

Global Expert Network on Copyright User Rights

The Global Expert Network on Copyright User Rights is an international association of more than 100 leading copyright scholars and legal experts from over 30 countries. The Network promotes balanced copyright systems by advocating open and flexible user rights, including fair use and public-interest exceptions and limitations. It also advances the right to research, education, and digital access within national and international copyright frameworks, and examines measures to prevent contractual terms from overriding statutory copyright exceptions and limitations.

The Centre on Knowledge Governance, in its capacity as Chair of the Global Expert Network on Copyright User Rights, offers technical assistance and capacity-building programmes on intellectual property and knowledge governance. These services are available to interested delegations seeking to strengthen their technical expertise and enhance their capacity to participate effectively and meaningfully in multilateral intellectual property negotiations.
