	of electric motors and internal combustion engines
11 (00	for mutual or common propulsion B60K 6/20) [5, 6, 2006.01]
11/02	 using engine-driven generators using dc generators and motors
11/04	0 0
11/06 11/08	using ac generators and dc motorsusing ac generators and motors
11/00	 using ac generators and motors using dc generators and ac motors
11/10	 with additional electric power supply, e.g.
	accumulator
11/14	• • with provision for direct mechanical propulsion
11/16	• using power stored mechanically, e.g. in flywheel
11/18	 using power supplied from primary cells, secondary cells, or fuel cells
13/00	Electric propulsion for monorail vehicles, suspension

vehicles or rack railways; Magnetic suspension or levitation for vehicles [4, 6]

13/03	•	Electric propulsion by linear motors [6]
13/04	•	Magnetic suspension or levitation for vehicles [4]
13/06	•	Means to sense or control vehicle position or
		attitude with respect to railway [4]
13/08	•	• • for the lateral position [4]
13/10	•	Combination of electric propulsion and magnetic suspension or levitation [4]
15/00	pi th pe el fr ve	lethods, circuits or devices for controlling the ropulsion of electrically-propelled vehicles, e.g. eer traction-motor speed, to achieve a desired erformance; Adaptation of control equipment on ectrically-propelled vehicles for remote actuation om a stationary place, from alternative parts of the chicle or from alternative vehicles of the same which train
15/02	•	characterised by the form of the current used in the control circuit
15/04	•	 using dc
15/06	•	 using substantially-sinusoidal ac
15/08	•	 using pulses
15/10	•	for automatic control superimposed on human control to limit the acceleration of the vehicle, e.g. to prevent excessive motor current (electric devices for safety purposes B60L 3/00)
15/12	•	• with circuits controlled by relays or contactors
15/14	•	• with main controller driven by a servomotor (B60L 15/18 takes precedence)
15/16	•	• with main controller driven through a ratchet mechanism (B60L 15/18 takes precedence)
15/18	•	• without contact-making and breaking, e.g. using a transductor
15/20	•	for control of the vehicle or its driving motor to achieve a desired performance, e.g. speed, torque, programmed variation of speed
15/22	•	• with sequential operation of interdependent switches, e.g. relays, contactors, programme drum
15/24	•	• with main controller driven by a servomotor (B60L 15/28 takes precedence)
15/26	•	• with main controller driven through a ratchet mechanism (B60L 15/28 takes precedence)
15/28	•	• without contact-making and breaking, e.g. using a transductor
15/30	•	• with means to change-over to human control
15/32	•	Control or regulation of multiple-unit electrically- propelled vehicles
15/34	•	 with human control of a setting device
15/36	•	• • with automatic control superimposed, e.g. to prevent excessive motor current
15/38	•	with automatic control
15/40	•	Adaptation of control equipment on vehicle for remote actuation from a stationary place (devices along the route for controlling devices on rail vehicles B61L 3/00; central rail-traffic control systems B61L 27/00)
15/42	•	Adaptation of control equipment on vehicle for actuation from alternative parts of the vehicle or from alternative vehicles of the same vehicle train (B60L 15/32 takes precedence)

B60M POWER SUPPLY LINES, OR DEVICES ALONG RAILS, FOR ELECTRICALLY-PROPELLED VEHICLES (control of points or safety arrangements along railway lines B61L; construction of rails or points in general E01B)

1/26

1/28

1/30

Note(s)

This subclass covers:

- overhead, overground, or underground power-supply lines; their crossings and points, erection and supervision;
- devices along rails and rail joints, for current-conduction and for insulation;
- safety devices along the route against earth currents and inductive interference with nearby communication lines.

1/00	Power supply lines for contact with collector on vehicle (collectors therefor B60L 5/00)
1/02	• Details
1/04	 Mechanical protection of line; Protection against contact by living beings
1/06	 Arrangements along the power lines for reducing interference in nearby communication lines (in general H04B 15/02)
1/08	 Arrangements for energising and de-energising power line sections using mechanical actuation by the passing vehicle
1/10	 Arrangements for energising and de-energising power line sections using magnetic actuation by the passing vehicle
1/12	 Trolley lines; Accessories therefor
1/13	Trolley wires
1/14	Crossings; Points
1/16	 Suspension insulators (in general H01B)
1/18	Section insulators; Section switches
1/20	• Arrangements for supporting or suspending trolley wires, e.g. from buildings
1/22	 Separate lines from which power lines are suspended, e.g. catenary lines, supporting-lines under tension
1/225	 Arrangements for fixing trolley wires to supporting-lines which are under tension
1/23	• • Arrangements for suspending trolley wires from catenary line
1/234	 incorporating yielding means or damping means (supporting wires B60M 1/22)
1/24	• • • Clamps; Splicers; Anchor tips

- • Compensation means for variation in length
- Manufacturing or repairing trolley lines (scaffold cars B60P, B61D 15/00; platforms therefor B66F 11/04; manufacturing conductors in general H01B 13/00; overhead lines in general H02G 1/00)
 Power rails
- 1/32 Crossings; Points (B60M 1/34 takes precedence)
- 1/34 • in slotted conduits
- 1/36 Single contact pieces along the line for power supply
- 3/00 Feeding power to the supply lines in contact with collector on vehicles; Arrangements for consuming regenerative power (controlling rail vehicles by varying voltage of power fed to vehicle B60L; power distribution in general H02J)
- 3/02 with means for maintaining voltage within a predetermined range (in general G05F)
- 3/04 Arrangements for cutting-in and -out of individual track sections (by passage of the vehicle B60M 1/10)
- 3/06 Arrangements for consuming regenerative power
- 5/00 Arrangements along running rails or at joints thereof for current-conduction or insulation, e.g. safety devices for reducing earth currents (insulating rail joints E01B 11/54; conductive connections between rails in general H01R 4/00, e.g. H01R 4/64)
- 5/02 Means for reducing potential difference between rail and adjacent ground
- 7/00 Power lines or rails specially adapted for electricallypropelled vehicles of special types, e.g. suspension tramway, ropeway, underground railway

B60N VEHICLE PASSENGER ACCOMMODATION NOT OTHERWISE PROVIDED FOR (furniture construction A47)

<u>Note(s)</u>

Attention is drawn to the Note following the title of class B60.

