

## NICE CLASSIFICATION - 7<sup>th</sup> Edition, Version 1997

### Class 1

Chemicals used in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics; manures; fire extinguishing compositions; tempering and soldering preparations; chemical substances for preserving foodstuffs; tanning substances; adhesives used in industry.

#### Explanatory Note

Class 1 includes mainly chemical products used in industry, science and agriculture, including those which go to the making of products belonging to other classes.

This Class includes, in particular:

- compost;
- salt for preserving other than for foodstuffs.

This Class does not include, in particular:

- raw natural resins (Cl. 2);
- chemical products for use in medical science (Cl. 5);
- fungicides, herbicides and preparations for destroying vermin (Cl. 5);
- adhesives for stationery or household purposes (Cl. 16);
- salt for preserving foodstuffs (Cl. 30);
- straw mulch (Cl. 31).

| Basic no. | Indication                                                                                             |
|-----------|--------------------------------------------------------------------------------------------------------|
| 010008    | <b>acetate</b> of cellulose, unprocessed                                                               |
| 010007    | <b>acetates</b> [chemicals]*                                                                           |
| 010010    | <b>acetic</b> anhydride                                                                                |
| 010011    | <b>acetone</b>                                                                                         |
| 010012    | <b>acetylene</b>                                                                                       |
| 010013    | <b>acetylene</b> tetrachloride                                                                         |
| 010016    | <b>acid</b> proof chemical compositions                                                                |
| 010014    | <b>acids</b> *                                                                                         |
| 010251    | <b>acidulated</b> water for recharging batteries / <b>acidulated</b> water for recharging accumulators |
| 010461    | <b>acrylic</b> resins, unprocessed                                                                     |
| 010018    | <b>actinium</b>                                                                                        |
| 010025    | <b>activated</b> carbons                                                                               |
| 010019    | <b>additives</b> , chemical, to drilling muds / <b>chemical</b> additives to drilling muds             |
| 010020    | <b>additives</b> , chemical, to motor fuel / <b>chemical</b> additives to motor fuel                   |
| 010308    | <b>additives</b> , chemical, to insecticides / <b>chemical</b> additives to insecticides               |
| 010309    | <b>additives</b> , chemical, to fungicides / <b>chemical</b> additives to fungicides                   |
| 010022    | <b>adhesive</b> preparations for surgical bandages                                                     |
