Add/Select File

Enhanced Reception

- Customizable receipt details (file number format, registration number format)
- Possibility to print QR codes for use with WIPO SCAN

Enhanced Reception

- Search receipt reports by application type and reprint receipt

The screenshot shows a search interface with the following fields and controls:

- Doc Origin: INAPI
- Reception Date: 01/02/2014 - 03/02/2015
- Payment Receipt Number: (empty)
- Payment Receipt Date: (empty)
- Buttons: Reset, Search

Below the search fields is a table with tabs for Trademark, Patent, and Industrial Design. The table displays the following data:

Print	Edit	Application #	Application Type	Reception Date	Payment Info	Payment Amount
		M/DZ/2014/01034	Art 9 SEXIES 2	2014-07-04 23:10:18		
		M/DZ/2014/01033	Art 9 SEXIES 2	2014-07-04 23:10:12		
		M/DZ/2014/01032	Art 9 SEXIES	2014-07-04 23:10:05

		M/DZ/2014/01030	Art 9 SEXIES 2	2014-07-04 23:09:50		

- Search receipt reports by user document group

The screenshot shows a search interface with the following tabs and table:

- Tabs: ID Registration / Renewal, Marques, PA Corrections & Arguments, Time Extension, Others

The table displays the following data:

Print	Edit	User Document #	Document Type	Reception Date	Payment Info
			ID Registration Fees	2014-05-07 00:00:56	
			ID Registration Fees	2014-05-07 00:00:47	
			ID Registration Fees	2014-05-07 00:00:30	Revenue receipt 2014-06-10.00.00.00.33
			ID Registration Fees	2014-05-07 00:00:24	
			ID Registration Fees	2014-05-01 00:00:00	

Page 1 of 2

- Export reports to excel format

Data Extraction

- Based on publication date range

The screenshot shows a web-based interface for data extraction. The top section contains configuration options: Process Type (Industrial Designs), Export Format (ST 86), Document Export Type (Incremental Export selected), and Extraction Interval (Weekly selected). It also includes date pickers for Start Date (18/06/2014) and End Date, and a dropdown for 'Include Application Number with:'. 'Preview' and 'Save' buttons are visible. The bottom section features a tree view on the left with folders: Industrial Designs, Industrial designs, FrontFile, UserDocuments, OfficeDocuments (highlighted), and BackFile. On the right, there is a 'Process State(S)' table with a red box around an edit icon.

- Data and documents packaging based on WIPO Standards (ST 36, ST 66, ST86)
- Possibility to export file statuses

Data Extraction

- Possibility to export documents if EDMS is enabled in IPAS (usually patent specifications)

The screenshot displays the IPAS data extraction configuration interface. At the top, there are several configuration fields: 'Process Type' is set to 'Industrial Designs', 'Export Format' is 'ST 86', 'Export Type' has 'Incremental Export' selected, and 'Extraction Interval' has 'Weekly' selected. There are also date pickers for 'Start Date' (23/01/2015) and 'End Date', and a dropdown for 'Include Application Number as:'. Below these fields is a document tree structure. The tree is expanded to show 'Industrial Designs' > 'Industrial designs' > 'FrontFile' > 'UserDocuments' > 'OfficeDocuments' > 'ApplicationDocuments' > 'design'. The 'design' folder is highlighted with a red box. To the right of the tree is a 'Process State(s)' panel, which is currently empty.

- Criteria for front-file and back-file documents

Data Extraction

■ Extraction reports

The screenshot displays a web-based interface for a 'Data Extraction Report'. At the top, there is a 'Search By' section with three radio buttons: 'Date Range' (selected), 'Application Number', and 'LastSRuns'. The 'Date Range' is set to '01/08/2013' to '08/08/2013'. Below the search filters are 'Reset' and 'Search' buttons. The main area contains a table with the following data:

Extraction Date	Application Type	Start Date	End Date	Passed	Failed	Total	
08/08/2013	MIN	01/04/2013	14/08/2013	2	0	2	
01/08/2013	DI	01/04/2013	14/08/2013	1	1	2	

■ Extraction batch program to be configured to run on regular bases (e.g. weekly, monthly)

Future Enhancement

- Generate ST.66 XML-based MADRID notifications to be sent to the International Bureau (i.e. decision of grant or refusal)
- Enhance Quick Response (QR) codes to be printed on receipts
- Support ST.96
