AIRCOP CONTAINER CONTROL PROGRAMME

WHO WE ARE

PCCP contributes to building the capacity of inter-agency national units comprised, as relevant, of customs, police, anti-narcotics forces and other law enforcement agencies. These units are located at seaports, airports, dry ports, rail terminals and land border crossings and work to identify and inspect high-risk containers, cargo, mail and passengers. These efforts are assisted by enhanced inter-agency cooperation nationally and regionally – all with minimum disruption to legitimate trade and the movement of passengers.

PCCP EFFORTS AGAINST IPR VIOLATIONS

AIRCOP CONTAINER CONTROL PROGRAMME

PCCP supports Member States by facilitating coordination and providing expert training to identify and inspect high-risk containers, gaining practical insights into the complexities of enforcing IPR.

AIRCOP CONTAINER CONTROL PROGRAMME

TARGETED PCCP TRAINING FOR IP ENFORCEMENT

- Intellectual Property Rights
- Targeting (analyzing data, profiling, WCO Cargo Targeting System and information exchange)
- Inspection (x-ray image analysis, conducting examinations, records, safety, reporting, referral and evidence collection)
- National Situation (Customs and law enforcement agencies' national presentations)
- Private Sector Awareness (financial and industry impact, guidelines)
- Gender and Human Rights

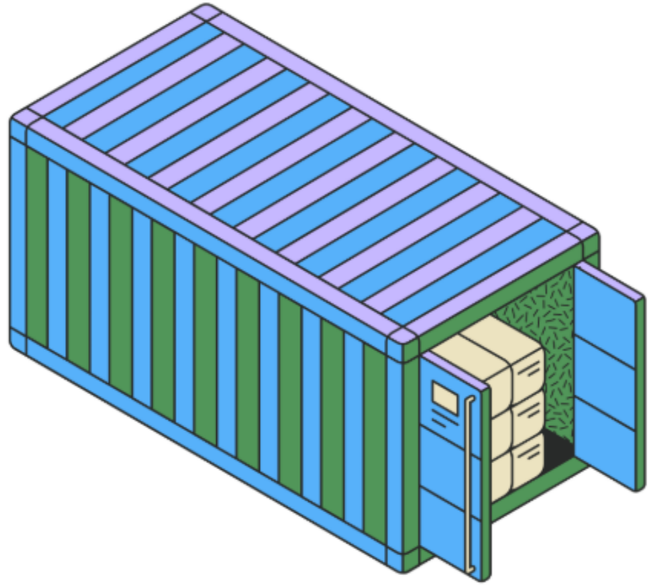
IMPACT AND OUTCOMES OF PCCP IP ENFORCEMENT

AIRCOP CONTAINER CONTROL PROGRAMME



Since the inception of the programme, PCCP-supported units have seized more than 1300 shipments related to IPR violations.

Infringements include a wide range of products, from clothing to cosmetics, cigarettes, toys and electronics.

In 2025 alone, PCCP-supported units seized 9,428,667 IPR-infringing items across all continents.

The PCCP carries out several IPR-related activities, bringing together various stakeholders, including the private sector. It also works closely with the WCO IPR Section in Brussels.

New communication channels are established with the stakeholders to share information and work together to protect IPR.
