C07 ORGANIC CHEMISTRY

Note(s)

- 1. In this class, the following term is used with the meaning indicated:
- "preparation" covers purification, separation, stabilisation or use of additives, unless a separate place is provided therefor.
 Biocidal, pest repellant, pest attractant or plant growth regulatory activity of compounds or preparations is further classified in subclass
- A01P.In subclasses C07C-C07K and within each of theses subclasses, in the absence of an indication to the contrary, and with the exception referred to below, a compound is classified in the last appropriate place. For example, 2-butyl-pyridine, which contains an acyclic chain
- and a heterocyclic ring, is classified only as a heterocyclic compound, in subclass C07D. In general, and in the absence of an indication to the contrary (such as groups C07C 59/58, C07C 59/70), the terms "acyclic" and "aliphatic" are used to describe compounds in which there is no ring; and, if a ring were present, the compound would be taken by the "last place" rule to a later group for cycloaliphatic or aromatic compounds, if such a group exists. Where a compound or an entire group of compounds exists in tautomeric forms, it is classified as though existing in the form which is classified last in the system, unless the other form is specifically mentioned earlier in the system.
- 4. Chemical compounds and their preparation are classified in the groups for the type of compound prepared. The processes of preparation are also classified in places for the types of reaction employed, if of interest. Examples of such places outside this class are: C12P......Fermentation or enzyme-using processes to synthesise a desired chemical compound or composition or to separate optical isomers from a racemic mixture

C25B 3/00......Electrolytic production of organic compounds

C25B 7/00.....Electrophoretic production of compounds

- 5. General processes for the preparation of a class of compounds falling into more than one main group are classified in the groups for the processes employed, when such groups exist. The compounds prepared are also classified in the groups for the types of compound prepared, if of interest.
- 6. In this class, in the absence of an indication to the contrary, the compounds containing carboxyl or thiocarboxyl groups are classified as the relevant carboxylic or thiocarboxylic acids, unless the "last place rule" (see Note (3), above) dictates otherwise; a carboxyl group being a carbon atom having three bonds, and no more than three, to hetero atoms, other than nitrogen atoms of nitro or nitroso groups, with at least one multiple bond to the same hetero atom and a thiocarboxyl group being a carboxyl group having at least one bond to a sulfur atom, e.g. amides or nitriles of carboxylic acids, are classified with the corresponding acids.
- 7. Salts of a compound, unless specifically provided for, are classified as that compound, e.g. aniline hydrochloride is classified as containing carbon, hydrogen and nitrogen only (in group C07C 211/46), sodium malonate is classified as malonic acid (in C07C 55/08), and a mercaptide is classified as the mercaptan. Metal chelates are dealt with in the same way. Similarly, metal alcoholates and metal phenates are classified in subclass C07C and not in subclass C07F, the alcoholates in groups C07C 31/28-C07C 31/32 and the phenates as the corresponding phenols in group C07C 39/235 or C07C 39/44. Salts, adducts or complexes formed between two or more organic compounds are classified according to all compounds forming the salts, adducts or complexes.
- C07B GENERAL METHODS OF ORGANIC CHEMISTRY; APPARATUS THEREFOR (preparation of carboxylic acid esters by telomerisation C07C 67/47; processes for preparing macromolecular compounds, e.g. telomerisation C08F, C08G)

Note(s)

- 1. In this subclass, a functional group which is already present in some residue being introduced and is not substantially involved in a chemical reaction, is not considered as the functional group which is formed or introduced as a result of the chemical reaction.
- 2. In this subclass, the following term is used with the meaning indicated:
- "separation" means separation only for the purposes of recovering organic compounds.
- 3. When classifying in this subclass, classification is also made in group B01D 15/08insofar as subject matter of general interest relating to chromatography is concerned.
- 4. In this subclass, in the absence of an indication to the contrary, classification is made in the last appropriate place according to the type of reaction employed, noting the bond or the functional group which is formed or introduced as a result of the chemical reaction.

Subclass index

REDUCTION IN GENERAL OXIDATION IN GENERAL	
REACTIONS WITHOUT FORMATION OR INTRODUCTION OF FUNCTIONAL GROUPS	
CONTAINING HETERO ATOMS	
Change of bond type between carbon atoms already directly linked	
Formation of new or disconnection of existing carbon-to-carbon bonds	

C07B

REACTIONS WITH FORMATION OR INTRODUCTION OF FUNCTIONAL GROUPS CONTAINING HETERO ATOMS INTRODUCTION OF PROTECTING OR ACTIVATING GROUPS NOT COVERED BY THE GENERATION OF ORGANIC FREE RADICALS......60/00

Reduction in general [4] 31/00

33/00 Oxidation in general [4]

Reactions without formation or introduction of functional groups containing hetero atoms [4]

35/00	Reactions without formation or introduction of
	functional groups containing hetero atoms, involving
	a change in the type of bonding between two carbon
	atoms already directly linked [4]
35/02	Reduction [4]
35/04	Dehydrogenation [4]
35/06	• Decomposition, e.g. elimination of halogens, water or
	hydrogen halides [4]
35/08	Isomerisation [4]
37/00	Reactions without formation or introduction of
	functional groups containing hetero atoms, involving
	either the formation of a carbon-to-carbon bond
	between two carbon atoms not directly linked
	already or the disconnection of two directly linked
	already or the disconnection of two directly linked carbon atoms [4]
37/02	already or the disconnection of two directly linked
37/02 37/04	already or the disconnection of two directly linked carbon atoms [4]
0	already or the disconnection of two directly linkedcarbon atoms [4]Addition [4]
37/04	 already or the disconnection of two directly linked carbon atoms [4] Addition [4] Substitution [4]
37/04 37/06	 already or the disconnection of two directly linked carbon atoms [4] Addition [4] Substitution [4] Decomposition, e.g. elimination of carbon dioxide [4]
37/04 37/06 37/08	 already or the disconnection of two directly linked carbon atoms [4] Addition [4] Substitution [4] Decomposition, e.g. elimination of carbon dioxide [4] Isomerisation [4]
37/04 37/06 37/08 37/10	 already or the disconnection of two directly linked carbon atoms [4] Addition [4] Substitution [4] Decomposition, e.g. elimination of carbon dioxide [4] Isomerisation [4] Cyclisation [4]

Reactions with formation or introduction of functional groups containing hetero atoms [4]

39/00	Halogenation [4]
41/00	Formation or introduction of functional groups containing oxygen [4]
41/02	 of hydroxy or O-metal groups [4]
41/04	• of ether, acetal or ketal groups [4]
41/06	 of carbonyl groups [4]
41/08	 of carboxyl groups or salts, halides or anhydrides thereof [4]
41/10	• • Salts, halides or anhydrides of carboxyl groups [4]
41/12	 of carboxylic acid ester groups [4]
41/14	• of peroxy or hydroperoxy groups [4]

43/00 Formation or introduction of functional groups containing nitrogen [4] 43/02 • of nitro or nitroso groups [4]

- 43/04 • of amino groups [4]
- 43/06 • of amide groups [4]
- 43/08
 - of cyano groups [4]
- 43/10 • of isocyanate groups [4]
- 45/00 Formation or introduction of functional groups containing sulfur [4]
- 45/02 • of sulfo or sulfonyldioxy groups [4]
- 45/04 • of sulfonyl or sulfinyl groups [4]
- 45/06of mercapto or sulfide groups [4]
- 47/00 Formation or introduction of functional groups not provided for in groups C07B 39/00-C07B 45/00 [4]
- 49/00 Grignard reactions [4]
- 51/00 Introduction of protecting groups or activating groups, not provided for in groups C07B 31/00-C07B 49/00 [4]
- 53/00 Asymmetric syntheses [4]
- 55/00 Racemisation; Complete or partial inversion [4]
- 57/00 Separation of optically-active organic compounds [4]
- 59/00 Introduction of isotopes of elements into organic compounds [4]
- 60/00 Generation of organic free radicals [2011.01]
- 61/00 Other general methods [4]

Purification; Separation; Stabilisation [4]

- 63/00 Purification; Separation specially adapted for the purpose of recovering organic compounds (separation of optically-active organic compounds C07B 57/00); Stabilisation; Use of additives [4]
- 63/02 • by treatment giving rise to a chemical modification [4]
- 63/04 • Use of additives [4]

C07C ACYCLIC OR CARBOCYCLIC COMPOUNDS (macromolecular compounds C08; production of organic compounds by electrolysis or electrophoresis C25B 3/00, C25B 7/00)

Note(s)

- 1. In this subclass, the following terms or expressions are used with the meanings indicated:
 - "bridged" means the presence of at least one fusion other than ortho, peri or spiro;
 - two rings are "condensed" if they share at least one ring member, i.e. "spiro" and "bridged" are considered as condensed;
 - "condensed ring system" is a ring system in which all rings are condensed among themselves;
 - "number of rings" in a condensed ring system equals the number of scissions necessary to convert the ring system into one acyclic chain;
 - "quinones" are compounds derived from compounds containing a six-membered aromatic ring or a system comprising sixmembered aromatic rings (which system may be condensed or not condensed) by replacing two or four >CH groups of the sixmembered aromatic rings by > C=O groups, and by removing one or two carbon-to-carbon double bonds, respectively, and rearranging the remaining carbon-to-carbon double bonds to give a ring or ring system with alternating double bonds, including the carbon-to-oxygen bonds; this means that acenaphthenequinone or camphorquinone are not considered as quinones.
- 2. Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K and within these subclasses.
- 3. Therapeutic activity of compounds is further classified in subclass A61P.
- 4. When classifying in this subclass, classification is also made in group B01D 15/08insofar as subject matter of general interest relating to chromatography is concerned.
- 5. In this subclass, in the absence of an indication to the contrary, a process is classified in the last appropriate place.
- 6. In this subclass, in the absence of an indication to the contrary, "quaternary ammonium compounds" are classified with the corresponding "non-quaternised nitrogen compounds".
- 7. For the classification of compounds in groups C07C 1/00-C07C 71/00and C07C 401/00-C07C 409/00:
 - a compound is classified considering the molecule as a whole (rule of the "whole molecule approach");
 - a compound is considered to be saturated if it does not contain carbon atoms bound to each other by multiple bonds;
 - a compound is considered to be unsaturated if it contains carbon atoms bound to each other by multiple bonds, which includes a sixmembered aromatic ring,

unless otherwise specified or implicitly derivable from the subdivision, as in group C07C 69/00, e.g. C07C 69/712.

- 8. For the classification of compounds in groups C07C 201/00-C07C 395/00, i.e. after the functional group has been determined according to the "last place rule", a compound is classified according to the following principles:
 - compounds are classified in accordance with the nature of the carbon atom to which the functional group is attached;
 - a carbon skeleton is a carbon atom, other than a carbon atom of a carboxyl group, or a chain of carbon atoms bound to each other; a
 carbon skeleton is considered to be terminated by every bond to an element other than carbon or to a carbon atom of a carboxyl
 group;
 - when the molecule contains several functional groups, only functional groups linked to the same carbon skeleton as the one first determined are considered;
 - a carbon skeleton is considered to be saturated if it does not contain carbon atoms bound to each other by multiple bonds;
 - a carbon skeleton is considered to be unsaturated if it contains carbon atoms bound to each other by multiple bonds, which includes a six-membered aromatic ring.

Subclass index

COMPOUNDS CONTAINING CARBON AND HYDROGEN ONLY Preparation Purification, separation, stabilisation Compounds	1/00, 2/00, 4/00, 5/00, 6/00 7/00
aliphatic	9/00, 11/00
cycloaliphatic, aromatic COMPOUNDS CONTAINING CARBON AND HALOGENS, WITH OR WITHOUT HYDROGEN	13/00, 15/00
Preparation Compounds	17/00
aliphatic	
cycloaliphatic, aromatic COMPOUNDS CONTAINING CARBON AND OXYGEN, WITH OR WITHOUT HYDROGEN OR HALOGENS	22/00, 23/00, 25/00
Preparation	27/00
simultaneous production of more than one class of oxygen- containing compounds	
of alcohols; of phenols	
of ethers or acetals; of oxo compounds	
of quinones	
of carboxylic acids, their salts or anhydrides	
of esters of carboxylic acids	
of esters of carbonic or haloformic acids	68/00
Compounds	
with OH group(s): aliphatically bound	31/00, 33/00

cycloaliphatically bound	
with OH group(s) aromatically bound	39/00
Ethers, acetals, orthoesters; aldehydes; ketones	43/00, 47/00, 49/00
Quinones	50/00
carboxylic acids	
acyclic	
cyclic	61/00, 62/00, 63/00, 65/00, 66/0
Esters IPOUNDS CONTAINING CARBON AND NITROGEN, WITH OR WITHOUT HYDROGEN, .OGENS, OR OXYGEN Preparation	69/00, 71/00
of amines	209/00
of hydroxy amines, aminoethers, or aminoesters	
of aminoaldehydes, aminoketones, aminoquinones	
of aminocarboxylic acids	
of amides of carboxylic acids	
of nitriles of carboxylic acids	
of derivatives of hydrazine	
of compounds containing carbon- to-nitrogen double bonds, e.g. imines, hydrazones, isocyanates	
of derivatives of carbamic acids	
of urea or derivatives	
of guanidines or derivatives	
of nitro or nitroso compounds, or esters of nitric or nitrous acids	
having nitrogen bound to carbon or to carbon and hydrogen	
Amines	211/00
Hydroxy amines; Aminoethers; Aminoesters	
Aminoaldehydes, aminoketones, aminoquinones	
Amino carboxylic acids	
Amides of carboxylic acids	
Compounds containing one or more carbon-to-nitrogen double bonds, e.g. imines	
Nitriles of carboxylic acids	
Amidines, imino-ethers	257/00
Hydroxamic acids	259/00
Derivatives of cyanic or isocyanic acid	261/00, 265/00
Carbodiimides	267/00
Carbamic acids	271/00
Ureas	275/00
Guanidines	279/00
having nitrogen bound to halogens	239/00
having nitrogen bound to oxygen	
Nitro or nitroso compounds	205/00, 207/00
Nitrites or nitrates	
Hydroxylamines	239/00
Oximes	
having nitrogen bound to another nitrogen	
Hydrazines, hydrazides	243/00
Semicarbazates, semicarbazides	
Azo compounds, diazo compounds	
Hydrazones, hydrazidines	
Semicarbazones	
N-nitro or N-nitroso compounds	
containing chains of three nitrogen atoms bound together	
Triazenes	245/00
Azides	
Other compounds containing nitrogen	

COMPOUNDS CONTAINING CARBON, TOGETHER WITH SULFUR, SELENIUM, OR TELLURIUM, WITH OR WITHOUT HYDROGEN, HALOGENS, OXYGEN, OR NITROGEN Preparation Compounds having sulfur bound to oxygen having sulfur bound to carbon having sulfur bound to nitrogen DERIVATIVES OF CYCLOHEXANE OR OF A CYCLOHEXENE HAVING AN UNSATURATED SIDE-CHAIN WITH AT LEAST FOUR CARBON ATOMS......403/00 PROSTAGLANDINS OR DERIVATIVES......405/00 PEROXIDES; PEROXYACIDS

Hydrocarbons [3]

-			from a single molecule
1/00	Preparation of hydrocarbons from one or more	1/32	• starting from compounds containing hetero atoms
	compounds, none of them being a hydrocarbon		other than, or in addition to, oxygen or halogen [3]
1/02	 from oxides of carbon (preparation of liquid hydrocarbon mixtures of undefined composition 	1/34	• • reacting phosphines with aldehydes or ketones, e.g. Wittig reaction [3]
	C10G 2/00; of synthetic natural gas C10L 3/06) [5]	1/36	• by splitting of esters (C07C 1/213, C07C 1/30 take
1/04	 from carbon monoxide with hydrogen 		precedence) [3, 5]
1/06	• • • in the presence of organic compounds, e.g.		
	hydrocarbons	2/00	Preparation of hydrocarbons from hydrocarbons
1/08	• • • Isosyntheses		containing a smaller number of carbon atoms [3]
1/10	• • from carbon monoxide with water vapour	2/02	• by addition between unsaturated hydrocarbons [3]
1/12	• • from carbon dioxide with hydrogen	2/04	• • by oligomerisation of well-defined unsaturated
1/20	 starting from organic compounds containing only 		hydrocarbons without ring formation [3]
	oxygen atoms as hetero atoms	2/06	• • • of alkenes, i.e. acyclic hydrocarbons having
1/207	• • from carbonyl compounds [5]		only one carbon-to-carbon double bond [3]
1/213	• • • by splitting of esters [5]	2/08	• • • • Catalytic processes [3]
1/22	 by reduction 	2/10	• • • • with metal oxides [3]
1/24	• by elimination of water	2/12	• • • • • with crystalline alumino-silicates, e.g.
	5		molecular sieves [3]
1/247	• • by splitting of cyclic ethers [3]	2/14	• • • • • with inorganic acids; with salts or
1/26	starting from organic compounds containing only	=, <u>-</u>	anhydrides of acids [3]
	halogen atoms as hetero atoms	2/16	• • • • • • Acids of sulfur; Salts thereof; Sulfur
1/28	• by ring closure	2,10	oxides [3]

1/30

by splitting-off the elements of hydrogen halide

2/18	• • • • • Acids of phosphorus; Salts thereof;	
2/20	Phosphorus oxides [3] •••••• Acids of halogen; Salts thereof [3]	
2/20	• • • • • • • • • • • Metal halides; Complexes thereof	f
2122	with organic compounds [3]	L
2/24	• • • • • with metals [3]	
2/26	• • • • • with hydrides or organic compounds	
	(C07C 2/22 takes precedence) [3]	
2/28	••••• with ion-exchange resins [3]	
2/30	• • • • • • containing a metal-to-carbon bond; Metal hydrides [3]	
2/32	• • • • • as complexes, e.g. acetyl-	
_,	acetonates [3]	
2/34	• • • • • • • Metal-hydrocarbon complexes [3]
2/36	• • • • • as phosphines, arsines, stilbines or	
2/20	bismuthines [3]	
2/38 2/40	 of dienes or alkynes [3] of conjugated dienes [3] 	
2/40	 homo- or co-oligomerisation with ring formatio 	n
2/42	not being a Diels-Alder conversion [3]	,
2/44	• • • of conjugated dienes only [3]	
2/46	• • • • Catalytic processes [3]	
2/48	• • of only hydrocarbons containing a carbon-to	
0.00	carbon triple bond [3]	
2/50 2/52	 Diels-Alder conversion [3] Catalytic processes [3] 	
2/52	 by addition of unsaturated hydrocarbons to saturate 	he
2734	hydrocarbons, or to hydrocarbons containing a six-	
	membered aromatic ring with no unsaturation outs	ide
o / = c	the aromatic ring [3]	
2/56	Addition to acyclic hydrocarbons [3]	
2/58 2/60	 Catalytic processes [3] • • • with halides [3] 	
2/60	• • • • with acids [3]	
2/64	 Addition to a carbon atom of a six-membered 	
	aromatic ring [3]	
2/66	• • Catalytic processes [3]	
2/68		
	• • • • with halides [3]	
2/70	• • • • with acids [3]	
	 • • • with acids [3] • Addition to a non-aromatic carbon atom of 	otic
2/70	 • • • with acids [3] • Addition to a non-aromatic carbon atom of hydrocarbons containing a six-membered aromatic carbon atom at a six-membered aromatic carbon at a six-membered aromatic carbon	ıtic
2/70	 • • • with acids [3] • Addition to a non-aromatic carbon atom of 	ıtic

5/23	•	•	Rearrangement of carbon-to-carbon unsaturated bonds [3]
5/25	•	•	• Migration of carbon-to-carbon double bonds [3]
5/27	•	•	Rearrangement of carbon atoms in the hydrocarbon skeleton [3]
5/29	•	•	 changing the number of carbon atoms in a ring while maintaining the number of rings [3]
5/31	•	•	 changing the number of rings [3]
5/32	•		v dehydrogenation with formation of free vdrogen [2]
5/327	•	•	Formation of non-aromatic carbon-to-carbon double bonds only [3]
5/333	•	•	Catalytic processes [3]
5/35	•	•	Formation of carbon-to-carbon triple bonds
			only [3]
5/367	•	•	Formation of an aromatic six-membered ring from an existing six-membered ring, e.g. dehydrogenation of ethylcyclohexane to
			ethylbenzene [3]
5/373	•	•	with simultaneous isomerisation [3]
5/387	•	•	 of cyclic compounds containing no six- membered ring to compounds containing a six- membered aromatic ring [3]
5/393	•	•	 with cyclisation to an aromatic six-membered ring, e.g. dehydrogenation of n-hexane to
			benzene [3]
5/41	•	•	Catalytic processes [3]
5/42	•	by	v dehydrogenation with a hydrogen acceptor [2]
			2(5)
	1.	•	In this group:
			 the catalyst is considered as forming part of the acceptor system in case of simultaneous catalyst reduction;
			 catalyst reduction; compounds added for binding the reduced acceptor system are not considered as belonging to the acceptor system
			peropage to the acceptor system

	2. The acceptor system is classified according to the
	supplying substances in case of <u>in situ</u> formation
	of the acceptor system or of <u>in situ</u> regeneration of the reduced acceptor system
F / 4 4	the reduced acceptor system.
5/44	• • with a halogen or a halogen-containing compound
E / 4C	as an acceptor [2]
5/46	 with sulfur or a sulfur-containing compound as an acceptor [2]
F / 40	
5/48	• • with oxygen as an acceptor [2]
5/50	• • with an organic compound as an acceptor [2]
5/52	• • with a hydrocarbon as an acceptor, e.g.
	hydrocarbon disproportionation, i.e. $2 C_n H_p \rightarrow C_n H_{p+q} + C_n H_{p-q}$ [2]
5/54	 with an acceptor system containing at least two
5/54	compounds provided for in more than one of
	groups C07C 5/44-C07C 5/50 [3]
5/56	• • • containing only oxygen and either halogens or
	halogen-containing compounds [3]
6/00	Preparation of hydrocarbons from hydrocarbons
	containing a different number of carbon atoms by
C /02	redistribution reactions [3]
6/02	Metathesis reactions at an unsaturated carbon-to- carbon bond [3]
6/04	 • at a carbon-to-carbon double bond [3]
6/06	• • at a cyclic carbon-to-carbon double bond [3]
6/08	 by conversion at a saturated carbon-to-carbon bond [3]
6/10	 in hydrocarbons containing no six-membered
0/10	aromatic rings [3]
6/12	 of exclusively hydrocarbons containing a six-
0/12	membered aromatic ring [3]
7/00	Purification, separation or stabilisation of
	hydrocarbons; Use of additives [5]
7/04	• by distillation [3]
7/05	• • with the aid of auxiliary compounds [3]
7/06	• • • by azeotropic distillation
7/08	• • • by extractive distillation
7/09	 by fractional condensation [3]
7/10	• by extraction, i.e. purification or separation of liquid
	hydrocarbons with the aid of liquids [3]
7/11	• by absorption, i.e. purification or separation of
7/10	gaseous hydrocarbons with the aid of liquids [3]
7/12	 by adsorption, i.e. purification or separation of hydrocarbons with the aid of solids, e.g. with ion-
	exchangers [3]
7/13	 • by molecular-sieve technique [2, 3]
7/135	 by gas-chromatography [3]
7/14	 by gas enomicography [9] by crystallisation; Purification or separation of the
,, 11	crystals [3]
7/144	• using membranes, e.g. selective permeation [3]
7/148	• by treatment giving rise to a chemical modification of
	at least one compound [3]
7/152	• • by forming adducts or complexes [3]
7/156	• • • with solutions of copper salts [3]
7/163	• • by hydrogenation [3]
7/167	• • • for removal of compounds containing a triple
	carbon-to-carbon bond [3]
7/17	• • with acids or sulfur oxides [3]
7/171	• • • Sulfuric acid or oleum [7]
7/173	• • with the aid of organo-metallic compounds [3]
7/177	
	polymerisation of at least one compound of the
	mixture [3]
7/20	• Use of additives, e.g. for stabilisation [3]

0/00	
9/00	Acyclic saturated hydrocarbons
9/02	• with one to four carbon atoms [5]
9/04	• Methane (production by treatment of sewage
0/06	C02F 11/04) [5] • Ethane
9/06 9/08	
	Propanewith four carbon atoms [5]
9/10 0/12	• • • Iso-butane
9/12	
9/14	• with five to fifteen carbon atoms
9/15 9/16	 Straight-chain hydrocarbons [3] Branched-chain hydrocarbons
9/10 9/18	 Branched-chain hydrocarbons with five carbon atoms [5]
9/18 9/21	 • • 2,2,4-Trimethylpentane [3]
9/21 9/22	 with more than fifteen carbon atoms
5122	with more than inteen carbon atoms
11/00	Acyclic unsaturated hydrocarbons
11/02	Alkenes
11/04	• • Ethene
11/06	• • Propene
11/08	• • with four carbon atoms [5]
11/09	• • • Isobutene [3]
11/10	• • with five carbon atoms [5]
11/107	• • with six carbon atoms [5]

11/14	• • Allene
11/16	• • with four carbon atoms
11/167	• • • 1,3-Butadiene [3]
11/173	• • with five carbon atoms [3]
11/18	• • • Isoprene [3]
11/20	• • • 1,3-Pentadiene [3]
11/21	• Alkatrienes; Alkatetraenes; Other alkapolyenes [2, 3]
11/22	 containing carbon-to-carbon triple bonds
11/24	Acetylene (production of acetylene gas by wet
	methods C10H) [5]
11/28	containing carbon-to-carbon double bonds and
	carbon-to-carbon triple bonds
11/30	• • Butenyne
13/00	Cyclic hydrocarbons containing rings other than, or
10/00	in addition to, six-membered aromatic rings
13/02	Monocyclic hydrocarbons or acyclic hydrocarbon
	derivatives thereof
13/04	• • with a three-membered ring
13/06	• • with a four-membered ring
13/08	 with a five-membered ring
13/10	• • • with a cyclopentane ring
13/11	• • • substituted by unsaturated hydrocarbon
	groups [2]
13/12	• • • with a cyclopentene ring
13/15	• • • with a cyclopentadiene ring [3]
13/16	• • with a six-membered ring
13/18	• • • with a cyclohexane ring
13/19	• • • substituted by unsaturated hydrocarbon
12/20	groups [2]
13/20	• • with a cyclohexene ring
13/21	• • • Menthadienes [2]
13/23	• • with a cyclohexadiene ring [3]
13/24	• with a seven-membered ring
13/26	• with an eight-membered ring
13/263	• • with a cyclo-octene or cyclo-octadiene ring [3]
13/267	• • • with a cyclo-octatriene or cyclo-octatetraene ring [3]
13/271	• • with a nine- to eleven-membered ring [3]
13/2/1	with a mile- to eleven-membered mile [5]

13/273	• • with a twelve-membered ring [3]	
13/275	• • • the twelve-membered ring being	
	unsaturated [3]	
13/277	• • • with a cyclododecatriene ring [3]	
13/28	Polycyclic hydrocarbons or acyclic hydrocarbon derivatives thereaf	
	derivatives thereof	
	<u>Note(s)</u>	
	Ring systems consisting only of condensed six-	
	membered rings with maximum number of non-	
	cumulative double bonds are classified in group	
	C07C 15/00.	
13/32	with condensed rings	
13/34	• • • with a bicyclo ring system containing four carbon atoms	
13/36	• • • with a bicyclo ring system containing five carbon atoms	
13/38	• • • with a bicyclo ring system containing six	
10 100	carbon atoms	
13/39	• • • with a bicyclo ring system containing seven carbon atoms [3]	
13/40	• • • • with a bicycloheptane ring structure [3]	
13/42	• • • • with a bicycloheptene ring structure [3]	
13/43	• • • • substituted by unsaturated acyclic	
10, 10	hydrocarbon groups [3]	
13/44	• • • with a bicyclo ring system containing eight	
	carbon atoms	
13/45	• • with a bicyclo ring system containing nine	
10/405	carbon atoms [3]	
13/465	• • • • Indenes; Completely or partially hydrogenated indenes [3]	
13/47	 • • with a bicyclo ring system containing ten 	
	carbon atoms [3]	
13/48	• • • Completely or partially hydrogenated	
10/50	naphthalenes [3]	
13/50	• • • • Decahydronaphthalenes [3]	
13/52	• • • Azulenes; Completely or partially hydrogenated azulenes [3]	
13/54	 • • with three condensed rings 	
13/547	• • • at least one ring not being six-membered, the	
	other rings being at the most six- membered [3]	
13/553	• • • • Indacenes; Completely or partially	
10,000	hydrogenated indacenes [3]	
13/567	• • • • Fluorenes; Completely or partially	
	hydrogenated fluorenes [3]	
13/573	• • • with three six-membered rings [3]

21/10	• • • Trichloro-ethylene
21/12	• • • Tetrachloro-ethylene
21/14	containing bromine
21/16	• • Crotyl bromide
21/17	 containing iodine [5]
21/18	containing fluorine
21/185	• • • Tetrafluoroethene [5]
21/19	 Halogenated dienes [3]
21/20	Halogenated butadienes [3]
21/21	• • • Chloroprene [3]
21/215	to-carbon double bonds [3]
21/22	containing carbon-to-carbon triple bonds
22/00	Cyclic compounds containing halogen atoms bound to an acyclic carbon atom [5]
22/02	• having unsaturation in the rings [5]
22/04	containing six-membered aromatic rings [5]
22/06 22/08	 • Trichloromethylbenzene [5] • containing fluorine [5]
22/00	Containing nuorine [5]
23/00	Compounds containing at least one halogen atom bound to a ring other than a six-membered aromatic ring
23/00 23/02	bound to a ring other than a six-membered aromatic
	bound to a ring other than a six-membered aromatic ring
23/02	bound to a ring other than a six-membered aromatic ringMonocyclic halogenated hydrocarbons
23/02 23/04	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring
23/02 23/04 23/06	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring
23/02 23/04 23/06 23/08	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring Hexachlorocyclohexanes
23/02 23/04 23/06 23/08 23/10	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring Hexachlorocyclohexanes with a seven-membered ring
23/02 23/04 23/06 23/08 23/10 23/12	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring Hexachlorocyclohexanes with a seven-membered ring with a sight-membered ring
23/02 23/04 23/06 23/08 23/10 23/12 23/14	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring With a seven-membered ring with a seven-membered ring with a n eight-membered ring Polycyclic halogenated hydrocarbons
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring With a six-membered ring With a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring with a six-membered ring Hexachlorocyclohexanes with a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring Hexachlorocyclohexanes With a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing five carbon atoms
23/02 23/04 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring Hexachlorocyclohexanes With a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring Hexachlorocyclohexanes with a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms
23/02 23/04 23/06 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27 23/28	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring Hexachlorocyclohexanes with a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms Saturated bicyclo ring system [5]
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27 23/28 23/20	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring Hexachlorocyclohexanes With a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system [5] with a bicyclo ring system [5]
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27 23/28 23/30 23/32	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring With a seven-membered ring with a seven-membered ring with a seven-membered ring with an eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system [5] Mono-unsaturated bicyclo ring system [5] with a bicyclo ring system containing eight carbon atoms
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27 23/28 23/30 23/32 23/34	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring with a six-membered ring Hexachlorocyclohexanes with a seven-membered ring with a seven-membered ring with a seven-membered ring with a sight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system [5] Mono-unsaturated bicyclo ring system [5] With a bicyclo ring system containing eight carbon atoms Halogenated completely or partially hydrogenated indenes
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27 23/26 23/27 23/28 23/30 23/32 23/34	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring With a six-membered ring With a seven-membered ring with a seven-membered ring with a seven-membered ring with a n eight-membered ring Polycyclic halogenated hydrocarbons with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system [5] Mono-unsaturated bicyclo ring system [5] With a bicyclo ring system containing eight carbon atoms Halogenated completely or partially hydrogenated indenes Halogenated completely or partially hydrogenated naphthalenes
23/02 23/04 23/06 23/08 23/10 23/12 23/14 23/16 23/18 23/20 23/22 23/24 23/26 23/27 23/28 23/30 23/32 23/34	 bound to a ring other than a six-membered aromatic ring Monocyclic halogenated hydrocarbons with a three-membered ring with a four-membered ring with a five-membered ring with a six-membered ring With a six-membered ring Hexachlorocyclohexanes with a seven-membered ring with a seven-membered ring with a seven-membered ring with a sight-membered ring with condensed rings none of which is aromatic with a bicyclo ring system containing four carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing six carbon atoms with a bicyclo ring system containing seven carbon atoms with a bicyclo ring system [5] Mono-unsaturated bicyclo ring system [5] With a bicyclo ring system containing eight carbon atoms Halogenated completely or partially hydrogenated indenes Halogenated completely or partially