2/00	Seats specially adapted for vehicles; Arrangement or mounting of seats in vehicles (for facilitating access of patients or disabled persons to, or exit from, vehicles A61G 3/02; railway seats B61D 33/00; cycle seats B62J 1/00; aircraft seats B64D 11/06, B64D 25/04,
	B64D 25/10) [5]
2/005	• Arrangement or mounting of seats in vehicles (B60N 2/02 takes precedence) [7]
2/01	• • Arrangement of seats relative to one another [7]
2/015	• • Attaching seats directly to vehicle chassis [7]
2/02	• the seat or part thereof being movable, e.g. adjustable (adjustable arm-rests B60N 2/46; adjustable head-rest B60N 2/48) [5]
2/04	 the whole seat being movable [5]
2/06	• • • slidable (B60N 2/12 takes precedence) [5]

2/07• Slide construction [7] • • • • roller-less [7] 2/075• • • characterised by the locking device [5] 2/08• • • tiltable (B60N 2/12 takes precedence) [5] 2/102/12• • • slidable and tiltable [5] 2/14• rotatable, e.g. to permit easy access (B60N 2/10 takes precedence) [5] 2/16• • • height-adjustable [5] 2/18• the front or the rear portion of the seat being ٠ adjustable, e.g. independently of each other [5] the back-rest being tiltable, e.g. to permit easy 2/20 • • access (B60N 2/04, B60N 2/22 take precedence) [5]

B60N

2/22	• • the back-rest being adjustable [5]	2/56	• • Heating or ventilating devices [7]

B60P VEHICLES ADAPTED FOR LOAD TRANSPORTATION OR TO TRANSPORT, TO CARRY, OR TO COMPRISE SPECIAL LOADS OR OBJECTS (vehicles with special provisions for transporting patients or disabled persons, or their personal conveyances A61G 3/00)

<u>Note(s)</u>

Attention is drawn to the Note following the title of class B60.

1/00	Vehicles predominantly for transporting loads and	1/16 • • actuated by fluid-operated mechanisms
	modified to facilitate loading, consolidating the load,	1/18 • • • with relative displacement of the wheel axles
	or unloading (vehicles for carrying harvested crops with means for self-loading or self-unloading	1/20 • • • with toothed gears, wheels, or sectors; with links, cams and rollers, or the like
	A01D 90/00; peculiar to refuse-collecting-vehicles B65F; loading or unloading vehicles by means not	 1/22 • with cables, chains, or the like 1/24 • using the weight of the load
1/02	 incorporated therein B65G) with parallel up-and-down movement of load supporting or containing element (in combination 	1/26 • Means for controlling movement of tailboards or sideboards [5]
	with tipping B60P 1/34; devices for lifting or lowering bulky or heavy goods for loading or unloading purposes, movable on wheels or the like,	 1/267 • • • Controlling degree of tailboard or sideboard movement in dependence upon degree of tipping movement, e.g. by linkage or cam [5]
1/04	 e.g. fork-lift trucks, B66F 9/06) with a tipping movement of load supporting or containing element (dredges or soil-shifting machines 	 1/273 • • • Providing interdependence between tipping movement and the latching or unlatching of a freely-swingable tailboard or sideboard [5]
	E02F 3/00)	1/28 • • Tipping-body constructions
1/06	• • actuated by mechanical gearing only	1/30 • • in combination with another movement of the
1/08	• • • with relative displacement of the wheel axles	element
1/10	• • • with screw and nut	1/32 • • • the other movement being lateral displacement
1/12	• • • with toothed gears, wheels, or sectors; with links, cams and rollers, or the like	1/34 • • • the other movement being raising or lowering1/36 • using endless chains or belts thereon
1/14	• • • with cables, chains, or the like	

1/38	• • forming the main load supporting or containing
	element or part thereof
1/40	 using screw conveyors thereon
1/42	 mounted on the load supporting or containing element
1/43	 using a loading ramp mounted on the vehicle (loading ramps <u>per se</u> B65G 69/28) [5]
1/44	• having a loading platform thereon raising the load to the level of the load supporting or containing element
1/46	 carried in vertical guides
1/48	• using pivoted arms raisable above the load supporting or containing element (load-engaging elements B66)
1/50	• • loading from in front of the vehicle
1/52	 using rollers in the load supporting or containing element
1/54	 using cranes for self-loading or self-unloading (vehicles for transporting cranes B60P 3/28; mobile or travelling cranes B66C)
1/56	 the load supporting or containing element having bottom discharging openings
1/58	 using vibratory effect
1/60	 using fluids, e.g. having direct contact between fluid and load [2]
1/62	• • with porous walls
1/64	 the load supporting or containing element being readily removable (caravans, camping, or the like vehicles characterised by living accommodation in the form of a removable body supported by the vehicle unit B60P 3/33, B60P 3/345) [5]
3/00	Vehicles adapted to transport, to carry or to
	comprise special loads or objects (ambulances or other
	vehicles with special provisions for transporting patients
	or disabled persons, or their personal conveyances
	A61G 3/00; hearses A61G 21/00; fire-fighting land

3/12 • for salvaging damaged vehicles

- the object being a workshop for servicing, for maintenance, or for carrying workmen during work (lifting devices for movable platforms or cabins for workmen B66F 11/04)
- 3/16 for carrying mixed concrete, e.g. having rotatable drums
- 3/18 the object being a searchlight
- 3/20 for transporting refrigerated goods (air treatment of goods space B60H)
- 3/22 Tank vehicles (tank aspects B65D 88/00, B65D 90/00, F17C)
- 3/24 • compartmented
- for transporting cranes (vehicles using cranes for selfloading or self-unloading B60P 1/54; mobile or travelling cranes B66C)
- 3/30 Spraying-vehicles (sprinkling-wagons for fertilising liquid A01C 23/00; for destruction of noxious animals, vermin, or unwanted vegetation A01M; for spraying asphalt, bitumen, tar, or the like E01C; for cleaning streets E01H)
- 3/32 comprising living accommodation for people, e.g. caravans, camping, or like vehicles (tents or canopies, in general E04H 15/00)
- 3/325 • the living accommodation being neither expansible nor collapsible nor capable of rearrangement [5]
- 3/33 • characterised by living accommodation in the form of a removable body supported by the vehicle unit [5]
- 3/335 • supported by a trailer-type vehicle or being itself of the trailer-type (B60P 3/33 takes precedence) [5]
- 3/34 the living accommodation being expansible, collapsible or capable of rearrangement (B60P 3/39 takes precedence; tents supported at least partially by vehicles E04H 15/06) [5]
- 3/345 • characterised by living accommodation in the form of a removable body supported by the vehicle unit **[5]**
- 3/35 • supported by a trailer-type vehicle or being itself of the trailer-type (B60P 3/345 takes precedence) [5]
- 3/355 • collapsible to a condition not usable as living accommodation, e.g. to a trailer of compact design **[5]**
- 3/36 Auxiliary arrangements; Arrangements of living accommodation (toilet or washing arrangements B60R 15/00); Details [5]
- 3/363 • with vehicle-carrying means [5]
- 3/367 • • with boat-carrying means [5]
- 3/37 • Exterior platforms, e.g. porch (awnings for buildings E04F 10/00; trailer awnings E04H 15/08; awnings for tents E04H 15/58) [5]
- 3/373 • Passageways between living accommodation and vehicle operating compartment [5]
- 3/377 • Means for securing living accommodation to vehicle unit [5]
- 3/38 • Sleeping arrangements3/39 • expansible, collapsible
 - expansible, collapsible or repositionable elements adapted to support a bed, e.g. wall portions [5]
- for carrying long loads, e.g. with separate wheeled load-supporting elements (B60P 3/022 takes precedence; signal devices to be attached to overhanging load B60Q 7/02) [5]
- 3/41 • for log transport [6]

