

CWS/5/12

الأصل: بالإنكليزية

التاريخ: 11 أبريل 2017

اللجنة المعنية بمعايير الويبو

الدورة الخامسة

جنيف، من 29 مايو إلى 2 يونيو 2017

تقرير عن الدراسة الاستقصائية بشأن أنظمة ترقيم الطلبات وطلبات الأولوية التي كانت تستخدمها مكاتب الملكية الصناعية في الماضي

وثيقة من إعداد الأمانة

1. وافقت اللجنة المعنية بمعايير الويبو (لجنة المعايير) في دورتها الرابعة المجمععة مجدداً التي عُقدت في مارس 2016 على استبيان "ترقيم الطلبات وطلبات الأولوية - الممارسات السابقة" الذي أعدته فرقة العمل المعنية بالمعيار ST.10/C، وطلبت من المكتب الدولي تنفيذ الإجراءات التالية:

(أ) إعداد وإصدار تعميم يدعو فيه مكاتب الملكية الصناعية إلى استكمال الاستبيان،

(ب) إعداد تقرير عن الدراسة الاستقصائية،

(ج) وتقديم نتائج الدراسة الاستقصائية لتنظر فيها لجنة المعايير في دورتها المقبلة، كي توافق على نشرها في الجزء 7 من دليل الويبو بشأن المعلومات والوثائق المتعلقة بالملكية الصناعية (دليل الويبو).

(انظر الوثيقة CWS/4/4 والفقرات من 29 إلى 34 من الوثيقة CWS/4BIS/16).

2. وما إن تُنشر هذه الدراسة الاستقصائية، فسوف تُكَمَّل الدراسة الاستقصائية المعنونة "ترقيم الطلبات وطلبات الأولوية - الممارسات الحالية"، المنشورة في الجزء 6.2.7 من دليل الويبو.

3. وعملاً بهذا القرار الصادر عن لجنة المعايير، أصدر المكتب الدولي التعميم C.CWS 73 بتاريخ 16 يونيو 2016، ودعا فيه مكاتب الملكية الصناعية إلى تقديم ردودها وتبادل المعلومات بشأن الممارسات السابقة لترقيم الطلبات وطلبات الأولوية.

4. وإلى جانب الردود المتعلقة بالأنظمة السابقة لترقيم الطلبات وطلبات الأولوية، دُعيت مكاتب الملكية الصناعية إلى تقديم مشاركتها المتعلقة بالممارسات الحالية لترقيم الطلبات في الجزء 6.2.7 من دليل الويبو، أو تحديث هذه المشاركات، إذا لزم الأمر.

5. ووفقاً لخطة العمل الخاصة بتحديث الدراسات الاستقصائية المنشورة في الجزء 7 من دليل الويبو، قام المكتب الدولي، إلى جانب فرقة العمل المعنية بالجزء 7، بإدماج المعلومات الواردة في الأجزاء 1.2.7 و2.2.7 و3.2.7 من دليل الويبو في الجزء 6.2.7 والجزء الجديد 7.2.7 من دليل الويبو، حيثما كان ذلك الإدماج ممكناً (انظر المرفق الثاني للوثيقة CWS/4BIS/6).

6. وُحِدَت المشاركات الثماني عشرة التالية في الجزء 6.2.7 من دليل الويبو أو أُضيفت إلى هذا الجزء:

إيطاليا	IT	النمسا	AT
اليابان	JP	أستراليا	AU
جمهورية كوريا	KR	بلجيكا	BE
جمهورية مولدوفا	MD	الصين	CN
بولندا	PL	ألمانيا	DE
الاتحاد الروسي	RU	إسبانيا	ES
المملكة العربية السعودية	SA	المملكة المتحدة	GB
السويد	SE	كرواتيا	HR
سلوفاكيا	SK	إيرلندا	IE

ونشر المكتب الدولي الجزء 6.2.7 المُنقَّح من دليل الويبو في مارس 2017 على العنوان التالي:

<http://www.wipo.int/standards/en/pdf/07-02-06.pdf>

7. وترد نتائج الدراسة الاستقصائية بشأن الممارسات السابقة لترقيم الطلبات وطلبات الأولوية في مرفق هذه الوثيقة لتتظر فيها لجنة المعايير وتتخذ قراراً بشأن نشرها بوصفها جزءاً جديداً برقم 7.2.7 في دليل الويبو.

