Abstract:

A helium-xenon gas-discharge fiber laser based on hollow-core fiber is demonstrated for the first time. Being pumped by a pulsed microwave radiation at 2.45 GHz in a slot antenna configuration, the laser operates at 2.03 μm in a quasi-continuous-wave mode with output power of ~2 mW. The laser performance depends strongly on the pressure of the gas mixture and on the mole fraction of the Xe atoms. The results obtained open up new opportunities in developing a new type of lasers that can potentially generate in a wide spectral range from ultraviolet to mid-infrared and combine advantages of both gas-discharge and fiber lasers.

PCT NATIONAL PHASE ENTRY INFORMATION

Since July 1, 2017, designated Offices have been required to notify the International Bureau of information concerning international applications which enter the national phase at their Office.

Display of information in the National Phase tab of PATENTSCOPE for an office indicates that the applicant requested national phase processing for the application concerned in that office. The national entry date and national reference number are supplied by the national office concerned and can be used to retrieve further details from that office, if desired. Please note that absence of information for a given office does not necessarily indicate a non-entry in that office.

While the supply of information has improved since the requirement entered into force, further work needs to be done to improve the breadth and quality of the data and the timeliness of its transmission. The information is therefore updated at different frequencies, depending on the office.

Abstract
[EN]
A measured powder dispenser has a hopper feeding powder down into a measured dispensing mechanism. The measured dispensing mechanism has an inlet and an outlet and a measuring container operable therebetween. The measuring container is rotatably engaged about a rotation axis generally orthogonal to an inlet axis of the inlet such that an exterior surface thereof moves across the inlet when the measuring container rotates. The measuring container has an interior volume adjustable measurement chamber recessed within the exterior surface such that, in use, at a first rotational position, the measurement chamber aligns with the inlet to accept a measured amount of powder therein from the power container and, when rotated to a second rotational position, the exterior surface seals across the inlet and the measurement chamber aligns with the outlet to dispense the measured amount of powder therefrom.
[FR]
La présente invention concerne un distributeur de poudre mesurée présentant une trémie introduisant de la poudre vers le bas dans un mécanisme de distribution mesurée. Le mécanisme de distribution mesurée présente une admission et une évacuation et un contenant de mesure pouvant être actionné entre eux. Le contenant de mesure est en prise rotative autour d'un axe de rotation généralement orthogonal à un axe d'admission de l'admission de sorte qu'une surface extérieure de ce dernier se déplace à travers l'admission lorsque le contenant de mesure tourne. Le contenant de mesure présente une chambre de mesure à volume intérieur réglable en retrait à l'intérieur de la surface extérieure de sorte que, lors de l'utilisation, au niveau d'une première position de rotation, la chambre de mesure s'aligne avec l'admission afin d'accepter une quantité de poudre mesurée en son sein à partir du contenant de poudre et, dans une seconde position de rotation, la surface extérieure sur l'admission et la chambre de mesure s'aligne avec l'évacuation afin de distribuer la quantité de poudre mesurée à partir de cette dernière.

说明书

技术领域

技术领域

[0001] 本发明涉及一种样本光学检测装置。

背景技术

背景技术

[0002] 血细胞分析仪大多采用激光散射原理进行测量，原理为：将激光照射在细胞上，通过收集细胞被照射后产生的前向散射光、侧向散射光（90度散射光）和侧向荧光（90度荧光），来对细胞进行分类和计数等。

[0003] 图1为一种血细胞分析仪的光学检测装置，细胞在鞘流的作用下逐个通过流动室，当激光光源发出的光被透镜准直后向通过流动室的细胞照射，照射到细胞上的光会向四面产生散射，通过一收集透镜来收集前向散射光后，再经过一个光源来限定最终到达光电探测器的前向散射光的角度，例如将前向散射光限定为低角度（或者说小角度）的前向散射光——这种角度的前向散射光一般用于测量细胞体积；同时，在与照射到细胞的光线垂直的方向通过另一收集透镜来收集侧向光，收集的侧向光再通过二向色镜发生反射和折射，其中侧向光中的侧向散射光在经过二向色镜时发生反射，然后到达相应的光电探测器——侧向散射光一般用于测量细胞的表面复杂程度，侧向荧光则经过折射或者透镜后再经过一滤光片也到达相应的光电探测器——侧向荧光一般用于测量细胞内核黄素量。