23/42	• • • Halogenated completely or partially hydrogenated anthracenes
23/44	• • • Halogenated completely or partially hydrogenated phenanthrenes
23/46	• • • with more than 3 condensed rings
25/00	Compounds containing at least one halogen atom
	bound to a six-membered aromatic ring
25/02	Monocyclic aromatic halogenated hydrocarbons
25/06	Monochloro-benzene [3]
25/08	• • Dichloro-benzenes [3]
25/10	• • Trichloro-benzenes [3]
25/12	Hexachloro-benzene [3]
25/125	• • Halogenated xylenes [2, 3]
25/13	• • containing fluorine [2, 3]
25/18	 Polycyclic aromatic halogenated hydrocarbons
25/20	Dichloro-diphenyl-trichloro-ethane
25/22	with condensed rings
25/24	• Halogenated aromatic hydrocarbons with unsaturated side chains
25/28	Halogenated styrenes [3]

<u>Compounds containing carbon and oxygen, with or without</u> <u>hydrogen or halogens [2]</u>

27/00	Processes involving the simultaneous production of			
27/02		re than one class of oxygen-containing compounds

		gases [5]
29/147	•	• • of carboxylic acids or derivatives thereof [5]
29/149	•	• • • with hydrogen or hydrogen-containing gases [5]
29/15	•	by reduction of oxides of carbon exclusively [3]
29/151	•	• with hydrogen or hydrogen-containing gases [5]
29/152		 characterised by the reactor used [5]
		-
29/153	•	• • characterised by the catalyst used [5]
29/154	•	 containing copper, silver, gold, or compounds thereof [5]
29/156	•	• • • containing iron group metals, platinum group metals, or compounds thereof [5]
29/157	•	• • • containing platinum group metals or
		compounds thereof [5]
29/158	•	• • • • containing rhodium or compounds thereof [5]
29/159	•	• with reducing agents other than hydrogen or
		hydrogen-containing gases [5]
29/16	•	by oxo-reaction combined with reduction
29/17	•	by hydrogenation of carbon-to-carbon double or
23/17		triple bonds [3]
29/19		 in six-membered aromatic rings [3]
	•	
29/20	•	• • in non-condensed rings substituted with hydroxy groups [3]
29/32	•	increasing the number of carbon atoms by reactions without formation of hydroxy groups [3]
29/34		 by condensation involving hydroxy groups or the
20,01		mineral ester groups derived therefrom, e.g.
		Guerbet reaction [3]
29/36	•	increasing the number of carbon atoms by reactions
		with formation of hydroxy groups, which may occur
		<u>via</u> intermediates being derivatives of hydroxy
		groups, e.g. O-metal [3]
29/38	•	 by reaction with aldehydes or ketones [3]
29/40	•	• • with compounds containing carbon-to-metal
		bonds [3]
29/42	•	• • with compounds containing triple carbon-to- carbon bonds, e.g. with metal-alkynes [3]
29/44		increasing the number of carbon atoms by addition
23/44		reactions, i.e. reactions involving at least one carbon-
		to-carbon double or triple bond (C07C 29/16 takes
		precedence) [3]
20/46		 by diene-synthesis [3]
29/46	•	5 5
29/48	•	by oxidation reactions with formation of hydroxy
		groups [3]
29/50	•	• with molecular oxygen only [3]
29/52	•	• • in the presence of mineral boron compounds
		with, when necessary, hydrolysis of the intermediate formed [3]
29/54	•	• • starting from compounds containing carbon-to-
_0,01		metal bonds and followed by conversion of the
		O-metal to hydroxy groups [3]
29/56	•	by isomerisation [3]
		-
29/58	•	by elimination of halogen, e.g. by hydrogenolysis, splitting-off (C07C 29/124 takes precedence) [3]
20/02		
29/60	•	by elimination of hydroxy groups, e.g. by
		dehydration (C07C 29/34 takes precedence) [3]

29/62	• by introduction of halogen; by substitution of halogen	n				
20/04	atoms by other halogen atoms [3]					
29/64	by simultaneous introduction of hydroxy groups and halogens [3]					
29/66	• • by addition of hypohalogenous acids, which may					
	be formed <u>in situ</u> , to carbon-to-carbon unsaturated bonds [3]	l				
29/68	 Preparation of metal-alcoholates (C07C 29/42, 					
	C07C 29/54 take precedence) [3]					
29/70	 by converting hydroxy groups to O-metal 					
	groups [3]					
29/72	• • by oxidation of carbon-to-metal bonds [3]					
29/74	• Separation; Purification; Stabilisation; Use of					
20/76	additives [3]					
29/76	• • by physical treatment [3]					
29/78 29/80	 • by condensation or crystallisation [3] • by distillation [3] 					
29/80	 • • by distillation [3] • • • by azeotropic distillation [3] 					
29/82	 • • • by extractive distillation [3] 					
29/86	 • • by liquid-liquid treatment [3] 					
29/88	 by treatment giving rise to a chemical 					
25/00	modification of at least one compound					
	(chemisorption C07C 29/76) [3]					
29/90	• • • using hydrogen only [3]					
29/92	• • • by a consecutive conversion and					
	reconstruction [3]					
29/94	• • Use of additives, e.g. for stabilisation [3]					
31/00	Saturated compounds having hydroxy or O-metal					
	groups bound to acyclic carbon atoms					
31/02	Monohydroxylic acyclic alcohols					
31/04	• • Methanol					
31/08	• • Ethanol					
31/10	 containing three carbon atoms 					
31/12	 containing four carbon atoms 					
31/125	• • containing five to twenty-two carbon atoms [3]					
31/13	 Monohydroxylic alcohols containing saturated rings [2, 3] 					
31/133	• • monocyclic [3]					
31/135	• • • with five- or six-membered rings; Naphthenic					
	alcohols [3]					
31/137	• polycyclic with condensed ring systems [3]					
31/18	Polyhydroxylic acyclic alcohols					
31/20	Dihydroxylic alcohols					
31/22	• Trihydroxylic alcohols, e.g. glycerol [3]					
31/24	• Tetrahydroxylic alcohols, e.g. pentaerythritol [3]					
31/26	Hexahydroxylic alcohols					
31/27	 Polyhydroxylic alcohols containing saturated rings [3] 					
31/28	Metal alcoholates					
31/30	• • Alkali-metal or alkaline-earth-metal alcoholates					
31/32	Aluminium alcoholates					
31/34	Halogenated alcohols					
31/36	• • the halogen not being fluorine [3]					
31/38	• • containing only fluorine as halogen [3]					
31/40	• • perhalogenated [3]					
31/42	• • Halogenated polyhydroxylic acyclic alcohols [3]					
31/44	Halogenated alcohols containing saturated rings [3]					
33/00	Unsaturated compounds having hydroxy or O-metal groups bound to acyclic carbon atoms					

<u>Note(s)</u>

	In this group, in condensed ring systems of six-				
	membered aromatic rings and other rings, the double bond belonging to a benzene ring is not considered as				
		nd belonging to a benzene ring is not considered as issue as issue as issue as issues as the second se			
		ereon, e.g. the 1,2,3,4-tetrahydro- naphthalene ring is			
		onsidered to be saturated outside the aromatic ring.			
33/02	•	Acyclic alcohols with carbon-to-carbon double bonds			
33/025	•	• with only one double bond [3]			
33/03	•	• in beta-position, e.g. allyl alcohol, methallyl alcohol [3]			
33/035	•	• • Alkenediols [3]			
33/04	•	Acyclic alcohols with carbon-to-carbon triple bonds			
33/042	•	• with only one triple bond [3]			
33/044	•	Alkynediols [3]			
33/046	•	• • • Butynediols [3]			
33/048	•	• with double and triple bonds [3]

33/42	•	• acyclic [3]			
33/44	•	 containing rings other than six-membered aromatic rings [3] 			
33/46	•	 containing only six-membered aromatic rings as 			
		cyclic part [3]			
33/48	•	• • with unsaturation outside the aromatic rings [3]			
33/50	•	• containing six-membered aromatic rings and other			
		rings [3]			
35/00	С	ompounds having at least one hydroxy or O-metal			
55700		oup bound to a carbon atom of a ring other than a			
		x-membered aromatic ring [2]			
35/02	•	monocyclic			
35/04	•	containing three- or four-membered rings			
35/06	•	 containing five-membered rings 			
35/08	•	 containing six-membered rings 			
35/12	•	• • Menthol			
35/14	•	• • with more than one hydroxy group bound to the			
25/16		ring • • • Inositol			
35/16 35/17					
35/17	•	 with unsaturation only outside the ring [3] with unsaturation at least in the ring [3] 			
55/10	-				

35/20	 containing seven- or eight-membered rings 	
35/205	• containing nine- to twelve-membered rings, e.g. cyclododecanols [3]	
35/21	 polycyclic, at least one hydroxy group bound to a non-condensed ring [2] 	
35/22	 polycyclic, at least one hydroxy group bound to a condensed ring system [2] 	
35/23	 with a hydroxy group on a condensed ring system having two rings [3] 	
35/24	• • • the condensed ring system containing five carbon atoms [3]	
35/26	• • • • Bicyclopentadienols [3]	
35/27	• • • the condensed ring system containing six	
	carbon atoms [3]	
35/28	• • • the condensed ring system containing seven carbon atoms [3]	
35/29	• • • • being a [2.2.1] system [3]	
35/30	• • • • Borneol; Isoborneol [3]	
35/31	• • • the condensed ring system containing eight carbon atoms [3]	
35/32	• • the condensed ring system being a [4.3.0] system, e.g. indenols [3]	
35/34	• • • the condensed ring system being a [5.3.0] system, e.g. azulenols [3]	
35/36	• • • the condensed ring system being a [4.4.0] system, e.g. hydrogenated naphthols [3]	
35/37	• • with a hydroxy group on a condensed ring system having three rings [3]	
35/38	• • • derived from the fluorene skeleton [3]	
35/40	• • • derived from the anthracene skeleton [3]	
35/42	• • • derived from the phenanthrene skeleton [3]	
35/44	 with a hydroxy group on a condensed ring system having more than three rings 	
35/46	 O-metal derivatives of the cyclically bound hydroxy groups [3] 	
35/48	Halogenated derivatives [3]	
35/50	• • Alcohols with at least two rings [3]	
35/52	• • Alcohols with a condensed ring system [3]	
37/00	Preparation of compounds having hydroxy or O- metal groups bound to a carbon atom of a six- membered aromatic ring	
37/01	 by replacing functional groups bound to a six- 	
	membered aromatic ring by hydroxy groups, e.g. by hydrolysis [3]	
37/02	• • by substitution of halogen [3]	
37/04	 by substitution of SO₃H groups or a derivative thereof [3] 	
37/045	 by substitution of a group bound to the ring by nitrogen [3] 	
37/05	 • • by substitution of a NH₂ group [3] 	
37/055	 by substitution of a group bound to the ring by oxygen, e.g. ether group [3] 	
37/06	 by conversion of non-aromatic six-membered rings or of such rings formed <u>in situ</u> into aromatic six- 	
	membered rings, e.g. by dehydrogenation	
37/07	 with simultaneous reduction of C=O group in that ring [3] 	
37/08	 by decomposition of hydroperoxides, e.g. cumene hydroperoxide 	
37/11	 by reactions increasing the number of carbon atoms [3] 	
37/14	 by addition reactions, i.e. reactions involving at least one carbon-to-carbon unsaturated bond [3] 	
	[9]	

37/16	• • by condensation involving hydroxy groups of
	phenols or alcohols or the ether or mineral ester
	group derived therefrom [3]
37/18	by condensation involving halogen atoms of
27/20	halogenated compounds
37/20	• using aldehydes or ketones
37/48	• by exchange of hydrocarbon groups which may be substituted, from other compounds, e.g.
	transalkylation [3]
37/50	 by reactions decreasing the number of carbon atoms
	(C07C 37/01, C07C 37/08, C07C 37/48 take
	precedence) [3]
37/52	• • by splitting polyaromatic compounds, e.g.
	polyphenolalkanes [3]
37/54	• • by hydrolysis of lignin or sulfite waste
37/56	liquor [3]
37730	 by replacing a carboxyl or aldehyde group by a hydroxy group [3]
37/58	 by oxidation reactions introducing directly a hydroxy
07700	group on a CH-group belonging to a six-membered
	aromatic ring with the aid of molecular oxygen [3]
37/60	• by oxidation reactions introducing directly a hydroxy
	group on a CH-group belonging to a six-membered
	aromatic ring with the aid of other oxidants than
	molecular oxygen or their mixtures with molecular oxygen [3]
37/62	 by introduction of halogen; by substitution of halogen
07702	atoms by other halogen atoms [3]
37/64	• Preparation of O-metal compounds with the O-metal
	group linked to a carbon atom belonging to a six-
	membered aromatic ring [3]
37/66	• • by conversion of hydroxy groups to O-metal
27/60	groups [3]
37/68	 Separation; Purification; Stabilisation; Use of additives [3]
37/70	 • by physical treatment [3]
37/72	 • • by liquid-liquid treatment [3]
37/74	 • • by distillation [3]
37/76	• • • by steam distillation [3]
37/78	• • • by azeotropic distillation [3]
37/80	• • • by extractive distillation [3]
37/82	• • • by solid-liquid treatment; by chemisorption [3]
37/84	• • • by crystallisation [3]
37/86	• • by treatment giving rise to a chemical
	modification (by chemisorption C07C 37/82) [3]
37/88	• • Use of additives, e.g. for stabilisation [3]
39/00	Compounds having at least one hydrowy or O metal
39/00	Compounds having at least one hydroxy or O-metal group bound to a carbon atom of a six-membered
	aromatic ring
	Noto(s)
	Note(s)
	In this group, in condensed ring systems of six- membered aromatic rings and other rings, the double
	bond belonging to the benzene ring is not considered as
	unsaturated for the non-aromatic ring condensed
	thereon.
39/02	• monocyclic with no unsaturation outside the aromatic
DO (0.5	ring
39/04	Phenol
39/06	Alkylated phenols
39/07	• • containing only methyl groups as alkyl groups,
39/08	e.g. cresols, xylenols [3]Dihydroxy bonzenes: Alkylated derivatives thereof

- 39/08 • Dihydroxy benzenes; Alkylated derivatives thereof
- 39/10 Polyhydroxy benzenes; Alkylated derivatives thereof (C07C 39/08 takes precedence)

39/11	 Alkylated hydroxy benzenes containing also acyclically bound hydroxy groups, e.g. saligenol [3]
39/12	• polycyclic with no unsaturation outside the aromatic
39/14	ringswith at least one hydroxy group on a condensed
39/15	ring system containing two rings [3]with all hydroxy groups on non-condensed
	rings [3]
39/16	• • Bis(hydroxy phenyl)alkanes; Tris(hydroxy phenyl)alkanes [3]
39/17	 containing other rings in addition to the six- membered aromatic rings [2]
39/18	• monocyclic with unsaturation outside the aromatic
39/19	ringcontaining carbon-to-carbon double bonds but no
00 (00	carbon-to-carbon triple bonds [3]
39/20	• • • Hydroxy styrenes [3]
39/205	 polycyclic, containing only six-membered aromatic
	rings as cyclic part, with unsaturation outside the rings [3]
20/21	-
39/21	 with at least one hydroxy group on a non- condensed ring [3]
	-
	но- () -с=с- () -он
39/215	• • • containing the
20/225	structure, e.g. diethylstilbestrol [3]
39/225	 with at least one hydroxy group on a condensed ring system [3]
39/23	 polycyclic, containing six-membered aromatic rings
55/25	and other rings, with unsaturation outside the
	aromatic rings [3]
39/235	 Metal derivatives of a hydroxy group bound to a six-
007200	membered aromatic ring [3]
39/24	Halogenated derivatives
39/26	monocyclic monohydroxylic containing halogen
	bound to ring carbon atoms
39/27	• • all halogen atoms being attached to the ring
39/28	• • • the halogen being one chlorine atom
39/30	• • • the halogen being two chlorine atoms
39/32	• • • • the halogen being three chlorine atoms
39/34	• • • • the halogen being four chlorine atoms
39/36	• • • • Pentachlorophenol
39/367	• • polycyclic non-condensed, containing only six-
	membered aromatic rings, e.g. halogenated poly-
	(hydroxy-phenyl)alkanes [3]
39/373	• • with all hydroxy groups on non-condensed rings
	and with unsaturation outside the aromatic
	rings [3]
39/38	• • with at least one hydroxy group on a condensed
	 with at least one hydroxy group on a condensed ring system containing two rings
39/38 39/40	 with at least one hydroxy group on a condensed ring system containing two rings with at least one hydroxy group on a condensed
39/40	 with at least one hydroxy group on a condensed ring system containing two rings with at least one hydroxy group on a condensed ring system containing more than two rings [3]
	 with at least one hydroxy group on a condensed ring system containing two rings with at least one hydroxy group on a condensed ring system containing more than two rings [3] containing six-membered aromatic rings and other

43/168	•	•	• • • containing six-membered aromatic rings
			and other rings [3]
43/17	•	•	 containing halogen [2, 3]
43/172	•	•	• • • containing rings other than six-membered
			aromatic rings [3]
43/174	•	•	• • • containing six-membered aromatic
47/170	_	_	rings [3]
43/176	•	•	• • • having unsaturation outside the aromatic rings [3]
43/178		•	 containing hydroxy or O-metal groups [3]
43/18		•	having an ether-oxygen atom bound to a carbon
45/10			atom of a ring other than a six-membered aromatic
			ring
43/184	•	•	• to a carbon atom of a non-condensed ring [3]
43/188	•	•	Unsaturated ethers [3]
43/192	•	•	 containing halogen [3]
43/196	•	•	 containing hydroxy or O-metal groups [3]
43/20	•	•	having an ether-oxygen atom bound to a carbon
			atom of a six-membered aromatic ring
43/205	•	•	• the aromatic ring being a non-condensed
43/21			ring [3]containing rings other than six-membered
43/21	•	•	aromatic rings [3]
43/215	•	•	 having unsaturation outside the six-membered
10/ 110			aromatic rings [3]
43/225	•	•	• containing halogen [3]
43/23	•	•	• containing hydroxy or O-metal groups [3]
43/235	•	•	having an ether-oxygen atom bound to a carbon
			atom of a six-membered aromatic ring and to a
			carbon atom of a ring, other than a six-membered
43/243			aromatic ring [3]having unsaturation outside the six-membered
43/243	•	•	aromatic rings [3]
43/247	•	•	 containing halogen [3]
43/253	•	•	 containing hulogen [3] containing hydroxy or O-metal groups [3]
43/257	•	•	having an ether-oxygen atom bound to carbon
			atoms both belonging to six-membered aromatic
			rings [3]
43/263	•	•	• the aromatic rings being non-condensed [3]
43/267	•	•	• containing other rings [3]
43/275	•	•	having all ether-oxygen atoms bound to carbon
10 /00-			atoms of six-membered aromatic rings [3]
43/285	•	•	having unsaturation outside the six-membered aromatic rings [3]
43/29			aromatic rings [3] containing halogen [3]
43/29 43/295	•	•	 containing halogen [5] containing hydroxy or O-metal groups [3]
-31233	,	,	containing nyeroxy or O-metal groups [5]

43/30	Compounds having	, >C< ^{O-} 0-C	groups
	1 (,	0 1

Note(s)

In this group, the acetal carbon atom is the carbon of the >C<⁰⁻⁰ group.

43/303 • having acetal carbon atoms bound to acyclic carbon atoms [3] 43/305 • • having acetal carbon atoms as ring members or bound to carbon atoms of rings other than sixmembered aromatic rings [3] having acetal carbon atoms bound to carbon atoms 43/307 of six-membered aromatic rings [3] 43/313 containing halogen [3] • • 43/315 containing oxygen atoms singly bound to carbon ٠ atoms not being acetal carbon atoms [3]

having $>C < 0-X \\ 0-C$ groups, X being hydrogen or 43/317 • • metal [3]

45/00 **Preparation of compounds having** C=O groups bound only to carbon or hydrogen atoms; Preparation of chelates of such compounds [2] 45/26 by hydration of carbon-to-carbon triple bonds [3] 45/27 by oxidation [3] •

45/28 • • of —CH_x-moieties [3]

43/32

- 45/29 of hydroxy groups [3] • ٠
- 45/30 with halogen containing compounds, e.g. • hypohalogenation [3]
- 45/31 with compounds containing mercury atoms, which may be regenerated *in situ*, e.g. by oxygen [3] 45/32 with molecular oxygen [3] 45/33 • of CH_x-moieties [3]
- 45/34 • in unsaturated compounds [3]
- 45/35 in propene or isobutene [3] ٠ .
- 45/36 in compounds containing six-membered • ٠ • aromatic rings [3] 45/37 • of C-O functional groups to C=O
- groups [3] 45/38 • being a primary hydroxy group [3]
- 45/39 • • being a secondary hydroxy group [3]
- 45/40• by oxidation with ozone; by ozonolysis [3]
- 45/41 by hydrogenolysis or reduction of carboxylic groups or functional derivatives thereof [3] 45/42
- by hydrolysis [3] 45/43 • of CX2 groups, X being halogen [3]
- 45/44 by reduction and hydrolysis of nitriles [3]
- 45/45 by condensation [3] 45/46
- Friedel-Crafts reactions [3] 45/47 using phosgene [3]
- 45/48 involving decarboxylation [3] ٠
- 45/49 • by reaction with carbon monoxide [3]
- 45/50 by oxo-reactions [3] • ٠
- 45/51 by pyrolysis, rearrangement or decomposition [3] •
- by dehydration and rearrangement involving two 45/52 • hydroxy groups in the same molecule [3] 45/53 of hydroperoxides [3] . .
- 45/54 • of compounds containing doubly bound oxygen atoms, e.g. esters [3]

45/55	• • of oligo, or polymeric ave compounds [2]
	• of oligo- or polymeric oxo-compounds [3]
45/56	• from heterocyclic compounds (C07C 45/55 takes precedence) [3]
45/57	
45/57	• • with oxygen as the only hetero atom [3]
45/58	• • • in three-membered rings [3]
45/59	• • in five-membered rings (from ozonides C07C 45/40) [3]
45/60	• • • in six-membered rings [3]
45/61	• by reactions not involving the formation of C=O
	groups [3]
45/62	 by hydrogenation of carbon-to-carbon double or triple bonds [3]
45/63	• • by introduction of halogen; by substitution of
45/64	halogen atoms by other halogen atoms [3]by introduction of functional groups containing
	oxygen only in singly bound form [3]
45/65	• • by splitting-off hydrogen atoms or functional
	groups; by hydrogenolysis of functional groups [3]
45/66	• • • by dehydration [3]
45/67	• • by isomerisation; by change of size of the carbon skeleton [3]
45/68	• • • by increase in the number of carbon atoms [3]
45/69	• • • • by addition to carbon-to-carbon double or triple bonds [3]
45/70	 • • • by reaction with functional groups
45770	containing oxygen only in singly bound
	form [3]
45/71	• • • • • being hydroxy groups [3]
45/72	• • • by reaction of compounds containing C=O
	groups with the same or other compounds containing $C=O$ groups [3]
45/73	• • • • • combined with hydrogenation [3]
45/74	• • • • • combined with dehydration [3]
45/75	• • • • • Reactions with formaldehyde [3]
45/76	• • • with the aid of ketenes [3]
45/77	• Preparation of chelates of aldehydes or ketones [3]
45/78	• Separation; Purification; Stabilisation; Use of
	additives [3]
45/79	• • by solid-liquid treatment; by chemisorption [3]
45/80	• • by liquid-liquid treatment [3]
45/81	• • by change in the physical state, e.g.
	crystallisation [3]
45/82	• • • by distillation [3]
45/83	• • • • by extractive distillation [3]
45/84	• • • • by azeotropic distillation [3]
45/85	• • by treatment giving rise to a chemical
	modification [3]
45/86	• Use of additives, e.g. for stabilisation [3]
45/87	 Preparation of ketenes or dimeric ketenes [3]
45/88	• • from ketones [3]
45/89	• from carboxylic acids, their anhydrides, esters or halides [3]
45/90	• • Separation; Purification; Stabilisation; Use of additives [3]
40 /00	Demonstrian of main and [2]
46/00	Preparation of quinones [3]
46/02 46/04	 by oxidation giving rise to quinoid structures [3] of unsubstituted ring carbon atoms in six-
46/04	membered aromatic rings [3]
46/06	• • of at least one hydroxy group on a six-membered
10.15-	aromatic ring [3]
46/08	• • with molecular oxygen [3]
46/10	 Separation; Purification; Stabilisation; Use of additives [3]
47/00	Compounds having —CHO groups

47/02	•	Saturated compounds having —CHO groups bound
47/04	_	to acyclic carbon atoms or to hydrogen
47/04 47/042		 Formaldehyde Preparation from carbon monoxide [3]
47/042	•	 Preparation from carbon monoxide [3] Preparation by depolymerisation [3]
47/043		 Preparation by oxidation of hydrocarbons [3]
47/048		 Preparation by oxidation of methanol [3]
47/052		 • using noble metals or compounds thereof as
477033	•	catalysts [3]
47/058	•	• • Separation; Purification; Stabilisation; Use of additives [3]
47/06	•	Acetaldehyde
47/07	•	Preparation by oxidation [3]
47/09	•	• • Separation; Purification; Stabilisation; Use of additives [3]
47/105	•	• containing rings [3]
47/11	•	• • monocyclic [3]
47/115	•	• • containing condensed ring systems [3]
47/12	•	 containing more than one —CHO group
47/127	•	• • Glyoxal [3]
47/133	•	• • containing rings [3]
47/14	•	containing halogen
47/16	•	Trichloroacetaldehyde
47/17	•	• • containing rings [3]
47/19	•	• containing hydroxy groups [2, 3]
47/192		• • containing rings [3]
47/195	•	• • containing halogen [3]
47/198	•	• containing ether groups, $2C_{0-C}^{0-}$ groups,
		Π_
		0-C groups, or 0-C groups [3]
47/20	•	Uncert groups, or Uncert groups [3] Unsaturated compounds having —CHO groups
	•	Unsaturated compounds having —CHO groups bound to acyclic carbon atoms
47/20 47/21	•	Uncert groups, or Uncert groups [3] Unsaturated compounds having —CHO groups
	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3]
47/21	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3]
47/21 47/22	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3]
47/21 47/22	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered
47/21 47/22 47/222 47/225	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3]
47/21 47/22 47/222	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g.
47/21 47/22 47/222 47/225	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3]
47/21 47/22 47/222 47/225 47/228	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3]
47/21 47/22 47/222 47/225 47/228 47/23 47/23	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3]
47/21 47/22 47/222 47/225 47/228 47/23	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic
47/21 47/22 47/222 47/225 47/228 47/23 47/23	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] having unsaturation outside the aromatic
47/21 47/22 47/225 47/225 47/228 47/232 47/235 47/235	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] playugate aromatic rings [3] containing six-membered aromatic rings [3] containing six-membered aromatic rings [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] having unsaturation outside the aromatic rings [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing six-membered aromatic rings and other rings [3] containing halogen
47/21 47/22 47/225 47/228 47/238 47/235 47/238 47/238	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing hydroxy groups [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen acyclic [3]
47/21 47/22 47/225 47/228 47/23 47/23 47/235 47/238 47/238 47/24 47/26 47/26 47/263 47/263	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238 47/26 47/263 47/263 47/267	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing rings other than six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3]
47/21 47/22 47/225 47/228 47/23 47/23 47/235 47/238 47/238 47/24 47/26 47/26 47/263 47/263	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238 47/238 47/26 47/26 47/263 47/267 47/27	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238 47/26 47/263 47/263 47/267	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing rings other than six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238 47/238 47/26 47/26 47/263 47/267 47/27	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing halogen containing six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3] containing rings other than six-membered aromatic rings [3] containing halogen [3] containing rings other than six-membered aromatic rings [3] containing halogen [3] containing rings other than six-membered aromatic rings [3] containing halogen [3] containing six-membered aromatic rings [3] containing halogen [3] containing halogen [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238 47/238 47/26 47/26 47/263 47/267 47/27	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing halogen containing six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3] containing rings other than six-membered aromatic rings [3] containing halogen [3] containing rings other than six-membered aromatic rings [3] containing halogen [3] containing rings other than six-membered aromatic rings [3] containing halogen [3] containing six-membered aromatic rings [3] containing halogen [3] containing halogen [3]
47/21 47/22 47/225 47/228 47/238 47/232 47/235 47/238 47/238 47/238 47/26 47/26 47/263 47/267 47/27	•	 U-C groups, or U-C groups [3] Unsaturated compounds having —CHO groups bound to acyclic carbon atoms with only carbon-to-carbon double bonds as unsaturation [3] Acrylaldehyde; Methacrylaldehyde [3] with only carbon-to-carbon triple bonds as unsaturation [3] containing rings other than six-membered aromatic rings [3] containing six-membered aromatic rings, e.g. phenylacetaldehyde [3] polycyclic [3] having unsaturation outside the aromatic rings [3] containing six-membered aromatic rings and other rings [3] containing halogen containing halogen containing rings other than six-membered aromatic rings [3] containing halogen containing rings other than six-membered aromatic rings [3]

47/28			
	•	Satura	ted compounds having —CHO groups bound
		to carb	oon atoms of rings other than six-membered
			tic rings
47/293	•		h a three- or four-membered ring [3]
47/30	•	 with 	h a five-membered ring
47/32	•	 with 	h a six-membered ring
47/33	•	 with 	h a seven- to twelve-membered ring [3]
47/34	•		ycyclic
47/347	•	•• ł	naving a —CHO group on a condensed ring
		5	system [3]
47/353	•	• con	taining halogen [3]
47/36	•	• con	taining hydroxy groups
47/37	•	• con	taining ether groups, $2C < 0-C$ groups,
			- /
		c/	
		-L ,	
			0- 0- 0-C 0-C 0-C 0-C 0-C groups, or 0-C 0-C 0-C 0-C 0-C 0-C 0-C 0-C
47/38	•	Unsati	irated compounds having —CHO groups
			to carbon atoms of rings other than six-
47/205			ered aromatic rings
47/395			h a three- or four-membered ring [3]
47/40			h a five-membered ring [3]
47/42			h a six-membered ring [3]
47/43			h a seven- to twelve-membered ring [3]
			ycyclic [3]
			containing a condensed ring system [3]

50/32	•	•	the quinoid structure being part of a condensed
			ring system having two rings [3]

50/34	• • the quinoid structure being part of a condensed ring system having three rings [3]
50/36	• • the quinoid structure being part of a condensed
50 (00	ring system having four or more rings [3]
50/38	• containing —CHO or non-quinoid keto groups [3]
51/00	Preparation of carboxylic acids or their salts, halides, or anhydrides [2]
51/02	from salts of carboxylic acids
51/04	from carboxylic acid halides
51/06	• from carboxylic acid amides
51/08	• from nitriles
51/083	 from carboxylic acid anhydrides [3]
51/087	 by hydrolysis [3]
51/09	 from carboxylic acid esters or lactones
51,00	(saponification of carboxylic acid esters C07C 27/02)
51/093	• by hydrolysis of —CX ₃ groups, X being halogen [3]
51/097	 from or <u>via</u> nitro-substituted organic compounds [3]
51/10	 by reaction with carbon monoxide
51/10	 on an oxygen-containing group in organic
51/12	compounds, e.g. alcohols
51/14	• • on a carbon-to-carbon unsaturated bond in organic
	compounds [3]
51/145	• • with simultaneous oxidation [3]
51/15	 by reaction of organic compounds with carbon
	dioxide, e.g. Kolbe-Schmitt synthesis [2]
51/16	 by oxidation (C07C 51/145 takes precedence) [3]
51/21	• • with molecular oxygen [3]
51/215	• • • of saturated hydrocarbyl groups [3]
51/225	• • • • of paraffin waxes [3]
51/23	• • • of oxygen-containing groups to carboxyl
	groups [3]
51/235	• • • of —CHO groups or primary alcohol groups [3]
51/245	• • • of keto groups or secondary alcohol
51/25	groups [3] • • • of unsaturated compounds containing no six-
	membered aromatic ring [3]
51/255	• • • of compounds containing six-membered aromatic rings without ring-splitting [3]
51/265	 having alkyl side chains which are oxidised to carboxyl groups [3]
51/27	• • with oxides of nitrogen or nitrogen-containing
	mineral acids [3]
51/275	• • • of hydrocarbyl groups [3]
51/285	• • with peroxy-compounds [3]
51/29	• • with halogen-containing compounds which may
	be formed <u>in situ</u> [3]
51/295	• with inorganic bases, e.g. by alkali fusion [3]
51/305	• • with sulfur or sulfur-containing compounds [3]
51/31	• • of cyclic compounds with ring-splitting [3]
51/34	• by oxidation with ozone; by hydrolysis of
E4 (D 4E	ozonides [3]
51/347	 by reactions not involving formation of carboxyl groups [3]
51/353	 by isomerisation; by change of size of the carbon
21,000	skeleton [3]
51/36	 by hydrogenation of carbon-to-carbon unsaturated bonds [3]
51/363	 by introduction of halogen; by substitution of
505	halogen atoms by other halogen atoms [3]
51/367	• • by introduction of functional groups containing oxygen only in singly bound form [3]
51/373	 by introduction of functional groups containing
01/0/0	oxygen only in doubly bound form [3]
	, , , , , , , , , , , , , , , , , , ,

