NICE CLASSIFICATION - 12th Edition, Version 2025

General Remarks

The indications of goods or services appearing in the class headings are general indications relating to the fields to which, in principle, the goods or services belong. The Alphabetical List should therefore be consulted in order to ascertain the exact classification of each individual product or service.

GOODS

If a product cannot be classified with the aid of the List of Classes, the Explanatory Notes and the Alphabetical List, the following remarks set forth the criteria to be applied:

a. A finished product is in principle classified according to its function or purpose. If the function or purpose of a finished product is not mentioned in any class heading, the finished product is classified by analogy with other comparable finished products, indicated in the Alphabetical List. If none is found, other subsidiary criteria, such as that of the material of which the product is made or its mode of operation, are applied.
b. A finished product which is a multipurpose composite object (e.g., clocks incorporating radios) may be classified in all classes that correspond to any of its functions or intended purposes. However if a good has a primary purpose it should be classified in this class. If those functions or purposes are not mentioned in any class heading, other criteria, indicated under (a), above, are to be applied.
c. Raw materials, unworked or semi-worked, are in principle classified according to the material of which they consist.
d. Goods intended to form part of another product are in principle classified in the same class as that product only in cases where the same type of goods cannot normally be used for another purpose. In all other cases, the criterion indicated under (a), above, applies.
e. When a product, whether finished or not, is classified according to the material of which it is made, and it is made of different materials, the product is in principle classified according to the material which predominates.
f. Cases adapted to the product they are intended to contain are in principle classified in the same class as the product.

SERVICES

If a service cannot be classified with the aid of the List of Classes, the Explanatory Notes and the Alphabetical List, the following remarks set forth the criteria to be applied:

a. Services are in principle classified according to the branches of activities specified in the headings of the service classes and in their Explanatory Notes or, if not specified, by analogy with other comparable services indicated in the Alphabetical List.
b. Rental services are in principle classified in the same classes as the services provided by means of the rented objects (e.g., Rental of telephones, covered by Cl. 38). Leasing services are analogous to rental services and therefore should be classified in the same way. However, hire- or lease-purchase financing is classified in Cl. 36 as a financial service.
c. Services that provide advice, information or consultancy are in principle classified in the same classes as the services that correspond to the subject matter of the advice, information or consultancy, e.g., transportation consultancy (Cl. 39), business management consultancy (Cl. 35), financial consultancy (Cl. 36), beauty consultancy (Cl. 44). The rendering of the advice, information or consultancy by electronic means (e.g., telephone, computer) does not affect the classification of these services.
d. The means by which a service is rendered in principle does not have any impact on the classification of the services. For example, financial consultancy is classified in Cl. 36 whether the services are rendered in person, by telephone, online, or in a virtual environment. However, this remark does not apply if the purpose or result of a service changes due to its means or place of delivery. This is the case, for example, when certain services are rendered in a virtual environment. For instance, transport services belonging to Cl. 39 involve the moving of goods or people from one physical place to another. However, in a virtual environment, these services do not have the same purpose or result and must be clarified for appropriate classification, e.g., simulated travel services provided in virtual environments for entertainment purposes (Cl. 41).
e. Services rendered in the framework of franchising are in principle classified in the same class as the particular services provided by the franchisor (e.g., business advice relating to franchising (Cl. 35), financing services relating to franchising (Cl. 36), legal services relating to franchising (Cl. 45)).

Class 40

Treatment of materials; recycling of waste and trash; air purification and treatment of water; printing services; food and drink preservation.

Explanatory Note

Class 40 includes mainly services rendered by the mechanical or chemical processing, transformation or production of objects or inorganic or organic substances, including custom manufacturing services. For the purposes of classification, the production or manufacturing of goods is considered a service only in cases where it is effected for the account of another person to their order and specification. If the production or manufacturing is not being performed to fulfil an order for goods which meet the customer's particular needs, requirements, or specifications, then it is generally ancillary to the maker's primary commercial activity or goods in trade. If the substance or object is marketed to third parties by the person who processed, transformed or produced it, then this would generally not be considered a service.

This Class includes, in particular:

- transformation of an object or substance and any process involving a change in its essential properties, for example, dyeing a garment; such transformation services are also classified in Class 40 if they are provided in the framework of repair or maintenance work, for example, chromium plating of motor vehicle bumpers;
- services of material treatment which may be present during the production of any substance or object other than a building, for example, services which involve cutting, shaping, polishing by abrasion or metal coating;
- joining of materials, for example, soldering or welding;
- processing and treatment of foodstuffs, for example, fruit crushing, flour milling, food and drink preservation, food smoking, freezing of foods;
- custom manufacturing of goods to the order and specification of others (bearing in mind that certain offices require that the goods produced be indicated), for example, custom manufacturing of automobiles;
- quilting, embroidering, custom tailoring, textile dyeing, applying finishes to textiles.

This Class does not include, in particular:

- services that do not entail a change in the essential properties of the object or substance, for example, furniture maintenance or repair (Cl. 37);