B60P

- 3/42 convertible from one use to a different one (vehicles capable of travelling in or on different media, rail-and-road vehicles B60F)
- 5/00 Arrangements of weighing machines on vehicles (adapting weighing machines to use on transport vehicles G01G 19/08)

7/00 Securing or covering of load on vehicles7/02 • Covering of load

- 7/04 by tarpaulins or like flexible members
- 7/06 Securing of load (vehicle retainers B60P 3/073) [5]
- 7/08 Securing to vehicle floor or sides (B60P 7/13, B60P 7/135 take precedence) **[3, 5]**
- 7/10 • the load being plates, cases, or boxes
- the load being tree-trunks, beams, drums, tubes, 7/12or the like 7/13 Securing freight containers or forwarding . containers on vehicles [3] 7/135 • Securing or supporting by load bracing means [5] the load bracing means comprising a movable 7/14 • bulkhead 7/15 the load bracing means comprising a movable ٠ ٠ bar [5] 7/16 • Protecting against shocks 7/18 Protecting freight containers or forwarding containers [3] 9/00 Other vehicles predominantly for carrying loads
- **B60Q** ARRANGEMENT OF SIGNALLING OR LIGHTING DEVICES, THE MOUNTING OR SUPPORTING THEREOF OR CIRCUITS THEREFOR, FOR VEHICLES IN GENERAL (arrangement of signalling or lighting devices, the mounting or supporting thereof, for rail vehicles B61D, for cycles B62J, for ships B63B, for aircraft B64D; lighting in general, lighting devices per se F21, H05B; signalling in general G08; electric switches per se H01H) [4]

Note(s)

- 1. This subclass <u>covers</u> also arrangement or adaptation of lighting switches or signal-initiating means for vehicles.
- 2. Attention is drawn to the Note following the title of class B60.

Subclass index

LIGHTING	
Interior	
Other	
SIGNALLING	
Visual	
Acoustic	
Portable emergency devices	
Other	

1/00	Arrangement of optical signalling or lighting devices, the mounting or supporting thereof or circuits therefor (for lighting vehicle interior B60Q 3/00) [4]
1/02	 the devices being primarily intended to illuminate the way ahead or to illuminate other areas of way or environments
1/04	the devices being headlights
1/05	• • • retractable [5]
1/06	 • adjustable, e.g. remotely-controlled from inside vehicle (B60Q 1/05 takes precedence) [5]
1/064	• • • by fluid means [5]
1/068	• • • by mechanical means [5]
1/072	 • • • comprising a flexible element, e.g. chain [5]
1/076	• • • by electric means [5]
1/08	• • • • automatically
1/10	• • • • due to vehicle inclination, e.g. due to load distribution
1/105	••••• by fluid means [5]
1/11	• • • • • by mechanical means [5]
1/115	• • • • • by electric means [5]
1/12	• • • • due to steering position
1/124	• • • • • by mechanical means [5]
1/128	• • • • • • comprising a flexible element, e.g. chain [5]
1/132	• • • • • • • comprising meshing gear elements [5]

1/136	••••••• comprising rigid link elements [5]
1/14	• • • having dimming means
1/16	• • • illuminating the way asymmetrically
1/18	• • • being additional front lights
1/20	• • • • Fog lights
1/22	for reverse drive
1/24	• • for lighting other areas than only the way ahead
1/26	• the devices being primarily intended to indicate the
	vehicle, or parts thereof, or to give signals, to other traffic
1/28	 for indicating front of vehicle
1/30	• for indicating rear of vehicle, e.g. by means of
	reflecting surfaces
1/32	 for indicating vehicle sides
1/34	 for indicating change of drive direction
	(B60Q 1/22 takes precedence)
1/36	• • using movable members, e.g. arms with built-in flashing lamps
1/38	• • • using immovably-mounted light sources, e.g.
	fixed flashing lamps
1/40	• • • having automatic return to inoperative position
1/42	• • • due to steering-wheel position
1/44	 for indicating braking action
1/46	• • for giving flashing caution signals during drive,
	other than signalling change of direction, e.g.
	flashing the headlights
1/48	• • for parking purposes

- 1/50 for indicating other intentions or conditions, e.g. request for waiting or overtaking
- 1/52 • for indicating emergencies
- 1/54 • for indicating speed
- 1/56 • for illuminating registrations or the like
- 3/00 Arrangement of lighting devices for vehicle interior, the mounting or supporting thereof or circuits therefor [4]
- 3/02 for lighting passenger or driving compartment
- 3/04 • for dashboard
- 3/06 for lighting compartments other than passenger or driving space, e.g. luggage or engine compartment

- 5/00 Arrangement or adaptation of acoustic signal devices
- 7/00 Arrangement or adaptation of portable emergency signal devices on vehicles (arrangements for enforcing caution on roads, e.g. marker posts, E01F 9/00; signs G09F, e.g. reflecting warning triangles G09F 13/16)
- 7/02 to be attached to overhanging loads or extending parts of vehicle
- 9/00 Arrangement or adaptation of signal devices not provided for in one of main groups B60Q 1/00-B60Q 7/00
- 11/00 Arrangement of monitoring devices for devices provided for in groups B60Q 1/00-B60Q 9/00 [2]
- **B60R VEHICLES, VEHICLE FITTINGS, OR VEHICLE PARTS, NOT OTHERWISE PROVIDED FOR** (fire prevention, containment or extinguishing specially adapted for vehicles A62C 3/07)

Note(s)

Attention is drawn to the Note following the title of class B60.