[0004] 图1中的光学检测装置仅有三路测量通道——即低角度前向散射光通道、侧向散射光通道和侧向荧光通道，因此只能基于这三路测量通道获取的信号来对细胞进行分类和计数，这在一定程度上会限制对细胞的进一步分析和计数，即无法做到进行更多维度和更加细致的分类和计数，降低了异常细胞的分类能力；技术人员如果将图1中低角度前向散射光通道替换成增加高角度（或者说大角度）散射光通道，可以直接使用光电探测器来接收大角度前向散射光，但这样接收得到的信号信噪比非常差，因此为了保证信号质量，技术人员通常会采用复杂的多个透镜组合来收集大角度前向散射光再出射给对应的光电探测器，这种做法则会大大增加装置的成本；另外，光学检测装置的尺寸一般偏大，这是由于其光路结构所造成的，例如前向散射光通道一般被设计为折射式的光路结构，因此这会造成光学检测装置的尺寸偏大，尤其是当前向散射光通道用于收集多个角度范围（例如低角度和高角度等）的散射光时。

发明概述

技术问题

[0005] 本发明主要提供一种样本光学检测装置，下面说明。

技术方案

- [0006] 一实施例的样本光学检测装置，包括：
- [0007] 流动室，用于使得待测样本中的细胞逐个通过；
- [0008] 光源，用于照射通过所述流动室的细胞；

发明名称：一种样本光学检测装置

1. **WO/2020/204674** METHOD FOR DIAGNOSING CANCER USING CFDNA

WO - 08.10.2020

Int.Class [C12Q 1/6886](#) Appl.No PCT/KR2020/004602 Applicant **GENOPSY, INC.** Inventor CHO, Youngnam

A diagnosis method according to the present invention relates to a technique for concentrating and separating small cfDNA from a liquid specimen such as urine, cerebrospinal fluid, plasma, blood, pleural fluid, or body fluid, and then detecting **biomarkers**, overexpressed in a specific **cancer**, with extreme sensitivity and without a PCR. A detection method according to one example of the present invention does not require a PCR amplification reaction, and thus can significantly reduce the time it takes to diagnose cancer. In addition, the method enables immediate on-site analysis, and can be used as point-of-care testing [POCT] that can simultaneously search a large number of genes in a short time.

2. **1020200117916** METHOD FOR DIAGNOSING PANCREATIC CANCER USING CFDNA

KR - 14.10.2020

Int.Class [C12Q 1/6886](#) Appl.No 1020200041243 Applicant **GENOPSY CO., LTD.** Inventor CHO YOUNGNAM

A diagnosing method of the present invention relates to a technology of concentrating and separating cfDNA having a small size from a liquid sample such as urine, a cerebrospinal fluid, plasma, blood, a pleural fluid, or a body fluid, and then detecting a **biomarker** overexpressed in specific **cancer** super-sensitively without PCR. A detecting method according to an embodiment of the present invention can greatly reduce a time consumed to diagnose cancer as a PCR amplification reaction becomes unnecessary. In addition, the detecting method can be used as point-of-care testing [POCT] enabling direct analysis on the spot and simultaneous searching of multiple genes in a short time. COPYRIGHT KIPO 2021

3. **1020200117917** METHOD FOR DIAGNOSING CANCER USING CFDNA

KR - 14.10.2020

Int.Class [C12Q 1/6886](#) Appl.No 1020200041245 Applicant **GENOPSY CO., LTD.** Inventor CHO YOUNGNAM

A diagnosing method of the present invention relates to a technology of concentrating and separating cfDNA having a small size from a liquid sample such as urine, a cerebrospinal fluid, plasma, blood, a pleural fluid, or a body fluid, and then super-sensitively detecting a **biomarker** overexpressed in specific **cancer** without PCR. A detecting method according to an embodiment of the present invention can greatly reduce a time consumed to diagnose cancer as a PCR amplification reaction becomes unnecessary. In addition, the detecting method can be used as point-of-care testing [POCT] enabling direct analyses on the spot and simultaneous searching of multiple genes in a short time. COPYRIGHT KIPO 2021

4. **1020200117911** METHOD FOR DIAGNOSING BLADDER CANCER USING CFDNA

KR - 14.10.2020

Int.Class [C12Q 1/6886](#) Appl.No 1020200041227 Applicant **GENOPSY CO., LTD.** Inventor CHO YOUNGNAM

A diagnosing method of the present invention relates to a technology of concentrating and separating cfDNA having a small size from a liquid sample such as urine, a cerebrospinal fluid, plasma, blood, a pleural fluid, or a body fluid, and then super-sensitively detecting a **biomarker** overexpressed in specific **cancer** without PCR. 1. **216422632** MULTIFUNCTIONAL HAIR TRIMMER SET CAPABLE OF BEING USED ON WHOLE BODY