51/377	•	 by splitting-off hydrogen or functional groups; by hydrogenolysis of functional groups [3] 	53/50	• • • of acids containing three or more carbon atoms [3]
51/38	•	• • by decarboxylation [3]		
51/41		Preparation of salts of carboxylic acids by conversion of the acids or their salts into salts with the same	55/00	Saturated compounds having more than one carboxyl group bound to acyclic carbon atoms [2]
		carboxylic acid part (preparation of soap C11D) [3]	55/02	Dicarboxylic acids
51/42	•	Separation; Purification; Stabilisation; Use of	55/06	• Oxalic acid
		additives [3]	55/07	• • • Salts thereof [3]
51/43	•	• by change of the physical state, e.g.	55/08	Malonic acid
		crystallisation [3]	55/10	Succinic acid
51/44	•	• • by distillation [3]	55/12	Glutaric acid
51/46		 • • by azeotropic distillation [3] 	55/14	Adipic acid
51/47		 by solid-liquid treatment; by chemisorption [3] 	55/14	Pimelic acid
51/47		 by solid-liquid treatment by liquid-liquid treatment 		
			55/18	Azelaic acid
51/487	•	• by treatment giving rise to chemical modification	55/20	Sebacic acid
F1 / 400		(by chemisorption C07C 51/47) [3]	55/21	Dicarboxylic acids having twelve carbon
		• whereby carboxylic acid esters are formed [3]	(22	atoms [3]
51/50		• Use of additives, e.g. for stabilisation [3]	55/22	Tricarboxylic acids
51/54	•	Preparation of carboxylic acid anhydrides (by	55/24	 containing more than three carboxyl groups
		oxidation C07C 51/16)	55/26	 containing rings [3]
51/56		 from organic acids, their salts, or their esters 	55/28	• • monocyclic [3]
51/567	•	 by reactions not involving the carboxylic acid 	55/30	• • containing condensed ring systems [3]
		anhydride group [3]	55/32	• containing halogen [3]
51/573	•	 Separation; Purification; Stabilisation; Use of 	55/34	• • containing rings [3]
		additives [3]	55/36	Acyl halides [3]
51/58	•	Preparation of carboxylic acid halides	55/38	 • containing rings [3]
51/60	•	 by conversion of carboxylic acids or their 	55/40	 containing halogen outside the carbonyl halide
		anhydrides into halides with the same carboxylic acid part [3]	55/40	group [3]
51/62	•	 by reactions not involving the carboxylic acid halide group [3] 	57/00	Unsaturated compounds having carboxyl groups bound to acyclic carbon atoms [2]
51/64	•	 Separation; Purification; Stabilisation; Use of additives [3] 	57/02	• with only carbon-to-carbon double bonds as unsaturation
	_		57/03	Monocarboxylic acids [3]

57/34	• • containing more than one carboxyl group [3]
57/36	• • • Phenylmalonic acid [3]
57/38	• • polycyclic [3]
57/40	• • • containing condensed ring systems [3]
57/42	• • having unsaturation outside the rings [3]
57/44	• • • Cinnamic acid [3]
57/46	• containing six-membered aromatic rings and other
57/48	 rings, e.g. cyclohexylphenylacetic acid [3] having unsaturation outside the aromatic rings [3]
57/40 57/50	 naving unsaturation outside the aromatic rings [5] containing condensed ring systems [3]
57/52	 containing contensed ring systems [5] containing halogen [3]
57/54	 Halogenated acrylic or methacrylic acids [3]
57/56	 containing rings other than six-membered
07700	aromatic rings [3]
57/58	• • containing six-membered aromatic rings [3]
57/60	• • • having unsaturation outside the rings [3]
57/62	• • containing six-membered aromatic rings and other
	rings [3]
57/64	Acyl halides [3]
57/66	• • with only carbon-to-carbon double bonds as
F7/C0	unsaturation [3]
57/68	 with only carbon-to-carbon triple bonds as unsaturation [3]
57/70	 containing rings other than six-membered
	aromatic rings [3]
57/72	• • containing six-membered aromatic rings [3]
57/74	 containing six-membered aromatic rings and other
	rings [3]
57/76	containing halogen outside the carbonyl halide groups [2]
	groups [3]
59/00	Compounds having carboxyl groups bound to acyclic
39/00	
39/00	carbon atoms and containing any of the groups OH,
59/00	carbon atoms and containing any of the groups OH, $\sum_{i=1}^{n} C_{i}^{n-1}$
39/00	
33/00	carbon atoms and containing any of the groups OH, $\sum_{i=1}^{n} C_{i}^{n-1}$
33/00	carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, $C = 0^{-}$ groups, 0^{-} $0^$
33/00	carbon atoms and containing any of the groups OH, $\sum_{i=1}^{n} C_{i}^{n-1}$
59/01	carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, $\begin{array}{c} & & \\ & & $
59/01	carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, $\begin{array}{c} & & \\$
59/01 59/06	<pre>carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, -C_O-C C_O-C C_O-C groups, -C_O-C groups, or O-C groups [2] • Saturated compounds having only one carboxyl group and containing hydroxy or O-metal groups [3] • • Glycolic acid [3]</pre>
59/01 59/06 59/08	<pre>carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, -COCOCOC -COO</pre>
59/01 59/06 59/08 59/10	<pre>carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, -C_O-C groups, or -C_O-C groups, or -C_O-C groups, or -C_O-C groups [2] • Saturated compounds having only one carboxyl group and containing hydroxy or O-metal groups [3] • Glycolic acid [3] • Lactic acid [3] • Polyhydroxy carboxylic acids</pre>
59/01 59/06 59/08	<pre>carbon atoms and containing any of the groups OH, O-metal, —CHO, keto, ether, -C_O-C groups, or -C_O-C groups, or -C_O-C groups, or -C_O-C groups [2] • Saturated compounds having only one carboxyl group and containing hydroxy or O-metal groups [3] • Glycolic acid [3] • Lactic acid [3] • Polyhydroxy carboxylic acids • • having five or more carbon atoms, e.g. aldonic</pre>

Compounds containing carbon and nitrogen with or without hydrogen, halogens or oxygen [5]

201/00	Preparation of esters of nitric or nitrous acid or of compounds containing nitro or nitroso groups bound to a carbon skeleton [5]
201/02	 Preparation of esters of nitric acid [5]
201/04	• Preparation of esters of nitrous acid [5]
201/06	Preparation of nitro compounds [5]
201/08	 by substitution of hydrogen atoms by nitro groups [5]
201/10	 by substitution of functional groups by nitro groups [5]
201/12	 by reactions not involving the formation of nitro groups [5]
201/14	 by formation of nitro groups together with reactions not involving the formation of nitro groups [5]
201/16	• • Separation; Purification; Stabilisation; Use of additives [5]
203/00	Esters of nitric or nitrous acid [5]
203/02	• Esters of nitric acid [5]
203/04	 having nitrate groups bound to acyclic carbon atoms [5]
203/06	• • • Glycerol trinitrate [5]
203/08	• • having nitrate groups bound to carbon atoms of rings other than six-membered aromatic rings [5]

203/10	• • having nitrate groups bound to carbon atoms of six-membered aromatic rings [5]
205/00	Compounds containing nitro groups bound to a carbon skeleton [5]
205/01	 having nitro groups bound to acyclic carbon atoms [5]
205/02	• • of a saturated carbon skeleton [5]
205/03	• • of an unsaturated carbon skeleton [5]
205/04	• • • containing six-membered aromatic rings [5]
205/05	 having nitro groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
205/06	 having nitro groups bound to carbon atoms of six- membered aromatic rings [5]
205/07	 the carbon skeleton being further substituted by halogen atoms [5]
205/08	 having nitro groups bound to acyclic carbon atoms [5]
205/09	• • • of an unsaturated carbon skeleton [5]
205/10	• having nitro groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
205/11	 having nitro groups bound to carbon atoms of six- membered aromatic rings [5]
205/12	 the six-membered aromatic ring or a condensed ring system containing that ring being substituted by halogen atoms [5]
205/13	 the carbon skeleton being further substituted by hydroxy groups [5]
205/14	 having nitro groups and hydroxy groups bound to acyclic carbon atoms [5]
205/15	• • • of a saturated carbon skeleton [5]
205/16	• • • of a carbon skeleton containing six-membered aromatic rings [5]
205/17	 having nitro groups bound to acyclic carbon atoms and hydroxy groups bound to carbon atoms of six- membered aromatic rings [5]
205/18	 having nitro groups or hydroxy groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
205/19	 having nitro groups bound to carbon atoms of six- membered aromatic rings and hydroxy groups bound to acyclic carbon atoms [5]
205/20	• • having nitro groups and hydroxy groups bound to carbon atoms of six-membered aromatic rings [5]
205/21	 having nitro groups and hydroxy groups bound to carbon atoms of the same non-condensed six-membered aromatic ring [5]
205/22	• • • • having one nitro group bound to the ring [5]
205/23	• • • having two nitro groups bound to the ring [5]
205/24	• • • having three, and only three, nitro groups bound to the ring [5]
205/25	 having nitro groups bound to carbon atoms of six-membered aromatic rings being part of a condensed ring system [5]
205/26	• • and being further substituted by halogen atoms [5]
205/27	 the carbon skeleton being further substituted by etherified hydroxy groups [5]
205/28	 having nitro groups and etherified hydroxy groups bound to acyclic carbon atoms of the carbon skeleton [5]
205/29	• • • the carbon skeleton being saturated [5]
205/29	• • • • the oxygen atom of at least one of the
203730	etherified hydroxy groups being further bound to a carbon atom of a six-membered aromatic ring [5]

205/31	 • the carbon skeleton containing six-membered aromatic rings [5] 	
205/32	 having nitro groups bound to acyclic carbon atoms and etherified hydroxy groups bound to carbon atoms of six-membered aromatic rings of the 	
205/33	carbon skeleton [5]having nitro groups or etherified hydroxy groups	
	bound to carbon atoms of rings other than six- membered aromatic rings of the carbon skeleton [5]	
205/34	 having nitro groups bound to carbon atoms of six- membered aromatic rings and etherified hydroxy groups bound to acyclic carbon atoms of the carbon skeleton [5]

211/40	 having at least two amino groups bound to the
_	carbon skeleton [5]
211/50	• • • with at least two amino groups bound to carbon atoms of six-membered aromatic
	rings of the carbon skeleton [5]
211/51	• • • • • Phenylenediamines [5]
211/52	• • • the carbon skeleton being further substituted by
	halogen atoms or by nitro or nitroso groups [5]
211/53	• • having the nitrogen atom of at least one of the amino groups further bound to a hydrocarbon
211/54	radical substituted by amino groups [5]
211/54	 having amino groups bound to two or three six- membered aromatic rings [5]
211/55	• • • Diphenylamines [5]
211/56	• • • the carbon skeleton being further substituted by halogen atoms or by nitro or nitroso groups [5]
211/57	• • having amino groups bound to carbon atoms of
	six-membered aromatic rings being part of
211/58	 condensed ring systems of the carbon skeleton [5] Naphthylamines; N-substituted derivatives
211/50	thereof [5]
211/59	• • • the carbon skeleton being further substituted by
211/60	 halogen atoms or by nitro or nitroso groups [5] containing a ring other than a six-membered
211/00	aromatic ring forming part of at least one of the
	condensed ring systems [5]
211/61	• • • with at least one of the condensed ring systems
	formed by three or more rings [5]
211/62	Quaternary ammonium compounds [5]
211/63	• • having quaternised nitrogen atoms bound to acyclic carbon atoms [5]
211/64	 having quaternised nitrogen atoms bound to
	carbon atoms of six-membered aromatic rings [5]
211/65	 Metal complexes of amines [5]
213/00	Preparation of compounds containing amino and
210/00	hydroxy, amino and etherified hydroxy or amino and
	esterified hydroxy groups bound to the same carbon
213/02	skeleton [5]by reactions involving the formation of amino groups
213/02	from compounds containing hydroxy groups or
213/04	etherified or esterified hydroxy groups [5]by reaction of ammonia or amines with olefin oxides
210/04	or halohydrins [5]
213/06	 from hydroxy amines by reactions involving the etherification or esterification of hydroxy groups [5]
213/08	 by reactions not involving the formation of amino
	groups, hydroxy groups or etherified or esterified
	hydroxy groups [5]
213/10	• Separation; Purification; Stabilisation; Use of additives [5]
D1= /00	
215/00	Compounds containing amino and hydroxy groups bound to the same carbon skeleton [5]
215/02	 having hydroxy groups and amino groups bound to
	acyclic carbon atoms of the same carbon skeleton [5]
215/04	acyclic carbon atoms of the same carbon skeleton [5]the carbon skeleton being saturated [5]
215/06	 acyclic carbon atoms of the same carbon skeleton [5] the carbon skeleton being saturated [5] and acyclic [5]
	acyclic carbon atoms of the same carbon skeleton [5]the carbon skeleton being saturated [5]

215/10	 • • with one amino group and at least two hydroxy groups bound to the carbon skeleton [5] 	215/5
215/12	 • • • the nitrogen atom of the amino group being further bound to hydrocarbon groups substituted by hydroxy groups [5] 	215/5
215/14	 • • • the nitrogen atom of the amino group being further bound to hydrocarbon groups substituted by amino groups [5] 	215/6
215/16	 the nitrogen atom of the amino group being further bound to carbon atoms of six- membered aromatic rings [5] 	
215/18	• • • • with hydroxy groups and at least two amino groups bound to the carbon skeleton [5]	215/6
215/20	• • • the carbon skeleton being saturated and containing rings [5]	
215/22	• • the carbon skeleton being unsaturated [5]	215/6
215/24	• • • and acyclic [5]	
215/26	• • and containing rings other than six-membered aromatic rings [5]	215/6
215/28	 • • and containing six-membered aromatic rings [5] 	215/6
215/30	• • • containing hydroxy groups and carbon atoms of six-membered aromatic rings bound to the	
215/32	 same carbon atom of the carbon skeleton [5] •••••• containing hydroxy groups and carbon atoms of two six-membered aromatic 	215/7
	rings bound to the same carbon atom of the carbon skeleton [5]	215/7
215/34	• • • containing hydroxy groups and carbon atoms of six-membered aromatic rings bound to the same carbon atom of the carbon skeleton and	215/7
	at least one hydroxy group bound to another carbon atom of the carbon skeleton [5]	215/7
215/36	• • • • • 1-Aryl-2-amino-1,3-propane diols [5]	215/7
215/38	• • • with rings other than six-membered aromatic rings being part of the carbon skeleton [5]	215/8
215/40	• • with quaternised nitrogen atoms bound to carbon atoms of the carbon skeleton [5]	215/8
215/42	 having amino groups or hydroxy groups bound to carbon atoms of rings other than six-membered 	215/8
215/44	aromatic rings of the same carbon skeleton [5]bound to carbon atoms of the same ring or	215/0
	condensed ring system [5]	215/8
215/46	 having hydroxy groups bound to carbon atoms of at least one six-membered aromatic ring and amino 	215/8
	groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic	215/9
	rings of the same carbon skeleton [5]	
215/48	• • with amino groups linked to the six-membered aromatic ring, or to the condensed ring system	217/0
	containing that ring, by carbon chains not further substituted by hydroxy groups [5]	217/0
215/50	• • with amino groups and the six-membered aromatic ring, or the condensed ring system	217/0
	containing that ring, bound to the same carbon atom of the carbon chain [5]	217/0
215/52	 • Iinked by carbon chains having two carbon atoms between the amino groups and the six- 	21770
	membered aromatic ring or the condensed ring system containing that ring [5]	217/0
215/54	 • Iinked by carbon chains having at least three 	
	carbon atoms between the amino groups and the six-membered aromatic ring or the	217/1
	condensed ring system containing that ring [5]	

215/56	• • with amino groups linked to the six-membered aromatic ring, or to the condensed ring system containing that ring, by carbon chains further
	substituted by hydroxy groups [5]
215/58	• • with hydroxy groups and the six-membered aromatic ring, or the condensed ring system containing that ring, bound to the same carbon
	atom of the carbon chain [5]
215/60	 the chain having two carbon atoms between the amino groups and the six-membered aromatic ring or the condensed ring system containing that ring [5]
215/62	 • • • the chain having at least three carbon atoms between the amino groups and the six- membered aromatic ring or the condensed ring system containing that ring [5]
215/64	• • with rings other than six-membered aromatic rings being part of the carbon skeleton [5]
215/66	 with quaternised amino groups bound to the carbon skeleton [5]
215/68	 having amino groups bound to carbon atoms of six- membered aromatic rings and hydroxy groups bound to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings of the same carbon skeleton [5]
215/70	 with rings other than six-membered aromatic rings being part of the carbon skeleton [5]
215/72	 with quaternised amino groups bound to the carbon skeleton [5]
215/74	 having hydroxy groups and amino groups bound to carbon atoms of six-membered aromatic rings of the same carbon skeleton [5]
215/76	 of the same non-condensed six-membered aromatic ring [5]
215/78	 • containing at least two hydroxy groups bound to the carbon skeleton [5]
215/80	 containing at least two amino groups bound to the carbon skeleton [5]
215/82	• • • having the nitrogen atom of at least one of the amino groups further bound to a carbon atom of another six-membered aromatic ring [5]
215/84	 having amino groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems [5]
215/86	• • • being formed by two rings [5]
215/88	• • • being formed by at least three rings [5]
215/90	• • with quaternised amino groups bound to the carbon skeleton [5]
217/00	
217/00	Compounds containing amino and etherified hydroxy groups bound to the same carbon
217/02	skeleton [5]
217/02	 having etherified hydroxy groups and amino groups bound to acyclic carbon atoms of the same carbon skeleton [5]
217/04	• • the carbon skeleton being acyclic and saturated [5]
217/06	 having only one etherified hydroxy group and one amino group bound to the carbon skeleton, which is not further substituted [5]
217/08	•••• the oxygen atom of the etherified hydroxy group being further bound to an acyclic carbon atom [5]

- 237/18 • the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings [5]
- 237/20 • the carbon skeleton containing six-membered aromatic rings **[5]**
- 237/22 having nitrogen atoms of amino groups bound to the carbon skeleton of the acid part, further acylated [5]
- 237/24 having the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton [5]
- of a ring being part of a condensed ring system formed by at least four rings, e.g. tetracycline [5]
- having the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a non-condensed six-membered aromatic ring of the carbon skeleton [5]
- 237/30 having the nitrogen atom of the carboxamide group bound to hydrogen atoms or to acyclic carbon atoms [5]
- 237/32 having the nitrogen atom of the carboxamide group bound to an acyclic carbon atom of a hydrocarbon radical substituted by oxygen atoms **[5]**
- 237/34 having the nitrogen atom of the carboxamide group bound to an acyclic carbon atom of a hydrocarbon radical substituted by nitrogen atoms not being part of nitro or nitroso groups [5]

237/36	 having the nitrogen atom of the carboxamide group bound to an acyclic carbon atom of a hydrocarbon radical substituted by carboxyl groups [5]
237/38	 having the nitrogen atom of the carboxamide group bound to a carbon atom of a ring other than a six-membered aromatic ring [5]
237/40	 having the nitrogen atom of the carboxamide group bound to a carbon atom of a six-membered aromatic ring [5]
237/42	 having nitrogen atoms of amino groups bound to the carbon skeleton of the acid part, further acylated [5]
237/44	 having carbon atoms of carboxamide groups, amino groups and singly-bound oxygen atoms bound to carbon atoms of the same non-condensed six-membered aromatic ring [5]
237/46	 having carbon atoms of carboxamide groups, amino groups and at least three atoms of bromine or iodine, bound to carbon atoms of the same non- condensed six-membered aromatic ring [5]
237/48	 having the carbon atom of at least one of the carboxamide groups bound to a carbon atom of a six- membered aromatic ring being part of a condensed ring system of the same carbon skeleton [5]
237/50	 having the nitrogen atom of at least one of the carboxamide groups quaternised [5]
237/52	• having the nitrogen atom of at least one of the carboxamide groups further acylated [5]
239/00	Compounds containing nitrogen-to-halogen bonds; Hydroxylamino compounds or ethers or esters thereof [5]
239/02	Compounds containing nitrogen-to-halogen bonds [5]
239/04	 N-halogenated amines [5]
239/06	 N-halogenated carboxamides [5]
239/08	 Hydroxylamino compounds or their ethers or esters [5]
239/10	 having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of unsubstituted hydrocarbon radicals or of hydrocarbon radicals substituted by halogen atoms or by nitro or nitroso groups [5]
239/12	 having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms [5]
239/14	 having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by doubly-bound oxygen atoms [5]
239/16	 having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms not being part of nitro or nitroso groups [5]
239/18	 having nitrogen atoms of hydroxylamino groups further bound to carbon atoms of hydrocarbon radicals substituted by carboxyl groups [5]
239/20	 having oxygen atoms of hydroxylamino groups etherified [5]
239/22	 having oxygen atoms of hydroxylamino groups esterified [5]
241/00	Preparation of compounds containing chains of nitrogen atoms singly-bound to each other, e.g. hydrazines, triazanes [5]
241/02	Preparation of hydrazines [5]
241/04	Preparation of hydrazides [5]

243/00	Compounds containing chains of nitrogen atoms singly-bound to each other, e.g. hydrazines, triazanes [5]			
243/02	N-nitro compounds [5]			
	-			
243/04	N-nitroso compounds [5]			
243/06	• • N-nitroso-amines [5]			
243/08	• • N-nitroso-carboxamides [5]			
243/10	Hydrazines [5]			
243/12	• • having nitrogen atoms of hydrazine groups bound to acyclic carbon atoms [5]			
243/14	• • • of a saturated carbon skeleton [5]			
243/16	• • • of an unsaturated carbon skeleton [5]			
243/18	• • • • containing rings [5]			
243/20	• • having nitrogen atoms of hydrazine groups bound to carbon atoms of rings other than six-membered aromatic rings [5]			
243/22	 having nitrogen atoms of hydrazine groups bound to carbon atoms of six-membered aromatic rings [5] 			
243/24	 Hydrazines having nitrogen atoms of hydrazine groups acylated by carboxylic acids [5] 			
243/26	• • with acylating carboxyl groups bound to hydrogen atoms or to acyclic carbon atoms [5]			
243/28	 to hydrogen atoms or to carbon atoms of a saturated carbon skeleton [5] 			
243/30	• • • to carbon atoms of an unsaturated carbon skeleton [5]			
243/32	• • • • the carbon skeleton containing rings [5]			
243/34	• • • to carbon atoms of a carbon skeleton further substituted by nitrogen atoms [5]			
243/36	 with acylating carboxyl groups bound to carbon atoms of rings other than six-membered aromatic rings [5] 			
243/38	• • with acylating carboxyl groups bound to carbon atoms of six-membered aromatic rings [5]			
243/40	 Hydrazines having nitrogen atoms of hydrazine groups being quaternised [5] 			
243/42	• Hydrazines having nitrogen atoms of hydrazine groups further singly-bound to hetero atoms [5]			
245/00	Compounds containing chains of at least two nitrogen atoms with at least one nitrogen-to-nitrogen			
	multiple bond (azoxy compound C07C 291/08) [5]			
245/02	 Azo compounds, i.e. compounds having the free valencies of —N=N— groups attached to different atoms, e.g. diazohydroxides [5] 			
245/04	 with nitrogen atoms of azo groups bound to 			
243704	acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings [5]			
245/06	• • with nitrogen atoms of azo groups bound to carbon atoms of six-membered aromatic rings [5]			
245/08	• • • with the two nitrogen atoms of azo groups bound to carbon atoms of six-membered aromatic rings, e.g. azobenzene [5]			
245/10	 • with nitrogen atoms of azo groups bound to carbon atoms of six-membered aromatic rings being part of condensed ring systems [5] 			
245/12	 Diazo compounds, i.e. compounds having the free valencies of N₂ groups attached to the same carbon atom [5] 			
245/14	 having diazo groups bound to acyclic carbon atoms of a carbon skeleton [5] 			
245/16	 • • Diazomethane [5] 			
245/18	 the carbon skeleton being further substituted by carboxyl groups [5] 			
245/20	Diazonium compounds [5]			

245/22	 containing chains of three or more nitrogen atoms with one or more nitrogen-to-nitrogen double bonds [5]
245/24	 Chains of only three nitrogen atoms, e.g. diazoamines [5]
247/00	Compounds containing azido groups [5]
247/02	 with azido groups bound to acyclic carbon atoms of a carbon skeleton [5]
247/04	 being saturated [5]
247/06	• • • and containing rings [5]
247/08	 being unsaturated [5]
247/10	 • • • and containing rings [5]
247/10 247/12	 being further substituted by carboxyl groups [5]
247/12	 with azido groups bound to carbon atoms of rings
	other than six-membered aromatic rings [5]
247/16	• with azido groups bound to carbon atoms of six-
247/10	membered aromatic rings of a carbon skeleton [5]
247/18	• • being further substituted by carboxyl groups [5]
247/20	• with azido groups acylated by carboxylic acids [5]
247/22	 with the acylating carboxyl groups bound to hydrogen atoms, to acyclic carbon atoms or to carbon atoms of rings other than six-membered aromatic rings [5]
247/24	 with at least one of the acylating carboxyl groups bound to a carbon atom of a six-membered aromatic ring [5]
249/00	Durantian of annual containing aiter and
249/00	Preparation of compounds containing nitrogen atoms doubly-bound to a carbon skeleton (of diazo
	compounds C07C 245/12) [5]
249/02	 of compounds containing imino groups [5]
	 of oximes [5]
249/04	
249/06	by nitrosation of hydrocarbons or substituted by descentary [5]
240/00	hydrocarbons [5]
249/08	 by reaction of hydroxylamines with carbonyl compounds [5]
249/10	• • from nitro compounds or salts thereof [5]
249/12	 by reactions not involving the formation of oxyimino groups [5]
249/14	 Separation; Purification; Stabilisation; Use of additives [5]
249/16	• of hydrazones [5]
251/00	Compounds containing nitrogen atoms doubly-
	bound to a carbon skeleton (diazo compounds
	C07C 245/12) [5]
251/02	containing imino groups [5]
251/04	 having carbon atoms of imino groups bound to hydrogen atoms or to acyclic carbon atoms [5]
251/06	 • to carbon atoms of a saturated carbon skeleton [5]
251/08	• • • • being acyclic [5]
251/10	• • • to carbon atoms of an unsaturated carbon
	skeleton [5]
251/12	• • • • being acyclic [5]
251/14	• • • containing rings other than six-membered
	aromatic rings [5]
251/16	• • • • containing six-membered aromatic rings [5]
251/18	• • having carbon atoms of imino groups bound to
	carbon atoms of rings other than six-membered aromatic rings [5]
251/20	 having carbon atoms of imino groups being part of
	rings other than six-membered aromatic rings [5]
251/22	 • • Quinone imines [5]
251/22	 having carbon atoms of imino groups bound to
231/24	carbon atoms of six-membered aromatic rings [5]

251/26	•	•	having nitrogen atoms of imino groups further
251/28	•	•	bound to halogen atoms [5] having nitrogen atoms of imino groups
			acylated [5]
251/30	•	•	having nitrogen atoms of imino groups quaternised [5]
251/22		0	
251/32	•	U	ximes [5]
251/34	•	•	with oxygen atoms of oxyimino groups bound to
			hydrogen atoms or to carbon atoms of unsubstituted hydrocarbon radicals [5]
054 (06			-
251/36	•	•	• with the carbon atoms of the oxyimino groups bound to hydrogen atoms or to acyclic carbon
			atoms [5]
251/38	•	•	 to carbon atoms of a saturated carbon skeleton [5]
251/40	•	•	 to carbon atoms of an unsaturated carbon
			skeleton [5]
251/42	•	•	 with the carbon atom of at least one of the
			oxyimino groups bound to a carbon atom of a
			ring other than a six-membered aromatic
			-
			ring [5]
251/44	•	•	 with the carbon atom of at least one of the
			oxyimino groups being part of a ring other than
			a six-membered aromatic ring [5]
251/46			-
251/46	•	•	• • Quinone oximes [5]
251/48	•	•	 with the carbon atom of at least one of the
			oxyimino groups bound to a carbon atom of a
			six-membered aromatic ring [5]
251/50			having oxygen atoms of oxyimino groups bound
251/50			
			to carbon atoms of substituted hydrocarbon
			radicals [5]
251/52	•	•	 of hydrocarbon radicals substituted by halogen
			atoms or by nitro or nitroso groups [5]
251/54			 of hydrocarbon radicals substituted by singly-
231/34	•	•	
			bound oxygen atoms [5]
251/56	•	•	• of hydrocarbon radicals substituted by doubly-
			bound oxygen atoms [5]
251/58	•	•	of hydrocarbon radicals substituted by nitrogen
			atoms not being part of nitro or nitroso
			groups [5]
251/60	•	•	• of hydrocarbon radicals substituted by carboxyl
2017 00			groups [5]
251/62			having oxygen atoms of oxyimino groups
201/02			esterified [5]
054/64			
251/64	•	•	• by carboxylic acids [5]
251/66	•	•	• • with the esterifying carboxyl groups bound
			to hydrogen atoms, to acyclic carbon atoms
			or to carbon atoms of rings other than six-
			membered aromatic rings [5]
054 (60			0
251/68	•	•	• • with at least one of the esterifying carboxyl
			groups bound to a carbon atom of a six-
			membered aromatic ring [5]
251/70	•	•	Metal complexes of oximes [5]
251/72		н	ydrazones [5]
		11	-
251/74	•	•	having doubly-bound carbon atoms of hydrazone
			groups bound to hydrogen atoms or to acyclic
			carbon atoms [5]
251/76	•	•	 to carbon atoms of a saturated carbon
			skeleton [5]
DE1 /70			 to carbon atoms of an unsaturated carbon
251/78	•	•	
			skeleton [5]
251/80	•	•	 the carbon skeleton containing rings [5]
251/82	•	•	having doubly-bound carbon atoms of hydrazone
-			groups bound to carbon atoms of rings other than
			six-membered aromatic rings [5]
			and memocrea aromatic migo [J]

251/84	 having doubly-bound carbon atoms of hydrazone groups being part of rings other than six- membered aromatic rings [5]
251/86	 having doubly-bound carbon atoms of hydrazone groups bound to carbon atoms of six-membered aromatic rings [5]
251/88	• • having also the other nitrogen atom doubly-bound to a carbon atom, e.g. azines [5]
253/00	Preparation of carboxylic acid nitriles (of cyanogen or compounds thereof C01C 3/00) [5]
253/02	 by reaction of nitrogen oxide with organic compounds [5]
253/04	• by reaction of cyanogen halides, e.g. ClCN, with organic compounds [5]
253/06	 from N-formylated amino compounds [5]
253/08	• by addition of hydrogen cyanide or salts thereof to
	unsaturated compounds [5]
253/10	 to compounds containing carbon-to-carbon double bonds [5]
253/12	 to compounds containing carbon-to-carbon triple bonds [5]
253/14	• by reaction of cyanides with halogen-containing compounds with replacement of halogen atoms by
	cyano groups [5]
253/16	 by reaction of cyanides with lactones or compounds containing hydroxy groups or etherified or esterified hydroxy groups [5]
253/18	 by reaction of ammonia or amines with compounds
	containing carbon-to-carbon multiple bonds other than in six-membered aromatic rings [5]
253/20	• by dehydratation of carboxylic acid amides [5]
253/22	• by reaction of ammonia with carboxylic acids with
	replacement of carboxyl groups by cyano groups [5]
253/24	 by ammoxidation of hydrocarbons or substituted hydrocarbons [5]
253/26	 containing carbon-to-carbon multiple bonds, e.g. unsaturated aldehydes [5]
253/28	 containing six-membered aromatic rings, e.g. styrene [5]
253/30	 by reactions not involving the formation of cyano groups [5]
253/32	 Separation; Purification; Stabilisation; Use of additives [5]
253/34	• • Separation; Purification [5]
255/00	Carboxylic acid nitriles (cyanogen or compounds thereof C01C 3/00) [5]
255/01	 having cyano groups bound to acyclic carbon atoms [5]
255/02	• • of an acyclic and saturated carbon skeleton [5]
255/03	• • • Mononitriles [5]
255/04	 • containing two cyano groups bound to the carbon skeleton [5]
255/05	 • containing at least three cyano groups bound to the carbon skeleton [5]
255/06	• • of an acyclic and unsaturated carbon skeleton [5]
255/07	• • • Mononitriles [5]
255/08	• • • • Acrylonitrile; Methacrylonitrile [5]
255/09	• • containing at least two cyano groups bound to the carbon skeleton [5]
255/10	 containing cyano groups and halogen atoms, or nitro or nitroso groups, bound to the same acyclic carbon skeleton [5]
255/11	 containing cyano groups and singly-bound oxygen atoms bound to the same saturated acyclic carbon skeleton [5]