Subclass index

VEHICLES OR VEHICLE PARTS OR ACCESSORIES NOT OTHERWISE PROVIDED FOR ARRANGEMENTS	16/00, 99/00
Of optical viewing means	1/00
Of optical viewing means Of steps or ladders	3/00
ARRANGEMENTS OR ADAPTATIONS	
Of electric installations not otherwise provided for; of sanitation devices	16/00, 15/00
For advertising	13/00
For advertising Of lubricating systems or devices	17/00
ARRANGEMENTS OF FITTINGS FOR HOLDING OR CARRYING LUGGAGE OR OTHER	
ARTICLES	5/00-11/00
PROTECTION OR SECURITY	
Arrangements concerning the vehicle or passengers; safety belts or body harnesses; anti- theft	
arrangements	19/00, 21/00, 22/00, 25/00
BODY-FINISHING ELEMENTS	13/00
OTHER VEHICLE FITTINGS	99/00

1/00	Optical viewing arrangements (antiglare equipment, e.g. polarising, for windscreens or windows	
	B60J 3/00) [2]	
1/02	Rear-view mirror arrangements (periscope	
	arrangements B60R 1/10)	
1/04	 mounted inside vehicle (B60R 1/08 takes 	
	precedence) [1, 7]	
1/06	 mounted on vehicle exterior (B60R 1/08 takes 	
	precedence) [1, 7]	
1/062	• • • with remote control for adjusting position [7]	
1/064	• • • • by manually powered actuator [7]	
1/066	• • • • for adjusting the mirror relative to its	
	housing [7]	
1/068	• • • • • using cables [7]	
1/07	• • • • by electrically powered actuator [7]	
1/072	• • • • for adjusting the mirror relative to its	
	housing [7]	
1/074	• • • • for retracting the mirror arrangements to a	
	non-use position alongside the vehicle [7]	
1/076	 • yieldable to excessive external force and 	
	provided with an indexed use position	
	(B60R 1/062 takes precedence) [7]	
1/078	• • • easily removable; mounted for bodily outward	
	movement, e.g. when towing [7]	

- 1/08 • involving special optical features, e.g. avoiding blind spots
- 1/10 Front-view mirror arrangements; Periscope arrangements
- 1/12 Mirror assemblies combined with other articles, e.g. clocks
- **3/00** Arrangements of steps, e.g. running-boards (constructed as superstructure sub-units of road vehicles B62D 25/22)
- 3/02 Retractable steps
- 3/04 with provisions for shoe-scraping
- 5/00 Compartments within vehicle body primarily intended or sufficiently spacious for trunks, suitcases, or the like (primarily intended for stowing loads in load-transporting vehicles B60P; arrangements for stowing spare wheels B62D 43/06)
- 5/02 arranged at front of vehicle
- 5/04 arranged at rear of vehicle

7/00	Stowing or holding appliances inside of vehicle primarily intended for personal property smaller than suit-cases, e.g. travelling articles, or maps (for radio sets, television sets, telephones, or the like, mounting of cameras operative during drive, tools, or spare parts B60R 11/02-B60R 11/06; for receptacles for refuse, food, beverages, cigarettes B60N 3/00)
7/02	in a separate luggage compartment
7/04	 in driver or passenger space
7/05	• • mounted on sun visor [5]
7/06	 mounted on or below dashboards
7/08	• Disposition of racks, clips, or the like
7/10	• • for supporting hats, clothes or clothes hangers [5]
7/12	• • for supporting umbrellas [5]
7/14	• • for supporting weapons [5]
9/00	Supplementary fittings on vehicle exterior for carrying loads, e.g. luggage, sports gear or the like [5]
9/02	• at the sides, e.g. on running-board
9/04	 Carriers associated with vehicle roof (B60R 9/08 takes precedence) [5]
9/042	 Carriers characterised by means to facilitate loading or unloading of the load, e.g. rollers, tracks, or the like [5]
9/045	• Carriers being adjustable or transformable, e.g. expansible, collapsible [5]
9/048	• Carriers characterised by article-gripping, - retaining, or -locking means [5]
9/05	Carriers characterised by wind deflecting means [5]
9/052	 Carriers comprising elongate members extending only transversely of vehicle (B60R 9/08 takes precedence) [5]
9/055	• Enclosure-type carriers, e.g. containers, boxes (B60R 9/048 takes precedence) [5]
9/058	 characterised by releasable attaching means between carrier and roof [5]
9/06	at vehicle front or rear
9/08	specially adapted for sports gear
9/10	for cycles
9/12	• • for skis
11/00	Arrangements for holding or mounting articles, not otherwise provided for
11/02	• for radio sets, television sets, telephones, or the like; Arrangement of controls thereof
11/04	• Mounting of cameras operative during drive; Arrangement of controls thereof relative to the vehicle
11/06	 for tools or spare parts (for spare wheels B62D 43/00)
13/00	Elements for body-finishing, identifying, or decorating; Arrangements or adaptations for advertising purposes
13/01	• Liners for load platforms or load compartments [5]
13/02	 Trim mouldings; Ledges; Wall liners; Roof liners (B60R 13/01 takes precedence) [5]
13/04	Ornamental or guard strips; Ornamental inscriptive devices
13/06	Sealing strips
13/07	• Water drainage or guide means not integral with roof structure (B60R 13/06 takes precedence; water deflectors for bonnets or lids B62D 25/13) [4]
13/08	• Insulating elements, e.g. for sound insulation [4]
13/10	Registration, licensing, or like devices

15/00	
	Arrangements or adaptations of sanitation devices
15/02	Washing facilities
15/04	Toilet facilities
15/04	Tonet facilities
16/00	Electric or fluid circuits specially adapted for vehicles and not otherwise provided for; Arrangement of elements of electric or fluid circuits specially adapted for vehicles and not otherwise provided for [3]
16/02	• electric [3]
16/023	 for transmission of signals between vehicle parts
10/010	or subsystems [2006.01]
16/027	 • between relatively movable parts of the vehicle, e.g. between steering wheel and column [2006.01]
16/03	 for supply of electrical power to vehicle subsystems [2006.01]
16/033	• • characterised by the use of electrical cells or batteries [2006.01]
16/037	 for occupant comfort [2006.01]
16/04	• • Arrangement of batteries [3, 6, 2006.01]
16/06	 for carrying-off electrostatic charges [3]
16/08	• fluid [3]
17/00	Arrangements or adaptations of lubricating systems or devices
17/02	Systems, e.g. central lubrication systems
19/00	Wheel guards; Radiator guards; Obstruction removers; Fittings damping bouncing force in collisions (mudguards B62D 25/16)
19/02	• Bumpers, i.e. impact receiving or absorbing members for protecting vehicles or fending off blows from other vehicles or objects (integral with waterborne vessels or specially adapted therefor B63B 59/02) [4]
19/03	 characterised by material, e.g. composite (B60R 19/18 takes precedence) [4]
19/04	• • formed from more than one section (B60R 19/18 takes precedence) [4]
19/04 19/12	
19/12	takes precedence) [4]vertically spaced [4]
19/12 19/14	 takes precedence) [4] vertically spaced [4] having folding parts [4]
19/12	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers,
19/12 19/14 19/16	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4]
19/12 19/14 19/16 19/18	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4]
19/12 19/14 19/16 19/18 19/20	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4]
19/12 19/14 19/16 19/18 19/20 19/22	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4]
19/12 19/14 19/16 19/18 19/20	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on
19/12 19/14 19/16 19/18 19/20 19/22 19/24	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on vehicles [4]
19/12 19/14 19/16 19/18 19/20 19/22 19/24 19/26	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on vehicles [4] comprising yieldable mounting means [4]
19/12 19/14 19/16 19/18 19/20 19/22 19/24 19/26 19/28	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on vehicles [4] comprising yieldable mounting means [4] Metallic springs [4]
19/12 19/14 19/16 19/18 19/20 19/22 19/24 19/26	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on vehicles [4] comprising yieldable mounting means [4] Metallic springs [4] Elastomeric material [4]
19/12 19/14 19/16 19/18 19/20 19/22 19/24 19/26 19/28	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on vehicles [4] comprising yieldable mounting means [4] Metallic springs [4]
19/12 19/14 19/16 19/18 19/20 19/22 19/24 19/26 19/28 19/30	 takes precedence) [4] vertically spaced [4] having folding parts [4] having deflecting members, e.g. rollers, balls [4] Means within the bumper to absorb impact [4] containing gas or liquid, e.g. inflatable [4] containing cellular material, e.g. solid foam [4] Arrangements for mounting bumpers on vehicles [4] comprising yieldable mounting means [4] Metallic springs [4] Elastomeric material [4] Fluid shock absorbers [4] destroyed upon impact, e.g. one-shot

