WHAT WE DO

We facilitate secured access for the sharing economy.

We offer a world-class ecosystem of products with a robust identity and credentials management platform to enable businesses to scale in a safe and secure manner.

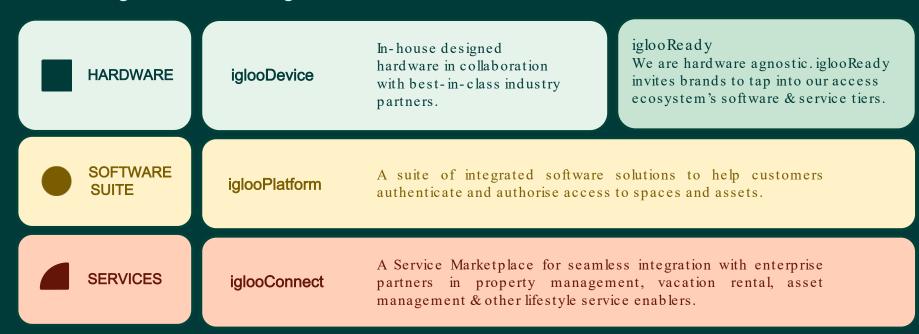

ECOSYSTEM

We adopt a 3 - tier framework to build a world class smart access ecosystem, and we do this through seamless integration of Services, Software and Hardware.

HARDWARE

iglooDevice | iglooReady

We develop and design our own core technology platform for identity and credentials management.

We partner 3rd party manufacturers to extend our ecosystem of products.