255/12	•	•	 containing cyano groups and hydroxy groups bound to the carbon skeleton [5]
255/13	•	•	• containing cyano groups and etherified hydroxy groups bound to the carbon skeleton [5]
255/14	•	•	 containing cyano groups and esterified hydroxy groups bound to the carbon skeleton [5]
255/15	•	•	containing cyano groups and singly-bound oxygen
			atoms bound to the same unsaturated acyclic
255/16	•		carbon skeleton [5] containing cyano groups and singly-bound oxygen
200/10			atoms bound to the same carbon atom of an acyclic carbon skeleton [5]
255/17	•		containing cyano groups and doubly-bound
200717			oxygen atoms bound to the same acyclic carbon skeleton [5]
255/18	•	•	containing cyano groups bound to carbon atoms of
			carboxyl groups [5]
255/19	•	•	containing cyano groups and carboxyl groups, other than cyano groups, bound to the same
255 (20			saturated acyclic carbon skeleton [5]
255/20	•	•	• the carbon skeleton being further substituted by singly-bound oxygen atoms [5]
255/21	•	•	• the carbon skeleton being further substituted by doubly-bound oxygen atoms [5]
255/22	•	•	 containing cyano groups and at least two
			carboxyl groups bound to the carbon skeleton [5]
255/23	•	•	containing cyano groups and carboxyl groups,
			other than cyano groups, bound to the same unsaturated acyclic carbon skeleton [5]
255/24	•	•	containing cyano groups and singly-bound
			nitrogen atoms, not being further bound to other
			hetero atoms, bound to the same saturated acyclic carbon skeleton [5]
255/25	•	•	Aminoacetonitriles [5]
255/26	•	•	• containing cyano groups, amino groups and
			singly-bound oxygen atoms bound to the carbon skeleton [5]
255/27	•	•	 containing cyano groups, amino groups and
			doubly-bound oxygen atoms bound to the
255/28	•		carbon skeleton [5] • containing cyano groups, amino groups and
200720			carboxyl groups, other than cyano groups,
255 (20			bound to the carbon skeleton [5]
255/29	•	•	 containing cyano groups and acylated amino groups bound to the carbon skeleton [5]
255/30	•	•	containing cyano groups and singly-bound
			nitrogen atoms, not being further bound to other hetero atoms, bound to the same unsaturated
			acyclic carbon skeleton [5]
255/31	•	•	having cyano groups bound to acyclic carbon
			atoms of a carbon skeleton containing rings other than six-membered aromatic rings [5]
255/32	•	•	having cyano groups bound to acyclic carbon
			atoms of a carbon skeleton containing at least one
255/33	•		six-membered aromatic ring [5]with cyano groups linked to the six-membered
200700			aromatic ring, or to the condensed ring system
			containing that ring, by saturated carbon chains [5]
255/34	•	•	• with cyano groups linked to the six-membered
			aromatic ring, or to the condensed ring system
			containing that ring, by unsaturated carbon chains [5]
255/35	•	•	containing that ring, by unsaturated carbon chains [5]the carbon skeleton being further substituted by
255/35 255/36	•	•	containing that ring, by unsaturated carbon chains [5]

255/37	• • • the carbon skeleton being further substituted by etherified hydroxy groups [5]
255/38	 the carbon skeleton being further substituted by esterified hydroxy groups [5]
255/39	 • with hydroxy groups esterified by derivatives of 2,2-dimethylcyclopropane carboxylic acids, e.g. chrysanthemumic acids [5]
255/40	• • • the carbon skeleton being further substituted by doubly-bound oxygen atoms [5]
255/41	• • • the carbon skeleton being further substituted by carboxyl groups, other than cyano groups [5]
255/42	 the carbon skeleton being further substituted by singly-bound nitrogen atoms, not being further bound to other hetero atoms [5]
255/43	• • • the carbon skeleton being further substituted by singly-bound oxygen atoms [5]
255/44	• • • at least one of the singly-bound nitrogen atoms being acylated [5]
255/45	 having cyano groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
255/46	 to carbon atoms of non-condensed rings [5]
255/47	 to carbon atoms of rings being part of condensed ring systems [5]
255/48	• • to carbon atoms of 2,2-dimethylcyclopropane rings, e.g. nitrile of chrysanthemumic acids [5]
255/49	 having cyano groups bound to carbon atoms of six- membered aromatic rings of a carbon skeleton [5]
255/50	• • to carbon atoms of non-condensed six-membered aromatic rings [5]
255/51	• • • containing at least two cyano groups bound to the carbon skeleton [5]
255/52	 to carbon atoms of six-membered aromatic rings being part of condensed ring systems [5]
255/53	 containing cyano groups and hydroxy groups bound to the carbon skeleton [5]
255/54	• containing cyano groups and etherified hydroxy groups bound to the carbon skeleton [5]
255/55	 containing cyano groups and esterified hydroxy groups bound to the carbon skeleton [5]
255/56	 containing cyano groups and doubly-bound oxygen atoms bound to the carbon skeleton [5]
255/57	 containing cyano groups and carboxyl groups, other than cyano groups, bound to the carbon skeleton [5]
255/58	 containing cyano groups and singly-bound nitrogen atoms, not being further bound to other hetero atoms, bound to the carbon skeleton [5]
255/59	• • • the carbon skeleton being further substituted by singly-bound oxygen atoms [5]
255/60	• • • at least one of the singly-bound nitrogen atoms being acylated [5]
255/61	 containing cyano groups and nitrogen atoms being part of imino groups bound to the same carbon skeleton [5]
255/62	 containing cyano groups and oxygen atoms being part of oxyimino groups bound to the same carbon skeleton [5]
255/63	 containing cyano groups and nitrogen atoms further bound to other hetero atoms, other than oxygen atoms of nitro or nitroso groups, bound to the same carbon skeleton [5]
255/64	• • with the nitrogen atoms further bound to oxygen atoms [5]
255/65	 with the nitrogen atoms further bound to nitrogen atoms [5]

255/66	• • • having cyano groups and nitrogen atoms being part of hydrazine or hydrazone groups bound to
255/67	 the same carbon skeleton [5] • having cyano groups and azido groups bound to the same carbon skeleton [5]
257/00	Compounds containing carboxyl groups, the doubly- bound oxygen atom of a carboxyl group being replaced by a doubly-bound nitrogen atom, this nitrogen atom not being further bound to an oxygen atom, e.g. imino-ethers, amidines [5]
257/02	• with replacement of the other oxygen atom of the carboxyl group by halogen atoms, e.g. imino-halides [5]
257/04	• without replacement of the other oxygen atom of the carboxyl group, e.g. imino-ethers [5]
257/06	 having carbon atoms of imino-carboxyl groups bound to hydrogen atoms, to acyclic carbon atoms, or to carbon atoms of rings other than six- membered aromatic rings [5]
257/08	 having carbon atoms of imino-carboxyl groups bound to carbon atoms of six-membered aromatic rings [5]
257/10	• with replacement of the other oxygen atom of the carboxyl group by nitrogen atoms, e.g. amidines [5]
257/12	 having carbon atoms of amidino groups bound to hydrogen atoms [5]
257/14	 having carbon atoms of amidino groups bound to acyclic carbon atoms [5]
257/16	 having carbon atoms of amidino groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
257/18	• having carbon atoms of amidino groups bound to carbon atoms of six-membered aromatic rings [5]
257/20	 having nitrogen atoms of amidino groups acylated [5]
257/22	• • having nitrogen atoms of amidino groups further bound to nitrogen atoms, e.g. hydrazidines [5]
259/00	Compounds containing carboxyl groups, an oxygen atom of a carboxyl group being replaced by a nitrogen atom, this nitrogen atom being further bound to an oxygen atom and not being part of nitro or nitroso groups [5]
259/02	 with replacement of the other oxygen atom of the carboxyl group by halogen atoms [5]
259/04	 without replacement of the other oxygen atom of the carboxyl group, e.g. hydroxamic acids [5]
259/06	 having carbon atoms of hydroxamic groups bound to hydrogen atoms or to acyclic carbon atoms [5]
259/08	 having carbon atoms of hydroxamic groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
259/10	 having carbon atoms of hydroxamic groups bound to carbon atoms of six-membered aromatic rings [5]
259/12	 with replacement of the other oxygen atom of the carboxyl group by nitrogen atoms, e.g. N- hydroxyamidines [5]
259/14	 having carbon atoms of hydroxyamidine groups bound to hydrogen atoms or to acyclic carbon atoms [5]
259/16	 having carbon atoms of hydroxyamidine groups bound to carbon atoms of rings other than six- membered aromatic rings [5]
259/18	 having carbon atoms of hydroxyamidine groups bound to carbon atoms of six-membered aromatic rings [5]

259/20	• • with at least one nitrogen atom of hydroxyamidine groups bound to another nitrogen atom [5]	271/00
261/00	Derivatives of cyanic acid [5]	
261/02	Cyanates [5]	
261/04	Cyanamides (unsubstituted cyanamide C01C 3/16) [5]	
263/00	Preparation of derivatives of isocyanic acid [5]	271/02
263/02	 by reaction of halides with isocyanic acid or its derivatives [5] 	_/ 1/0_
263/04	• from or <u>via</u> carbamates or carbamoyl halides [5]	271/04
263/06 263/08	 from or <u>via</u> ureas [5] from or <u>via</u> heterocyclic compounds, e.g. pyrolysis of 	271/06
200700	furoxans [5]	271/08
263/10	 by reaction of amines with carbonyl halides, e.g. with phosgene [5] 	271/10
263/12	 from or <u>via</u> nitrogen analogues of carboxylic acids, e.g. from hydroxamic acids, involving a Hofmann, Curtius or Lossen-type rearrangement (C07C 209/56 	271/12
	takes precedence) [5]	271/14
263/14	 by catalytic reaction of nitro compounds with carbon monoxide [5] 	2,1,11
263/16	 by reactions not involving the formation of isocyanate groups [5] 	271/16

281/00	Derivatives of carbonic acid containing functional groups covered by groups C07C 269/00-C07C 279/00 in which at least one nitrogen atom of these functional groups is further bound to another nitrogen atom not being part of a nitro or nitroso group [5]
281/02	Compounds containing any of the groups
	N-N-C-O- or $N-N=C-O-$ e.g. carbazates [5]

281/04 • the other nitrogen atom being further doubly-bound to a carbon atom [5]

281/06 • Compounds containing any of the groups

	or $N-N-C=N-$
	e.g. sellicarbazides [5]
281/08	• the other nitrogen atom being further doubly-
	bound to a carbon atom, e.g. semicarbazones [5]
281/10	• • • the carbon atom being further bound to an
	acyclic carbon atom or to a carbon atom of a
	ring other than a six-membered aromatic
281/12	ring [5]
201/12	• • • the carbon atom being part of a ring other than a six-membered aromatic ring [5]
281/14	 the carbon atom being further bound to a
201/14	carbon atom of a six-membered aromatic
	ring [5]
281/16	Compounds containing any of the groups
	NN-
	N = -N = -N = N = N = N = N = N = N = N
281/18	• • the other nitrogen atom being further doubly-
	bound to a carbon atom, e.g. guanylhydrazones [5]
281/20	• the two nitrogen atoms of the functional groups being
	doubly-bound to each other, e.g. azoformamide [5]
291/00	Compounds containing carbon and nitrogen and
291/00	Compounds containing carbon and nitrogen and having functional groups not covered by groups
	C07C 201/00-C07C 281/00 [5]
291/02	 containing nitrogen-oxide bonds [5]
291/04	 containing amino-oxide bonds [5]
291/06	• • Nitrile oxides [5]
291/08	Azoxy compounds [5]
291/10	Isocyanides [5]
291/12	Fulminates [5]
291/14	 containing at least one carbon atom bound to a nitro
	or nitroso group and doubly-bound to a hetero
	atom [5]

<u>Compounds containing carbon together with sulfur, selenium or tellurium, with or without hydrogen, halogens, oxygen or nitrogen [5]</u>

301/00 301/02	 Esters of sulfurous acid [5] having sulfite groups bound to carbon atoms of sixmembered aromatic rings [5]
303/00	Preparation of esters or amides of sulfuric acids; Preparation of sulfonic acids or of their esters,
	halides, anhydrides or amides [5]
303/02	 of sulfonic acids or halides thereof [5]
303/04	 by substitution of hydrogen atoms by sulfo or halosulfonyl groups [5]
303/06	 • by reaction with sulfuric acid or sulfur trioxide [5]
303/08	• • • by reaction with halogenosulfonic acids [5]
303/10	• • by reaction with sulfur dioxide and halogen or by reaction with sulfuryl halides [5]
303/12	• • • by reaction with thionylhalides [5]
303/14	 by sulfoxidation, i.e. by reaction with sulfur dioxide and oxygen with formation of sulfo or halosulfonyl groups [5]
303/16	 by oxidation of thiols, sulfides, hydropolysulfides, or polysulfides with formation of sulfo or halosulfonyl groups [5]

303/18	• • by reaction of sulfides with compounds having
	functional groups with formation of sulfo or
	halosulfonyl groups [5]
303/20	• • by addition of sulfurous acid or salts thereof to
	compounds having carbon-to-carbon multiple bonds [5]
303/22	 from sulfonic acids by reactions not involving the
505/22	formation of sulfo or halosulfonyl groups [5]
303/24	• of esters of sulfuric acids [5]
303/26	• of esters of sulfonic acids [5]
303/28	• • by reaction of hydroxy compounds with sulfonic
	acids or derivatives thereof [5]
303/30	• by reactions not involving the formation of
303/32	esterified sulfo groups [5] • of salts of sulfonic acids [5]
303/32	 of amides of sulfuric acids [5]
303/34	 of amides of sulfunic acids [5] of amides of sulfonic acids [5]
303/38	 by reaction of ammonia or amines with sulfonic
505/50	acids, or with esters, anhydrides, or halides
	thereof [5]
303/40	• • by reactions not involving the formation of
	sulfonamide groups [5]
303/42	• Separation; Purification; Stabilisation; Use of
202/44	additives [5]
303/44 303/46	 Separation; Purification [5] from by-products of refining mineral oils with
505/40	sulfuric acid [5]
305/00	Esters of sulfuric acids [5]
305/02	 having oxygen atoms of sulfate groups bound to
205 /04	acyclic carbon atoms of a carbon skeleton [5]
305/04	being acyclic and saturated [5]
305/06	Hydrogenosulfates [5] Dialludaulfates Substituted dialludaulfates [5]
305/08	 Dialkylsulfates; Substituted dialkylsulfates [5] being further substituted by singly-bound
305/10	• • • being further substituted by singly-bound oxygen atoms [5]
305/12	 being saturated and containing rings [5]
305/14	 being acyclic and unsaturated [5]
305/16	• • being unsaturated and containing rings [5]
305/18	• • • containing six-membered aromatic rings [5]
305/20	 having oxygen atoms of sulfate groups bound to
	carbon atoms of rings other than six-membered
	aromatic rings [5]
305/22	having oxygen atoms of sulfate groups bound to
205/24	 carbon atoms of six-membered aromatic rings [5] of non-condensed six-membered aromatic
305/24	rings [5]
305/26	Halogenosulfates, i.e. monoesters of halogenosulfuric
	acids [5]
005 (00	
307/00	Amides of sulfuric acids, i.e. compounds having singly-bound oxygen atoms of sulfate groups
	replaced by nitrogen atoms, not being part of nitro
	or nitroso groups [5]
307/02	• Monoamides of sulfuric acids or esters thereof, e.g.
	sulfamic acids [5]
307/04	Diamides of sulfuric acids [5]
307/06	having nitrogen atoms of the sulfamide groups hound to acyclic corbon atoms [5]
307/08	bound to acyclic carbon atoms [5]
307708	having nitrogen atoms of the sulfamide groups bound to carbon atoms of rings other than six-
	membered aromatic rings [5]
307/10	• • having nitrogen atoms of the sulfamide groups
	bound to carbon atoms of six-membered aromatic
	rings [5]

309/00		nic acids; Halides, esters, or anhydrides of [5]	
309/01	• Sı	lfonic acids [5]	
309/02	••	having sulfo groups bound to acyclic carbon atoms [5]	
309/03	• •	• of an acyclic saturated carbon skeleton [5]	
309/04	• •	• • containing only one sulfo group [5]	
309/05	••	 containing at least two sulfo groups bound the carbon skeleton [5] 	d to
309/06	••	 containing halogen atoms, or nitro or nitro groups bound to the carbon skeleton [5] 	oso
309/07	••	 containing oxygen atoms bound to the carbon skeleton [5] 	
309/08	••	 containing hydroxy groups bound to th carbon skeleton [5] 	ie
309/09	••	 containing etherified hydroxy groups bound to the carbon skeleton [5] 	
309/10	••	 • with the oxygen atom of at least one the etherified hydroxy groups furthe bound to an acyclic carbon atom [5] 	er
309/11	••	 with the oxygen atom of at least one the etherified hydroxy groups furthe bound to a carbon atom of a six- membered aromatic ring [5] 	e of
309/12	••	 containing esterified hydroxy groups bound to the carbon skeleton [5] 	
309/13	••	 containing nitrogen atoms, not being part nitro or nitroso groups, bound to the carbo skeleton [5] 	
309/14	••	 containing amino groups bound to the carbon skeleton [5] 	
309/15	••	• • • the nitrogen atom of at least one of the amino groups being part of any of the amino groups being part of amino groups being part of amy of the amy of the amino groups being	
		N-C-Y or -N=C	ic
		groups Y X being any atom [5]	0
309/16	••	 containing doubly-bound nitrogen atom bound to the carbon skeleton [5] 	
309/17	••	• • containing carboxyl groups bound to the carbon skeleton [5]	
309/18	••	• • • containing amino groups bound to the same carbon skeleton [5]	
309/19	••	• of a saturated carbon skeleton containing rings [5]	
309/20	• •	• of an acyclic unsaturated carbon skeleton [5]	
309/21	••	• • containing nitrogen atoms, not being part	
		nitro or nitroso groups, bound to the carbo skeleton [5]	
309/22	••	• • containing carboxyl groups bound to the carbon skeleton [5]	
309/23	••	 of an unsaturated carbon skeleton containing rings other than six-membered aromatic rings [5] 	
309/24	••	 of a carbon skeleton containing six-membere aromatic rings [5] 	ed
309/25	••	having sulfo groups bound to carbon atoms of rings other than six-membered aromatic rings o carbon skeleton [5]	f a
309/26	••	• containing nitrogen atoms, not being part of nitro or nitroso groups, bound to the carbon	
309/27	••	 skeleton [5] containing carboxyl groups bound to the carl skeleton [5] 	bon
309/28	••	having sulfo groups bound to carbon atoms of s membered aromatic rings of a carbon skeleton	

309/29	•	•	•	of non-condensed six-membered aromatic rings [5]
309/30	•	•	•	 of six-membered aromatic rings substituted by alkyl groups [5]
309/31	•	•	•	 by alkyl groups (5) by alkyl groups containing at least three carbon atoms [5]
309/32				 containing at least two non-condensed six-
505752				membered aromatic rings in the carbon skeleton [5]
309/33	•	•	•	of six-membered aromatic rings being part of
808788				condensed ring systems [5]
309/34	•	•	•	• formed by two rings [5]
309/35	•	•	•	• • Naphthalene sulfonic acids [5]
309/36	•	•	•	• • • substituted by alkyl groups [5]
309/37	•	•	•	 • • • by alkyl groups containing at least
				three carbon atoms [5]
309/38	•	•	•	• formed by at least three rings [5]
309/39	•	•	•	containing halogen atoms bound to the carbon skeleton [5]
309/40	•	•	•	containing nitro or nitroso groups bound to the carbon skeleton [5]
309/41	•	•	•	containing singly-bound oxygen atoms bound to the carbon skeleton [5]
309/42	•	•	•	 having the sulfo groups bound to carbon
				atoms of non-condensed six-membered aromatic rings [5]
309/43	•	•	•	 having at least one of the sulfo groups bound
				to a carbon atom of a six-membered
				aromatic ring being part of a condensed ring
				system [5]
309/44	•	•	•	containing doubly-bound oxygen atoms bound to the carbon skeleton [5]
309/45	•	•	•	containing nitrogen atoms, not being part of
0007 10				nitro or nitroso groups, bound to the carbon
				skeleton [5]
309/46	•	•	•	 having the sulfo groups bound to carbon
				atoms of non-condensed six-membered
				aromatic rings [5]
309/47	•	•	•	 having at least one of the sulfo groups bound

317/42 317/44	• • • • Y being a hetero atom [5]• having sulfone or sulfoxide groups and carboxyl
51//44	groups bound to the same carbon skeleton [5]
317/46	• the carbon skeleton being further substituted by
	singly-bound oxygen atoms [5]
317/48	the carbon skeleton being further substituted by singly-bound nitrogen atoms, not being part of
	nitro or nitroso groups [5]
317/50	• • • at least one of the nitrogen atoms being part of
	×××
	N-C or -N=C X
	any of the groups Y Y X being a hetero atom, Y being any atom [5]
	being a netero atom, 1 being any atom [5]
319/00	Preparation of thiols, sulfides, hydropolysulfides or
210/02	polysulfides [5]
319/02 319/04	 of thiols [5] by addition of hydrogen sulfide or its salts to
515/04	unsaturated compounds [5]
319/06	• • from sulfides, hydropolysulfides or
	polysulfides [5]
319/08	 by replacement of hydroxy groups or etherified or esterified hydroxy groups [5]
319/10	 • • by replacement of hydroxy groups or etherified
010/10	or esterified hydroxy groups bound to carbon
	atoms of six-membered aromatic rings [5]
319/12	by reactions not involving the formation of mersante groups [5]
319/14	mercapto groups [5] of sulfides [5]
319/16	 by addition of hydrogen sulfide or its salts to
	unsaturated compounds [5]
319/18	• • by addition of thiols to unsaturated compounds [5]
319/20	• • by reactions not involving the formation of sulfide groups [5]
319/22	 of hydropolysulfides or polysulfides [5]
319/24	 by reactions involving the formation of sulfur-to-
	sulfur bonds [5]
319/26	 Separation; Purification; Stabilisation; Use of additives [5]
319/28	• Separation; Purification [5]
319/30	 • • from the by-products of refining mineral
	oils [5]
321/00	Thiolo cultides budyonolycultides or polycultides [5]
321/00	Thiols, sulfides, hydropolysulfides or polysulfides [5]Thiols having mercapto groups bound to acyclic
521/02	carbon atoms [5]
321/04	• • of an acyclic saturated carbon skeleton [5]
321/06	• • of a saturated carbon skeleton containing rings [5]
321/08	• • of an acyclic unsaturated carbon skeleton [5]
321/10	 of an unsaturated carbon skeleton containing rings [5]
321/12	 Sulfides, hydropolysulfides, or polysulfides having
	thio groups bound to acyclic carbon atoms [5]
321/14	• • of an acyclic saturated carbon skeleton [5]
321/16	• • of a saturated carbon skeleton containing rings [5]
321/18	• of an acyclic unsaturated carbon skeleton [5]
321/20	of an unsaturated carbon skeleton containing rings [5]

321/22	•	ha	niols, sulfides, hydropolysulfides, or polysulfides wing thio groups bound to carbon atoms of rings
321/24	•	Tl ha	her than six-membered aromatic rings [5] niols, sulfides, hydropolysulfides, or polysulfides wing thio groups bound to carbon atoms of six-
		m	embered aromatic rings [5]
321/26	•	•	Thiols [5]
321/28	•	•	Sulfides, hydropolysulfides, or polysulfides having thio groups bound to carbon atoms of six- membered aromatic rings [5]
321/30	•	•	 Sulfides having the sulfur atom of at least one thio group bound to two carbon atoms of six- membered aromatic rings [5]
323/00	su	bs	ls, sulfides, hydropolysulfides or polysulfides tituted by halogen, oxygen or nitrogen atoms, or ılfur atoms not being part of thio groups [5]
323/01	•	сс	intaining thio groups and halogen atoms, or nitro or troso groups bound to the same carbon skeleton [5]
323/02	•	•	having sulfur atoms of thio groups bound to acyclic carbon atoms of the carbon skeleton [5]
323/03	•	•	 the carbon skeleton being acyclic and saturated [5]
323/04	•	•	 the carbon skeleton being saturated and containing rings [5]
323/05	•	•	 the carbon skeleton being acyclic and unsaturated [5]
323/06	•	•	 the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings [5]
323/07	•	•	 the carbon skeleton containing six-membered aromatic rings [5]
323/08	•	•	having sulfur atoms of thio groups bound to carbon atoms of rings other than six-membered
323/09	•	•	aromatic rings of the carbon skeleton [5] having sulfur atoms of thio groups bound to carbon atoms of six-membered aromatic rings of
000/10			the carbon skeleton [5]
323/10	•		ntaining thio groups and singly-bound oxygen oms bound to the same carbon skeleton [5]
323/11	•	•	having the sulfur atoms of the thio groups bound to acyclic carbon atoms of the carbon skeleton [5]
323/12	•	•	 the carbon skeleton being acyclic and saturated [5]
323/13	•	•	 the carbon skeleton being saturated and containing rings [5]
323/14	•	•	 the carbon skeleton being acyclic and unsaturated [5]
323/15	•	•	 the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings [5]
323/16	•	•	• the carbon skeleton containing six-membered aromatic rings [5]
323/17	•	•	having the sulfur atom of at least one of the thio groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton [5]
323/18	•	•	having the sulfur atom of at least one of the thio groups bound to a carbon atom of a six-membered aromatic ring of the carbon skeleton [5]
323/19	•	•	 with singly-bound oxygen atoms bound to acyclic carbon atoms of the carbon skeleton [5]
323/20	•	•	• with singly-bound oxygen atoms bound to carbon atoms of the same non-condensed six-
			membered aromatic ring [5]
323/21	•	•	• with the sulfur atom of the thio group bound to a carbon atom of a six-membered aromatic ring being part of a condensed ring system [5]

323/22	 containing thio groups and doubly-bound oxygen 	
	atoms bound to the same carbon skeleton [5]	
323/23	 containing thio groups and nitrogen atoms, not being part of nitro or nitroso groups, bound to the same carbon skeleton [5] 	
323/24	• • having the sulfur atoms of the thio groups bound	
323/25	to acyclic carbon atoms of the carbon skeleton [5]the carbon skeleton being acyclic and	
323/26	saturated [5]the carbon skeleton being saturated and	
323/20	containing rings [5]	
323/27	• • • the carbon skeleton being acyclic and unsaturated [5]	
323/28	 the carbon skeleton being unsaturated and containing rings other than six-membered aromatic rings [5] 	
323/29	 • • the carbon skeleton containing six-membered aromatic rings [5] 	
323/30	 having the sulfur atom of at least one of the thio groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon skeleton [5] 	
323/31	 having the sulfur atom of at least one of the thio 	
	groups bound to a carbon atom of a six-membered aromatic ring of the carbon skeleton [5]	
323/32	• • • having at least one of the nitrogen atoms bound	
	to an acyclic carbon atom of the carbon skeleton [5]	
323/33	• • having at least one of the nitrogen atoms bound	
	to a carbon atom of the same non-condensed six-membered aromatic ring [5]	
323/34	• • • • the thio group being a mercapto group [5]	
323/35	• • • • the thio group being a sulfide group [5]	
323/36	• • • • the sulfur atom of the sulfide group being	
	further bound to an acyclic carbon atom [5]	
323/37	• • • • • the sulfur atom of the sulfide group being	
	further bound to a carbon atom of a six- membered aromatic ring [5]	
323/38	• • • with the sulfur atom of the thio group bound to	
	a carbon atom of a six-membered aromatic ring being part of a condensed ring system [5]	
323/39	 at least one of the nitrogen atoms being part of any 	
	X X	
	× × × × × × × × × × × × × × × × × × ×	
	of the groups Y X being a	
	hetero atom, Y being any atom [5]	
323/40	• • • Y being a hydrogen or a carbon atom [5]	
323/41	• • • Y being a hydrogen or an acyclic carbon atom [5]	
323/42	• • • Y being a carbon atom of a six-membered aromatic ring [5]	
323/43	 Y being a hetero atom [5] 	
323/44	• • • • X or Y being nitrogen atoms [5]	
323/45	 having at least one of the nitrogen atoms doubly- 	
-	bound to the carbon skeleton [5]	
323/46	 having at least one of the nitrogen atoms, not being part of nitro or nitroso groups, further bound to other hetero atoms [5] 	
323/47	 • • to oxygen atoms [5] 	
323/47	• • • to nitrogen atoms [5]	
323/40	• • • to sulfur atoms [5]	
323/49	 containing thio groups and carboxyl groups bound to 	
525,50	the same carbon skeleton [5]	
323/51	• • having the sulfur atoms of the thio groups bound	
	to acyclic carbon atoms of the carbon skeleton [5]	

323/52	• • • the carbon skeleton being acyclic and saturated [5]
323/53	• • • the carbon skeleton being saturated and
323/54	 containing rings [5] the carbon skeleton being acyclic and
323/55	unsaturated [5]• • the carbon skeleton being unsaturated and
020,00	containing rings other than six-membered aromatic rings [5]
323/56	• • • the carbon skeleton containing six-membered
323/57	aromatic rings [5]• • the carbon skeleton being further substituted by
020,07	nitrogen atoms, not being part of nitro or nitroso groups [5]
323/58	• • • • with amino groups bound to the carbon skeleton [5]
323/59	•••• with acylated amino groups bound to the carbon skeleton [5]
323/60	• • • with the carbon atom of at least one of the carboxyl groups bound to nitrogen atoms [5]
323/61	• • having the sulfur atom of at least one of the thio
	groups bound to a carbon atom of a ring other than a six-membered aromatic ring of the carbon
000 (00	skeleton [5]
323/62	• • having the sulfur atom of at least one of the thio groups bound to a carbon atom of a six-membered aromatic ring of the carbon skeleton [5]
323/63	• • • the carbon skeleton being further substituted by
	nitrogen atoms, not being part of nitro or nitroso groups [5]
323/64	 containing thio groups and sulfur atoms, not being part of thio groups, bound to the same carbon
	skeleton [5]
323/65	 containing sulfur atoms of sulfone or sulfoxide groups bound to the carbon skeleton [5]
323/66	• • containing sulfur atoms of sulfo, esterified sulfo or
	halosulfonyl groups, bound to the carbon skeleton [5]
323/67	• • containing sulfur atoms of sulfonamide groups, bound to the carbon skeleton [5]
325/00	Thioaldehydes; Thioketones; Thioquinones; Oxides
	thereof [5]
325/02	Thioketones; Oxides thereof [5] Thioguinenes; Oxides thereof [5]
325/04	Thioquinones; Oxides thereof [5]
327/00	Thiocarboxylic acids [5]
327/02	Monothiocarboxylic acids [5]
327/04	 having carbon atoms of thiocarboxyl groups bound to hydrogen atoms or to acyclic carbon atoms [5]
327/06	 • to hydrogen atoms or to carbon atoms of an acyclic saturated carbon skeleton [5]
327/08	to carbon atoms of a saturated carbon skeleton containing rings [5]
327/10	to carbon atoms of an acyclic unsaturated carbon skeleton [5]
327/12	 to carbon atoms of an unsaturated carbon skeleton containing rings [5]
327/14	• • having carbon atoms of thiocarboxyl groups bound to carbon atoms of rings other than six-
327/16	membered aromatic rings [5]having carbon atoms of thiocarboxyl groups
	bound to carbon atoms of six-membered aromatic rings [5]
327/18	Dithiocarboxylic acids [5]
327/10	 Esters of monothiocarboxylic acids [5]
527720	Loters of monounocurboxyne aclus [J]