CN - 03.05.2022

Int.Class [B26B 19/38](#) [?](#) Appl.No 202122735308.9 Applicant SHENZHEN YAI SCIENCE AND TECHNOLOGY CO., LTD Inventor LIANG YUBIAO

The utility model provides a multifunctional hair trimmer set capable of being used on the whole body. The multifunctional hair trimmer set comprises a trimmer body, a haircutting head and a **shaving head**. The haircutting head or the **shaving head** is installed at the upper end of the trimmer body in a replaceable mode. connecting blocks are installed at the lower end of the haircutting head and the lower end of the **shaving head**, a connecting groove is formed in the upper end face of the trimmer body, a fixing assembly is arranged in the connecting groove, the connecting blocks are movably connected with the connecting groove, a fixing hole is formed in the connecting groove, and the fixing assembly is arranged in the fixing hole. The hair **cutting head** or the **shaving head** is provided with a fixing hole, the fixing assembly is matched with the fixing hole to fix the hair **cutting head** or the **shaving head**, the trimmer is provided with a limiting groove, an unlocking assembly is installed in the limiting groove, and the unlocking assembly acts on the fixing assembly and is used for disassembling the hair **cutting head** or the **shaving head**. The hairdressing head or the **shaving head** can be rapidly disassembled and assembled through the fixing assembly and the unlocking assembly, replacement is convenient, and the hairdressing and shaving effects are achieved.

2. **201979543** 手机剃须刀

1. **216422632** MULTIFUNCTIONAL HAIR TRIMMER SET CAPABLE OF BEING USED ON WHOLE BODY

Int.Class [B26B 19/38](#) ⓘ Appl.No 202122735308.9 Applicant SHENZHEN YAI SCIENCE AND TECHNOLOGY CO., LTD Inventor LIANG YUBIAO

The utility model provides a multifunctional hair trimmer set capable of being used on the whole body. The multifunctional hair trimmer set comprises a trimmer body, a haircutting head and a shaving head. The shaving head is installed at the upper end of the trimmer body in a replaceable mode, connecting blocks are installed at the lower end of the haircutting head and the lower end of the shaving head, a connecting body, a fixing assembly is arranged in the connecting groove, the connecting blocks are movably connected with the connecting groove, a fixing hole is formed in the connecting groove, and the haircutting head or the shaving head is provided with a fixing hole, the fixing assembly is matched with the fixing hole to fix the hair cutting head or the shaving head, the trimmer is provided with a limiting groove, and the unlocking assembly acts on the fixing assembly and is used for disassembling the hair cutting head or the shaving head. The hairdressing head or the shaving head can be replaced through the fixing assembly and the unlocking assembly, replacement is convenient, and the hairdressing and shaving effects are achieved.

CN - 03.05.2022

... or the shaving head is installed on the front face of the trimmer body through the fixing hole. The hairdressing assembly is installed in the limiting groove and assembled through the unlocking assembly.

2. **201979543** 手机剃须刀

Int.Class [B26B 19/48](#) ⓘ Appl.No 201020684836.5 Applicant 李龙华 Inventor 李龙华

手机剃须刀，属于通讯工具，主要解决随着生活节奏的加快，对于男士来说，往往匆忙而忘记剃须，对个人形象造成不好的影响的问题。它包括手机主体，手机主体上设有显示屏和按键，剃须刀刀头，电动剃须刀刀头的外侧罩有网罩，所述电动剃须刀刀头的工作开关设在手机主体的侧面，电动剃须刀刀头、工作开关和手机主体的蓄电池电连接；在手机主体上设有显示屏和按键的一体式设计，能够相结合，如果出门忘记剃须，可以找任意一个空闲时间进行剃须，方便实用。

CN - 21.09.2011

... 没有一个电动剃须刀刀头，手机和剃须刀的实用功能相结合，如果出门忘记剃须，可以找任意一个空闲时间进行剃须，方便实用。

3. **201808077** 旋转式电动剃须刀刀头组件

Int.Class [B26B 19/14](#) ⓘ Appl.No 201020568845.8 Applicant 浙江光科电器有限公司 Inventor 包伟光

本实用新型涉及一种旋转式电动剃须刀刀头组件，包括刀头盖、切刀组件以及安置切刀组件的刀头底座，所述刀头底座的侧面开有让剃须残渣排出的槽或者孔，这种旋转式电动剃须刀刀头组件具有不需要打开刀头盖能自行排出剃须残渣的特点。