25/022	•	•	•	operating on the steering wheel, e.g. bars
				locked to the steering wheel rim
				(B60R 25/021 takes precedence) [2013.01]
25/023	•	•	•	Countermeasures against the physical
10/010				destruction of the steering lock [2013.01]
25/04	•	•	o	perating on the propulsion system, e.g. engine or
				rive motor [1, 2013.01]
25/042	•	•	•	operating on the fuel supply [2013.01]
25/043	•	•	•	by blocking the exhaust [2013.01]
25/044	•	•	•	by limiting or blocking the air supply [2013.01]
25/045	•	•	•	by limiting or cutting the electrical supply to
25/06				the propulsion unit [2013.01]
25/08	-			operating on the vehicle transmission
	•	•		perating on brakes or brake systems
25/09	•	•	cl	y restraining wheel rotation, e.g. wheel amps [2013.01]
25/10	•	a	ctua	ating a signalling device [1, 2013.01]
25/102	•	•		signal being sent to a remote location, e.g. a
				dio signal being transmitted to a police station, a curity company or the owner [2013.01]
25/104	•	•	cł	naracterised by the type of theft warning signal,
			e.	g. visual or audible signals with special
			cł	naracteristics [2013.01]
25/20	•			ns to switch the anti-theft system on or 2013.01]
25/21	•	•		sing hidden switches [2013.01]
25/21				sing mechanical identifiers [2013.01]
				-
25/23	•	•	CC	sing manual input of alphanumerical odes [2013.01]
25/24	•	•		sing electronic identifiers containing a code not
			m	emorised by the user [2013.01]

25/25	• • using biometry [2013.01]	25/34	• • of conditions of vehicle components, e.g. of
25/30	• Detection related to theft or to other events relevant	25/40	windows, door locks or gear selectors [2013.01]
	to anti-theft systems [2013.01]	25/40	• Features of the power supply for the anti-theft
25/31	of human presence inside or outside the vehicle [2013.01]		system, e.g. anti-theft batteries, back-up power supply or means to save battery power [2013.01]
25/32	• • of vehicle dynamic parameters, e.g. speed or acceleration [2013.01]		Subject matter not provided for in other groups of
25/33	• • of global position, e.g. by providing GPS coordinates [2013.01]		this subclass [2009.01]

B60S SERVICING, CLEANING, REPAIRING, SUPPORTING, LIFTING, OR MANOEUVRING OF VEHICLES, NOT **OTHERWISE PROVIDED FOR**

Note(s)

Attention is drawn to the Note following the title of class B60.

Subclass index

CLEANING	1/00, 3/00
SERVICING, MAINTENANCE, REPAIR	5/00
LIFTING OR MANOEUVRING	
Devices integral with, or separate from, vehicle	9/00, 13/00
Vehicle modifications to receive separate devices	
I.	

1/00	Cleaning of vehicles (by apparatus not integral with vehicle B60S 3/00; cleaning in general B08B; de-icing of aircraft B64D; heating arrangements specially adapted for transparent or reflecting areas H05B 3/84)	1/56 1/58 1/60	 specially adapted for cleaning other parts or devices than front windows or windscreens for rear windows for signalling devices, e.g. reflectors
1/02	 Cleaning windscreens, windows, or optical devices 		
1/02	 Wipers or the like, e.g. scrapers 	1/62	Other vehicle fittings for cleaning
1/04	 • characterised by the drive (producing other than 	1/64	• • for cleaning vehicle interiors, e.g. built-in vacuum
1/00	swinging movement B60S 1/44)	1 100	cleaners
1/08	• • • • electrically driven	1/66	for cleaning vehicle exterior
1/10	• • • pneumatically driven	1/68	• • • for freeing wheels or tyres from foreign matter,
1/10	• • • hydraulically driven		e.g. wheel scrapers
1/12	• • • • personally driven	3/00	Vehicle cleaning apparatus not integral with vehicles
1/14	• • • • Means for transmitting drive		(cleaning in general B08B; cleaning peculiar to
1/10	• • • • mechanically		waterborne vessels B63B 57/00, B63B 59/00; ground
1/10	• • • • • by cable drives; by flexible shafts		equipment for cleaning aircraft B64F 5/00)
1/20	• • • • • • by rotary cams	3/04	 for exteriors of land vehicles
1/22	• • • • • by rotary cranks	3/06	 with rotary bodies contacting the vehicles
1/24	• • • • • by toothed gearing	= (00	
1/20	 • characterised by a plurality of wipers 	5/00	Servicing, maintaining, repairing, or refitting of vehicles (vehicles adapted to carry a workshop for
1/20	(B60S 1/06 takes precedence)		servicing or maintenance B60P 3/14; servicing rail
1/30	 • • • arranged both outside and inside 		locomotives B61K)
1/32	• • • characterised by constructional features of	5/02	• Supplying fuel to vehicles; General disposition of
1/52	wiper blades or arms		plant in filling stations (apparatus for transferring
1/34	• • • • Wiper arms; Mountings therefor		measured quantities of petrol, oil, or the like from
1/36	• • • • Variable-length arms		storage space to vehicles B67D)
1/38	• • • • Wiper blades	5/04	• Supplying air for tyre inflation (arrangement of tyre
1/40	• • • • Connections between blades and arms		inflating devices on vehicles B60C 23/00; tyre
1/42	• • • • resilient	F (00	pressure gauges G01L 17/00) [3]
1/44	• • • the wiper blades having other than swinging	5/06	• Supplying batteries to, or removing batteries from,
	movement, e.g. rotary		vehicles (circuit arrangements for charging batteries H02J 7/00) [6]
1/46	• • using liquid; Windscreen washers		
1/48	• • • Liquid supply therefor	9/00	Ground-engaging vehicle fittings for supporting,
1/50	• • • • Arrangement of reservoir		lifting, or manoeuvring the vehicle, wholly or in part,
1/52	• • • • Arrangement of nozzles (nozzles <u>per se</u>		e.g. built-in jacks (lifting devices in general B66F;
	B05B)		supports in general F16M)
1/54	• • using gas, e.g. hot air	9/02	for only lifting or supporting
		9/04	• • mechanically
		9/06	• • • of screw-and-nut type