327/22	• • having carbon atoms of esterified thiocarboxyl
	groups bound to hydrogen atoms or to acyclic carbon atoms [5]
327/24	 having carbon atoms of esterified thiocarboxyl
527724	groups bound to carbon atoms of rings other than
	six-membered aromatic rings [5]
327/26	• • having carbon atoms of esterified thiocarboxyl
	groups bound to carbon atoms of six-membered
	aromatic rings [5]
327/28	having sulfur atoms of esterified thiocarboxyl
	groups bound to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen
	atoms [5]
327/30	 having sulfur atoms of esterified thiocarboxyl
	groups bound to carbon atoms of hydrocarbon
	radicals substituted by nitrogen atoms, not being
	part of nitro or nitroso groups [5]
327/32	having sulfur atoms of esterified thiocarboxyl
	groups bound to carbon atoms of hydrocarbon radicals substituted by carboxyl groups [5]
327/34	 • with amino groups bound to the same
527754	hydrocarbon radicals [5]
327/36	• Esters of dithiocarboxylic acids [5]
327/38	Amides of thiocarboxylic acids [5]
327/40	• • having carbon atoms of thiocarboxamide groups
	bound to hydrogen atoms or to acyclic carbon
227 (42	atoms [5]
327/42	• • • to hydrogen atoms or to carbon atoms of a saturated carbon skeleton [5]
327/44	 to carbon atoms of an unsaturated carbon
527744	skeleton [5]
327/46	having carbon atoms of thiocarboxamide groups
	bound to carbon atoms of rings other than six-
	membered aromatic rings [5]
327/48	• • having carbon atoms of thiocarboxamide groups
	bound to carbon atoms of six-membered aromatic rings [5]
327/50	 Compounds containing any of the groups
827788	S X S X
	S X S X -C-N-C-Y or -C-N=C
	Υ X being a hetero
	atom, Y being any atom [5]
327/52	• • • Y being a hydrogen or a carbon atom [5]
327/54	• • • Y being a hetero atom [5]
327/56	having nitrogen atoms of thiocarboxamide groups
	further bound to another hetero atom [5]
327/58	Derivatives of thiocarboxylic acids, the doubly- bound oxygen atoms being replaced by nitrogen
	bound oxygen atoms being replaced by nitrogen atoms, e.g. imino-thio ethers [5]
327/60	 Thiocarboxylic acids having sulfur atoms of
527700	thiocarboxyl groups further doubly-bound to oxygen
	atoms [5]
329/00	Thiocarbonic acids; Halides, esters or anhydrides
529/00	thereof [5]
329/02	 Monothiocarbonic acids; Derivatives thereof [5]
329/04	 Esters of monothiocarbonic acids [5]
329/06	
020/00	• • • having sulfur atoms of thiocarbonic groups
828788	bound to acyclic carbon atoms [5]
329/08	bound to acyclic carbon atoms [5]having sulfur atoms of thiocarbonic groups
	 bound to acyclic carbon atoms [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six-
329/08	 bound to acyclic carbon atoms [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six- membered aromatic rings [5]
	 bound to acyclic carbon atoms [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six- membered aromatic rings [5] having sulfur atoms of thiocarbonic groups
329/08	 bound to acyclic carbon atoms [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six- membered aromatic rings [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of six-membered
329/08	 bound to acyclic carbon atoms [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six- membered aromatic rings [5] having sulfur atoms of thiocarbonic groups
329/08 329/10	 bound to acyclic carbon atoms [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of rings other than six- membered aromatic rings [5] having sulfur atoms of thiocarbonic groups bound to carbon atoms of six-membered aromatic rings [5]

329/16	• • having sulfur atoms of dithiocarbonic groups bound to acyclic carbon atoms [5]
329/18	• • having sulfur atoms of dithiocarbonic groups bound to carbon atoms of rings other than six-
329/20	membered aromatic rings [5]having sulfur atoms of dithiocarbonic groups
	bound to carbon atoms of six-membered aromatic rings [5]
331/00	Derivatives of thiocyanic acid or of isothiocyanic acid [5]
331/02	Thiocyanates [5]
331/04	 having sulfur atoms of thiocyanate groups bound to acyclic carbon atoms [5]
331/06	• • having sulfur atoms of thiocyanate groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
331/08	 having sulfur atoms of thiocyanate groups bound to carbon atoms of six-membered aromatic rings [5]
331/10	-
331/10	 having sulfur atoms of thiocyanate groups bound to carbon atoms of hydrocarbon radicals substituted by singly-bound oxygen atoms [5]
331/12	 having sulfur atoms of thiocyanate groups bound
001/12	to carbon atoms of hydrocarbon radicals substituted by nitrogen atoms, not being part of
	nitro or nitroso groups [5]
331/14	• having sulfur atoms of thiocyanate groups bound to carbon atoms of hydrocarbon radicals
	substituted by carboxyl groups [5]
331/16	Isothiocyanates [5]
331/18	 having isothiocyanate groups bound to acyclic carbon atoms [5]
331/20	• • • of a saturated carbon skeleton [5]
331/22	• • • of an unsaturated carbon skeleton [5]
331/24	• • • • the carbon skeleton containing six- membered aromatic rings [5]
331/26	 having isothiocyanate groups bound to carbon atoms of rings other than six-membered aromatic rings [5]
331/28	 having isothiocyanate groups bound to carbon atoms of six-membered aromatic rings [5]
331/30	 containing at least two isothiocyanate groups bound to the same carbon skeleton [5]
331/32	• • having isothiocyanate groups acylated [5]
333/00	Derivatives of thiocarbamic acids, i.e. compounds containing any of the groups
	S 0 S N-C-S-, N-C-S-, N-C-O-,
	S S- D- N-C-Hal, N=C-S-, N=C-S-
	S- or >N=C-Hal the nitrogen atom
333/02	 not being part of nitro or nitroso groups [5] Monothiocarbamic acids; Derivatives thereof [5]
333/04	 having nitrogen atoms of thiocarbamic groups bound to hydrogen atoms or to acyclic carbon atoms [5]
333/06	• • having nitrogen atoms of thiocarbamic groups bound to carbon atoms of rings other than six-
333/08	 membered aromatic rings [5] having nitrogen atoms of thiocarbamic groups having the order of air membrand commuting
	bound to carbon atoms of six-membered aromatic rings [5]

333/10	 having nitrogen atoms of thiocarbamic groups being part of any of the groups 	335/24 • • containing any of the groups $S \times S \times S$ N-C-N-C or >N-C-N=C
	-S-C-N-CO-C-N-C	Y Y X being a hetero
	Y Y	atom, Y being any atom [5]
	S X D X Hal-C-N-C -S-C-N=C	335/26 • • • Y being a hydrogen or a carbon atom, e.g. benzoylthioureas [5]
	Y Y	335/28 • • • Y being a hetero atom, e.g. thiobiuret [5]
	s x s x	335/30 • Isothioureas [5]
	S X S X -O-C-N=C Hal-C-N=C	335/32 • having sulfur atoms of isothiourea groups bound
	Y X being a hetero	to acyclic carbon atoms [5] 335/34 • having sulfur atoms of isothiourea groups bound
	atom, Y being any atom, e.g., N-acyl- thiocarbamates [5]	to carbon atoms of rings other than six-membered aromatic rings [5]
333/12	 having nitrogen atoms of thiocarbamic groups bound to other hetero atoms [5] 	 335/36 • having sulfur atoms of isothiourea groups bound to carbon atoms of six-membered aromatic
333/14	• Dithiocarbamic acids; Derivatives thereof [5]	rings [5]
333/16	• • Salts of dithiocarbamic acids [5]	335/38 • • containing any of the groups
333/18	• • Esters of dithiocarbamic acids [5]	ş- ,× ş- ,×
333/20	• • having nitrogen atoms of dithiocarbamate groups bound to hydrogen atoms or to acyclic	>N-Ċ=N-C´´ , >N=Ċ-Ŋ-C´´
222/22	carbon atoms [5]	Ş- X
333/22	 having nitrogen atoms of dithiocarbamate groups bound to carbon atoms of rings other than six-membered aromatic rings [5] 	or $-N=\dot{C}-N=\dot{C}$ X being a hetero
333/24	• • • having nitrogen atoms of dithiocarbamate	atom, Y being any atom [5]
	groups bound to carbon atoms of six-membered	• having nitrogen atoms of thiourea or isothiourea
	aromatic rings [5]	groups further bound to other hetero atoms [5]
333/26	• • • containing any of the groups	335/42 • Sulfonylthioureas; Sulfonylisothioureas [5]
	S X S X -S-C-N-C or -S-C-N=C	335/44 • • Sulfenylthioureas; Sulfenylisothioureas [5]
		337/00 Derivatives of thiocarbonic acids containing
	Y Y X being a	functional groups covered by groups C07C 333/00 or
	hetero atom, Y being any atom, e.g. N-acyldithiocarbamates [5]	C07C 335/00 in which at least one nitrogen atom of
333/28	 having nitrogen atoms of dithiocarbamate 	these functional groups is further bound to another
333/20	groups bound to other hetero atoms [5]	nitrogen atom not being part of a nitro or nitroso group [5]
333/30	 having sulfur atoms of dithiocarbamic groups bound to other sulfur atoms [5] 	• Compounds containing any of the groups
333/32	• • • Thiuramsulfides; Thiurampolysulfides [5]	S S− N−N−C−S−, N−N=C−S−
335/00	This was is compounds containing any of the	
333700	Thioureas, i.e. compounds containing any of the S S - I = 0 groups $N = C - N \le 0$ the nitrogen atoms not	S 0 >N-N-C-O-, >N-N-C-S-
		5- N. N. D. C.
335/02	 being part of nitro or nitroso groups [5] Thiourea [5] 	or >N-N=C-O- e.g. thiocarbazates [5]
335/02	 Derivatives of thiourea [5] 	337/04 • • the other nitrogen atom being further doubly-
335/04	 having nitrogen atoms of thiourea groups bound to 	bound to a carbon atom [5]
555700	acyclic carbon atoms [5]	337/06 • Compounds containing any of the groups
335/08	• • • of a saturated carbon skeleton [5]	S S− >N−N−C−N<, >N−N=C−N<
335/10	• • • of an unsaturated carbon skeleton [5]	
335/12	• • • • the carbon skeleton containing six-	, S-
	membered aromatic rings [5]	or >N-Ň-Č=N< e.g.
335/14	• having nitrogen atoms of thiourea groups bound to	thiosemicarbazides [5]
	carbon atoms of rings other than six-membered aromatic rings [5]	337/08 • • the other nitrogen atom being further doubly-
335/16	 having nitrogen atoms of thiourea groups bound to 	bound to a carbon atom, e.g.
230,10	carbon atoms of six-membered aromatic rings of a carbon skeleton [5]	thiosemicarbazones [5]337/10 • the two nitrogen atoms of the functional group being doubly bound to each other [5]
335/18	• • • being further substituted by singly-bound	doubly-bound to each other [5]
	oxygen atoms [5]	381/00 Compounds containing carbon and sulfur and
335/20	• • being further substituted by nitrogen atoms, not	having functional groups not covered by groups
	being part of nitro or nitroso groups [5]	C07C 301/00-C07C 337/00 [5]
335/22	• • • being further substituted by carboxyl groups [5]	381/02 • Thiosulfates [5]
		381/04 • Thiosulfonates [5]

381/06	 Compounds containing sulfur atoms only bound to two nitrogen atoms [5] 	405/00	Compounds containing a five-membered ring having two side-chains in ortho position to each other, and
381/08	 having at least one of the nitrogen atoms acylated [5] 		having oxygen atoms directly attached to the ring in ortho position to one of the side-chains, one side-
381/10	 Compounds containing sulfur atoms doubly-bound to nitrogen atoms [5] 		chain containing, not directly attached to the ring, a carbon atom having three bonds to hetero atoms
381/12	Sulfonium compounds [5]		with at the most one bond to halogen, and the other
381/14	 Compounds containing a carbon atom having four bonds to hetero atoms, with a double bond to one 		side-chain having oxygen atoms attached in gamma- position to the ring, e.g. prostaglandins [5]
	hetero atom and at least one bond to a sulfur atom further doubly-bound to oxygen atoms [5]	407/00	Preparation of peroxy compounds [5]
		409/00	Peroxy compounds [5]
391/00	Compounds containing selenium [5]	409/02	• the —O—O— group being bound between a carbon
391/02	 having selenium atoms bound to carbon atoms of six- membered aromatic rings [5] 		atom, not further substituted by oxygen atoms, and hydrogen, i.e. hydroperoxides [5]
395/00	Compounds containing tellurium [5]	409/04	• • the carbon atom being acyclic [5]
		409/06	• • • Compounds containing rings other than six- membered aromatic rings [5]
401/00	Irradiation products of cholesterol or its derivatives;	409/08	• • Compounds containing six-membered aromatic rings [5]
101/00	Vitamin D derivatives, 9,10-seco	409/10	• • • Cumene hydroperoxide [5]
	cyclopenta[a]phenanthrene or analogues obtained by chemical preparation without irradiation [5]	409/12	• • • • with two alpha,alpha-dialkylmethyl- hydroperoxy groups bound to carbon atoms of the same six-membered aromatic ring [5]
403/00	Derivatives of cyclohexane or of a cyclohexene, having a side-chain containing an acyclic	409/14	• the carbon atom belonging to a ring other than a six-membered aromatic ring [5]
	unsaturated part of at least four carbon atoms, this part being directly attached to the cyclohexane or cyclohexene rings, e.g. vitamin A, beta-carotene,	409/16	 the —O—O— group being bound between two carbon atoms not further substituted by oxygen atoms, i.e. peroxides [5]
100 (00	beta-ionone [5]	409/18	 at least one of the carbon atoms belonging to a
403/02	 having side-chains containing only carbon and 		ring other than a six-membered aromatic ring [5]
402/04	hydrogen atoms [5]	409/20	• the —O—O— group being bound to a carbon atom
403/04	 having side-chains substituted by halogen atoms [5] having side chains substituted by singly haved 		further substituted by singly-bound oxygen atoms [5]
403/06	 having side-chains substituted by singly-bound oxygen atoms [5] 	409/22	 having two —O—O— groups bound to the carbon atom [5]
403/08	• • by hydroxy groups [5]	409/24	 the —O—O— group being bound between a C=O
403/10	• by etherified hydroxy groups [5]		group and hydrogen, i.e. peroxy acids [5]
403/12	• • by esterified hydroxy groups [5]	409/26	Peracetic acid [5]
403/14	 having side-chains substituted by doubly-bound oxygen atoms [5] 	409/28	• • a C=O group being bound to a carbon atom of a ring other than a six-membered aromatic ring [5]
403/16	• • not being part of —CHO groups [5]	409/30	• • a C=O group being bound to a carbon atom of a
403/18	 having side-chains substituted by nitrogen atoms [5] 		six-membered aromatic ring [5]
403/20	 having side-chains substituted by carboxyl groups [5] 	409/32	• the —O—O— group being bound between two X=O
403/22	 having side-chains substituted by sulfur atoms [5] having side chains substituted by sing grant and grant 	400 /0 4	groups [5]
403/24	• having side-chains substituted by six-membered non- aromatic rings, e.g. beta-carotene [5]	409/34	• • both belonging to carboxylic acids [5]
	מוסווומנוכ וווובס, כ.ב. טכנמ-כמוטוכווכ [ט]	409/36	• • Diacetyl peroxide [5]
		409/38	 the —O—O— group being bound between a XC=O group and a carbon atom, not further substituted by oxygen atoms, i.e. esters of peroxy acids [5]
		409/40	 containing nitrogen atoms [5]
		409/42	 containing sulfur atoms [5]

C07D HETEROCYCLIC COMPOUNDS (macromolecular compounds C08) [2]

Note(s)

- This subclass does not cover compounds containing saccharide radicals (as defined in Note (3) following the title of subclass C07H), 1. which are covered by subclass C07H.
- 2. In this subclass, in compounds containing a hetero ring covered by group C07D 295/00 and at least one other hetero ring, the hetero ring covered by group C07D 295/00 is considered as an acyclic chain containing nitrogen atoms. 3.

409/44

- In this subclass, the following terms or expressions are used with the meanings indicated:
 - "hetero ring" is a ring having at least one halogen, nitrogen, oxygen, sulfur, selenium or tellurium atom as a ring member;
 - "bridged" means the presence of at least one fusion other than ortho, peri or spiro;

with sulfur atoms directly bound to the —O—O—

groups, e.g. persulfonic acids [5]

- two rings are "condensed" if they share at least one ring member, i.e. "spiro" and "bridged" are considered as condensed;
- "condensed ring system" is a ring system in which all rings are condensed among themselves;
- "number of relevant rings" in a condensed ring system equals the number of scissions necessary to convert the ring system into one acyclic chain;
- "relevant rings" in a condensed ring system, i.e. the rings which taken together describe all the links between every atom of the ring system, are chosen according to the following criteria consecutively:
 - lowest number of ring members; a.
 - highest number of hetero atoms as ring members; h.
 - lowest number of members shared with other rings; c.
 - d. last place in the classification scheme.
- Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K 4. and within these subclasses.
- Therapeutic activity of compounds is further classified in subclass A61P. 5. 6.
 - In this subclass, in the absence of an indication to the contrary:
 - compounds having only one hetero ring are classified in the last appropriate place in one of the groups C07D 203/00-C07D 347/00. The same applies for compounds having more hetero rings covered by the same main group, neither condensed among themselves nor condensed with a common carbocyclic ring system;
 - compounds having two or more hetero rings covered by different main groups neither condensed among themselves nor condensed b. with a common carbocyclic ring system are classified in the last appropriate place in one of the groups C07D 401/00-C07D 421/00;
 - compounds having two or more relevant hetero rings, covered by the same or by different main groups, which are condensed among c. themselves or condensed with a common carbocyclic ring system, are classified in the last appropriate place in one of the groups C07D 451/00-C07D 519/00.
- 7. In this subclass:
 - where a compound may exist in tautomeric forms, it is classified as though existing in the form which is classified last in the system. Therefore, double bonds between ring members and non-ring members and double bonds between ring members themselves are considered equivalent in determining the degree of hydrogenation of the ring. Formulae are considered to be written in Kekule form:
 - hydrocarbon radicals containing a carbocyclic ring and an acyclic chain by which it is linked to the hetero ring and being substituted on both the carbocyclic ring and the acyclic chain by hetero atoms or by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, are classified according to the substituents on the acyclic chain. For example, the compound

NH N→CH2-CH2-CH2-CH2-CH2-K→×

is classified in group C07D 233/22, and the compound is classified in groups C07D 233/24 and C07D 233/26, where X --- NH2, -- NHCOCH3, or --- COOCH3.

nitrogen and oxygen	
nitrogen and sulfur	
thiamine	
nitrogen, oxygen, and sulfur	
HAVING OXYGEN AS RING HETERO ATOM	
only oxygen	407/00
oxygen and nitrogen	
oxygen and sulfur	
oxygen, nitrogen, and sulfur	
HAVING SULFUR AS RING HETERO ATOM	
only sulfur in a particular ring	409/00
sulfur and nitrogen	
thiamine	
sulfur and oxygen	
sulfur, nitrogen, and oxygen	
HAVING SELENIUM, TELLURIUM, OR HALOGEN AS RING HETERO ATOM	
COMPOUNDS CONTAINING TWO OR MORE RING SYSTEMS, HAVING EACH TWO OR	421/00
MORE HETERO RINGS.	519/00
ALKALOIDS	
Emetine	455/00
Ergot	457/00, 519/00
Granatanine	451/00
Morphine	
Nicotine	401/00
Papaverine	
Quinine	
Strychnine	
Tropane	

CEPHALOSPORIN	
PENICILLIN	
PTERIDINE	
THIENAMYCIN	
PURINE	
THIAMINE	
COMPOUNDS CONTAINING UNSPECIFIED HETERO RINGS	

Heterocyclic compounds having only nitrogen as ring hetero_ atom [2]

201/00	Preparation, separation, purification, or stabilisation of unsubstituted lactams [2]							
201/02	Preparation of lactams [2]							
201/04	from or <u>via</u> oximes by Beckmann rearrangement [2]							
201/06	 • from ketones by simultaneous oxime formation and rearrangement [2] 							
201/08	 from carboxylic acids or derivatives thereof, e.g. hydroxy carboxylic acids, lactones, nitriles [2] 							
201/10	• from cycloaliphatic compounds by simultaneous nitrosylation and rearrangement [2]							
201/12	• • by depolymerising polyamides [2]							
201/14	• Preparation of salts or adducts of lactams [2]							
201/16	Separation or purification [2]							
201/18	Stabilisation [2]							
203/00	Heterocyclic compounds containing three-membered rings with one nitrogen atom as the only ring hetero atom [2]							
203/02	• Preparation by ring-closure [2]							
203/04	 not condensed with other rings [2] 							
203/06	• • having no double bonds between ring members or between ring members and non-ring members [2]							
203/08	 • with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to the ring nitrogen atom [2] 							
203/10	• • • Radicals substituted by singly bound oxygen atoms [2]							
203/12	 • • • Radicals substituted by nitrogen atoms not forming part of a nitro radical [2] 							
203/14	 • • • with carbocyclic rings directly attached to the ring nitrogen atom [2] 							
203/16	 • • with acylated ring nitrogen atoms [2] 							
203/18	 • • by carboxylic acids, or by sulfur or nitrogen analogues thereof [2] 							
203/20	 • • • by carbonic acid, or by sulfur or nitrogen analogues thereof, e.g. carbamates [2] 							
203/22	• • • with hetero atoms directly attached to the ring nitrogen atom [2]							
203/24	• • • • Sulfur atoms [2]							
203/26	• condensed with carbocyclic rings or ring systems [2]							
205/00	Heterocyclic compounds containing four-membered rings with one nitrogen atom as the only ring hetero							
205/02	atom [2]							
205/02 205/04	 not condensed with other rings [2] having no double bonds between ring members or 							
205/04	 having no double bonds between ring members or between ring members and non-ring members [2] 							
205/06	 having one double bond between ring members or between a ring member and a non-ring member [2] 							
205/08	• • • with one oxygen atom directly attached in position 2, e.g. beta-lactams [2]							

205/085	• • • • with a nitrogen atom directly attached in position 3 [5]
205/09	• • • • with a sulfur atom directly attached in position 4 [5]
205/095	• • • • and with a nitrogen atom directly attached in position 3 [5]
205/10	• • having two double bonds between ring members or between ring members and non-ring
205/12	members [2]condensed with carbocyclic rings or ring systems [2]
207/00	Heterocyclic compounds containing five-membered rings not condensed with other rings, with one nitrogen atom as the only ring hetero atom [2]
	<u>Note(s)</u>
	Pyrrolidines having only hydrogen atoms attached to the ring carbon atoms are classified in group C07D 295/00.
207/02	 with only hydrogen or carbon atoms directly attached to the ring nitrogen atom [2]
207/04	• • having no double bonds between ring members or between ring members and non-ring members [2]
207/06	• • • with radicals, containing only hydrogen and carbon atoms, attached to ring carbon atoms [2]
207/08	• • • with hydrocarbon radicals, substituted by hetero atoms, attached to ring carbon atoms [2]
207/09	• • • Radicals substituted by nitrogen atoms not forming part of a nitro radical [3]
207/10	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
207/12	• • • • Oxygen or sulfur atoms [2]
207/14	• • • • Nitrogen atoms not forming part of a nitro radical [2]
207/16	• • • Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]
207/18	 having one double bond between ring members or between a ring member and a non-ring member [2]
207/20	 with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
207/22	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
207/24	• • • • Oxygen or sulfur atoms [2]
207/26	• • • • 2-Pyrrolidones [2]
207/263	• • • • • • with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to other ring carbon atoms [3]

207/267	•	•	•	••	•	 with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to the ring nitrogen atom [3]
207/27	•	•	•	••	•	 with substituted hydrocarbon radicals directly attached to the ring nitrogen atom [3]
207/273	•	•	•	• •	•	with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to other ring carbon atoms [3]
207/277	•	•	•	••	•	• Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [3]
207/28	•	•	•	••	•	 2-Pyrrolidone-5- carboxylic acids; Functional derivatives thereof, e.g. esters, nitriles [2, 3]
207/30	•	•	0		veen	o double bonds between ring members n ring members and non-ring
207/32	•	•	•	with subs	i on stitu	ly hydrogen atoms, hydrocarbon or ted hydrocarbon radicals, directly to ring carbon atoms [2]
207/323	•	•	•	• v c d	vith onta irec	only hydrogen atoms or radicals aining only hydrogen and carbon atoms ty attached to the ring nitrogen as [3]
207/325	•	•	•	• v d	vith irec	substituted hydrocarbon radicals tly attached to the ring nitrogen
207/327	•	•	•	• •	Ra ha at	adicals substituted by carbon atoms aving three bonds to hetero atoms with the most one bond to halogen, e.g. ester r nitrile radicals [3]
207/33	•	•	•			substituted hydrocarbon radicals, ty attached to ring carbon atoms [3]
207/333	•	•	•	 • Radicals substituted by oxygen or sulfur atoms [3] 		
207/335	•	•	•	••		adicals substituted by nitrogen atoms of forming part of a nitro radical [3]
207/337	•	•	•	••	ha at	adicals substituted by carbon atoms aving three bonds to hetero atoms with the most one bond to halogen, e.g. ester r nitrile radicals [3]
207/34	•	•	•	thre one	e bo bon cals	tero atoms or with carbon atoms having onds to hetero atoms with at the most ad to halogen, e.g. ester or nitrile b, directly attached to ring carbon 2]
207/36	•	•	•	• (gen or sulfur atoms [2]
207/38	•	•	•	••		-Pyrrolones [2]
207/40	•	•	•	••	2,	5-Pyrrolidine-diones [2]
207/404	•	•	•	••	•	with only hydrogen atoms or radicals containing only hydrogen and carbon atoms directly attached to other ring carbon atoms, e.g. succinimide [3]
207/408	•	•	•	••	•	 Radicals containing only hydrogen and carbon atoms attached to ring carbon atoms [3]
207/412	•	•	•	••	•	Acyclic radicals containing more than six carbon atoms [3]

207/416					
	•	•	•	•	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to other ring carbon atoms [3]

209/72	•	•	•	membered [2] 4,7-Endo-alkylene-iso-indoles [2]
209/74	•	•	•	• with an oxygen atom in position 1 [2]
209/76	•	•	•	• with oxygen atoms in positions 1 and 3 [2]
209/78	•	•	•	• with oxygen and nitrogen atoms in positions 1 and 3 [2]
209/80	•	•	ſĿ	, c]- or [b, d]-condensed [2]
209/82	•	•	•	Carbazoles; Hydrogenated carbazoles [2]
209/84	•	•	•	• Separation, e.g. from tar; Purification [2]
209/86	•	•	•	• with only hydrogen atoms, hydrocarbon or
				substituted hydrocarbon radicals, directly attached to carbon atoms of the ring system [2]
209/88	•	•	•	• with hetero atoms or with carbon atoms
				having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to carbon
				atoms of the ring system [2]
209/90	•	•	•	Benzo [c, d] indoles; Hydrogenated benzo [c, d] indoles [2]
209/92	•	•	•	Naphthostyrils [2]
209/94	•	•	•	containing carbocyclic rings other than six- membered [4]
209/96	•	•	Sj	piro-condensed ring systems [2]
211/00				cyclic compounds containing hydrogenated e rings, not condensed with other rings [2]
	N	lot	e(s)	1
	1		Iı	n this group, the following term is used with the neaning indicated:
				-

			•		"hydrogenated" means having less than three double bonds between ring members or between ring members and non-ring
	2.	•	tc	riı	members. ridines having only hydrogen atoms attached ng carbon atoms are classified in group D 295/00.
211/02	•		epa	ara	tion by ring-closure or hydrogenation [2]
211/04	•				y hydrogen or carbon atoms directly attached ng nitrogen atom [2]
211/06	•	•			ng no double bonds between ring members or een ring members and non-ring members [2]
211/08	•	•	•	w. ra	ith hydrocarbon or substituted hydrocarbon dicals directly attached to ring carbon oms [2, 3]
211/10	•	•	•	•	with radicals containing only carbon and hydrogen atoms attached to ring carbon atoms [2, 3]
211/12	•	•	•	•	 with only hydrogen atoms attached to the ring nitrogen atom [2, 3]
211/14	•	•	•	•	 with hydrocarbon or substituted hydrocarbon radicals attached to the ring
					nitrogen atom [2]
211/16	•	•	•	•	• with acylated ring nitrogen atom [2]
211/18	•	•	•	•	with substituted hydrocarbon radicals attached to ring carbon atoms [2]
211/20	•	•	•	•	 with hydrocarbon radicals, substituted by singly bound oxygen or sulfur atoms [2]
211/22	•	•	•	•	• • by oxygen atoms [2]
211/24	•	•	•	•	• • by sulfur atoms to which a second hetero atom is attached [2]
211/26	•	•	•	•	• with hydrocarbon radicals, substituted by nitrogen atoms [2]
211/28	•	•	•	•	 to which a second hetero atom is attached [2]
211/30	•	•	•	•	 with hydrocarbon radicals, substituted by doubly bound oxygen or sulfur atoms or by two oxygen or sulfur atoms singly bound to the same carbon atom [2]
211/32	•	•	•	•	• • by oxygen atoms [2]
211/34	•	•	•	•	• with hydrocarbon radicals, substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]
211/36	•	•	•		ith hetero atoms or with carbon atoms having
				or	ree bonds to hetero atoms with at the most ne bond to halogen, e.g. ester or nitrile dicals, directly attached to ring carbon
					oms [2]
211/38	•	•	•	•	Halogen atoms or nitro radicals [2]
211/40	•	•	•	•	Oxygen atoms [2]
211/42	•	•	•	•	• attached in position 3 or 5 [2]
211/44	•	•	•	•	• attached in position 4 [2]
211/46	•	•	•	•	• • having a hydrogen atom as the second substituent in position 4 [2]
211/48	•	•	•	•	• • having an acyclic carbon atom attached in position 4 [2]
211/50	•	•	•	•	• • • Aroyl radical [2]
211/52	•	•	•	•	• • having an aryl radical as the second substituent in position 4 [2]
211/54	•	•	•	•	Sulfur atoms [2]
211/56	•	•	•	•	Nitrogen atoms (nitro radicals C07D 211/38) [2]
211/58	•	•	•	•	• attached in position 4 [2]
211/60	•	•	•	•	Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen,
					e.g. ester or nitrile radicals [2]

	thereof [3]	>
213/09	 amine salts, or nitriles [3] from acetaldehyde or cyclic polymers 	2

227/093	 Two doubly-bound oxygen atoms attached to the carbon atoms adjacent to the ring nitrogen atom, e.g. dicarboxylic acid imides [3]
227/10	• • Nitrogen atoms not forming part of a nitro radical [2]
227/12	• with hetero atoms directly attached to the ring nitrogen atom [2]
229/00	Heterocyclic compounds containing rings of less than five members having two nitrogen atoms as the only ring hetero atoms [2]
229/02	• containing three-membered rings [3]
231/00	Heterocyclic compounds containing 1,2-diazole or hydrogenated 1,2-diazole rings [2]
231/02	• not condensed with other rings [2]
231/04	 having no double bonds between ring members or between ring members and non-ring members [2]
231/06	 having one double bond between ring members or between a ring member and a non-ring member [2]

231/08	•	•	•				en or sulfur atoms directly attached to n atoms [2]
231/10	•	•	ha		-		r three double bonds between ring
							between ring members and non-ring
			m			[2]	
231/12	•	•	•				hydrogen atoms, hydrocarbon or
							l hydrocarbon radicals, directly o ring carbon atoms [2]
231/14	•	•	•				o atoms or with carbon atoms having
				th	ree l	bond	ls to hetero atoms with at the most
							o halogen, e.g. ester or nitrile
					dica oms		irectly attached to ring carbon
231/16	•	•	•	•			n atoms or nitro radicals [2]
231/18	•	•	•	•			ygen or sulfur atom [2]
231/20	•	•	•	•			oxygen atom attached in position 3
						or 5	
231/22	•	•	•	•	•		rith aryl radicals attached to ring itrogen atoms [2]
231/24	•	•	•		•	••	having sulfone or sulfonic acid
201/24							radicals in the molecule [2]
231/26	•	•	•	•	•	••	1-Phenyl-3-methyl-5- pyrazolones,
							unsubstituted or substituted on the
231/28					т.,	0.01	phenyl ring [2] ygen or sulfur atoms [2]
231/20							thed in position 3 and 5 [2]
231/32	•	•	•	•	•		xygen atoms [2]
231/34	•	•	•	•	•	•••	with only hydrogen atoms or
							radicals containing only hydrogen
							and carbon atoms, attached in
231/36							position 4 [2] with hydrocarbon radicals,
231/30							substituted by hetero atoms,
							attached in position 4 [2]
231/38	•	•	•	•			en atoms (nitro radicals
231/40							231/16) [2] lated on said nitrogen atom [2]
231/40	•	•	•	•		-	zene-sulfonamido pyrazoles [2]
231/44	•	•	•	•			and nitrogen or sulfur and nitrogen
						ms [
231/46	•	•	•	•			gen atom in position 3 or 5 and
221/40							gen atom in position 4 [2]
231/48	•	•	•	•	•		ith hydrocarbon radicals attached to aid nitrogen atom [2]
231/50	•	•	•	•	•		cylated on said nitrogen atom [2]
231/52	•	•	•	•		Oxy	gen atom in position 3 and nitrogen
							n in position 5, or <u>vice-versa</u> [2]
231/54 231/56	•	c					carbocyclic rings or ring systems [2] les; Hydrogenated
201/00	•	-					les [2]
000 /00							
233/00							oounds containing 1,3-diazole or diazole rings, not condensed with
					s [2]		
233/02	•						e bonds between ring members or
101/04						-	embers and non-ring members [2]
233/04	•						ble bond between ring members or nember and a non-ring member [2]
233/06	•	•					lrogen atoms or radicals containing
			or	ly	hyd	roge	n and carbon atoms, directly attached
222.000			to		-		n atoms [2]
233/08	•	•	•				radicals, containing more than four ms, directly attached to ring carbon
					oms		and, and a suborright a
233/10	•	•	•	•			ly hydrogen atoms or radicals
							ing only hydrogen and carbon atoms,
					uir	ectry	attached to ring nitrogen atoms [2]