8. وإذا وافقت لجنة المعايير على نشر الدراسة الاستقصائية في دليل الويبو، فينبغي أن تُعتبر المهمة رقم 30 منتهية وأن تُحذف من قائمة مهام لجنة المعايير، ومن ثمَّ ينبغي أن يتوقف عمل فرقة العمل المعنية بالمعيار ST.10/C.

9. إن لجنة المعايير مدعوة إلى:

(أ) الإحاطة علماً بمضمون هذه الوثيقة ومرفقها؛

(ب) والإحاطة علماً بأن الجزء 6.2.7 من دليل الويبو قد حُدِّث في مارس 2017، على النحو المشار إليه في الفقرات من 4 إلى 6 أعلاه،

(ج) والنظر في نشر الدراسة الاستقصائية
المعنونة "ترقيم الطلبات وطلبات الأولوية -
الممارسات السابقة" كجزء جديد برقم 7.2.7 في
دليل الويبو، والبت في ذلك النشر، على النحو
المشار إليه في الفقرة 7 أعلاه،

(د) واعتبار المهمة رقم 30 منتهية والبت فيما
إذا كان ينبغي حذفها من قائمة مهام لجنة المعايير،
على النحو المشار إليه في الفقرة 8 أعلاه،

(هـ) والبت في توقف عمل فرقة العمل المعنية
بالمعيار ST 10/C، على النحو المشار إليه في
الفقرة 8 أعلاه.

[يلي ذلك المرفق]

CWS/5/12

ANNEX

المرفق

NUMBERING OF APPLICATIONS AND PRIORITY APPLICATIONS – FORMER PRACTICES

Editorial note by the International Bureau

The following survey provides examples of application and priority application numbers assigned by industrial property offices (IPOs) in the past, as well as information on the codes used for indicating the type of industrial property rights, position of different parts of application number and other relevant remarks. This survey complements the survey “Numbering of applications and priority applications – Current practices”, which is published in [Part 7.2.6](#) of the WIPO Handbook.

NUMBERING OF APPLICATIONS AND PRIORITY APPLICATIONS – FORMER PRACTICES

Document prepared by the Secretariat

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks
<p>AU AUSTRALIA</p>	<p>69179/91 10611/92 39945/89</p>	<p>69179/91 10611/92 39945/89</p>	<p>Used from January 1, 1989, to July 5, 2002 for: Patents, International applications filed under the PCT (PCT international phase), International patent applications under the PCT (PCT applications in the national phase)</p> <p>Used from January 1, 1989, to May 23, 2001 for: Innovation/simple/short-term/petty patent applications (Innovations)</p>
	<p>– Description: In the above examples 69179/91 is a patent application filed directly at IPAU in 1990 10611/92 - patent application filed directly at IPAU in 1992 39945/89 - petty Patent application filed directly at IPAU in 1989</p> <p>– Code for the type of IP rights: N/A</p> <p>– Year designation: 2 digits in positions 6-7 indicate the year of filing according to Gregorian calendar</p> <p>– Serial number: fixed length of 5 digits in positions 1 to 5.</p> <p>– Code for internal use: N/A</p> <p>– Control number/Check digit: N/A</p> <p>Further remarks: Machine-readable presentation of application numbers is the same as print presentation described above.</p> <p>Slash separates the main body of application number from the year of filing.</p> <p>Code for the type of IP rights hadn't been used by IP Australia before it moved to 10 digit application numbering system</p> <p>Note: Separators used (slash) are not counted for defining the position of elements of the application number.</p>		
<p>AU AUSTRALIA</p>	<p>1991PF1774 1993PL6640 1995PN0367 1999PP8031</p>	<p>1991PF1774 1993PL6640 1995PN0367 1999PP8031</p>	<p>Used from January 1, 1989, to July 5, 2002 for: Provisional patent applications (Provisional patents)</p>
	<p>– Description: In the above examples 1991PF1774 - Provisional Patent application filed directly at IPAU in 1991 1993PL6640 – Provisional Patent application filed directly at IPAU in 1993 1995PN0367 – Provisional Patent application filed directly at IPAU in 1995 1999PP8031 – Provisional Patent application filed directly at IPAU in 1999</p> <p>– Code for the type of IP rights: position 5 o Provisional patent applications (Provisional patents)..... P</p> <p>– Year designation: 4 digits in positions 1-4 indicate the year of filing according to Gregorian calendar</p> <p>– Serial number: fixed length of 4 digits in positions 7-10.</p> <p>– Code for internal use: N/A</p> <p>– Control number/Check digit: N/A</p> <p>Further remarks: Machine-readable presentation of application numbers is the same as print presentation described above.</p> <p>Letter at position 6 is arbitrary increasing over the course of the decades.</p>		