- 9/08 • • the screw axis being substantially vertical9/10 • by fluid pressure
- 9/12 • of telescopic type
- 9/14 for both lifting and manoeuvring
- 9/16 for operating only on one end of vehicle (B60S 9/205 takes precedence) [4]
- 9/18 • mechanically
- 9/20 • with fluid-pressure lift
- 9/205 Power driven manoeuvring fittings, e.g. reciprocably driven steppers or rotatably driven cams (vehicles with ground-engaging propulsion means, e.g. walking members, B62D 57/02) [4]
- 9/21 • comprising a rotatably driven auxiliary wheel or endless track, e.g. driven by a ground wheel (track vehicles with additional or alternative ground wheels B62D 55/02, B62D 55/04; auxiliary drives from a ground wheel B60K 25/08) [4]
- 9/215 • • driven by an auxiliary motor **[4]**
- 9/22 Means for attaching lifting, supporting, or manoeuvring devices to vehicles (for separate devices B60S 11/00)
- 11/00 Vehicle modifications for receiving separate lifting, supporting, or manoeuvring devices
- **13/00** Vehicle-manoeuvring devices separate from the vehicle (vehicle-lifting or pushing devices B66F)
- 13/02 Turntables; Traversers (incorporated in vehiclestoring garages E04H)

B60T VEHICLE BRAKE CONTROL SYSTEMS OR PARTS THEREOF; BRAKE CONTROL SYSTEMS OR PARTS THEREOF, IN GENERAL (control of electrodynamic brake systems B60L 7/00; conjoint control of brakes and other drive units of vehicles B60W); ARRANGEMENT OF BRAKING ELEMENTS ON VEHICLES IN GENERAL; PORTABLE DEVICES FOR PREVENTING UNWANTED MOVEMENT OF VEHICLES; VEHICLE MODIFICATIONS TO FACILITATE COOLING OF BRAKES [1, 2006.01]

<u>Note(s)</u>

In this subclass, the following expression is used with the meaning indicated:

• "brake control systems" includes brake control systems for vehicles or of general applicability.

<u>Subclass index</u>

IMMOBILISATION Portable devices BRAKING	3/00
Kind of braking and corresponding arrangements	1/00
Vehicle modifications for cooling brakes Kinds of brake control	
initiating means; varying braking force or its distribution according to road or load conditions continuous braking	
transmission of control between initiating means and brakes Parts or accessories for fluid-pressure brake control:	11/00, 13/00
valve structure, disposition, and operation	15/00
other parts or accessories	17/00

1/00	Arrangements of braking elements, i.e. of those parts
	where braking effect occurs
1/02	 acting by retarding wheels
1/04	 acting directly on tread
1/06	• • acting otherwise than on tread, e.g. employing rim, drum, disc, or transmission
1/08	 using fluid or powdered medium
1/087	 • in hydrodynamic, i.e. non-positive displacement, retarders [3]
1/093	• • • in hydrostatic, i.e. positive displacement, retarders [3]
1/10	 by utilising wheel movement for accumulating energy, e.g. driving air compressors (using propulsion unit as braking means, <u>see</u> the relevant class)
1/12	 acting otherwise than by retarding wheels, e.g. jet- action
1/14	

1/14 • directly on road (portable devices, e.g. chocks, B60T 3/00)

- 1/16 • by increasing air resistance, e.g. flaps
- 3/00 Portable devices for preventing unwanted movement of vehicles, e.g. chocks
- 5/00 Vehicle modifications to facilitate cooling of brakes

Brake control systems or parts thereof

7/00	Brake-action initiating means
7/02	for personal initiation
7/04	foot-actuated
7/06	• • Disposition of pedal
7/08	hand-actuated
7/10	• • Disposition of hand control
7/12	• for automatic initiation; for initiation not subject to
	will of driver or passenger
7/14	

7/14 • • operated upon collapse of driver

7/16	•	•	operated by remote control, i.e. initiating means
= /10			not mounted on vehicle
7/18	•	•	operated by wayside apparatus
7/20	•	•	specially adapted for trailers, e.g. in case of
			uncoupling of trailer (inertia-actuated overrun brakes B60T 13/08)
7/22			initiated by contact of vehicle, e.g. bumper, with
1122	•	•	an external object, e.g. another vehicle [4]
			an external object, e.g. another vemere [1]
8/00			ingements for adjusting wheel-braking force to
			varying vehicular or ground-surface conditions,
			imiting or varying distribution of braking force hanging number of effective brake cylinders in
			er brake systems B60T 17/10)
8/17	•		sing electrical or electronic regulation means to
			ontrol braking [2006.01]
	N	T - 4 -	
			e(s) [2006.01]
			n classifying in group B60T 8/17, classification is
			made in appropriate places in groups B60T 8/18, T 8/24, B60T 8/26 or B60T 8/32 if other aspects
			electronic control are of interest.
8/171	•	•	Detecting parameters used in the regulation;
			Measuring values used in the regulation [2006.01]
8/172	•	•	Determining control parameters used in the
			regulation, e.g. by calculations involving
0 / 1 7 2			measured or detected parameters [2006.01]
8/173	•	•	Eliminating or reducing the effect of unwanted signals, e.g. due to vibrations or electrical
			noise [2006.01]
8/174	•	•	characterised by using special control logic, e.g.
			fuzzy logic [2006.01]
8/175	•	•	Brake regulation specially adapted to prevent
			excessive wheel spin during vehicle acceleration,
0 / 4 8 5 5			e.g. for traction control [2006.01]
8/1755	•	•	Brake regulation specially adapted to control the stability of the vehicle, e.g. taking into account
			yaw rate or transverse acceleration in a curve
			(road vehicle drive control systems for control of
			driving stability otherwise than by controlling a
			particular sub-unit B60W 30/02) [2006.01]
8/176	•	•	Brake regulation specially adapted to prevent
			excessive wheel slip during vehicle deceleration, e.g. ABS (B60T 8/1755 takes
			precedence) [2006.01]
8/1761	•	•	 responsive to wheel or brake dynamics, e.g.
			wheel slip, wheel acceleration or rate of change
			of brake fluid pressure [2006.01]
8/1763	•	•	 responsive to the coefficient of friction between the schools and the ground surface.
			the wheels and the ground surface (B60T 8/1764 takes precedence) [2006.01]
8/1764	•		 Regulation during travel on surface with
5/1/04			different coefficients of friction, e.g. between
			left and right sides, mu-split [2006.01]
8/1766	•	•	Proportioning of brake forces according to
			vehicle axle loads, e.g. front to rear of
0/4500			vehicle [2006.01]
8/1769	•	•	• specially adapted for vehicles having more than
			one driven axle, e.g. four-wheel drive vehicles [2006.01]
8/18	•	re	sponsive to vehicle weight or load, e.g. load
0,10			stribution (B60T 8/30 takes precedence; responsive
			weight and speed condition B60T 8/58) [4]
8/20	•	•	with stepwise control action
8/22	•	•	with continuous control action
8/24	•		sponsive to vehicle inclination or change of
		di	rection, e.g. negotiating bends

