

Work Smarter with the Madrid System's Digital Tools

From researching to budgeting, WIPO's Madrid System offers a suite of free digital tools – all accessible through eMadrid – to help you plan and execute your global trademark strategy with confidence.

Key tools

1

Global Brand Database

Search millions of trademarks registered worldwide to check whether your mark is already in use in your target markets – and avoid potential conflicts before you file.

2

Member profiles

Learn about trademark rules and requirements in your target markets so you know what to expect.

3

Fee calculator

Estimate your filing costs based on target markets and number of classes of goods and services so you can plan ahead and adjust if needed.

4

Goods and services manager

Select from thousands of pre-approved terms to build, check and translate your list of goods and services. Getting this right from the start helps avoid errors and supports broader protection across your target markets.

Ready to file your international trademark application?

Let eMadrid guide you through the process.