233/12	• • • with substituted hydrocarbon radicals
1/1/	attached to ring nitrogen atoms [2]
233/14	• • • • Radicals substituted by oxygen atoms [2]
233/16 233/18	• • • • Radicals substituted by nitrogen atoms [2]
233/18	• • • • Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester
	or nitrile radicals [2]
233/20	• • with substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
233/22	• • • Radicals substituted by oxygen atoms [2]
233/24	• • • Radicals substituted by nitrogen atoms not forming part of a nitro radical [2]
233/26	• • Radicals substituted by carbon atoms having three bonds to hetero atoms [2]
233/28	• • with hetero atoms or with carbon atoms having
	three bonds to hetero atoms with at the most one
	bond to halogen, e.g. ester or nitrile radicals,
	directly attached to ring carbon atoms [2]
233/30	• • • Oxygen or sulfur atoms [2]
233/32	• • • • One oxygen atom [2]
233/34	• • • • Ethylene-urea [2]
233/36	• • • • with hydrocarbon radicals, substituted by
	nitrogen atoms, attached to ring nitrogen atoms [2]
233/38	• • • • • with acyl radicals or hetero atoms directly
233/30	attached to ring nitrogen atoms [2]
233/40	• • • • Two or more oxygen atoms [2]
233/42	• • • • Sulfur atoms [2]
233/44	 • • • Nitrogen atoms not forming part of a nitro
200/ 44	radical [2]
233/46	• • • • with only hydrogen atoms attached to said
	nitrogen atoms [2]
233/48	• • • • with acyclic hydrocarbon or substituted
	acyclic hydrocarbon radicals, attached to
000 / 50	said nitrogen atoms [2]
233/50	•••• with carbocyclic radicals directly attached to said nitrogen atoms [2]
233/52	• • • • with hetero atoms directly attached to said
200/02	nitrogen atoms [2]
233/54	 having two double bonds between ring members or
	between ring members and non-ring members [2]
233/56	• • with only hydrogen atoms or radicals containing
	only hydrogen and carbon atoms, attached to ring
222/50	carbon atoms [2]
233/58	• • • with only hydrogen atoms or radicals containing only hydrogen and carbon atoms,
	attached to ring nitrogen atoms [2]
233/60	• • • with hydrocarbon radicals, substituted by
	oxygen or sulfur atoms, attached to ring
	nitrogen atoms [2]
233/61	• • • with hydrocarbon radicals, substituted by
	nitrogen atoms not forming part of a nitro
	radical, attached to ring nitrogen atoms [3]
233/62	• • • with triarylmethyl radicals attached to ring nitrogen atoms [2]
777/64	-
233/64	• • with substituted hydrocarbon radicals attached to ring carbon atoms, e.g. histidine [2]
233/66	 with hetero atoms or with carbon atoms having
	three bonds to hetero atoms with at the most one
	bond to halogen, e.g. ester or nitrile radicals,
	directly attached to ring carbon atoms [2]
233/68	• • • Halogen atoms [2]
233/70	• • • One oxygen atom [2]
233/72	• • • Two oxygen atoms, e.g. hydantoin [2]

233/74	•	•	•	• with only hydrogen atoms or radicals containing only hydrogen and carbon atoms,	
233/76	•	•	•	attached to other ring members [2]with substituted hydrocarbon radicals	
				attached to the third ring carbon atom [2]	
233/78	•	•	•	• • Radicals substituted by oxygen atoms [2]	
233/80	•	•	•	• with hetero atoms or acyl radicals directly attached to ring nitrogen atoms [2]	
233/82	•	•	•	• • Halogen atoms [2]

261/14	• • • • Nitrogen atoms [2]
261/16	• • • • Benzene-sulfonamido isoxazoles [2]
261/18	 Carbon atoms having three bonds to hetero atoms, with at the most one bond to halogen [2]
261/20	• condensed with carbocyclic rings or ring systems [2]
263/00	Heterocyclic compounds containing 1,3-oxazole or hydrogenated 1,3-oxazole rings [2]
263/02	• not condensed with other rings [2]
263/04	• • having no double bonds between ring members or between ring members and non-ring members [2]
263/06	• • • with hydrocarbon radicals, substituted by
	oxygen atoms, attached to ring carbon atoms [2]
263/08	 having one double bond between ring members or between a ring member and a non-ring member [2]
263/10	 • with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
263/12	• • • • with radicals containing only hydrogen and carbon atoms [2]
263/14	• • • • with radicals substituted by oxygen atoms [2]
263/16	 • with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
263/18	• • • • Oxygen atoms [2]
263/20	• • • • attached in position 2 [2]
263/22	 with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to other ring carbon atoms [2]
263/24	•••••• with hydrocarbon radicals, substituted by oxygen atoms, attached to other ring carbon atoms [2]

263/26	• • • • • with hetero atoms or acyl radicals
	directly attached to the ring nitrogen
262 (20	atom [2]
263/28	• • • Nitrogen atoms not forming part of a nitro radical [2]
263/30	 having two or three double bonds between ring
203730	members or between ring members and non-ring
	members [2]
263/32	• • • with only hydrogen atoms, hydrocarbon or
	substituted hydrocarbon radicals, directly
263/34	attached to ring carbon atoms [2]with hetero atoms or with carbon atoms having
203/34	three bonds to hetero atoms with at the most
	one bond to halogen, e.g. ester or nitrile
	radicals, directly attached to ring carbon
262/26	atoms [2]
263/36 263/38	 One oxygen atom [2] • • • attached in position 2 [2]
263/30	 ••••• attached in position 2 [2] •••• attached in position 4 [2]
263/40	• • • • • attached in position 5 [2]
263/44	• • • • Two oxygen atoms [2]
263/46	• • • • Sulfur atoms [2]
263/48	• • • • Nitrogen atoms not forming part of a nitro
	radical [2]
263/50	• • • • Benzene-sulfonamido oxazoles [2]
263/52	• condensed with carbocyclic rings or ring systems [2]
263/54	Benzoxazoles; Hydrogenated benzoxazoles [2]
263/56	 with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly
	attached in position 2 [2]
263/57	• • • • Aryl or substituted aryl radicals [5]
263/58	• • • with hetero atoms or with carbon atoms having
	three bonds to hetero atoms with at the most
	one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 2 [2]
263/60	Naphthoxazoles; Hydrogenated
203700	naphthoxazoles [2]
263/62	having two or more ring systems containing
	condensed 1,3-oxazole rings [2]
263/64	• • • linked in positions 2 and 2' by chains
	containing six-membered aromatic rings or ring systems containing such rings [5]
	systems containing such rings [0]
265/00	Heterocyclic compounds containing six-membered
	rings having one nitrogen atom and one oxygen atom as the only ring hetero atoms [2]
	<u>Note(s)</u>
	Morpholines having only hydrogen atoms attached to
	the ring carbon atoms are classified in group C07D 295/00.
265/02	 1,2-Oxazines; Hydrogenated 1,2-oxazines [2]
265/04	• 1,3-Oxazines; Hydrogenated 1,3-oxazines [2]
265/06	• • not condensed with other rings [2]
265/08	• • • having one double bond between ring members
	or between a ring member and a non-ring
265/10	member [2]
265/10	• • • with oxygen atoms directly attached to ring carbon atoms [2]
265/12	 condensed with carbocyclic rings or ring
	systems [2]
265/14	• • • condensed with one six-membered ring [2]
265/16	• • • with only hydrogen or carbon atoms directly
	attached in positions 2 and 4 [2]
265/18	• • • with hetero atoms directly attached in position 2 [2]
	position 2 [2]

265/20	• • • • with hetero atoms directly attached in
	position 4 [2]
265/22	• • • • • Oxygen atoms [2]
265/24	• • • • with hetero atoms directly attached in
	positions 2 and 4 [2]
265/26	• • • • Two oxygen atoms, e.g. isatoic
265/20	anhydride [2]
265/28	• 1,4-Oxazines; Hydrogenated 1,4-oxazines [2]
265/30	• • not condensed with other rings [2]
265/32	 with oxygen atoms directly attached to ring carbon atoms [2]
265/33	• • • • Two oxygen atoms, in positions 3 and 5 [5]
265/34	 condensed with carbocyclic rings [2]
265/36	 • • condensed with one six-membered ring [2]
265/38	• • [b, e]-condensed with two six-membered
200700	rings [2]
267/00	Heterocyclic compounds containing rings of more
	than six members having one nitrogen atom and one
	oxygen atom as the only ring hetero atoms [2]
267/02	Seven-membered rings [2]
267/04	• • having the hetero atoms in positions 1 and 2 [2]
267/06	• • having the hetero atoms in positions 1 and 3 [2]
267/08	• • having the hetero atoms in positions 1 and 4 [2]
267/10	• • • not condensed with other rings [2]
267/12	• • • condensed with carbocyclic rings or ring
267/14	systems [2]condensed with one six-membered ring [2]
267/14	• • • • condensed with two six-membered rings [2]
267/18	• • • • • [b, e]-condensed [2]
267/20	• • • • • [b, f]-condensed [2]
267/22	• Eight-membered rings [2]
20//22	Elgit membered migs [=]
269/00	Heterocyclic compounds containing rings having one
269/00	nitrogen atom and one oxygen atom as the only ring
269/00	nitrogen atom and one oxygen atom as the only ring hetero atoms according to more than one of groups
	nitrogen atom and one oxygen atom as the only ring hetero atoms according to more than one of groups C07D 261/00-C07D 267/00 [2]

273/02	 having two nitrogen atoms and only one oxygen atom [2]
273/04	 Six-membered rings [2]
273/06	Seven-membered rings [2]
273/08	having two nitrogen atoms and more than one oxygen
	atom [3]

Heterocyclic compounds having nitrogen and sulfur as the only ring hetero atoms [2]

275/00	Heterocyclic compounds containing 1, 2-thiazole or hydrogenated 1,2-thiazole rings [2]
275/02	 not condensed with other rings [2]
275/03	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [5]
275/04	• condensed with carbocyclic rings or ring systems [2]
275/06	• • with hetero atoms directly attached to the ring
	sulfur atom [2]
277/00	Heterocyclic compounds containing 1,3-thiazole or hydrogenated 1,3-thiazole rings [2]
277/02	 not condensed with other rings [2]
277/04	• • having no double bonds between ring members or
277/06	 between ring members and non-ring members [2] with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen,
	e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
277/08	 having one double bond between ring members or between a ring member and a non-ring member [2]
277/10	• • • with only hydrogen atoms, hydrocarbon or
	substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
277/12	• • with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon
	atoms [2]
277/14	• • • • Oxygen atoms [2]
277/16	• • • • Sulfur atoms [2]
277/18	• • • Nitrogen atoms [2]
277/20	 having two or three double bonds between ring members or between ring members and non-ring members [2]
277/22	 with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
277/24	• • • • Radicals substituted by oxygen atoms [2]
277/26	• • • • Radicals substituted by sulfur atoms [2]
277/28	• • • • Radicals substituted by nitrogen atoms [2]
277/30	• • • • Radicals substituted by carbon atoms having
	three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]
277/32	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
277/34	• • • • Oxygen atoms [2]
277/36	• • • • Sulfur atoms [2]
277/38	• • • • Nitrogen atoms [2]
277/40	• • • • Unsubstituted amino or imino radicals [2]

277/42	•	•	•	•	•	Amino or imino radicals substituted by hydrocarbon or substituted hydrocarbon
277/44						radicals [2]
277/44 277/46	:	:	:	:	:	Acylated amino or imino radicals [2]by carboxylic acids, or sulfur or
277740	•	•	•	•	•	nitrogen analogues thereof [2]
277/48	•	•	•	•	•	 by radicals derived from carbonic acid, or sulfur or nitrogen analogues thereof, e.g. carbonylguanidines [2]
277/50	•	•	•	•	•	Nitrogen atoms bound to hetero atoms [2]
277/52	•	•	•	•	•	• to sulfur atoms, e.g. sulfonamides [2]
277/54	•	•	•	•		trogen and either oxygen or sulfur
						oms [2]
277/56	•	•	•	•		arbon atoms having three bonds to hetero oms with at the most one bond to
						logen [2]
277/58	•	•	•	•		tro radicals [2]
277/587	•	•	•	by at e.; rii	7 ca om: g. e ng c	aliphatic hydrocarbon radicals substituted rbon atoms having three bonds to hetero s with at the most one bond to halogen, ster or nitrile radicals, directly attached to carbon atoms, said aliphatic radicals being ituted in the alpha-position to the ring by a
				Ζ	bei	$+$ ^{−N} ₊ C [−] (CH ₂) _m −C \in o atom, e.g. S [−] Z [−] with m ≥ 0, ng a singly or a doubly bound hetero [5]
277/593	•	•	•	•	bo	being doubly bound oxygen or doubly und nitrogen, which nitrogen is part of a ssibly substituted oximino radical [5]
277/60	•	С	ond	ens		with carbocyclic rings or ring systems [2]
277/62	•	•	В	enz	oth	iazoles [2]
277/64	•	•	•			only hydrocarbon or substituted
				hy		ocarbon radicals attached in position 2 [2]
277/66	•	•	•	•		th aromatic rings or ring systems directly ached in position 2 [2]
277/68	•	•	•	th or	ith ree ne b	hetero atoms or with carbon atoms having bonds to hetero atoms with at the most ond to halogen, e.g. ester or nitrile als, directly attached in position 2 [2]
277/70	•	•	•	•	Su	llfur atoms [2]
277/72	•	•	•	•	•	2-Mercaptobenzothiazole [2]
277/74	•	•	•	•	•	Sulfur atoms substituted by carbon atoms [2]
277/76	•	•	•	•	•	Sulfur atoms attached to a second hetero atom [2]
277/78	•	•	•	•	•	• to a second sulfur atom [2]
277/80	•	•	•	•	•	• to a nitrogen atom [2]
277/82	•	•	•	•		trogen atoms [2]
277/84	•	•	Ν	apł	ntho	othiazoles [2]
279/00	Heterocyclic compounds containing six-membered rings having one nitrogen atom and one sulfur atom as the only ring hetero atoms [2]					
	N	ot	e(s)	1		
	to	th	e ri	ing		ines having only hydrogen atoms attached bon atoms are classified in group
279/02	•	1,	2-7	Thia	azir	nes; Hydrogenated 1,2-thiazines [2]
279/04	•	1,	3-1	Thia	azir	nes; Hydrogenated 1,3-thiazines [2]
279/06	•	•	no	ot c	ond	lensed with other rings [2]
279/08	•	•				ed with carbocyclic rings or ring
270/42			-			[2]
279/10	•	1,	4-1	hia	azir	nes; Hydrogenated 1,4-thiazines [2]

279/14

295/116	•	 with the doubly bound oxygen or sulfur atoms directly attached to a carbocyclic ring [5] 					
295/12	•	 substituted by singly or doubly bound nitrogen atoms (nitro radicals C07D 295/06) [2] 					
295/125	•	 with the ring nitrogen atoms and the substituent nitrogen atoms attached to the same carbon chain, which is not interrupted by carbocyclic rings [5] 					
295/13	•	• • • to an acyclic saturated chain [5]					
295/135	•	 with the ring nitrogen atoms and the substituent nitrogen atoms separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings [5] 					
295/14	•	 substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2] 					
295/145	•	 with the ring nitrogen atoms and the carbon atoms with three bonds to hetero atoms attached to the same carbon chain, which is not interrupted by carbocyclic rings [5] 					
295/15	•	• • • to an acyclic saturated chain [5]					
295/155	•	• with the ring nitrogen atoms and the carbon atoms with three bonds to hetero atoms separated by carbocyclic rings or by carbon chains interrupted by carbocyclic rings [5]					
295/16 295/18	•	 acylated on ring nitrogen atoms [2] by radicals derived from carboxylic acids, or sulfur or nitrogen analogues thereof [2] 					

295/182	• • • Radicals derived from carboxylic acids [5]
295/185	• • • • from aliphatic carboxylic acids [5]
295/192	• • • • from aromatic carboxylic acids [5]
295/194	• • • Radicals derived from thio- or thiono carboxylic acids [5]
295/195	• • • Radicals derived from nitrogen analogues of carboxylic acids [5]
295/20	• • by radicals derived from carbonic acid, or sulfur or nitrogen analogues thereof [2]
295/205	• • • Radicals derived from carbonic acid [5]
295/21	• • Radicals derived from sulfur analogues of carbonic acid [5]
295/215	• • Radicals derived from nitrogen analogues of carbonic acid [5]
295/22	 with hetero atoms directly attached to ring nitrogen atoms [2]
295/24	• • Oxygen atoms [5]
295/26	• • Sulfur atoms [5]
295/28	• • Nitrogen atoms [5]
295/30	• • • non-acylated [5]
295/32	• • • acylated with carboxylic or carbonic acids, or their nitrogen or sulfur analogues [5]

Heterocyclic compounds having oxygen atoms, with or without sulfur, selenium, or tellurium atoms, as ring hetero atoms [2]

301/00	Preparation of oxiranes [2]
301/02	• Synthesis of the oxirane ring [2]
301/03	• • by oxidation of unsaturated compounds, or of
	mixtures of unsaturated and saturated
	compounds [3]
301/04	• • • with air or molecular oxygen [2, 3]
301/06	• • • • in the liquid phase [2, 3]
301/08	• • • • in the gaseous phase [2, 3]
301/10	• • • • with catalysts containing silver or gold [2, 3]
301/12	• • • with hydrogen peroxide or inorganic peroxides or peracids [2, 3]
301/14	• • with organic peracids, or salts, anhydrides or esters thereof [2, 3]
301/16	• • • • formed <u>in situ</u> , e.g. from carboxylic acids and hydrogen peroxide [2, 3]
301/18	• • • • from polybasic carboxylic acids [2, 3]
301/19	• • • with organic hydroperoxides [3]
301/22	 by oxidation of saturated compounds with air or molecular oxygen (of mixtures of unsaturated and saturated compounds C07D 301/04) [2]
301/24	 by splitting-off Hal—Y from compounds containing the radical Hal—C—C—OY [2]
301/26	• • • Y being hydrogen [2]
301/27	 Condensation of epihalohydrins or halohydrins with compounds containing active hydrogen atoms (macromolecular compounds C08) [3]
301/28	• • by reaction with hydroxyl radicals [2, 3]
301/30	• • by reaction with carboxyl radicals [2, 3]
301/32	Separation; Purification [2]
301/36	• Use of additives, e.g. for stabilisation [3]
303/00	Compounds containing three-membered rings having one oxygen atom as the only ring hetero atom [2]
303/02	Compounds containing oxirane rings [2]
303/04	• containing only hydrogen and carbon atoms in addition to the ring oxygen atoms [2]

303/06	• • in which the oxirane rings are condensed with carbocyclic ring system having three or more relevant rings [2]	a
303/08	 relevant rings [2] with hydrocarbon radicals, substituted by haloger atoms, nitro radicals or nitroso radicals [2] 	n
303/10	 in which the oxirane rings are condensed with carbocyclic ring system having three or more relevant rings [2] 	a
303/12	• • with hydrocarbon radicals, substituted by singly doubly bound oxygen atoms [2]	or
303/14	• • • by free hydroxyl radicals [2]	
303/16	• • • by esterified hydroxyl radicals [2]	
303/17	• • • • containing oxirane rings condensed with	
	carbocyclic ring systems having three or more relevant rings [3]	
303/18	• • • by etherified hydroxyl radicals [2]	
303/20	• • • Ethers with hydroxy compounds containing no oxirane rings [2]	ł
303/22	• • • • • with monohydroxy compounds [2]	
303/23	Oxiranylmethyl ethers of compounds having one hydroxy group bound to a six-membered aromatic ring, the oxiranylmethyl radical not being further substituted, i.e.	
	CH ₂ -CH-CH ₂ -O-Aryl	
202/24	U [5]	
303/24	• • • • with polyhydroxy compounds [2]	
303/26	• • • • • • having one or more free hydroxyl radicals [2]	
303/27	• • • • • having all hydroxyl radicals etherified with oxirane containing compounds [3]	1
303/28	• • • Ethers with hydroxy compounds containing	ş
303/30	 oxirane rings [2] • • • • Ethers of oxirane-containing polyhydrox 	N.
303730	compounds in which all hydroxyl radica are etherified with oxirane-containing hydroxy compounds [2]	
303/31	 • in which the oxirane rings are condensed with a carbocyclic ring system having three or more relevant rings [3] 	<u>}</u>
303/32	• • • by aldehydo- or ketonic radicals [2]	
303/34	 with hydrocarbon radicals, substituted by sulfur, selenium, or tellurium atoms [2] 	
303/36	• • with hydrocarbon radicals, substituted by nitroge atoms (nitro, nitroso radicals C07D 303/08) [2]	n
303/38	• • with hydrocarbon radicals, substituted by carbon	
	atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]	
303/40	• • • by ester radicals [2]	
303/42	 • • • Acyclic compounds having a chain of seven or more carbon atoms, e.g. epoxidised fats [2] 	a
303/44	• • • Esterified with oxirane-containing hydroxy compounds [2]	
303/46	• • • by amide or nitrile radicals [2]	
303/48	 with hetero atoms or with carbon atoms having 	
	three bonds to hetero atoms with at the most one bond to halogen, directly attached to ring carbon atoms, e.g. ester or nitrile radicals [3]	
305/00	Heterocyclic compounds containing four-membered rings having one oxygen atom as the only ring heter atoms [2]	
305/02	 not condensed with other rings [2] 	

305/04	• • having no double bonds between ring members or between ring members and non-ring members [2]
305/06	• • • with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly
	attached to the ring atoms [2]
305/08	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring atoms [2]
305/10	 having one or more double bonds between ring members or between ring members and non-ring members [2]
305/12	• • • Beta-lactones [2]
305/14	• condensed with carbocyclic rings or ring systems [2]
307/00	Heterocyclic compounds containing five-membered rings having one oxygen atom as the only ring hetero atom [2]
307/02	• not condensed with other rings [2]
307/04	 having no double bonds between ring members or between ring members and non-ring members [2]
207/00	
307/06	 with only hydrogen atoms or radicals containing only hydrogen and carbon atoms, directly attached to ring carbon atoms [2]
307/08	• • • • Preparation of tetrahydrofuran [2]
307/10	• • • with substituted hydrocarbon radicals attached
507710	to ring carbon atoms [2]
307/12	• • • • Radicals substituted by oxygen atoms [2]
307/14	• • • • Radicals substituted by nitrogen atoms not
	forming part of a nitro radical [2]
307/16	• • • Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile
	radicals [2]
307/18	• • • with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most
	one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
307/20	• • • • Oxygen atoms [2]
307/22	• • • Nitrogen atoms not forming part of a nitro radical [2]
307/24	• • • • Carbon atoms having three bonds to hetero
307724	atoms with at the most one bond to halogen [2]
307/26	• • having one double bond between ring members or
	between a ring member and a non-ring member [2]
307/28	• • • with only hydrogen atoms, hydrocarbon or
	substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
307/30	• • • with hetero atoms or with carbon atoms having
	three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon
	atoms [2]
307/32	• • • • Oxygen atoms [2]
307/33	• • • • in position 2, the oxygen atom being in its
	keto or unsubstituted enol form [5]
307/34	 having two or three double bonds between ring members or between ring members and non-ring members [2]
307/36	• • • with only hydrogen atoms or radicals
	containing only hydrogen and carbon atoms, directly attached to ring carbon atoms [2]
307/38	• • • with substituted hydrocarbon radicals attached to ring carbon atoms [2]
307/40	• • • • Radicals substituted by oxygen atoms [2]
507740	Radicals substituted by oxygen atoms [2]

307/42					61. al la sel a ser ata a [3]
	•	•	•	•••	Singly bound oxygen atoms [2]
307/44	•	•	•	•••	Furfuryl alcohol [2]
307/45	•	•	•	•••	Oxygen atoms acylated by a
					cyclopropane containing carboxylic
					acyl radical, e.g.
					chrysanthemumates [3]
307/46	•	•	•	•••	Doubly bound oxygen atoms, or two
					oxygen atoms singly bound to the same

307/937	 • with hydrocarbon or substituted hydrocarbon radicals directly attached in position 2, e.g. prostacyclins [5]
307/94	• spiro-condensed with carbocyclic rings or ring systems, e.g. griseofulvins [2]
309/00	Heterocyclic compounds containing six-membered rings having one oxygen atom as the only ring hetero atom, not condensed with other rings [2]
309/02	 having no double bonds between ring members or between ring members and non-ring members [2]
309/04	 with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to ring carbon atoms [2]
309/06	 • • Radicals substituted by oxygen atoms [2]
309/08	 with hetero atoms or with carbon atoms having
	three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
309/10 309/12	• • Oxygen atoms [2]
309/12	 only hydrogen atoms and one oxygen atom directly attached to ring carbon atoms, e.g. tetrahydropyranyl ethers [2]
309/14	• • • Nitrogen atoms not forming part of a nitro radical [2]
309/16	 having one double bond between ring members or between a ring member and a non-ring member [2]
309/18	 containing only hydrogen and carbon atoms in addition to the ring hetero atom [2]
309/20	• • with hydrogen atoms and substituted hydrocarbon radicals directly attached to ring carbon atoms [2]
309/22	 • Radicals substituted by oxygen atoms [2]
309/24	• • • • Methylol radicals [2]
309/24	• • • Carboxaldehyde radicals [2]
309/28	 with hetero atoms or with carbon atoms having
303/20	three bonds to hetero atoms with carbon atoms having bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
309/30	• • • Oxygen atoms, e.g. delta-lactones [2]
309/32	 having two double bonds between ring members or between ring members and non-ring members [2]
309/34	 having three or more double bonds between ring members or between ring members and non-ring members [2]
309/36	• • with oxygen atoms directly attached to ring carbon atoms [2]

309/38	•	•	•			oxygen atom in position 2 or 4, e.g. nes [2]
309/40	•	•	•			gen atoms attached in positions 3 and 4,
						maltol [2]
311/00						compounds containing six-membered
	ri at	ng: on	s ha 1. c	avi on	ng dei	one oxygen atom as the only hetero nsed with other rings [2]
311/02	•					peri-condensed with carbocyclic rings or
						ns [2]
311/04	•	•				[b] pyrans, not hydrogenated in the clic ring [2]
311/06	•	•	•			oxygen or sulfur atoms directly attached in tion 2 [2]
311/08	•	•	•	•		ot hydrogenated in the hetero ring [2]
311/10	•	•	•	•	•	unsubstituted [2]
311/12	•	•	•	•	•	substituted in position 3 and unsubstituted
D44/44						in position 7 [2]
311/14	•	•	•	•	•	substituted in position 6 and unsubstituted in position 7 [2]
311/16	•	•	•	•	•	substituted in position 7 [2]
311/18	•	•	•	•	•	substituted otherwise than in position 3 or 7 [2]
311/20	•	•	•	•	hy	ydrogenated in the hetero ring [2]
311/22	•	•	•	W		oxygen or sulfur atoms directly attached in
				рс	osit	tion 4 [2]
311/24	•	•	•	•		vith carbon atoms having three bonds to
						etero atoms with at the most one bond to alogen, e.g. ester or nitrile radicals, directly
						ttached in position 2 [2]
311/26	•	•	•	•		<i>i</i> th aromatic rings attached in position 2 or
						[2]
311/28	•	•	•	•	•	with aromatic rings attached in position 2
311/30						only [2]
511/50	•	•	•	•	•	 not hydrogenated in the hetero ring, e.g. flavones [2]
311/32	•	•	•	•	•	 2, 3-Dihydro derivatives, e.g.
						flavanones [2]
311/34	•	•	•	•	•	with aromatic rings attached in position 3 only [2]
311/36	•	•	•	•	•	 not hydrogenated in the hetero ring,
						e.g. isoflavones [2]
311/38	•	•	•	•	•	 2, 3-Dihydro derivatives, e.g. isoflavanones [2]
311/40	•	•				Separation, e.g. from natural material;
						Purification [2]
311/42	•	•	•			oxygen or sulfur atoms in positions 2 and
311/44				4	[2]	I vith one hydrogen atom in position 3 [2]
311/44					•	unsubstituted in the carbocyclic ring [2]
311/48	•	•	•	•	•	 with two such benzopyran radicals
011, 10						linked together by a carbon chain [2]
311/50	•	•	•	•	•	• with elements other than carbon and
311/52						hydrogen in position 3 [2]Enol-esters or -ethers, or sulfur
511/52	-	-	-	-		analogues thereof [2]
311/54	•	•	•	•	•	substituted in the carbocyclic ring [2]
311/56	•	•	•	•	w	vithout hydrogen atoms in position 3 [2]
311/58	•	•	•		hei	r than with oxygen or sulfur atoms in
D44 (25				pc		tion 2 or 4 [2]
311/60	•	•	•	•	W	with aryl radicals attached in position 2 [2]
311/62	•	•	•	•	•	with oxygen atoms directly attached in position 3, e.g. anthocyanidins [2]
311/64	•	•	•	•		rith oxygen atoms directly attached in
					po	osition 8 [2]

311/66	• • • with carbon atoms having three bonds to
	hetero atoms with at the most one bond to
	halogen, e.g. ester or nitrile radicals, directly attached in position 2 [2]
311/68	• • • • with nitrogen atoms directly attached in
511/00	position 4 [2]
311/70	• • • • with two hydrocarbon radicals attached in
	position 2 and elements other than carbon
211/72	and hydrogen in position 6 [2]
311/72	••••• 3, 4-Dihydro derivatives having in position 2 at least one methyl radical and
	in position 6 one oxygen atom, e.g.
	tocopherols [2]
311/74	• Benzo [b] pyrans, hydrogenated in the carbocyclic
211/76	ring [2]
311/76 311/78	 Benzo [c] pyrans [2] Ring systems having three or more relevant
511/70	rings [2]
311/80	• • • Dibenzopyrans; Hydrogenated
	dibenzopyrans [2]
311/82	• • • • Xanthenes [2]
311/84	• • • • with hetero atoms or with carbon atoms
	having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester
	or nitrile radicals, directly attached in
	position 9 [2]
311/86	• • • • • • Oxygen atoms, e.g. xanthones [2]
311/88	• • • • • Nitrogen atoms [2]
311/90	•••• • with hydrocarbon radicals, substituted by amino radicals, directly attached in
	position 9 [2]
311/92	• • • Naphthopyrans; Hydrogenated
	naphthopyrans [2]
311/94	• condensed with rings other than six-membered or
211/00	with ring systems containing such rings [2, 5]
311/96	 spiro-condensed with carbocyclic rings or ring systems [2]
	-
313/00	Heterocyclic compounds containing rings of more than six members having one oxygen atom as the
313/02	only ring hetero atom [2]
313/02 313/04	
	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring
313/04 313/06	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2]
313/04 313/06 313/08	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2]
313/04 313/06 313/08 313/10	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2]
313/04 313/06 313/08 313/10 313/12	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] [b, e]-condensed [2]
313/04 313/06 313/08 313/10	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] [b, e]-condensed [2] [b, f]-condensed [2]
313/04 313/06 313/08 313/10 313/12 313/14	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] [b, e]-condensed [2] [b, f]-condensed [2]
313/04 313/06 313/08 313/10 313/12 313/14 313/16	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] [b, e]-condensed [2] [b, f]-condensed [2] Eight-membered rings [2]
313/04 313/06 313/08 313/10 313/12 313/14 313/16 313/18	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] [b, e]-condensed [2] [b, f]-condensed [2] Eight-membered rings [2] not condensed with other rings [2]
313/04 313/06 313/08 313/10 313/12 313/14 313/16 313/18 313/20	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] condensed with two six-membered rings [2] [b, e]-condensed [2] [b, f]-condensed [2] Eight-membered rings [2] not condensed with other rings [2] condensed with other rings [2] condensed with carbocyclic rings or ring systems [2]
313/04 313/06 313/08 313/10 313/12 313/14 313/16 313/18	 only ring hetero atom [2] Seven-membered rings [2] not condensed with other rings [2] condensed with carbocyclic rings or ring systems [2] condensed with one six-membered ring [2] condensed with two six-membered rings [2] [b, e]-condensed [2] [b, f]-condensed [2] Eight-membered rings [2] not condensed with other rings [2] condensed with other rings [2]

317/70	• • condensed with ring systems containing two or more relevant rings [2]
317/72	 spiro-condensed with carbocyclic rings [2]
319/00	Heterocyclic compounds containing six-membered rings having two oxygen atoms as the only ring hetero atoms [2]
319/02	• 1,2-Dioxanes; Hydrogenated 1,2-dioxanes [2]
319/04	• 1,3-Dioxanes; Hydrogenated 1,3-dioxanes [2]
319/06	• • not condensed with other rings [2]
319/08	 condensed with carbocyclic rings or ring
	systems [2]
319/10	• 1,4-Dioxanes; Hydrogenated 1,4-dioxanes [2]
319/12	• • not condensed with other rings [2]
319/14	 condensed with carbocyclic rings or ring systems [2]
319/16	• • • condensed with one six-membered ring [2]
319/18	• • • Ethylenedioxybenzenes, not substituted on the hetero ring [2]
319/20	• • • with substituents attached to the hetero ring [2]
319/22	 • condensed with one naphthalene or hydrogenated naphthalene ring system [2]
319/24	• • [b, e]-condensed with two six-membered rings [2]
321/00	Heterocyclic compounds containing rings having two oxygen atoms as the only ring hetero atoms, not provided for by groups C07D 317/00- C07D 319/00 [2]
321/02	Seven-membered rings [2]
321/04	 not condensed with other rings [2]
321/04	 • 1, 3-Dioxepines; Hydrogenated 1,3- dioxepines [2]
321/08	 • • 1, 4-Dioxepines; Hydrogenated 1,4- dioxepines [2]
321/10	 condensed with carbocyclic rings or ring systems [2]
321/12	Eight-membered rings [2]
323/00	Heterocyclic compounds containing more than two oxygen atoms as the only ring hetero atoms [2]
323/02	Five-membered rings [2]
323/04	Six-membered rings [2]
323/06	• • Trioxane [2]
325/00	Heterocyclic compounds containing rings having oxygen as the only ring hetero atom according to more than one of groups C07D 303/00- C07D 323/00 [2]
327/00	Heterocyclic compounds containing rings having oxygen and sulfur atoms as the only ring hetero atoms [2]
327/02	 one oxygen atom and one sulfur atom [2]
327/04	• • Five-membered rings [2]
327/06	• • Six-membered rings [2]
327/08	 • [b, e]-condensed with two six-membered carbocyclic rings [2]
327/10	 two oxygen atoms and one sulfur atom, e.g. cyclic sulfates [2]
329/00	Heterocyclic compounds containing rings having oxygen and selenium or oxygen and tellurium atoms as the only ring hetero atoms [2]