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks
CN CHINA	93100001.7	93100001.7	<p>Used from April 1, 1985 to September 30, 2003 for: Patents, Utility Models / Utility certificates, Industrial designs</p> <p>Used from January 1993 to September 30, 2003 for: International patent applications under the PCT (PCT applications in the national phase), International utility model applications under the PCT (PCT applications in the national phase)</p> <p>– Description: In the above example 93100001.7 is a patent application with serial number 00001 and check digit 7 filed at SIPO in 1993.</p> <p>– Code for the type of IP rights: position 3</p> <ul style="list-style-type: none"> o Patents 1 o International patent applications under the PCT (PCT applications in the national phase) 8 or 9 (see below) o Utility Models / Utility certificates 2 o International utility model applications under the PCT (PCT applications in the national phase) 8 or 9 (see below) o Industrial designs 3 <p>For PCT applications in the national phase, code 9 was used from April 1, 1994 to December 31, 1995 codes 8 and 9 were used from 1996 to 1997 code 8 was used from 1998 to October 2003</p> <p>– Year designation: 2 digits in positions 1-2 indicate the year of filing according to Gregorian calendar.</p> <p>– Serial number: fixed length of five digits in positions 4-8.</p> <p>– Code for internal use: N/A</p> <p>– Control number/Check digit: one check digit in position 9, separated by a dot. The algorithm for computing the check digit was adapted by the ISO 7064:1983 (MOD11-2 check digit algorithm).</p> <p>Further remarks: Machine-readable presentation of application numbers is the same as print presentation described above.</p> <p>Note: Separators used (dot) are not counted for defining the position of elements of the application number.</p>

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks
<p>DE GERMANY</p>	<p>Z 3 S 80015 VIII/21a1 S 71482 R 41613 / 21 Wz</p>	<p>Z 3 S 80015 VIII/21a1 S 71482 R 41613 / 21 Wz</p>	<p>Used from 1877 to 1968 for: Patents Used from 1891 to 1967 for: Utility Models / Utility certificates Used from 1894 to 1994 for: Trademarks</p> <p>– Description: Position 1: first letter of the applicant name Position 2 and following: continuous numbering for this letter (see “Serial number”, below) Position 7 (before '/'): patent department (this part was present for patents after 1928) Position 8 (after '/'): for patents after 1928, classification by German DPK classification for trademarks: classification of goods followed by "Wz" (from German "Warenzeichen" = trademark)</p> <p>– Code for the type of IP rights: only for trademarks, positions 9-10 o Trademarks Wz</p> <p>– Year designation: N/A</p> <p>– Serial number: variable length of 1 up to 6 digits, beginning at position 2. There are separate numbering cycles for each letter in position 1.</p> <p>– Code for internal use: The first letter of the applicant name is coded in position 1. The patent department is coded in Roman numbers before the slash ('/'), for patents filed after 1928. (The patent department was probably not publically known.) The classification according to the German classification (DPK) or the classification of goods was coded after the slash. DPK was available for public, as well as the classification for trademarks.</p> <p>– Control number/Check digit: N/A</p> <p>Further remarks: For machine-readable presentation of trademark application numbers, the classification information was omitted and spaces were deleted, for example, R41613.</p> <p>Note: Separators used (slash, space) are not counted for defining the position of elements of the application number.</p>
<p>DE GERMANY</p>	<p>P 18 00 001.6 P 44 45 678.6</p>	<p>P 18 00 001.6 P 44 45 678.6</p>	<p>Used from October 1, 1968, to December 31, 1994 for: Patents</p> <p>– Description: P YYNNNNN.C, where “P” is the type of IP rights (patent), YY is a coded year designation (see “Year designation” below), NNNNN is a serial number and C is a control number. In the above example P 18 00 001.6 – patent application filed in 1968.</p> <p>– Code for the type of IP rights: position 1 o Patents P</p> <p>– Year designation: positions 2-3 provide codified information about the year of filing according to Gregorian calendar. The code is computed by subtracting 50 from the two-digit-year, i.e. the year 1968 is coded as follows: 68-50=18.</p> <p>– Serial number: fixed length of 5 digits in positions 4-8. The numbering restarted every year.</p> <p>– Code for internal use: N/A</p> <p>– Control number/Check digit: position 9 separated by a dot “.”, the algorithm for computing the control number is unknown.</p> <p>Further remarks: Machine-readable presentation of application numbers is the same as print presentation described above.</p> <p>Note: Separators used (dot, space) are not counted for defining the position of elements of the application number.</p>

