Recent Improvements to the ROMARIN Database

1. The ROMARIN database contains information of all international marks which are currently in force under the Madrid System for the International Registration of Marks. This database is available on WIPO's website: <http://www.wipo.int/madrid/en/romarin/>. Its DVD version is available for subscription from the E-Bookshop: <http://www.wipo.int/ebookshop/>.
2. Users are informed that the ROMARIN database has recently been improved and that a number of new search possibilities were added to its interface as of September 2006, such as:
 - “Next” and “Previous” links were added to the display of the mark, to allow easier navigation through the result list.
 - The various sections in the history of a mark can be expanded or collapsed.
 - A display of the mark details, giving a summary of the history for each Contracting Party, has been added.
 - The mark image may now be displayed in the search result list.
 - The search result list may be exported in PDF format (including the mark image).
 - The details of the mark may be exported in PDF format.
 - The limit on the number of search results returned has been removed.
 - New selectable fields have been added in the advanced search.
3. Some major changes will also be implemented shortly in order to allow users to keep a history of their searches, as well as the ability to search “Pending” details.
4. As of January 1, 2007, the online version of ROMARIN is open to the public free of charge. At the same time, the annual subscription price of the ROMARIN DVD has been reduced to 750 Swiss francs, which amounts to 50% of the subscription price applicable in 2006.