CN - 27.04.2011

4. **1636686** DRY SHAVER

Int.Class [B26B 19/12](#) ⓘ Appl.No 200410104864.4 Applicant Matsushita Electric Works Ltd. Inventor Tsushio Toshiyuki

A dry shaver with a swingable shaving head which is capable of following a user's skin smoothly while keeping an optimum pressing relation with the skin. The shaver includes a grip and a shaving head mounted on top of the grip. The shaving head has a cutting face on its top and has a pair of support points through which the shaving head is supported to the grip. A linkage mechanism is provided to couple the shaving head to the grip for allowing the shaving head to swing relative to the grip. The linkage mechanism includes a pair of cranks each connected at its one end to each one of the support points and connected at the other end to each one of the anchor points on the side of the grip. A frame projects on top of the grip in an overlapping relation with the shaving head to give the anchor points which are positioned upwardly of the support points with respect to a height axis of the grip for suspending the shaving head on top of the grip by the frame. Accordingly, the shaving head is enabled to swing only accompanied with a small vertical displacement of the cutting face from the skin, but with a sufficient angular displacement of the cranks about the anchor points, thereby keeping an optimum contacting pressure against the skin, yet swinging the shaving head to smoothly follow the skin.

2. [201979543](#) MOBILE PHONE SHAVER

CN - 21.09.2011

Int.Class [B26B 19/48](#) Appl.No 201020684836.5 Applicant 李龙华 Inventor 李龙华

The mobile phone shaver belongs to a communication tool, and mainly solves the problems that as the life rhythm is accelerated, for men, for men, shaving is often forgotten, and bad influences are caused to personal images. An electric shaver head is arranged at one end of the mobile phone main body. A net cover covers the outer side of the electric shaver head. A working switch of the electric shaver head is arranged on the side face of the mobile phone main body. The electric shaver head, the working switch and a storage battery of the mobile phone main body are electrically connected. A protective cover is arranged on the side, provided with the display screen and the key, of the mobile phone main body. According to the present utility model, the practical functions of the mobile phone and the shaver are combined, and if the user forgets shaving, any idle time can be found for shaving, which is convenient and practical.

3. [201808077](#) ROTARY ELECTRIC SHAVER HEAD ASSEMBLY

CN - 27.04.2011

Int.Class [B26B 19/14](#) Appl.No 201020568845.8 Applicant 浙江光科电器有限公司 Inventor 包伟光

The rotary electric shaver head assembly comprises a cutter head cover, a cutter assembly and a cutter head base for containing the cutter assembly, wherein a groove or a hole for discharging shaving residues is formed in the side face of the cutter head base, and the rotary electric shaver head assembly has the characteristic that the shaver head cover does not need to be opened, so that shaving residues can be automatically discharged.

4. [1636686](#) DRY SHAVER

본 발명은 CAPRIN-1을 종양 마커로 하는 암의 검출 방법에 관한 것이다.

배경기술

암은 전체 사망 원인의 제 1위를 차지하는 질환이고, 현재 행해지고 있는 치료는 수술 요법을 주체로 방사선 요법과 화학 요법을 조합시킨 것이다. 지금까지의 의료 기술의 진보에 의해, 암종에 따라서는 조기 발견할 수 있으면 고칠 수 있는 가능성이 높은 질환이 되고 있다. 그 때문에, 암환자의 체력적, 경제적 부담이 없고, 간편하게 검사할 수 있는 암의 검출 방법이 요구되고 있다.

최근에는, 종양 마커 등의 종양 생산물을 측정하는 방법이 보급되어 왔다. 종양 생산물이란, 종양에 관련되는 항원, 효소, 특정 단백질, 대사산물, 종양 유전자, 종양 유전자 생산물 및 종양 억제 유전자 등을 가리키고, 암 태아성 항원 CEA, 당 단백질 CA19-9, 전립선 특이 항원 PSA, 갑상선에서 생산되는 펩티드 호르몬인 칼시토닌 등이 일부의 암에서 종양 마커로서 암진단에 활용되고 있다. 그러나, 다른 많은 암종에 있어서는 암진단에 유용한 종양 마커는 존재하지 않는다. 또한, 현재 알려져 있는 종양 마커의 대부분은 체액 중에 극히 미량(pg/mL 오더 정도)밖에 존재하지 않기 때문에, 그들을 검출하기 위해서는 고감도한 측정법이나 특수한 기술을 필요로 한다. 이러한 현재 상황 중에서, 각종 암을 간편한 조작으로 고감도로 검출할 수 있는 신규한 암 검사 수단을 제공할 수 있으면, 각종 암에 대한 진단 용도가 열린다고 기대된다.