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks
<p>DE GERMANY</p>	<p>28 60 001.3 33 79 999.7 38 82 001.5 33 90 003.5</p>	<p>28 60 001.3 33 79 999.7 38 82 001.5 33 90 003.5</p>	<p>Used from 1978 to 1988 for: European patent applications with DE designation</p> <p>Used from 1983 to 1994 for: International patent applications under the PCT (PCT applications in the national phase)</p>
	<p>– Description: YYTNNNN.C, where YY is a coded year designation (see “Year designation” below), T is a type of IP rights, NNNN is a serial number and C is a control number.</p> <p>In the above examples: 28 60 001.3 – EP patent application with DE designation filed in 1978; 33 90 003.5 – PCT application with DE designation entering the national phase filed in 1988.</p> <p>– Code for the type of IP rights: position 3 o European patent applications with DE designation..... 6, 7 and 8 o International patent applications under the PCT (PCT applications in the national phase) 9</p> <p>– Year designation: positions 1-2 provide codified information about the year of filing according to Gregorian calendar. The code is computed by subtracting 50 from the two-digit-year, i.e. the year 1968 is coded as follows: 68-50=18.</p> <p>– Serial number: fixed length of 4 digits in positions 4-7. The serial number runs consecutively inside the types coded in position 3.</p> <p>– Code for internal use: N/A</p> <p>– Control number/Check digit: position 8 separated by a dot “.”, the algorithm for computing the control number is unknown.</p> <p>Further remarks: Machine-readable presentation of application numbers is the same as print presentation described above.</p> <p>Note: Separators used (dot, space) are not counted for defining the position of elements of the application number.</p>		
<p>DE GERMANY</p>	<p>MR 28 192</p>	<p>MR 28 192</p>	<p>Used until June 30, 1988 for: Industrial Designs</p> <p>– Description: MRNNNNN, where “MR” is the type of IP rights (industrial designs, from German “Musterregister” = registry of designs) and NNNNN is a serial number.</p> <p>– Code for the type of IP rights: positions 1-2 o Industrial Designs MR</p> <p>– Year designation: N/A</p> <p>– Serial number: variable length of up to 5 digits in positions 3-7, continuous numbering.</p> <p>– Code for internal use: N/A</p> <p>– Control number/Check digit: N/A</p> <p>Further remarks: It is unknown whether the machine-readable presentation of application numbers was different from the print presentation described above.</p> <p>Note: Separators used (space) are not counted for defining the position of elements of the application number.</p>

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks

G (often omitted) or 2 (1995 – 2003) o Layout-designs (topographies) of integrated circuits T (1987 - 1994) or 2 (1995 - 2003) o Trademarks 3 o Geographical indications..... 3 o Design patents..... M (until 30.06.1998) or 4 o Typographies..... 4 <p>– Year designation: two digits in positions 2-3 indicate the year of filing according to Gregorian calendar.</p> <p>– Serial number: fixed length of 5 digits in positions 4-8. Serial numbers are consecutive inside types (position 1). For utility models filed before 1995, the numbering restarted every year; after 1994, numbering was continuous within number range. For topographies filed until 1994, the numbering restarted every year at 50000.</p>			

