Committee on Development and Intellectual Property (CDIP)

Nineteenth Session
Geneva, May 15 to 19, 2017

MAPPING OF SOUTH-SOUTH COOPERATION ACTIVITIES WITHIN THE WORLD INTELLECTUAL PROPERTY ORGANIZATION

Document prepared by the Secretariat

1. At its seventeenth session, in the context of the discussions on the Mapping of South-South Cooperation Activities within the World Intellectual Property Organization (document CDIP/17/4), the Committee on Development and Intellectual Property (CDIP) “requested the Secretariat to present a new document at its nineteenth session, taking into account the suggestions made by Delegations”.

2. Accordingly, the Annex to this document has been prepared to respond to the above-mentioned request. It covers the South-South Cooperation Activities undertaken within the Organization from 2014 to 2016.

3. The CDIP is invited to take note of the information contained in the Annex to this document.

[Annex follows]
I. INTRODUCTION

1. The present document was prepared to provide Member States with an overview of the IP-related activities undertaken by the Secretariat in the context of South-South Cooperation (SSC) covering the period 2014-16. It is a follow-up to the mapping (document CDIP 17/4) submitted to the Member States during the Seventeenth Session of the Committee on Development and Intellectual Property (CDIP) which took place on April 11 to 15, 2016.

2. An operational definition of South-South Cooperation (SSC) is found in the Framework of Operational Guidelines on United Nations support to South-South Cooperation as “a process whereby two or more developing countries pursue their individual and/or shared national capacity Development objectives through exchanges of knowledge, skills, resources and technical know-how, and through regional and interregional collective actions, including partnerships involving Governments, regional organizations, civil society, academia and the private sector, for their individual and/or mutual benefit within and across regions. South-South cooperation is not a substitute for, but rather a complement to, North-South cooperation.”

3. Similarly, the High Level United Nations Conference on South-South Cooperation which took place in Nairobi (December 2009) reaffirmed that “South-South Cooperation is a common endeavor of peoples and countries of the South, born out of shared experiences and sympathies, based on their common objectives and solidarity, and guided by, inter alia, the principles of respect for national sovereignty and ownership, free from any conditionality. South-South cooperation should not be seen as official development assistance. It is a partnership among equals based on solidarity.”

4. In line with the definition of SSC provided within the United Nations system, and following the comments made by Member States during the CDIP/17, the Secretariat reviewed and identified those development-related activities which facilitate mutually beneficial exchanges of knowledge and experience among developing countries and LDCs, and promote innovation, creativity and the effective use of the intellectual property system for economic, technological, social and cultural development.

5. The mapping presented in the Appendix of this document contains a list of activities undertaken by the Organization where both beneficiary and provider country/ies were developing countries or LDCs, and where all or the majority of speakers/experts attending the event, came from a developing country or LDC.

6. Excluded from this mapping are activities that took place: (a) at WIPO Headquarters in Geneva; (b) in relation to countries with economies in transition; (c) with funding from

---

1 Framework of Operational Guidelines on United Nations support to South-South Cooperation, Note by the Secretary General (SSC/17/3), in response to a request by the Joint Inspection Unit for an operational definition of SSC for the UN system.

3 A broad definition of what WIPO qualifies as “development-oriented activities” may be found in document WO/PBC/24/17, ANNEX II, on the “Revised definition of Development Expenditure for Accounting Purposes”. The document qualifies as development activities those which are financed and “provided by WIPO to developing countries and Least Developed countries (LDCs) and the equivalent expenditure is not provided to developed countries”. The document also states that “Consistent with past practice, countries with economies in transition are included for the purpose of the Program and Budget.” However, the UN principles of SSC have been developed with a view to address cooperation among developing and Least Developed Countries (LDCs). In line with these principles, the activities surveyed and reported in this mapping exercise concern specifically this group of countries.
developed countries, including under Funds-in-Trust from developed countries; (d) with the involvement of only one country (national activities, with national participants and speakers).

7. The present report integrates the information from document CDIP 17/4, which included data and expenditure information available as at October 31, 2015, on activities undertaken in the 2014/15 biennium. It provides additional data available for the remainder of 2015 and the entire 2016, therefore covering the three-year period 2014-2016.

8. The information provided in this document has been expanded with a view to providing more details on the type or nature of the activity in particular, by adding the activity’s pertinent IP field and, wherever applicable, its regional scope (based on the participating countries).

9. The present mapping exercise was carried out using WIPO’s IP-Technical Assistance Database (IP-TAD) as a source of data on the activities undertaken by the Organization.

II. MAPPING OF SOUTH-SOUTH ACTIVITIES

10. This mapping exercise identifies and groups activities which may be considered as SSC according to the UN definitions, according to Member States comments and observations, as well as being in line with the WIPO mandate. A total of one hundred forty eight (148) activities were identified for the three-year period 2014-2016.

11. All the activities included in this document resulted from requests by Member States and respond to the criteria of SSC. For the purpose of this mapping exercise, activities were grouped into nine types of technical assistance. Within each grouping, they were further listed by chronological order.

12. The list in the Appendix provides categories of grouping by type or nature of the activity as indicated below:
   - IP Forum - Policy Dialogue
   - National IP Strategies and Policies
   - Development of a legal IP Framework
   - Awareness and training on IP Administration
   - Building respect on IP
   - Higher Education
   - Training on IP Management
   - Automation systems for IP rights administrations
   - IP policies & projects for certain economic/productive sectors
   - Global Registrations Systems

13. In addition, for each activity listed in the Appendix, the following information is provided:
   - Title
   - Date
   - IP Field
   - Objective
   - Expected result
   - Place / Venue / Host Country
   - Beneficiary country/ies
   - Region(s)
   - Number of participants
   - Language(s) used
   - Cost
14. It is recalled that the United Nations Joint Inspection Unit (JIU) recommended that “[t]he legislative and governing bodies of the United Nations system organizations should request the Executive Heads to apportion a specific percentage – not less than 0.5 per cent – of core budget resources for the promotion of South-South cooperation (SSC) in their respective areas of competence, in consultation with program countries”.

15. The total expenditure entailed in carrying out these SSC activities amounted to 4,808,000 Swiss francs for the biennium 2014/15. This amount includes 4,166,000 Swiss francs from the regular budget and 642,000 Swiss francs from the Funds in Trust administered and implemented by WIPO. This represented 2.1 per cent of the total non-personnel expenditure in the biennium, including FIT expenditure.

16. As regards 2016, the expenditure of SSC activities amounted to 1,376,000 Swiss francs. This amount includes 1,149,000 from regular budget and 227,000 Swiss francs from the Funds in Trust administered and implemented by WIPO. This represented 1.2 per cent of the total non-personnel expenditure in 2016, including FIT expenditure.

17. The information contained in the Appendix to this document may also be found on the South-South IP Technical Assistance web page http://www.wipo.int/sscip/tad