한편, 최근 새로운 수술법의 개발이나 새로운 항암제의 발견에도 불구하고, 일부 암을 제외하고 대부분의 암에서는 효과적인 암 진단 기술이 확립되어 있지 않다. 그러므로, 암을 조기에 발견할 수 없고, 암의 치료 성적은 그다지 향상되지 않은 것이 현재 상황이다.

최근, 분자생물학이나 암면역학의 진보에 의해, 암에 특이적으로 반응하는 항체나, 암화나 암의 악화에 관련되는 암 항원에 대한 분자 표적약 등, 암 항원류를 타깃으로 한 특이적 암 치료법에의 기대가 높아지고 있다. 그 중에서도, 암세포 상의 항원 단백질을 표적으로 한 암을 치료하기 위한 항체 의약이 복수 상시되어 암 치료에 사용되고 있다. 항체 의약은 암 특이적 치료약으로서 일정 약효를 얻을 수 있으므로 주목받고 있지만, 표적이 되는 항원 단백질의 대부분은 정상세포에도 발현되는 것이고, 항체 투여의 결과, 암세포뿐만 아니라 항원이 발현되는 정상세포도 장애되어버려, 그 결과 생기는 부작용이 문제가 되고 있다. 또한, 암환자에 의해 병인은 다양하기 때문에 암 치료의 효과는 개인차가 매우 크다. 예를 들면, 수술, 화학 요법 또는 방사선 요법에 있어서, 암의 진행 단계에 의해 그 치료 및 예후는 크게 좌우된다. 개체의 다양성에 의해, 동일한 암 치료약에 대해서도 개개인으로 다른 감수성을 가진다는 것이 알려져 있고, 어떤 환자에 유효한 약이 다른 환자에게도 유효하다고는 할 수 없다.

그래서, 미리 환자의 질환 관련 유전자나 단백질의 발현을 측정하고, 어떤 특정 약품이 특정 유전자 또는 단백질을 발현하고 있는 암환자에 대하여 유효할 것인지 아닌지를 평가한 후에, 그 암환자에의 치료약의 투여 결정이 이루어지고 있다. 구체적으로는, 어느 종류의 암에 대한 질환 관련 유전자나 단백질은 측정하는 검출법을 사용하여, 임상 현장에서 암환자 유래의 시료, 예를 들면 혈청이나 조직 중에 암 항원이 존재하는지 아닌지를 검사한 후에 암 항원 특이적인 치료약의 투여 결정이 이루어지고 있다. 예를 들면, 알비투스의 유효성을 예측한 후에 알비투스의 투여를 결정하고 있다. 또, 허셉틴의 적용을 결정하고 있다.

그런데, 반려동물은 가족의 일원으로서 사육되고, 기르는 주인과 동일하는 것이 알려져 있다.

대표적인 반려동물인 개는 인간과 비교하여 7배 빨리 나이를 먹는 것으로 종 등의 혼합백신이 일반적으로 보급되고, 개 파보바이러스 감염증, 개 렙토스피라병이라는 치사율이 높은 감염증이 감소했다. 그 때문에, 개 일로를 걷고 있다. 미국에서는 1년에 약 400만마리의 개가 암으로 진단되기 때문에 발견이 늦어, 종양이 커지고 처음으로 주인이 알고 내원하는 때문에, 수의사가 악성이라고 판단했을 경우에는 수술하지 않고 항암 치료를 실시할 필요가 있다. 수술 후 즉시 항암제 치료를 시작하고, 경과 관찰도 짧은 간격으로 행하는 것이 바람직하다. 따라서, 암에 걸린 반려동물에 있어서도 암 치료약의 투약은 필수적이고, 어떤 종류의 암에 대한 질환 관련 유전자나 단백질을 측정하는 검출법이 존재하면, 지금까지 보다 효과적인 치료가 가능하게 되어 주인에게도 수의사에 있어서도 메리트가 크다.

