**WIPO Conversation on
Intellectual Property and
Frontier Technologies:
AI Inventions**

Sixth Session
September 21-22, 2022

The sixth session of the WIPO Conversation

the problems

01

Variable climatic conditions
Population growth

02

raise of 40% demands
over exploitation

03

Water pollution
Water scarcity
Water shortage

our solution

MydigiPool

A package IoT hardware
box and a SaaS
web/mobile platform

Based on the **IoT** and the **AI**
tools to monitor the water
quality
&
Make optimized decision

Role of IoT and AI in Water

Big data generated by the Internet of Things (IoT) directly feed into AI, The term AI refers to any algorithm that can process data and learn, increasing its performance over time as it becomes better trained.

01

make better decisions

02

Optimizing capital investment
(CAPEX)

03

reducing operating costs
(OPEX)

Role of IP systems

IP systems continue to foster to benefit from the potential for economic growth.

01

Enhance the market value
of my business

02

Facilitating technology
transfer

03

A guarantee to raise funds
For my startup

thank you for your
consideration

Connect your water anywhere anytime to save our life