8/26	 characterised by producing differential braking between front and near wheels
8/28	between front and rear wheelsresponsive to deceleration [4]
8/30	 responsive to load [4]
8/32	 responsive to a speed condition, e.g. acceleration or deceleration (B60T 8/28 takes precedence) [4]
8/34	 having a fluid pressure regulator responsive to a speed condition [4]
8/36	• • • including a pilot valve responding to an
8/38	 electromagnetic force [4] including valve means of the relay or driver
8/40	controlled type [4]comprising an additional fluid circuit including
	fluid pressurising means for modifying the pressure of the braking fluid, e.g. including
	wheel driven pumps for detecting a speed
	condition, or pumps which are controlled by means independent of the braking system [4]
8/42	• • • having expanding chambers for controlling pressure [4]
8/44	• • co-operating with a power-assist booster means associated with a master cylinder for
	controlling the release and reapplication of
	brake pressure through an interaction with the power assist device [4]
8/46	• • • the pressure being reduced by exhausting fluid [4]
8/48	• • connecting the brake actuator to an alternative or additional source of fluid pressure [4]
8/50	• • having means for controlling the rate at which pressure is reapplied to the brake [4]
8/52	 Torque sensing, i.e. wherein the braking action is controlled by forces producing or tending to produce a twisting or rotating motion on a braked rotating member [4]
8/54	• • by mechanical means [4]
8/56	• • having means for changing the coefficient of friction [4]
8/58	 responsive to speed and another condition or to plural speed conditions [4]
	<u>Note(s)</u>
	In this group, a single condition which is itself
	responsive to, or representative of, another single
8/60	condition is not regarded as plural conditions.• • using electrical circuitry for controlling the
0/00	braking action, the circuitry deriving a control
	function relating to the dynamic of the braked vehicle or wheel [4]
8/62	• • • wherein the individual vehicle wheels are
	provided (i) with self-contained braking systems operating the individual wheels in accordance with its dynamic state or (ii) with a central processing unit which receives input from individual wheels or wheel groups and produces a plurality of control
	signals for separately operating individual wheels or groups of wheels [4]
8/64	• • • • wherein the controlled braking action is characterised by the manner in which the braking fluid pressure is reduced or reapplied [4]
8/66	• • • • wherein the braking action is responsive to

 • • wherein the braking action is responsive to the difference between a computed or other theoretical vehicle speed and an actual speed of a wheel thereof [4]

B60T

8/68	• • • • wherein the braking action is controlled
	by a difference between the rate of change of vehicle velocity and the rate of
	change of wheel velocity [4]
8/70	• • • • sensing both acceleration and
	deceleration of either the vehicle or the
8/72	wheel [4]responsive to a difference between a speed
0/72	condition, e.g. deceleration, and a fixed reference
	(B60T 8/66 takes precedence) [4]
8/74	• • • sensing a rate of change of velocity [4]
8/76	• • • two or more sensing means from different wheels indicative of the same type of speed
	condition [4]
8/78	• • • using electrical circuitry for controlling the
	braking action, the circuitry deriving a control
	function relating to the dynamics of the braked vehicle or wheel [4]
8/80	 • • • • Means sensing a rate of change of
0/00	velocity [4]
8/82	• • • • two or more sensing means from different
	wheels indicative of the same type of speed
8/84	condition [4]••• wherein two wheels or wheel groups are
0/04	controlled in dependence on the behaviour
	of a reference wheel or wheel group, with
	means for changing the reference wheel, e.g. "select high, select low" operation [4]
8/86	 wherein the brakes are automatically applied in
	accordance with a speed condition and having
	means for overriding the automatic braking device
8/88	when a skid condition occurs [4]with failure responsive means, i.e. means for
0/00	detecting and indicating faulty operation of the
	speed responsive control means [4]
8/90	• • using a simulated speed signal to test speed
8/92	 responsive control means [4] • automatically taking corrective action [4]
8/94	 • • • • on a fluid pressure regulator [4]
8/96	• • • • on speed responsive control means [4]
10/00	Control or regulation for continuous braking making
10/00	use of fluid or powdered medium, e.g. for use when
	descending a long slope [4]
10/02	• with hydrodynamic brake [4]

B60V AIR-CUSHION VEHICLES

<u>Note(s)</u>

In this subclass, the following expression is used with the meaning indicated:

• "air-cushion vehicles" includes all vehicles which are wholly or partly supported on land or water by air or other gaseous cushions.

- 3/08 Aircraft, e.g. air-cushion alighting-gear therefor

B60W CONJOINT CONTROL OF VEHICLE SUB-UNITS OF DIFFERENT TYPE OR DIFFERENT FUNCTION; CONTROL SYSTEMS SPECIALLY ADAPTED FOR HYBRID VEHICLES; ROAD VEHICLE DRIVE CONTROL SYSTEMS FOR PURPOSES NOT RELATED TO THE CONTROL OF A PARTICULAR SUB-UNIT [2006.01]

Note(s) [2006.01]

- 1. Main groups B60W 10/00 and B60W 30/00-B60W 50/00 <u>do not cover</u> the control of a single sub-unit; such control is classified in the relevant place for the sub-unit, e.g. F02D, F16H. Where a single sub-unit is controlled by means of signals or commands from other sub-units, the control of this single sub-unit is classified in the relevant place for this sub-unit. For example, the control of variable-ratio gearing by means of signals from the engine or the accelerator is classified in the subclass for gearing, F16H.
- Conjoint control of driveline units, e.g. engines, and variable-ratio gearing occurring only transiently during ratio shift and being also characterised by the control of the gearing is also classified in the subclass for gearing, F16H.
- 3. When classifying in group B60W 10/00, classification must also be made in groups B60W 20/00-B60W 50/00 in order to identify the purpose or use of the control.
- 4. In this subclass, the following terms are used with the meanings indicated:
 - "conjoint control" means that a programmed or condition-responsive automatic controller on board the vehicle, embodying control logic for vehicle sub-units of different type or different function, sends control signals to actuators of two or more vehicle sub-units, so that the sub-units act together to solve a particular problem or in response to a particular driving condition;
 - "drive control system" means an electronic system in a road vehicle for automatically controlling the movement of that vehicle in order to take certain actions;
 - "road vehicle" means a vehicle normally under the control of a human driver for transportation on roads, e.g. an automobile, truck
 or bus;
 - "sub-unit" means one of the following vehicle systems: propulsion system, clutch system, change-speed gearing system, system for distributing drive torque between front and rear axles, axle differential system, brake system, steering system, suspension system, energy storage means, fuel cells or auxiliary equipment.