그 때문에, 반려동물의 암 감염에 의해, 기르는 주인이 장래 암을 발병할 위험성이 높은 것을 예측할 수 있다. 그 때문에, 반려동물의 암 감염에 의해, 기르는 주인이 장래 암을 발병할 위험성이 높은 것을 예측할 수 있다. 본에서는 약 670만마리, 또한 미국에서는 약 1764만마리라고 알려져 있다. 광견병 예방접종 이외에 5종, 7종, 8플루엔자(컨넬코프), 개 아데노바이러스 2형 감염증(컨넬코프), 개 전염성 간염, 개 코로나바이러스 감염증, 및 고령개는 전체 사육수의 35.5%를 차지하고 있다. 사망 원인도 인간과 같이 암이나 고혈압, 심장병 등이 증가의 160만마리에 어떤 종양이 있다고 알려져 있다. 그러나, 반려동물은 인간과 같이 건강진단이 보급되어 있지 않은 경우, 수술 등의 외과적 요법이나 항암제 등의 투약을 행한다 해도, 이미 너무 늦은 경우가 대부분이다. 그 수술을 행할 경우에도, 마진 확보의 크기나 수술 중의 혈액, 세포 비산 대책이라고 한 수술 중의 대책도 엄중하게 행할 필요가 있다.

Cytoplasmic-and proliferation-associated protein 1(CAPRIN-1)은 휴지기의 정상세포가 활성화나 세포분열을 일으킬 때에 발현되고, 또한 세포내에서 RNA와 세포내 스트레스 과립을 형성하여 mRNA의 수송, 번역의 제어에 관여하는 것 등이 알려져 있는 세포내 단백질이다. 한편으로, 본 발명자들은 유방암세포의 막 표면에 CAPRIN-1이 고발현하고 있는지, CAPRIN-1에 대한 항체가 유방암세포에 대하여 강한 항종양 효과를 발휘하는지를 밝혀냈다(특허문헌 1). 또한, 세포 표면에 발현하고 있는 CAPRIN-1에 결합하는 항체를 사용하여, 환자에 유래하는 시료 중의 CAPRIN-1의 발현을 측정함으로써, 암의 검출 및 암의 악성도를 평가할 수 있는 것이 보고되고 있다 즉, 세포막 단백질의 하나인 CAPRIN-1은 암 치료 등의 타깃이 될 수 있는 것이 기재되어 있다. 한편 상술한 바와 같이, 암환자의 다양성으로부터 CAPRIN-1을 표적으로 한 치료약, 예를 들면 항체의 투여를 결정하기 위해서는 미리 암환자 유래 시료 중의 CAPRIN-1의 발현을 검증할 필요가 있다. 그러나, 이와 같이 특이적인 치료약을 적용하기 위한 CAPRIN-1의 검출 방법에 관한 보고는 없고, 또한 암환자 시료를 사용한 암을 검출하는 시약은 존재하지 않는다.

1. [0002689928](#) PLANT AND METHOD FOR TRANSPORTATION OVER SUSPENSION ROPEWAY

Int.Class [B61B 12/06](#) ? Appl.No 2015136489 Applicant Inventor БАБА Матъе [FR]

FIELD: transportation. SUBSTANCE: invention relates to transportation by suspension ropeway, in particular, to transportation of people in **cable cars**. Transport installation of suspension ropeway [2] includes at least two cars [3-5], in each of which there is a detachable clamp for disconnection of car and connection of car to suspension ropeway [2]; at least one connecting device [17] of cars [3-5] with suspension ropeway [2]; and at least one bending support [23, 24, 40] of suspension ropeway [2]. At that, transport installation of suspension ropeway also contains detection facility [25-27] intended for detection of movement of the first car connected to suspension ropeway [2] through specified support [23, 24, 40], made with possibility to transfer at least one connection signal when movement is detected, and control means [28] of said connecting device [17] connected to detection means [25-27] and configured to transmit a command to connect at least one second car with suspension ropeway [2] when receiving said connection signal. EFFECT: electric power consumption of the suspension ropeway drive motor is reduced and, due to limitation of generated jerks, passenger comfort is provided. 16 cl, 5 dwg

2. [02184665](#) AERIAL TRAMWAY

Int.Class [B61B 7/02](#) ? Appl.No 2000115152/28 Applicant Juzhno-Rossiiskij gosudarstvennyj tekhnicheskij universitet (Novocherkasskij politekhnicheskij institut) Inventor Khal'fin M.N.