<u>Heterocyclic compounds having sulfur, selenium, or tellurium</u> atoms as the only ring hetero atoms [2]

<u>331/00</u>	Heterocyclic compounds containing rings of less than five members, having one sulfur atom as the only ring hetero atom [2]
331/02	-
331/02	Three-membered rings [2] Four membered rings [2]
331/04	Four-membered rings [2]
333/00	Heterocyclic compounds containing five-membered rings having one sulfur atom as the only ring hetero atom [2]
333/02	 not condensed with other rings [2]
333/04	 not substituted on the ring sulfur atom [2]
333/06	 • • with only hydrogen atoms, hydrocarbon or
	substituted hydrocarbon radicals, directly attached to the ring carbon atoms [2]
333/08	• • • Hydrogen atoms or radicals containing only hydrogen and carbon atoms [2]
333/10	• • • • • Thiophene [2]
333/12	• • • Radicals substituted by halogen atoms or nitro or nitroso radicals [2]
333/14	• • • Radicals substituted by singly bound hetero atoms other than halogen [2]
333/16	• • • • by oxygen atoms [2]
333/18	• • • • by sulfur atoms [2]
333/20	• • • • by nitrogen atoms (nitro, nitroso radicals C07D 333/12) [2]
333/22	 Radicals substituted by doubly bound hetero atoms, or by two hetero atoms other than halogen singly bound to the same carbon atom [2]
333/24	 Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]
333/26	 with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached to ring carbon atoms [2]
333/28	• • • • Halogen atoms [2]
333/30	• • • • Hetero atoms other than halogen [2]
333/32	• • • • • Oxygen atoms [2]
333/34	• • • • Sulfur atoms [2]
333/36	• • • • • Nitrogen atoms [2]
333/38	 Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]
333/40	• • • • • Thiophene-2-carboxylic acid [2]
333/42	• • • • with nitro or nitroso radicals directly attached to ring carbon atoms [2]
333/44	• • • • • attached in position 5 [2]
333/46	• • substituted on the ring sulfur atom [2]
333/48	• • • by oxygen atoms [2]
333/50	• condensed with carbocyclic rings or ring systems [2]
333/52	 Benzo [b] thiophenes; Hydrogenated benzo [b] thiophenes [2]
333/54	 • with only hydrogen atoms, hydrocarbon or substituted hydrocarbon radicals, directly attached to carbon atoms of the hetero ring [2]
333/56	• • • Radicals substituted by oxygen atoms [2]
333/58	• • • Radicals substituted by nitrogen atoms [2]
333/60	 Radicals substituted by carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals [2]

333/62	• • with hetero atoms or with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile
	radicals, directly attached to carbon atoms of the hetero ring [2]
333/64	• • • • Oxygen atoms [2]
333/66	• • • Nitrogen atoms not forming part of a nitro radical [2]
333/68	 Carbon atoms having three bonds to hetero atoms with at the most one bond to halogen [2]
333/70	• • • • • attached in position 2 [2]
333/72	Benzo [c] thiophenes; Hydrogenated benzo [c] thiophenes [2]
333/74	Naphthothiophenes [2]
333/76	• • Dibenzothiophenes [2]
333/78	• condensed with rings other than six-membered or with ring systems containing such rings [2, 5]
333/80	 • • Seven-membered rings [2]
335/00	Heterocyclic compounds containing six-membered
555,00	rings having one sulfur atom as the only ring hetero atom [2]
335/02	 not condensed with other rings [2]
335/04	• condensed with carbocyclic rings or ring systems [2]
335/06	 Benzothiopyrans; Hydrogenated benzothiopyrans [2]
335/08	 Naphthothiopyrans; Hydrogenated naphthothiopyrans [2]
335/10	 Dibenzothiopyrans; Hydrogenated dibenzothiopyrans [2]
335/12	• • • Thioxanthenes [2]
335/14	• • • with hetero atoms or with carbon atoms having three bonds to hetero atoms with at
	the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 9 [2]
335/16	• • • • • Oxygen atoms, e.g. thioxanthones [2]
335/18	• • • • • Nitrogen atoms [2]
335/20	 • • • with hydrocarbon radicals, substituted by amino radicals, directly attached in position 9 [2]
337/00	Heterocyclic compounds containing rings of more than six members having one sulfur atom as the only
227 (02	ring hetero atom [2]
337/02 337/04	• Seven-membered rings [2]
337/04	 not condensed with other rings [2] condensed with carbocyclic rings or ring
557700	systems [2]
337/08	• • • condensed with one six-membered ring [2]
337/10	• • • condensed with two six-membered rings [2]
337/12	• • • [b, e]-condensed [2]
337/14	• • • • [b, f]-condensed [2]
337/16	Eight-membered rings [2]
339/00	Heterocyclic compounds containing rings having two sulfur atoms as the only ring hetero atoms [2]
339/02	Five-membered rings [2]
339/04	 having the hetero atoms in positions 1 and 2, e.g. lipoic acid [2]
339/06	 having the hetero atoms in positions 1 and 3, e.g. cyclic dithiocarbonates [2]
339/08	Six-membered rings [2]

- 341/00 Heterocyclic compounds containing rings having three or more sulfur atoms as the only ring hetero atoms [2]
- 343/00 Heterocyclic compounds containing rings having sulfur and selenium or sulfur and tellurium atoms as the only ring hetero atoms [2]
- 345/00 Heterocyclic compounds containing rings having selenium or tellurium atoms as the only ring hetero atoms [2]
- 347/00 Heterocyclic compounds containing rings having halogen atoms as ring hetero atoms [2]

Heterocyclic compounds containing two or more hetero rings [2]

Note(s)

Groups C07D 401/00-C07D 421/00<u>cover</u> compounds containing two or more relevant hetero rings at least two of which are covered by different main groups of groups C07D 203/00-C07D 347/00, neither condensed among themselves nor condensed with a common carbocyclic ring or ring system.

401/00	Heterocyclic compounds containing two or more hetero rings, having nitrogen atoms as the only ring hetero atoms, at least one ring being a six-membered ring with only one nitrogen atom [2]
401/02	 containing two hetero rings [2]
401/04	• • directly linked by a ring-member-to-ring- member bond [2]
401/06	• • linked by a carbon chain containing only aliphatic carbon atoms [2]
401/08	 linked by a carbon chain containing alicyclic rings [2]
401/10	 linked by a carbon chain containing aromatic rings [2]
401/12	• • linked by a chain containing hetero atoms as chain links [2]
401/14	• containing three or more hetero rings [2]
403/00	Heterocyclic compounds containing two or more hetero rings, having nitrogen atoms as the only ring hetero atoms, not provided for by group C07D 401/00 [2]
403/02	• containing two hetero rings [2]
403/04	 directly linked by a ring-member-to-ring- member bond [2]
403/06	• • linked by a carbon chain containing only aliphatic carbon atoms [2]
403/08	 linked by a carbon chain containing alicyclic rings [2]
403/10	 linked by a carbon chain containing aromatic rings [2]
403/12	• • linked by a chain containing hetero atoms as chain links [2]
403/14	• containing three or more hetero rings [2]
405/00	Heterocyclic compounds containing both one or more hetero rings having oxygen atoms as the only ring hetero atoms, and one or more rings having nitrogen as the only ring hetero atom [2] • containing two hetero rings [2]
405/02	 containing two netero rings [2]

405/04	 directly linked by a ring-member-to-ring- member bond [2]
405/06	 linked by a carbon chain containing only aliphatic carbon atoms [2]
405/08	• • linked by a carbon chain containing alicyclic
405/10	 rings [2] linked by a carbon chain containing aromatic
405/12	rings [2]linked by a chain containing hetero atoms as chain
405/14	links [2]containing three or more hetero rings [2]
407/00	Heterocyclic compounds containing two or more hetero rings, at least one ring having oxygen atoms as the only ring hetero atoms, not provided for by group C07D 405/00 [2]
407/02	 containing two hetero rings [2]
407/02	 directly linked by a ring-member-to-ring- member
	bond [2]
407/06	• • linked by a carbon chain containing only aliphatic carbon atoms [2]
407/08	• • linked by a carbon chain containing alicyclic rings [2]
407/10	• • linked by a carbon chain containing aromatic rings [2]
407/12	• • linked by a chain containing hetero atoms as chain links [2]
407/14	• containing three or more hetero rings [2]
409/00	Heterocyclic compounds containing two or more
	hetero rings, at least one ring having sulfur atoms as
400 /00	the only ring hetero atoms [2]
409/02 409/04	 containing two hetero rings [2] directly linked by a ring-member-to-ring- member
	bond [2]
409/06	• • linked by a carbon chain containing only aliphatic carbon atoms [2]
409/08	 linked by a carbon chain containing alicyclic rings [2]
409/10	 linked by a carbon chain containing aromatic rings [2]
409/12	 linked by a chain containing hetero atoms as chain links [2]
409/14	• containing three or more hetero rings [2]
411/00	Heterocyclic compounds containing two or more hetero rings, at least one ring having oxygen and sulfur atoms as the only ring hetero atoms [2]
411/02	 containing two hetero rings [2]
411/04	• • directly linked by a ring-member-to-ring- member bond [2]
411/06	• • linked by a carbon chain containing only aliphatic carbon atoms [2]
411/08	• • linked by a carbon chain containing alicyclic rings [2]
411/10	• • linked by a carbon chain containing aromatic rings [2]
411/12	• • linked by a chain containing hetero atoms as chain links [2]
411/14	• containing three or more hetero rings [2]
413/00	
413/02	Heterocyclic compounds containing two or more hetero rings, at least one ring having nitrogen and oxygen atoms as the only ring hetero atoms [2] • containing two hetero rings [2]

413/04 • directly linked by a ring-member-to-ring- member bond [2]

C07D

413/06	Iinked by a carbon chain containing only aliphatic carbon atoms [2]
413/08	• • linked by a carbon chain containing alicyclic
413/10	 rings [2] linked by a carbon chain containing aromatic
413/12	 rings [2] linked by a chain containing hetero atoms as chain links [2]
413/14	• containing three or more hetero rings [2]
415/00	Heterocyclic compounds containing the thiamine skeleton [2]
417/00	Heterocyclic compounds containing two or more hetero rings, at least one ring having nitrogen and sulfur atoms as the only ring hetero atoms, not provided for by group C07D (15)
417/02	 provided for by group C07D 415/00 [2] containing two hetero rings [2]
417/02	 directly linked by a ring-member-to-ring- member bond [2]
417/06	 linked by a carbon chain containing only aliphatic carbon atoms [2]
417/08	 linked by a carbon chain containing alicyclic rings [2]
417/10	 linked by a carbon chain containing aromatic rings [2]
417/12	 linked by a chain containing hetero atoms as chain links [2]
417/14	• containing three or more hetero rings [2]
419/00	Heterocyclic compounds containing two or more hetero rings, at least one ring having nitrogen, oxygen, and sulfur atoms as the only ring hetero atoms [2]
419/02	 containing two hetero rings [2]
419/04	 directly linked by a ring-member-to-ring- member bond [2]
419/06	• • linked by a carbon chain containing only aliphatic
	• • linked by a carbon chain containing only aliphatic carbon atoms [2]
419/08	
419/08 419/10	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2]
	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic
419/10 419/12 419/14	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2]
419/10 419/12	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2]
419/10 419/12 419/14 421/00 421/02	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2] containing two hetero rings [2]
419/10 419/12 419/14 421/00 421/02 421/04	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2] containing two hetero rings [2] directly linked by a ring-member-to-ring- member bond [2]
419/10 419/12 419/14 421/00 421/02	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2] containing two hetero rings [2] containing two hetero rings [2] directly linked by a ring-member-to-ring- member bond [2] linked by a carbon chain containing only aliphatic carbon atoms [2]
419/10 419/12 419/14 421/00 421/02 421/04	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2] containing two hetero rings [2] containing two hetero rings [2] directly linked by a ring-member-to-ring- member bond [2] linked by a carbon chain containing only aliphatic carbon atoms [2] linked by a carbon chain containing alicyclic rings [2]
419/10 419/12 419/14 421/00 421/02 421/04 421/06	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2] containing two hetero rings [2] directly linked by a ring-member-to-ring- member bond [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing anomatic rings [2]
419/10 419/12 419/14 421/00 421/02 421/04 421/06 421/08	 carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing aromatic rings [2] linked by a chain containing hetero atoms as chain links [2] containing three or more hetero rings [2] Heterocyclic compounds containing two or more hetero rings, at least one ring having selenium, tellurium, or halogen atoms as ring hetero atoms [2] containing two hetero rings [2] directly linked by a ring-member-to-ring- member bond [2] linked by a carbon chain containing only aliphatic carbon atoms [2] linked by a carbon chain containing alicyclic rings [2] linked by a carbon chain containing anomatic

<u>Heterocyclic compounds containing condensed hetero ring</u> <u>systems [2]</u>

<u>Note(s)</u>

- 1. Groups C07D 451/00-C07D 517/00<u>cover</u> compounds containing one system of two or more relevant hetero rings condensed among themselves or condensed with a common carbocyclic ring system, with or without other non-condensed hetero rings.
- 2. For the purpose of classification in groups C07D 451/00-C07D 519/00, the degree of hydrogenation of the ring system is not taken into consideration.
- 3. For the purpose of classification in groups C07D 451/00-C07D 463/00, C07D 473/00-C07D 477/00, C07D 489/00, C07D 499/00-C07D 507/00, the wording of the groups has to be understood, in the absence of an indication to the contrary, as including ring systems further condensed with carbocyclic rings or ring systems, but excluding ring systems further condensed with other hetero rings, either directly or through a common carbocyclic ring system, e.g. sparteine

N is classified in group C07D 471/22, not in group C07D 455/02.

4. In groups C07D 471/00, C07D 487/00, C07D 491/00-C07D 498/00 or C07D 513/00-C07D 517/00, the subdivision is based on the number of relevant hetero rings.

451/00	Heterocyclic compounds containing 8-azabicyclo
	[3.2.1] octane, 9-azabicyclo [3.3.1] nonane, or 3-oxa-
	9-azatricyclo [3.3.1.02,4] nonane ring systems, e.g.
	tropane or granatane alkaloids, scopolamine; Cyclic
	acetals thereof [2]

- 451/02 containing not further condensed 8-azabicyclo [3.2.1] octane or 3-oxa-9-azatricyclo [3.3.1.02,4] nonane ring systems, e.g. tropane; Cyclic acetals thereof [2]
- 451/04 with hetero atoms directly attached in position 3 of the 8-azabicyclo [3.2.1] octane or in position 7 of the 3-oxa-9-azatricyclo [3.3.1.02,4] nonane ring system [2]
- 451/06 • Oxygen atoms **[2]**
- 451/08 • Diarylmethoxy radicals [2]
- 451/10 • acylated by aliphatic or araliphatic carboxylic acids, e.g. atropine, scopolamine **[2]**
- 451/12 • • acylated by aromatic or heteroaromatic carboxylic acids, e.g. cocaine **[2]**
- 451/14 containing 9-azabicyclo [3.3.1] nonane ring systems, e.g. granatane, 2-aza-adamantane; Cyclic acetals thereof **[2]**
- 453/00 Heterocyclic compounds containing quinuclidine or iso-quinuclidine ring systems, e.g. quinine alkaloids [2]
- 453/02 containing not further condensed quinuclidine ring systems [2]
- 453/04 having a quinolyl-4, a substituted quinolyl-4 or a alkylenedioxy-quinolyl-4 radical linked through only one carbon atom, attached in position 2, e.g. quinine [2]
- 453/06 containing iso-quinuclidine ring systems [2]
- 455/00 Heterocyclic compounds containing quinolizine ring systems, e.g. emetine alkaloids, protoberberine; Alkylenedioxy derivatives of dibenzo [a, g] quinolizines, e.g. berberine [2]

455/02	 containing not further condensed quinolizine ring systems [2]
455/03	 containing quinolizine ring systems directly condensed with at least one six-membered carbocyclic ring, e.g. protoberberine; Alkylenedioxy derivatives of dibenzo [a, g] quinolizines, e.g. berberine [3]
455/04	 containing a quinolizine ring system condensed with only one six-membered carbocyclic ring, e.g. julolidine [2, 3]
455/06	 • containing benzo [a] quinolizine ring systems [2, 3]
455/08	 having an isoquinolyl-1, a substituted isoquinolyl-1 or an alkylenedioxyisoquinolyl-1 radical linked through only one carbon atom, attached in position 2, e.g. emetine [2, 3]

457/00 Heterocyclic compounds containing indolo [4, 3-f, g] quinoline ring systems, e.g. derivatives of ergoline, of

the formula: HN_{1}^{1} , e.g. lysergic acid (compounds of the cyclic peptide type derived from ergotamane C07D 519/02) [2]

<u>Note(s)</u>

The numbering may be different according to the RING

	INDEX and given by the formula:
457/02	• with hydrocarbon or substituted hydrocarbon radicals, attached in position 8 [2]
457/04	• with carbon atoms having three bonds to hetero atoms with at the most one bond to halogen, e.g. ester or nitrile radicals, directly attached in position 8 [2]
457/06	• Lysergic acid amides [2]
457/08	• • in which the amide nitrogen is a member of a heterocyclic ring [2]
457/10	• with hetero atoms directly attached in position 8 [2]
457/12	• Nitrogen atoms [2]
457/14	• containing indolo [4, 3-f, g] quinoline ring systems condensed with carbocyclic rings or ring systems [3]
459/00	Heterocyclic compounds containing benz [g] indolo [2, 3-a] quinolizine ring systems, e.g. yohimbine; 16, 18-lactones thereof, e.g. reserpic acid lactone [2]
461/00	Heterocyclic compounds containing indolo [3, 2, 1-d, e] pyrido [3, 2, 1-i, j] [1, 5]-naphthyridine ring systems, e.g. vincamine (dimeric indolo alkaloids C07D 519/04) [3]
463/00	Heterocyclic compounds containing 1-azabicyclo [4.2.0] octane ring systems, i.e. compounds
	C7C654C 1 1 1 2 1 2 1 2 2 2 2 2 2 2 2 2 2
	containing a ring system of the formula:
	, e.g. carbacephalosporins; Such ring systems being further condensed, e.g. 2,3-condensed with an
	oxygen-, nitrogen- or sulfur-containing hetero ring [5]
463/02	 Preparation (by microbiological processes C12P 17/18) [6]
463/04	• • by forming the ring or condensed ring systems [6]

463/06	• • from compounds already containing the ring or
	condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents [6]
463/08	• • • Modification of a carboxyl group directly
463/10	attached in position 2, e.g. esterification [6]with a carbon atom having three bonds to hetero
403/10	atoms with at the most one bond to halogen, e.g. an
	ester or nitrile radical, directly attached in position
	2 [6]
463/12	• • with hydrogen atoms, hydrocarbon or substituted
463/14	hydrocarbon radicals attached in position 7 [6]with hetero atoms directly attached in position
	7 [6]
463/16	• • • Nitrogen atoms [6]
463/18	• • • • further acylated by radicals derived from
	carboxylic acids or by nitrogen or sulfur
462/20	analogues thereof [6]
463/20	• • • • • with the acylating radicals further substituted by hetero atoms or by carbon
	atoms having three bonds to hetero atoms
	with at the most one bond to halogen [6]
463/22	• • • • • further substituted by nitrogen
	atoms [6]
471/00	Heterocyclic compounds containing nitrogen atoms
4/1/00	as the only ring hetero atoms in the condensed
	system, at least one ring being a six-membered ring
	with one nitrogen atom, not provided for by groups
	C07D 451/00-C07D 463/00 [2, 5]
471/02	• in which the condensed system contains two hetero
471/04	rings [2]
471/04 471/06	 Ortho-condensed systems [2, 5] Peri-condensed systems [2]
471/08	 Bridged systems [2]
471/10	 Spiro-condensed systems [2]
471/12	 in which the condensed system contains three hetero
	rings [2]
471/14	Ortho-condensed systems [2]
471/16	Peri-condensed systems [2]
471/18	Bridged systems [2]
471/20	
	Spiro-condensed systems [2]
471/22	 • Spiro-condensed systems [2] in which the condensed systems contains four or
471/22	Spiro-condensed systems [2]
471/22 473/00	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2]
	 • Spiro-condensed systems [2] in which the condensed systems contains four or
	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly
473/00 473/02	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2]
473/00 473/02 473/04	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] • two oxygen atoms [2]
473/00 473/02	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] • two oxygen atoms [2] • two intradicals containing only hydrogen and
473/00 473/02 473/04 473/06	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] • two oxygen atoms [2] • with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2]
473/00 473/02 473/04	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] • two oxygen atoms [2] • with radicals containing only hydrogen and carbon atoms, attached in positions 1 or 3 [2] • • with methyl radicals in positions 1 and 3,
473/00 473/02 473/04 473/06	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] • two oxygen atoms [2] • two oxygen atoms [2] • with radicals containing only hydrogen and carbon atoms, attached in positions 1 and 3, e.g. theophylline [2]
473/00 473/02 473/04 473/06 473/08	 • Spiro-condensed systems [2] • in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] • with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] • two oxygen atoms [2] • with radicals containing only hydrogen and carbon atoms, attached in positions 1 or 3 [2] • • with methyl radicals in positions 1 and 3,
473/00 473/02 473/04 473/06 473/08	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in positions 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with methyl radicals in positions 1, 3, and 7,
473/00 473/02 473/04 473/06 473/08 473/10 473/12	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with methyl radicals in positions 1, 3, and 7, e.g. caffeine [2]
473/00 473/02 473/04 473/06 473/08 473/10	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] with two methyl radicals in positions 1 and 3
473/00 473/02 473/04 473/06 473/08 473/10 473/12	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. caffeine [2] with two methyl radicals in positions 1 and 3 and two methyl radicals in positions 7, 8, or
473/00 473/02 473/04 473/06 473/08 473/10 473/12 473/14	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] with two methyl radicals in positions 1 and 3 and two methyl radicals in positions 7, 8, or 9 [2]
473/00 473/02 473/04 473/06 473/08 473/10 473/12 473/14	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. caffeine [2] with two methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] two nitrogen atoms [2]
473/00 473/02 473/04 473/06 473/08 473/10 473/12 473/14	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with two methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] with two methyl radicals in positions 1 and 3 and two methyl radicals in positions 7, 8, or 9 [2] two nitrogen atoms [2]
473/00 473/02 473/04 473/06 473/08 473/10 473/12 473/14	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. caffeine [2] with two methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] two nitrogen atoms [2] two nitrogen atoms [2] two nitrogen atoms [2]
473/00 473/02 473/04 473/06 473/08 473/10 473/12 473/14 473/16 473/18	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with two methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] with two methyl radicals in positions 1 and 3 and two methyl radicals in positions 7, 8, or 9 [2] two nitrogen atoms [2]
473/00 473/02 473/04 473/06 473/08 473/10 473/12 473/14 473/16 473/18 473/20	 Spiro-condensed systems [2] in which the condensed systems contains four or more hetero rings [2] Heterocyclic compounds containing purine ring systems [2] with oxygen, sulfur, or nitrogen atoms directly attached in positions 2 and 6 [2] two oxygen atoms [2] with radicals containing only hydrogen and carbon atoms, attached in position 1 or 3 [2] with methyl radicals in positions 1 and 3, e.g. theophylline [2] with methyl radicals in positions 3 and 7, e.g. theobromine [2] with two methyl radicals in positions 1, 3, and 7, e.g. caffeine [2] with two methyl radicals in positions 1 and 3 and two methyl radicals in positions 7, 8, or 9 [2] two nitrogen atoms [2] two nitrogen atoms [2] two sulfur atoms [2]

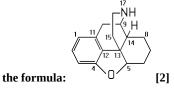

C07D

473/26	• with an oxygen, sulfur, or nitrogen atom directly
472/20	attached in position 2 or 6, but not in both [2]
473/28 473/30	 • Oxygen atom [2] • attached in position 6, e.g. hypoxanthine [2]
473/30	 • attached in position 6, e.g. hypoxanthine [2] • Nitrogen atom [2]
473/32	 • • • attached in position 6, e.g. adenine [2]
473/36	 Sulfur atom [2]
473/38	• • • attached in position 6 [2]
473/40	 with halogen atoms or perhalogeno-alkyl radicals directly attached in position 2 or 6 [2]
475/00	Heterocyclic compounds containing pteridine ring
475/02	systems [2]with an oxygen atom directly attached in position
475/04	 4 [2] • with a nitrogen atom directly attached in position
475/06	2 [2]with a nitrogen atom directly attached in position
	4 [2]
475/08	• • with a nitrogen atom directly attached in position 2 [2]
475/10	• • with an aromatic or hetero-aromatic ring directly attached in position 2 [2]
475/12	 containing pteridine ring systems condensed with carbocyclic rings or ring systems [3]
475/14	• • Benz [g] pteridines, e.g. riboflavin [3]
477/00	Heterocyclic compounds containing 1-azabicyclo
	[3.2.0] heptane ring systems, i.e. compounds
	$\begin{vmatrix} 0 \\ 7 \\ N \end{vmatrix} = \begin{bmatrix} 0 \\ 7 \\ N \end{vmatrix}$
	containing a ring system of the formula: $\Box \cap \Box$
	a a carbananicilling thionamycing. Such ring
	containing a ring system of the formula: $\begin{array}{c} C_{6} & C_{5} & A_{3} \\ I_{6} & I_{1} & I_{1} \\ C_{7} & N_{1} & 2 \\ I_{7} & N_{1} & 2 \\ I_{7} & I_{1} & 2 \\ I_{7} & I_{7} & I_{7} \\ I_{7} & I_{7} $
	e.g. carbapenicillins, thienamycins; Such ring systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing
	systems being further condensed, e.g. 2,3-condensed
477/02	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6]
477/04	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6]
	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6] from compounds already containing the ring or
477/04	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6] from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation
477/04	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6] from compounds already containing the ring or
477/04	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6] from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents [6]
477/04 477/06	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6] from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents [6] Modification of a carboxyl group directly attached in position 2, e.g. esterification [6]
477/04 477/06	 systems being further condensed, e.g. 2,3-condensed with an oxygen-, nitrogen- or sulfur-containing hetero ring [5] Preparation (by microbiological processes C12P 17/18) [6] by forming the ring or condensed ring systems [6] from compounds already containing the ring or condensed ring systems, e.g. by dehydrogenation of the ring, by introduction, elimination or modification of substituents [6] Modification of a carboxyl group directly attached in position 2, e.g. esterification [6] with hydrogen atoms, hydrocarbon or substituted

	rings [2]
497/14	Ortho-condensed systems [2]
497/16	Peri-condensed systems [2]
497/18	• • Bridged systems [2]
497/20	• • Spiro-condensed systems [2]
497/22	 in which the condensed system contains four or more hetero rings [2]
498/00	Heterocyclic compounds containing in the condensed system at least one hetero ring having nitrogen and
	oxygen atoms as the only ring hetero atoms (4-oxa-1-
	azabicyclo [3.2.0] heptanes, e.g. oxapenicillins
	C07D 503/00; 5-oxa-1-azabicyclo [4.2.0] octanes, e.g.
	oxacephalosporins C07D 505/00; analogues thereof having ring oxygen atoms in other position
	C07D 507/00) [2, 6]
498/02	• in which the condensed system contains two hetero
	rings [2]
498/04	Ortho-condensed systems [2]
498/06	Peri-condensed systems [2]
498/08	• Bridged systems [2]
498/10	• • Spiro-condensed systems [2]
498/12	 in which the condensed system contains three hetero rings [2]
498/14	Ortho-condensed systems [2]
498/16	• • Peri-condensed systems [2]
498/18	Bridged systems [2]
498/20	Spiro-condensed systems [2]
498/22	 in which the condensed system contains four or more hetero rings [2]
499/00	Heterocyclic compounds containing 4-thia-1-
	azabicyclo [3.2.0] heptane ring systems, i.e.
	compounds containing a ring system of the formula: S = -S
	$C_{\overline{6}} C_{\overline{5}} S_{\overline{4}} C_{\overline{3}} C_{\overline{5}} C_{\overline{4}} C_{\overline{5}} C_{\overline{5}} C_{\overline{4}} C_{\overline{5}} C$
	systems being further condensed, e.g. 2,3-condensed
	with an oxygen-, nitrogen- or sulfur-containing
	hetero ring [2]
499/04	• Preparation [2, 6]
499/06	• • by forming the ring or condensed ring systems (by microbiological processes C12P 37/00) [2, 6]
499/08	• • Modification of a carboxyl radical directly attached in position 2, e.g. esterification [2, 6]
499/10	• • Modification of an amino radical directly attached in position 6 [2, 6]
499/12	• • • Acylation [2, 6]
499/14	• • Preparation of salts [2, 6]
499/16	• • • of alkali or alkaline earth metals [2, 6]
499/18	• • Separation; Purification [2, 6]
499/20	• • • <u>via</u> salts with organic bases [2, 6]
499/21	• with a nitrogen atom directly attached in position 6
	and a carbon atom having three bonds to hetero
	atoms with at the most one bond to halogen, e.g. an ester or nitrile radical, directly attached in position 2 [6]
499/22	 Salts with organic bases; Complexes with organic

517/18	Bridged systems [2]
517/20	Spiro-condensed systems [2]
517/22	 in which the condensed system contains four or more hetero rings [2]
519/00	Heterocyclic compounds containing more than one system of two or more relevant hetero rings condensed among themselves or condensed with a common carbocyclic ring system not provided for in groups C07D 453/00 or C07D 455/00 [2]
519/02	 Ergot alkaloids of the cyclic peptide type [2]
519/04	• Dimeric indole alkaloids, e.g. vincaleucoblastine [2]

- 519/04 Dimeric indole alkaloids, e.g. vincaleucoblastine [2]
- 519/06 containing at least one condensed beta-lactam ring system, provided for by groups C07D 463/00, C07D 477/00 or C07D 499/00-C07D 507/00, e.g. a penem or a cepham system [6]

521/00 Heterocyclic compounds containing unspecified hetero rings [2]

<u>Note(s) [2009.01]</u>

This group is only used for the classification of heterocyclic compounds the chemical structure of which are not specified, i.e. only in those cases where the heterocyclic compounds cannot be classified in any of groups C07D 201/00-C07D 519/00.

C07F ACYCLIC, CARBOCYCLIC, OR HETEROCYCLIC COMPOUNDS CONTAINING ELEMENTS OTHER THAN CARBON, HYDROGEN, HALOGEN, OXYGEN, NITROGEN, SULFUR, SELENIUM OR TELLURIUM (metal-containing porphyrins C07D 487/22; macromolecular compounds C08)

<u>Note(s)</u>

- 1. Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K and within these subclasses.
- 2. Attention is drawn to Note (6) following the title of class C07.
- 3. Attention is drawn to Note (3) after the title of section C, which Note indicates to which version of the periodic table of chemical elements the IPC refers.
- 4. Therapeutic activity of compounds is further classified in subclass A61P.
- 5. In this subclass, organic acid salts, alcoholates, phenates, chelates or mercaptides are classified as the parent compounds.

1/00	Compounds containing elements of Groups 1 or 11 of the Periodic System	9/00 Compounds containing elements of Groups 5 or 15 or the Periodic System
1/02	Lithium compounds	9/02 • Phosphorus compounds [2]
1/04	Sodium compounds	9/04 • • Reaction products of phosphorus sulfur

C07F

C07G COMPOUNDS OF UNKNOWN CONSTITUTION (sulfonated fats, oils or waxes of undetermined constution C07C 309/62)

<u>Note(s)</u>

- 1. This subclass does not cover peptides or proteins, of unknown constitution, which are covered by subclass C07K.
- 2. Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K and within these subclasses.
- 3. Therapeutic activity of compounds is further classified in subclass A61P.