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks
			<p>For IP right code "1", the following numbering ranges in the serial number were used: 00001-74999: national patent applications 75001-79999 SPCs (years 1995-2001) 99001-99999 SPCs (years 2001-2003)</p> <p>For IP right code "2", (utility models or topographies filed after 1994) the following numbering ranges in the serial number were used: 00001-74999 = utility models 75001-79999 = topographies 80001-99999 = utility models from PCT application in the national phase</p> <p>For IP right code "3", the following numbering ranges in the serial number were used: 99000-99999 = geographical indications</p> <p>For IP right code "4", the following numbering ranges in the serial number were used: 50000-99999 = typographies (between 1998 and the end of 2004)</p> <ul style="list-style-type: none"> - Code for internal use: N/A - Control number/Check digit: position 9 separated by a dot "." <p>Assumed algorithm: modulo 8 algorithm: each digit of the base, from right to left, is multiplied by 2, 3, 4, 5 etc., respectively. The products of the separate digits are summed and then divided by 8. The remainder of the Division is subtracted from 8 to give the check digit.</p> <p>Further remarks: Machine-readable presentation of application numbers is the same as print presentation described above. Note: Separators used (dot, space) are not counted for defining the position of elements of the application number.</p>
<p>DE GERMANY</p>	<p>WP 22 f7 / 9269 AP A01D / 260 426 1</p>	<p>WP 22 f7 / 9269 AP A01D / 260 426 1</p>	<p>Used from 1949 to 1990 in the former German Democratic Republic (GDR) for: Patents</p> <ul style="list-style-type: none"> - Description: Positions 1-2 indicate subtypes of patents (see below). Positions 3-6 contain classification information. Positions 7 and following (after the slash '/') contain consecutive serial number. Between 1949 and 1951, additional numbers were inserted in positions 3-4 and the classification information was provided only in positions 5-6, like, for example, in WP 22 f7 / 9269. After 1951, the very last digit is a check digit (like in "AP A01D / 260 426 1", above). - Code for the type of IP rights: positions 1-2 <ul style="list-style-type: none"> o Exclusive patent AP (from German "Ausschlusspatent") o Economic patent..... WP (from German "Wirtschaftspatent") <p>Exclusive patents are similar to a patent in the regular sense. Economic patents were for inventions by nationally owned companies or state organizations. These economic patents could be used by all socialist companies.</p> - Year designation: N/A - Serial number: variable length from position 7 onwards, continuous numbering. - Code for internal use: Classification information was indicated in positions 5-6 or, after 1951, in positions 3-6 as IPC. - Control number/Check digit: After 1951, the last digit of the application number (no separators used); the algorithm for computing it is unknown <p>Further remarks: A slash separated classification information from the serial number. It is unknown whether the machine-readable presentation of application numbers was different from the print presentation described above. Note: Separators used (slash, space) are not counted for defining the position of elements of the application number.</p>

Country or Organization	Example of Application Number	Recommended Presentation in Abbreviated Form as a Priority Application Number	Remarks
DE GERMANY	19712 GM 19712 GM 2a/28849 W12345 H17	19712 GM 19712 GM 2a/28849 W12345 H17	Used from 1949 to 1963 in the former German Democratic Republic (GDR) for: Utility Models / Utility certificates Used from 1949 to 1990 in the former German Democratic Republic (GDR) for: Trademarks Used from 1985 to 1990 in the former German Democratic Republic (GDR) for: Geographical Indications
	<ul style="list-style-type: none"> - Description: Continuous numbers, which could be prefixed by indication of the type of IP rights and, in some cases, classification information (see below). The whole number could also be prefixed by DDR (German abbreviation for German Democratic Republic) - Code for the type of IP rights: positions 1-2 (or after the abbreviation DDR) <ul style="list-style-type: none"> o Utility Models / Utility certificates..... GM (from German "Gebrauchsmuster") o Trademarks W (from German "Warenzeichen") o Geographical Indications H (from German "Herkunftsangabe") - Year designation: N/A - Serial number: variable length, continuous numbering, last part of the number. - Code for internal use: Utility models could have classification information positioned between GM and the serial number; this classification information was separated from the serial number with a slash "/". For example, "2a" in "GM 2a/28849". - Control number/Check digit: N/A <p>Further remarks: It is unknown whether the machine-readable presentation of application numbers was different from the print presentation described above.</p> <p>Note: Separators used (slash, space) are not counted for defining the position of elements of the application number.</p>		
DE GERMANY	Gs.5497 U7124 MP7121	Gs.5497 U7124 MP7121	Used from 1952 to 1990 in the former German Democratic Republic (GDR) for: Industrial designs Used from 1973 to 1990 in the former German Democratic Republic (GDR) for: Originator's certificates, Design patents
	<ul style="list-style-type: none"> - Description: In the above examples: Gs.5497 is an industrial design with serial number 5497 U7124 is an originator's certificate with serial number 7124 MP7121 design patent with serial number 7121 - Code for the type of IP rights: position 1 (or 1-2) <ul style="list-style-type: none"> o Industrial designs..... Gs o Originator's certificates U o Design patents..... MP - Year designation: N/A - Serial number: fixed length of 4 digits after the prefix (positions 3-6 or 2-5), continuous numbering, last part of the number. - Code for internal use: N/A - Control number/Check digit: N/A <p>Further remarks: It is unknown whether the machine-readable presentation of application numbers is different from the print presentation described above.</p>