FIELD: road building; tramways. SUBSTANCE: proposed aerial tramway has carrying wire **ropes** resting of shoes hinge-secured on line supports. **Cars** are installed on carrying wire **ropes**. **Cars** are moved under action of hauling wire **rope**. Aerial tramway has **car** motion stabilizer which includes hydraulic motor mechanically connected with shoe axle and hydraulic connected with control restrictor. Level is hinge-mounted on line support. Free end of lever is connected with control restrictor by kinematic tie. Lever is connected with line support by means of multiple-core spring to kill vibrations of lever. EFFECT: improved reliability of aerial tramway by adjusting torsional rigidity of shoes. 2 dwg

3. [0002723573](#) OPERATING METHOD OF SUSPENDED CABLE RAILWAY SYSTEM AND SUSPENSION CABLEWAY SYSTEM FOR IMPLEMENTATION OF OPERATION METHOD THEREOF

Int.Class [B61B 12/06](#) ? Appl.No 2019119831 Applicant Inventor МАТИС, Михаэль [AT]

FIELD: transportation. SUBSTANCE: invention relates to aerial ropeway. Method of operating suspension ropeway system with at least two stations of aerial ropeway and with at least one carrying rope [13] located between stations of suspended aerial ropeway, at least one vehicle [15] of aerial ropeway is moved by means of at least one traction cable [14]. At that, by means of at least one measuring device, transport positions of said at least one vehicle [15] of aerial ropeway along motion section are determined, said transport positions of said at least one suspension ropeway vehicle [15] along said traffic section are transmitted to a control unit and processed therein, as well as stored therein, and by means of located on said at least one support [12] suspension **cableway** device input into control unit is entered a signal that on this support [12] suspension **cableway** is maintenance work, respectively, installation work. At that, by means of control unit at approach of **cable car** [15] of aerial ropeway to suspension **rope** road [12] support drive for movement of said at least one vehicle [15] of aerial ropeway is adjusted in the sense that the suspension **cableway** vehicle [15] in the area of suspension [12] of the aerial ropeway with a speed which is considerably reduced relative to the operating speed is moved, respectively, delayed. EFFECT: as a result, safety of ropeway, including safety of installation and repair works, is increased. 4 cl, 3 dwg

3. **0002723573** OPERATING METHOD OF SUSPENDED CABLE RAILWAY SYSTEM AND SUSPENSION CABLEWAY SYSTEM FOR IMPLEMENTATION OF OPERATION METHOD THEREOF

Int.Class **B61B 12/06** ? Appl.No 2019119831 Applicant Inventor МАТИС, Михаэль (AT)

FIELD: transportation. SUBSTANCE: invention relates to aerial ropeway. Method of operating suspension ropeway system with at least two stations of aerial ropeway and with at least one carrying rope [13] located between stations of suspended aerial ropeway, at least one vehicle [15] of aerial ropeway is moved by means of at least one traction cable [14]. At that, by means of at least one measuring device, transport positions of said at least one vehicle [15] of aerial ropeway along motion section are determined, said transport positions of said at least one suspension ropeway vehicle [15] along said traffic section are transmitted to a control unit and processed therein, as well as stored therein, and by means of located on said at least one support [12] suspension **cableway** device input into control unit is entered a signal that on this support [12] suspension **cableway** is maintenance work, respectively, installation work. At that, by means of control unit at approach of **cable car** [15] of aerial ropeway to suspension **rope** road [12] support drive for movement of said at least one vehicle [15] of aerial ropeway is adjusted in the sense that the suspension **cableway** vehicle [15] in the area of suspension [12] of the aerial ropeway with a speed which is considerably reduced relative to the operating speed is moved, respectively, delayed. EFFECT: as a result, safety of ropeway, including safety of installation and repair works, is increased. 4 cl, 3 dwg

Title

[DE] FAHRZEUG FÜR EINE UMLAUFSEILBAHN

[EN] VEHICLE FOR AN ENDLESS CABLEWAY

[FR] VÉHICULE POUR UN TÉLÉPHÉRIQUE À CÂBLE SANS FIN

Fig. 3

Abstract

[DE] Fahrzeug [1] für eine **Umlaufseilbahn**, welches mit einem umlaufenden Zug- oder Förderseil [2] der **Umlaufseilbahn** in eine Fahrrichtung [10] transportierbar ist, umfassend eine Fahrgasteinheit [8] zur Aufnahme von Fahrgästen, eine Klemmvorrichtung [3] zur Verbindung des Fahrzeugs [1] mit einem umlaufenden Zug- oder Förderseil [2] der **Umlaufseilbahn** und ein Gehänge [4], an welchem die Fahrgasteinheit [8] angebracht ist und welches mit der Klemmvorrichtung [3] verbunden ist, wobei die Fahrgasteinheit [8] mindestens ein, insbesondere zumindest bereichsweise durchsichtig ausgebildetes, Schiebeelement [12, 13] aufweist, welches im Bereich von gegenüberliegenden Rändern von Schiebeführungen [14, 14', 15, 15'] verschiebbar geführt ist. Die Schiebeführungen [14, 14', 15, 15'] verlaufen bogenförmig und das Schiebeelement [12, 13] ist zwischen einer heruntergeschobenen Schließstellung und einer hinaufgeschobenen Offenstellung verschiebbar.