10/00 Conjoint control of vehicle sub-units of different type or different function (for propulsion of purely	10/111 • • • with separate change-speed gear trains arranged in series [2012.01]
electrically-propelled vehicles with power supplied within the vehicle B60L 11/00) [2006.01]	10/113 • • • with two input flow paths, e.g. double clutch transmission selection of one of the torque flow
<u>Note(s) [2006.01]</u>	paths by the corresponding input clutch [2012.01]
When classifying in this group, each controlled sub-unit	10/115 • • • with planetary gears [2012.01]
must be separately identified by a classification in a relevant place in this group.	10/119 • including control of all-wheel-driveline-means, e.g. transfer gears or clutches for dividing torque between

10/109 • • • • of toroid type [2012.01]	10/196 • • acting within the driveline, e.g. retarders [2012.01]
10/11 • • Stepped gearings [2012.01]	10/198 • • with exhaust brakes [2012.01]
	10/20 • including control of steering systems [2006.01]

10/22	 including control of suspension systems [2006.01]
10/24	• including control of energy storage means [2006.01]
10/26	 for electrical energy, e.g. batteries or capacitors [2006.01]
10/28	 including control of fuel cells [2006.01]
10/30	 including control of auxiliary equipment, e.g. air- conditioning compressors or oil pumps [2006.01]
20/00	Control systems specially adapted for hybrid vehicles, i.e. vehicles having two or more prime movers of more than one type, e.g. electrical and internal combustion motors, all used for propulsion of the vehicle [2006.01]
30/00	Purposes of road vehicle drive control systems not related to the control of a particular sub-unit, e.g. of systems using conjoint control of vehicle sub- units [2006.01]
30/02	Control of vehicle driving stability [2006.01, 2012.01]
30/04	• related to roll-over prevention [2006.01]
30/045	• • Improving turning performance [2012.01]
30/06	• Automatic manoeuvring for parking [2006.01]
30/08	 Predicting or avoiding probable or impending collision [2006.01, 2012.01]
30/085	 Taking automatic action to adjust vehicle attitude in preparation for collision, e.g. braking for nose dropping [2012.01]
30/09	 Taking automatic action to avoid collision, e.g. braking and steering [2012.01]
30/095	 Predicting travel path or likelihood of collision [2012.01]
30/10	• Path keeping [2006.01]
30/12	• • Lane keeping [2006.01]
30/14	• Cruise control [2006.01]
30/16	• Control of distance between vehicles, e.g. keeping a distance to preceding vehicle [2006.01, 2012.01]
30/165	 Automatically following the path of a preceding lead vehicle, e.g. "electronic tow- bar" [2012.01]
30/17	 • with provision for special action when the preceding vehicle comes to a halt, e.g. stop and go [2012.01]
30/18	• Propelling the vehicle [2006.01, 2012.01]
30/182	• • Selecting between different operative modes, e.g. comfort and performance modes [2012.01]
30/184	• Preventing damage resulting from overload or excessive wear of the driveline [2012.01]
30/186	• • excessive wear or burn out of friction elements, e.g. clutches [2012.01]
30/188	• Controlling power parameters of the driveline, e.g. determining the required power [2012.01]
30/19	• Improvement of gear change, e.g. by synchronisation or smoothing gear shift [2012.01]
30/192	• Mitigating problems related to power-up or power- down of the driveline, e.g. start-up of a cold engine [2012.01]
30/194	• • related to low temperature conditions, e.g. high viscosity of hydraulic fluid [2012.01]
30/20	• • Reducing vibrations in the driveline [2006.01]

40/00	Estimation or calculation of driving parameters for
	road vehicle drive control systems not related to the
	control of a particular sub-unit [2006.01]
40/02	 related to ambient conditions [2006.01]
40/04	Traffic conditions [2006.01]
40/06	• • Road conditions [2006.01, 2012.01]

40/068	• • • Road friction coefficient [2012.01]
40/072	 Curvature of the road [2012.01]
40/072	 Slope angle of the road [2012.01]
40/08	 related to drivers or passengers [2006.01, 2012.01]
40/08	 Driving style or behaviour [2012.01]
40/10	• related to vehicle motion [2006.01, 2012.01]
40/101	• Side slip angle of tyre [2012.01]
40/103	• Side slip angle of vehicle body [2012.01]
40/105	• • Speed [2012.01]
40/107	 Longitudinal acceleration [2012.01]
40/109	Lateral acceleration [2012.01]
40/11	 Pitch movement [2012.01]
40/112	 Roll movement [2012.01]
40/114	• • Yaw movement [2012.01]
40/12	 related to parameters of the vehicle
	itself [2006.01, 2012.01]
40/13	 Load or weight [2012.01]
50/00	Details of control systems for road vehicle drive
	control not related to the control of a particular sub-
	unit [2006.01]
50/02	• Ensuring safety in case of control system failures,
	e.g. by diagnosing, circumventing or fixing
50/000	failures [2006.01, 2012.01]
50/023	Avoiding failures by using redundant parts [2012.01]
50/029	 • Adapting to failures or work around with other
30/029	constraints, e.g. circumvention by avoiding use of
	failed parts [2012.01]
50/032	 Fixing failures by repairing failed parts, e.g.
50/052	loosening a sticking valve [2012.01]
50/035	 Bringing the control units into a predefined state,
507 055	e.g. giving priority to particular
	actuators [2012.01]
50/038	 Limiting the input power, torque or
507 050	speed [2012.01]
50/04	 Monitoring the functioning of the control
	system [2006.01]
50/06	• Improving the dynamic response of the control
	system, e.g. improving the speed of regulation or
	avoiding hunting or overshoot [2006.01]
50/08	 Interaction between the driver and the control
	system [2006.01, 2012.01]
50/10	Interpretation of driver requests or
	demands [2012.01]
50/12	• • Limiting control by the driver depending on
	vehicle state, e.g. interlocking means for the
	control input for preventing unsafe
	operation [2012.01]
50/14	• • Means for informing the driver, warning the driver
	or prompting a driver intervention [2012.01]
50/16	• • • Tactile feedback to the driver, e.g. vibration or
	force feedback to the driver on the steering
	wheel or the accelerator pedal [2012.01]