1/00	Low-molecular-weight derivatives of lignin (high- molecular-weight derivatives of lignin	11/00	Antibiotics
	C08H 7/00) [1, 2011.01]	13/00	Vitamins of unknown constitution
3/00	Glycosides	15/00	Hormones
5/00	Alkaloids	99/00	Subject matter not provided for in other groups of this subclass [2009.01]
9/00	Ammonium bituminosulfonate, e.g. Ichthyol		

C07H SUGARS; DERIVATIVES THEREOF; NUCLEOSIDES; NUCLEOTIDES; NUCLEIC ACIDS (derivatives of aldonic or saccharic acids C07C, C07D; aldonic acids, saccharic acids C07C 59/105, C07C 59/285; cyanohydrins C07C 255/16; glycals C07D; compounds of unknown constitution C07G; polysaccharides, derivatives thereof C08B; DNA or RNA concerning genetic engineering, vectors, e.g. plasmids, or their isolation, preparation or purification C12N 15/00; sugar industry C13) [2]

Note(s)

- 1. This subclass <u>covers</u> compounds containing saccharide radicals (see the definitions in Note (3) below).
- 2. This subclass <u>does not cover</u> polysaccharides which for the purpose of this subclass are defined as having more than five saccharide radicals attached to each other by glycosidic linkages.
- 3. In this subclass, the following expressions are used with the meanings indicated:
 - "saccharide radical" which is derived from acyclic polyhydroxy-aldehydes or acyclic polyhydroxy-ketones, or from their cyclic tautomers, by removing hydrogen atoms or by replacing hetero bonds to oxygen by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium, in accordance with either of the following definitions:
 - a. It
 - i. consists of an uninterrupted carbon skeleton and oxygen atoms directly attached thereto, and
 - ii. is considered to be terminated by every bond to a carbon atom of a cyclic structure and by every bond to a carbon atom having three bonds to hetero atoms, e.g. ester or nitrile radicals, and
 - iii. contains within the carbon skeleton an unbranched sequence of at the most six carbon atoms in which at least three carbon atoms at least two in the case of a skeleton having only four carbon atoms have one single bond to an oxygen atom as the only hetero bond, and
 - A. in a cyclic or acyclic sequence, at least one other carbon atom has two single bonds to oxygen atoms as the only hetero bonds, or
 - B. in an acyclic sequence, at least one other carbon atom has one double bond to an oxygen atom as the only hetero bond,

the said sequence containing at the most one double bond, i.e. C=C or possibly ketalised C(=O), in addition to the hetero bonds mentioned above under (A) or (B), e.g. the compounds

сно (снон)₄ снон

(ĊHOH)n

 $\dot{C}H_2OH$ an unbranched sequence of at the most six carbon atoms, having bonds to oxygen as defined in this Note $\dot{C}HO$

- { (CHOH)₄
- CHOH
- (CH2)n
- CH₃
- n being an integer, are classified in group C07H 3/02 ;
- b. It is also a radical derived from a radical as defined in (a) above by replacing at the most four of the specified hetero bonds to oxygen by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium;
- "heterocyclic radical" or "hetero ring" is considered to exclude saccharide radicals as defined above.
- 4. Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K and within these subclasses.

C07H

5. Therapeutic activity of compounds is further classified in subclass A61P .

11/00

15/18

1/00	Processes for the preparation of sugar derivatives [2]
1/02	Phosphorylation [2]
1/04	• • Introducing polyphosphoric acid radicals [2]
1/06	Separation; Purification [2]
1/08	• • from natural products [2]
3/00	Compounds containing only hydrogen atoms and saccharide radicals having only carbon, hydrogen, and oxygen atoms (preparation by hydrolysis of di-or polysaccharides C13; separation or purification of sucrose, glucose, fructose, lactose or maltose C13) [2]
3/02	Monosaccharides [2]
3/04	Disaccharides [2]
3/06	 Oligosaccharides, i.e. having three to five saccharide radicals attached to each other by glycosidic linkages [2]
3/08	 Deoxysugars; Unsaturated sugars (1,2-dideoxy-1- enoses C07D); Osones [2]
3/10	• Anhydrosugars, e.g. epoxides [2]
5/00	Compounds containing saccharide radicals in which the hetero bonds to oxygen have been replaced by the same number of hetero bonds to halogen, nitrogen, sulfur, selenium, or tellurium [2]
5/02	• to halogen [2]
5/04	• to nitrogen [2]
5/06	• • Aminosugars [2]
5/08	• to sulfur, selenium, or tellurium [2]
5/10	• • to sulfur [2]
7/00	Compounds containing non-saccharide radicals linked to saccharide radicals by a carbon-to-carbon bond [2]
7/02	Acyclic radicals [2]
7/027	Keto-aldonic acids [4]
7/033	• • Uronic acids [4]
7/04	Carbocyclic radicals [2]
7/06	Heterocyclic radicals [2]
9/00	Compounds containing a hetero ring sharing at least two hetero atoms with a saccharide radical [2]
9/02	 the hetero ring containing only oxygen as ring hetero atoms [2]
9/04	• • Cyclic acetals [2]
9/06	 the hetero ring containing nitrogen as ring hetero atoms [2]

	by inorganic acids; Metal salts thereof (halo-sugars C07H 5/02; thio-, seleno-, or telluro-sugars C07H 5/08) [2]
11/02	• Nitrates; Nitrites [2]
11/04	Phosphates; Phosphites; Polyphosphates [2]
13/00	Compounds containing saccharide radicals esterified by carbonic acid or derivatives thereof, or by organic acids, e.g. phosphonic acids [2]
13/02	 by carboxylic acids [2]
13/04	• • having the esterifying carboxyl radicals attached to acyclic carbon atoms [2]
13/06	• • • Fatty acids [2]
13/08	• • having the esterifying carboxyl radicals directly attached to carbocyclic rings [2]
13/10	• • having the esterifying carboxyl radicals directly attached to heterocyclic rings [2]
13/12	 by acids having the group —X—C (=X)—X—, or halides thereof, in which X means nitrogen, oxygen, sulfur, selenium, or tellurium, e.g. carbonic acid, carbamic acid [2]
15/00	Compounds containing hydrocarbon or substituted
	hydrocarbon radicals directly attached to hetero atoms of saccharide radicals [2]
	 atoms of saccharide radicals [2] <u>Note(s)</u> In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as
15/02	atoms of saccharide radicals [2] <u>Note(s)</u> In this group, acyl radicals directly attached to hetero
15/02 15/04	 atoms of saccharide radicals [2] Note(s) In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. Acyclic radicals, not substituted by cyclic
	 atoms of saccharide radicals [2] Note(s) In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. Acyclic radicals, not substituted by cyclic structures [2] • attached to an oxygen atom of a saccharide
15/04	 atoms of saccharide radicals [2] Note(s) In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. Acyclic radicals, not substituted by cyclic structures [2] • attached to an oxygen atom of a saccharide radical [2] • being a hydroxyalkyl group esterified by a fatty
15/04 15/06	 atoms of saccharide radicals [2] Note(s) In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. Acyclic radicals, not substituted by cyclic structures [2] • attached to an oxygen atom of a saccharide radical [2] • being a hydroxyalkyl group esterified by a fatty acid [4]
15/04 15/06 15/08	 atoms of saccharide radicals [2] Note(s) In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. Acyclic radicals, not substituted by cyclic structures [2] • attached to an oxygen atom of a saccharide radical [2] • being a hydroxyalkyl group esterified by a fatty acid [4] • Polyoxyalkylene derivatives [2] • containing unsaturated carbon-to-carbon
15/04 15/06 15/08 15/10	 atoms of saccharide radicals [2] Note(s) In this group, acyl radicals directly attached to hetero atoms of the saccharide radicals are not considered as substituted hydrocarbon radicals. Acyclic radicals, not substituted by cyclic structures [2] • attached to an oxygen atom of a saccharide radical [2] • being a hydroxyalkyl group esterified by a fatty acid [4] • Polyoxyalkylene derivatives [2] • containing unsaturated carbon-to-carbon bonds [2] • attached to a nitrogen atom of a saccharide

Compounds containing saccharide radicals esterified

• Acyclic radicals, substituted by carbocyclic rings [2]

15/20	•	Carbocyclic rings [2]
15/203	•	Monocyclic carbocyclic rings other than
10/ 200		cyclohexane rings; Bicyclic carbocyclic ring
		systems [4]
15/207	•	Cyclohexane rings not substituted by nitrogen
		atoms, e.g. kasugamycins [4]
15/22	•	Cyclohexane rings, substituted by nitrogen
		atoms [4]
15/222	•	Cyclohexane rings, substituted by at least two
		nitrogen atoms [4]
15/224	•	• • with only one saccharide radical directly
		attached to the cyclohexane rings, e.g. destomycin, fortimicin, neamine [4]
15/006		
15/226	•	• • • with at least two saccharide radicals directly attached to the cyclohexane rings [4]
15/228		 • • • attached to adjacent ring-carbon atoms of
15/220	•	the cyclohexane rings [4]
15/23	•	• • • • • with only two saccharide radicals in
10/20		the molecule, e.g. ambutyrosin,
		butyrosin, xylostatin, ribostamycin [4]
15/232	•	• • • • with at least three saccharide radicals
		in the molecule, e.g. lividomycin,
		neomycin, paromomycin [4]
15/234	•	• • • attached to non-adjacent ring carbon
		atoms of the cyclohexane rings, e.g.
		kanamycins, tobramycin, nebramycin,
15/236		 gentamicin A₂ [4] •••• a saccharide radical being substituted
15/250	•	by an alkylamino radical in position 3
		and by two substituents different from
		hydrogen in position 4, e.g. gentamicin
		complex, sisomicin, verdamicin [4]
15/238	•	• • Cyclohexane rings substituted by two guanidine
		radicals, e.g. streptomycins [4]
15/24		
	•	Condensed ring systems having three or more
	•	• Condensed ring systems having three or more rings [2]
15/244	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4]
15/248	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4]
	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4] Naphthacene radicals, e.g. daunomycins,
15/248 15/252	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4] Naphthacene radicals, e.g. daunomycins, adriamycins [4]
15/248 15/252 15/256	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4] Naphthacene radicals, e.g. daunomycins, adriamycins [4] Polyterpene radicals [4]
15/248 15/252	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4] Naphthacene radicals, e.g. daunomycins, adriamycins [4] Polyterpene radicals [4] Acyclic or carbocyclic radicals, substituted by hetero
15/248 15/252 15/256	•	 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4] Naphthacene radicals, e.g. daunomycins, adriamycins [4] Polyterpene radicals [4]
15/248 15/252 15/256		 Condensed ring systems having three or more rings [2] Anthraquinone radicals, e.g. sennosides [4] Colchicine radicals, e.g. colchicosides [4] Naphthacene radicals, e.g. daunomycins, adriamycins [4] Polyterpene radicals [4] Acyclic or carbocyclic radicals, substituted by hetero

19/00	Compounds containing a hetero ring sharing one ring hetero atom with a saccharide radical; Nucleosides; Mononucleotides; Anhydro derivatives thereof [2, 4]
19/01	 sharing oxygen [4]
19/02	• sharing nitrogen [2]
19/04	 Heterocyclic radicals containing only nitrogen as ring hetero atom [2]
19/044	• • • Pyrrole radicals [4]
19/048	• • • Pyridine radicals [4]
19/052	• • • Imidazole radicals [4]
19/056	 Triazole or tetrazole radicals [4]
19/06	• • • Pyrimidine radicals [2]
19/067	• • • • with ribosyl as the saccharide radical [4]
19/073	 • • • with 2-deoxyribosyl as the saccharide radical [4]
19/09	• • • • with arabinosyl as the saccharide radical [4]
19/10	 • • • with the saccharide radical being esterified by phosphoric or polyphosphoric acids [2]
19/11	• • • • • containing cyclic phosphate [4]
19/12	• • • Triazine radicals [2]
19/14	• • • Pyrrolo-pyrimidine radicals [2]
19/16	• • • Purine radicals [2]
19/167	• • • • with ribosyl as the saccharide radical [4]
19/173	• • • with 2-deoxyribosyl as the saccharide radical [4]
19/19	• • • • with arabinosyl as the saccharide radical [4]
19/20	• • • • with the saccharide radical being esterified by phosphoric or polyphosphoric acids [2]
19/207	 • • • • the phosphoric or polyphosphoric acids being esterified by a further hydroxylic compound, e.g. flavine-adenine dinucleotide or nicotinamide-adenine dinucleotide [4]
19/213	• • • • • containing cyclic phosphate [4]
19/22	• • • Pteridine radicals [2]
19/23	• • Heterocyclic radicals containing two or more heterocyclic rings condensed among themselves or condensed with a common
	carbocyclic ring system, not provided for in groups C07H 19/14-C07H 19/22 [4]
19/24	 Heterocyclic radicals containing oxygen or sulfur as ring hetero atom [2]
21/00	Compounds containing two or more mononucleotide units having separate phosphate or polyphosphate groups linked by saccharide radicals of nucleoside groups, e.g. nucleic acids [2]
21/02	• with ribosyl as saccharide radical [2]
21/04	• with deoxyribosyl as saccharide radical [2]
23/00	Compounds containing boron, silicon, or a metal, e.g. chelates, vitamin B ₁₂ (esters with inorganic acids C07H 11/00; metal salts, <u>see</u> parent compounds) [2]
99/00	Subject matter not provided for in other groups of this subclass [2006.01]

C07J STEROIDS (seco-steroids C07C) [2]

<u>Note(s)</u>

- This subclass <u>covers</u> compounds containing a cyclopenta[a]hydrophenanthrene skeleton or a ring structure derived therefrom:
 by contraction or expansion of one ring by one or two atoms,
 - by contraction or expansion of two rings each by one atom,

C07J

2.

- by contraction of one ring by one atom and expansion of one ring by one atom,
- by substitution of one or two carbon atoms of the cyclopenta[a]hydrophenanthrene skeleton, which are not shared by rings, by hetero atoms, in combination with the above defined contraction or expansion or not, or
- by condensation with carbocyclic or heterocyclic rings in combination with one or more of the foregoing alterations or not.

Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K and within these subclasses.

3. Therapeutic activity of compounds is further classified in subclass A61P.

Subclass index

NORMAL STEROIDS

containing halogen or oxygen

oxygen other than as ring hetero atom	1/00, 3/00, 5/00, 7/00, 9/00, 11/00,
	13/00, 15/00
oxygen as ring hetero atom	
containing sulfur	
containing nitrogen	
other steroids	
STEROIDS WITH MODIFIED SKELETON	
retrosteroids	
nor-, homosteroids	
condensed with carbocyclic rings	
heterosteroids	
PREPARATION OF STEROIDS IN GENERAL	

Normal steroids, i.e. cyclopenta[a]hydrophenanthrenes, containing carbon, hydrogen, halogen, or oxygen [2]

- 1/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, not substituted in position 17 beta by a carbon atom, e.g. oestrane, androstane [2]
- 3/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by one carbon atom [2]
- 5/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by a chain of two carbon atoms, e.g. pregnane, and substituted in position 21 by only one singly bound oxygen atom [2]
- 7/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by a chain of two carbon atoms (C07J 5/00 takes precedence) [2]
- 9/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 beta by a chain of more than two carbon atoms, e.g. cholane, cholestane, coprostane [2]
- 11/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, not substituted in position 3 [2]
- 13/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, having a carbon-to-carbon double bond from or to position 17 [2]
- 15/00 Stereochemically pure steroids containing carbon, hydrogen, halogen, or oxygen, having a partially or totally inverted skeleton, e.g. retrosteroids, Lisomers [2]
- 17/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, having an oxygen-containing hetero ring not condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]

- 19/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, substituted in position 17 by a lactone ring [2]
- 21/00 Normal steroids containing carbon, hydrogen, halogen, or oxygen, having an oxygen-containing hetero ring spiro-condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]

Normal steroids, i.e. cyclopenta[a]hydrophenanthrenes, containing sulfur [2]

- 31/00 Normal steroids containing one or more sulfur atoms not belonging to a hetero ring [2]
- 33/00 Normal steroids having a sulfur-containing hetero ring spiro-condensed or not condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]

Normal steroids, i.e. cyclopenta[a]hydrophenanthrenes, containing nitrogen [2]

- 41/00 Normal steroids containing one or more nitrogen atoms not belonging to a hetero ring [2]
- 43/00 Normal steroids having a nitrogen-containing hetero ring spiro-condensed or not condensed with the cyclopenta[a]hydrophenanthrene skeleton [2]
- 51/00 Normal steroids with unmodified cyclopenta[a]hydrophenanthrene skeleton not provided for in groups C07J 1/00-C07J 43/00 [2]
- 53/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by condensation with carbocyclic rings or by formation of an additional ring by means of a direct link between two ring carbon atoms [2]

- 63/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by expansion of only one ring by one or two atoms [2]
- 65/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by contraction of two rings, each by one atom [2]
- 67/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by expansion of two rings, each by one atom [2]
- 69/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by contraction of only one ring by one atom and expansion of only one ring by one atom [2] 71/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton is condensed with a heterocyclic ring (spiro-condensed heterocyclic rings C07J 21/00, C07J 33/00, C07J 43/00) [2] 73/00 Steroids in which the cyclopenta[a]hydrophenanthrene skeleton has been modified by substitution of one or two carbon atoms by hetero atoms [2]
 - 75/00 Processes for the preparation of steroids, in general [4]
- **C07K PEPTIDES** (peptides containing β-lactam rings C07D; cyclic dipeptides not having in their molecule any other peptide link than those which form their ring, e.g. piperazine-2,5-diones, C07D; ergot alkaloids of the cyclic peptide type C07D 519/02; single cell proteins, enzymes C12N; genetic engineering processes for obtaining peptides C12N 15/00) **[4]**

Note(s)

- 1. In this subclass, the following terms or expressions are used with the meanings indicated:
 - "amino acids" are compounds in which at least one amino group and at least one carboxyl group are bound to the same carbon skeleton and the nitrogen atom of the amino group may form part of a ring;
 - "normal peptide link" is one between an alpha-amino group of an amino acid and the carboxyl group in position 1 of another alpha-amino acid;
 - "abnormal peptide link" is a link where at least one of the linked amino acids is not an alpha-amino acid or a link formed by at least one carboxyl or amino group being part of the side chain of an alpha-amino acid;
 - "peptides" are compounds containing at least two amino acid units, which are bound through at least one normal peptide link, including oligopeptides, polypeptides and proteins, where
 - i. "linear peptides" may comprise rings formed through S—S bridges, or through an hydroxy or a mercapto group of an hydroxy- or a mercapto-amino acid and the carboxyl group of another amino acid (e.g. peptide lactones) but do not comprise rings which are formed only through peptide links;
 - ii. "cyclic peptides" are peptides comprising at least one ring formed only through peptide links; the cyclisation may occur only through normal peptide links or through abnormal peptide links, e.g. through the 4-amino group of 2,4-diamino-butanoic acid. Thus, cyclic compounds in which at least one link in the ring is a non-peptide link are considered as "linear peptides";
 - iii. "depsipeptides" are compounds containing a sequence of at least two alpha-amino acids and at least one alpha-hydroxy carboxylic acid, which are bound through at least one normal peptide link and ester links, derived from the hydroxy carboxylic acids, where
 - a. "linear depsipeptides" may comprise rings formed through S—S bridges, or through an hydroxy or a mercapto group of an hydroxy-, or mercapto-amino acid and the carboxyl group of another amino- or hydroxy-acid but do not comprise rings formed only through peptide or ester links derived from hydroxy carboxylic acids, e.g. Gly-Ala-Gly—OCH₂CO₂H and Gly—OCH₂CO-Ala-Gly are considered as "linear depsipeptides", but HOCH₂CO-Gly-Ala-Gly does not contain an ester link, and is thus a derivative of Gly-Ala-Gly which is covered by C07K 5/08;
 - b. "cyclic depsipeptides" are peptides containing at least one ring formed only through peptide or ester links derived from hydroxy carboxylic acids —, e.g. Gly-Ala-Gly—OCH, CO;
 - iv. "hybrid peptides" are peptides produced through fusion or covalent binding of two or more heterologous peptides.
- 2. Attention is drawn to Note (3) after class C07, which defines the last place priority rule applied in the range of subclasses C07C-C07K and within these subclasses.
- 3. Therapeutic activity of compounds is further classified in subclass A61P.
- 4. When classifying in this subclass, classification is also made in group B01D 15/08 insofar as subject matter of general interest relating to chromatography is concerned.
- 5. Fragments of peptides or peptides modified by removal or addition of amino acids, by substitution of amino acids by others, or by combination of these modifications are classified as the parent peptides. However, fragments of peptides having only four or less amino acids are also classified in group C07K 5/00.
- 6. Peptides prepared by chemical processes and having an amino acid sequence derived from naturally occurring peptides are classified with the natural one.
- 7. Peptides prepared by recombinant DNA technology are not classified according to the host, but according to the original peptide expressed, e.g. HIV peptide expressed in E. coli is classified with HIV peptides.

Subclass index

PEPTIDES

Preparation	1/00
of undefined number of amino acids	2/00
Having up to 20 amino acids in an undefined or only partially defined sequence	4/00
Having up to 20 amino acids in a fully defined sequence	
Depsipeptides having up to 20 amino acids in a fully defined sequence	
Having more than 20 amino acids	
Immunoglobulins	
Carrier-bound or immobilised peptides	
Hybrid peptides	

1/00	General processes for the preparation of peptides [4]
1/02	• in solution [4]
1/04	• on carriers [4]
1/06	 using protecting groups or activating agents [4]
1/08	• • using activating agents [4]
1/10	 using coupling agents [4]
1/107	• by chemical modification of precursor peptides [6]
1/113	• • without change of the primary structure [6]
1/12	• by hydrolysis [4]
1/13	Labelling of peptides [6]
1/14	• Extraction; Separation; Purification [4, 6]
1/16	• • by chromatography [6]
1/18	• • • Ion-exchange chromatography [6]
1/20	• • Partition-, reverse-phase or hydrophobic
	interaction chromatography [6]
1/22	• • Affinity chromatography or related techniques
	based upon selective absorption processes [6]
1/24	• • by electrochemical means [6]

= (00	
5/03	• in which at least a delta-amino acid is involved, e.g. isosteres [6]
5/033	 in which at least an epsilon- or zeta-amino acid is involved [6]
5/037	 the abnormal link being formed by the side chain of an alpha-amino acid, e.g. gamma-Glu, epsilon- Lys, glutathione [6]
5/04	 containing only normal peptide links [4]
5/06	• • Dipeptides [4]
5/062	 the side chain of the first amino acid being acyclic, e.g. Gly, Ala [6]
5/065	• • the side chain of the first amino acid containing carbocyclic rings, e.g. Phe, Tyr [6]
5/068	• • • the side chain of the first amino acid containing more amino groups than carboxyl groups, or derivatives thereof, e.g. Lys, Arg [6]
5/072	 the side chain of the first amino acid containing more carboxyl groups than amino groups, or derivatives thereof, e.g. Asp, Glu, Asn [6]
5/075	• • • • Asp-Phe; Derivatives thereof, e.g. aspartame [6]
5/078	• • • the first amino acid being heterocyclic, e.g. Pro- His, Trp [6]
5/08	• • Tripeptides [4]
5/083	• • • the side chain of the first amino acid being acyclic, e.g. Gly, Ala [6]
5/087	 the side chain of the first amino acid containing carbocyclic rings, e.g. Phe, Tyr [6]
5/09	 the side chain of the first amino acid containing
	more amino groups than carboxyl groups, or derivatives thereof, e.g. Lys, Arg [6]
5/093	 the side chain of the first amino acid containing more carboxyl groups than amino groups, or derivatives thereof, e.g. Asp, Glu, Asn [6]
5/097	• • • the first amino acid being heterocyclic, e.g. Pro- His, Trp, e.g. thyroliberin, melanostatin [6]
5/10	• • Tetrapeptides [4]
5/103	• • the side chain of the first amino acid being
	acyclic, e.g. Gly, Ala [6]
5/107	• • • the side chain of the first amino acid containing carbocyclic rings, e.g. Phe, Tyr [6]
5/11	• • • the side chain of the first amino acid containing more amino groups than carboxyl groups, or derivatives thereof, e.g. Lys, Arg [6]
5/113	• • the side chain of the first amino acid containing more carboxyl groups than amino groups, or derivatives thereof, e.g. Asp, Glu, Asn [6]
5/117	• • • the first amino acid being heterocyclic, e.g. Pro- His, Trp [6]
5/12	• • Cyclic peptides [4]
7/00	Peptides having 5 to 20 amino acids in a fully defined sequence; Derivatives thereof [4, 6]

e.g. statine [6]

7/02	 Linear peptides containing at least one abnormal peptide link [4]
7/04	Linear peptides containing only normal peptide
7/06	links [4]
7/06	• having 5 to 11 amino acids [4]
7/08 7/14	 having 12 to 20 amino acids [4, 6] Angiotanging: Polated poptides [4]
	• Angiotensins; Related peptides [4]
7/16 7/18	 Oxytocins; Vasopressins; Related peptides [4] Kallidins; Bradykinins; Related peptides [4]
7/22	 Kallidins; Bradykinins; Related peptides [4] Eledoisins; Related peptides [4]
7/22	 Luteinising hormone-releasing hormone (LHRH);
	Related peptides [6]
7/28	• • Gramicidins A, B, D; Related peptides [4]
7/50	 Cyclic peptides containing at least one abnormal peptide link [4]
7/52	• • with only normal peptide links in the ring [4]
7/54	• • with at least one abnormal peptide link in the ring [4]
7/56	• • • the cyclisation not occurring through 2,4- diamino-butanoic acid [4]
7/58	• • • • Bacitracins; Related peptides [4]
7/60	• • • the cyclisation occurring through the 4-amino
	group of 2,4-diamino-butanoic acid [4]
7/62	• • • • Polymyxins; Related peptides [4]
7/64	 Cyclic peptides containing only normal peptide links [4]
7/66	• Gramicidins S, C; Tyrocidins A, B, C; Related
	peptides [4]
9/00	Peptides having up to 20 amino acids, containing saccharide radicals and having a fully defined sequence; Derivatives thereof [4, 6]
11/00	Depsipeptides having up to 20 amino acids in a fully
11/00	Depsipeptides naving up to 20 animo actus in a runy
	defined sequence; Derivatives thereof [4, 6]
11/02	
	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives
11/02 14/00	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6]
11/02 14/00 14/005	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6]
11/02 14/00 14/005 14/01	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6]
11/02 14/00 14/005 14/01 14/015	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6]
11/02 14/00 14/005 14/01 14/015 14/02	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6]
11/02 14/00 14/005 14/01 14/015	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6]
11/02 14/00 14/005 14/01 14/015 14/02	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6]
11/02 14/00 14/005 14/01 14/015 14/02 14/025	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpets simplex virus I or II [6]
11/02 14/00 14/005 14/01 14/015 14/02 14/025	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpes simplex virus I or II [6] Varicella-zoster virus [6]
11/02 14/00 14/005 14/01 14/015 14/02 14/025	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpes simplex virus I or II [6] Varicella-zoster virus [6] Cytomegalovirus [6]
11/02 14/00 14/005 14/01 14/015 14/02 14/025 14/035 14/04 14/045 14/05	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpes simplex virus I or II [6] Varicella-zoster virus [6] Cytomegalovirus [6] Epstein-Barr virus [6]
11/02 14/00 14/005 14/01 14/015 14/02 14/025 14/035 14/045 14/045 14/055	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpes simplex virus I or II [6] Varicella-zoster virus [6] Cytomegalovirus [6] Epstein-Barr virus [6] Marek's disease virus [6]
11/02 14/00 14/01 14/01 14/01 14/02 14/02 14/03 14/035 14/045 14/05 14/05 14/06	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpes simplex virus I or II [6] Varicella-zoster virus [6] Cytomegalovirus [6] Epstein-Barr virus [6] Marek's disease virus [6] Infectious bovine rhinotracheitis virus [6]
11/02 14/00 14/01 14/01 14/02 14/02 14/03 14/035 14/04 14/055 14/06 14/065	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpes simplex virus I or II [6] Varicella-zoster virus [6] Epstein-Barr virus [6] Marek's disease virus [6] Infectious bovine rhinotracheitis virus [6] Poxviridae, e.g. avipoxvirus [6]
11/02 14/00 14/01 14/01 14/025 14/025 14/03 14/035 14/04 14/045 14/055 14/06 14/065 14/07	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Varicella-zoster virus [6] Cytomegalovirus [6] Epstein-Barr virus [6] Marek's disease virus [6] Infectious bovine rhinotracheitis virus [6] Poxviridae, e.g. avipoxvirus [6] Vaccinia virus; Variola virus [6]
11/02 14/00 14/01 14/01 14/02 14/02 14/025 14/03 14/035 14/04 14/055 14/065 14/065 14/07 14/075	 defined sequence; Derivatives thereof [4, 6] cyclic, e.g. valinomycins [4] Peptides having more than 20 amino acids; Gastrins; Somatostatins; Melanotropins; Derivatives thereof [6] from viruses [6] DNA viruses [6] Parvoviridae, e.g. feline panleukopenia virus, human parvovirus [6] Hepadnaviridae, e.g. hepatitis B virus [6] Papovaviridae, e.g. papillomavirus, polyomavirus, SV40, BK virus, JC virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Herpetoviridae, e.g. pseudorabies virus [6] Varicella-zoster virus [6] Cytomegalovirus [6] Epstein-Barr virus [6] Marek's disease virus [6] Infectious bovine rhinotracheitis virus [6] Poxviridae, e.g. avipoxvirus [6] Adenoviridae [6]

14/75	• • • Fibrinogen [6]	
14/755	• • Factors VIII [6]	
14/76	• • Albumins [6]	
14/765	• • Serum albumin, e.g. HSA [6]	
14/77	• • • Ovalbumin [6]	
14/775	Apolipopeptides [6] Connective tiesue poptides o g. collegen o	lactin
14/78	Connective tissue peptides, e.g. collagen, e laminin, fibronectin, vitronectin, cold insol	
	globulin (CIG) [6]	lubic
14/785	• • Alveolar surfactant peptides; Pulmonary su	urfactant
	peptides [6]	
14/79	Transferrins, e.g. lactoferrins, ovotransferr	
14/795	Porphyrin- or corrin-ring-containing peptides	[6]
14/80		
14/805	• • Cytochromes [6]	
	• • Haemoglobins; Myoglobins [6]	
14/81	Haemoglobins; Myoglobins [6]Protease inhibitors [6]	
14/81 14/815	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] 	
14/81 14/815 14/82	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] 	
14/81 14/815	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] 	
14/81 14/815 14/82	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclop 	nal
14/81 14/815 14/82 14/825 16/00	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclopantibodies [6] 	nal
14/81 14/815 14/82 14/825 16/00	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclou antibodies [6] from eggs [6] 	nal
14/81 14/815 14/82 14/825 16/00 16/02 16/04	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclon antibodies [6] from eggs [6] from milk [6] 	nal
14/81 14/815 14/82 14/825 16/00 16/02 16/04 16/06	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclon antibodies [6] from eggs [6] from milk [6] from serum [6] 	nal
14/81 14/815 14/82 14/825 16/00 16/02 16/04 16/06 16/08	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclon antibodies [6] from eggs [6] from milk [6] from serum [6] against material from viruses [6] 	nal
14/81 14/815 14/82 14/825 16/00 16/02 16/04 16/06	 Haemoglobins; Myoglobins [6] Protease inhibitors [6] from leeches, e.g. hirudin, eglin [6] Translation products from oncogenes [6] Metallothioneins [6] Immunoglobulins, e.g. monoclonal or polyclon antibodies [6] from eggs [6] from milk [6] from serum [6] 	nal

- 16/14 • against material from fungi, algae or lichens [6] 16/46Hybrid immunoglobulins (hybrids of an ٠ immunoglobulin with a peptide not being an 16/16 against material from plants [6] ٠ immunoglobulin C07K 19/00) [6] 16/18 against material from animals or humans [6] ٠ 16/20 • from protozoa [6] • 17/00 Carrier-bound or immobilised peptides; Preparation 16/22 • • against growth factors [6] thereof [4] 16/24 • • against cytokines, lymphokines or interferons [6] 17/02 • Peptides being immobilised on, or in, an organic against hormones [6] 16/26 • • carrier [4] 16/28 • • against receptors, cell surface antigens or cell 17/04 . entrapped within the carrier, e.g. gel, hollow surface determinants [6] fibre [4] 16/30 • • • from tumour cells [6] attached to the carrier via a bridging agent [4] 17/06• 16/32 • • against translation products from oncogenes [6] 17/08• • the carrier being a synthetic polymer [4] • • 16/34 against blood group antigens [6] 17/10• the carrier being a carbohydrate [4] ٠ 16/36 • • against blood coagulation factors [6] 17/12• • Cellulose or derivatives thereof [4] 16/38 • against protease inhibitors of peptide structure [6] 17/14· Peptides being immobilised on, or in, an inorganic 16/40 • against enzymes [6] carrier [4] 16/42٠ against immunoglobulins (anti-idiotypic antibodies) [6]
- 16/44 • against material not provided for elsewhere [6]
- 19/00 Hybrid peptides (hybrid immunoglobulins composed solely of immunoglobulins C07K 16/46) [6]