[EN] Vehicle [1] for an endless **cableway**, said vehicle [1] being transportable in a direction of travel [10] by way of an endless traction or conveying cable [2] of the endless **cableway**, comprising a passenger unit [8] for accommodating passengers, a clamping device [3] for connecting the vehicle [1] to a circulating traction or conveying cable [2] of the endless **cableway** and a suspension means [4] to which the passenger unit [8] is attached and which is connected to the clamping device [3], wherein the passenger unit [8] has at least one sliding element [12, 13] that is configured in particular at least regionally in a transparent manner, said sliding element [12, 13] being guided in a slidable manner in the region of opposite edges of sliding guides [14, 14', 15, 15']. The sliding guides [14, 14', 15, 15'] extend in an arcuate manner and the sliding element [12, 13] is slidable between a pushed-down closed position and a pushed-up open position.

OVER SUSPENSION ROPEWAY

Inventor БАБА Матъе (FR)

suspension ropeway, in particular, to transportation of people in cable cars. Transport installation of suspension ropeway [2] includes at least one connecting device [17] of cars [3-5] with suspension ropeway [2]. At that, transport installation of suspension ropeway also contains detection facility [25-27] intended for detection of specified support [23, 24, 40], made with possibility to transfer at least one connection signal when movement is detected, and control facility [25-27] and configured to transmit a command to connect at least one second car with suspension ropeway [2] when receiving said connection signal. EFFECT: electric power consumption of the ropeway drive motor is reduced and, due to limitation of generated jerks, passenger comfort is provided. 16 cl, 5 dwg

2. 02184665 AERIAL TRAMWAY

Int.Class B61B 7/02 Appl.No 2000115152/28 Applicant Juzhno-Rossiiskij gosudarstvennyj tekhnicheskij universitet (Novocherkasskij politekhnicheskij institut) Inventor Khal'fin M.N.

FIELD: road building; tramways. SUBSTANCE: proposed aerial tramway has carrying wire ropes resting of shoes hinge-secured on line supports. Cars are installed on carrying wire ropes. Cars are moved under action of hauling wire rope. Aerial tramway has car motion stabilizer which includes hydraulic motor mechanically connected with shoe axle and hydraulic connected with control restrictor. Level is hinge-mounted on line support. Free end of lever is connected with control restrictor by kinematic tie. Lever is connected with line support by means of multiple-core spring to kill vibrations of lever. EFFECT: improved reliability of aerial tramway by adjusting torsional rigidity of shoes. 2 dwg

FIELD: road building; tramways. SUBSTANCE: proposed aerial tramway has carrying wire **ropes** resting of shoes hinge-secured on line supports. **Cars** are installed on carrying wire **ropes**. **Cars** are moved under action of hauling wire **rope**. Aerial tramway has **car** motion stabilizer which includes hydraulic motor mechanically connected with shoe axle and hydraulic connected with control restrictor. Level is hinge-mounted on line support. Free end of lever is connected with control restrictor by kinematic tie. Lever is connected with line support by means of multiple-core spring to kill vibrations of lever. EFFECT: improved reliability of aerial tramway by adjusting torsional rigidity of shoes. 2 dwg

3. [0002723573](#) OPERATING METHOD OF SUSPENDED CABLE RAILWAY SYSTEM AND SUSPENSION CABLEWAY SYSTEM FOR IMPLEMENTATION OF OPERATION METHOD THEREOF

RU - 16.06.2020

Int.Class [B61B 12/06](#) Appl.No 2019119831 Applicant Inventor МАТИС, Михаэль (AT)

FIELD: transportation. SUBSTANCE: invention relates to aerial ropeway. Method of operating suspension ropeway system with at least two stations of aerial ropeway and with at least one carrying rope [13] located between stations of suspended aerial ropeway, at least one vehicle [15] of aerial ropeway is moved by means of at least one traction cable [14]. At that, by means of at least one measuring device, transport positions of said at least one vehicle [15] of aerial ropeway along motion section are determined, said transport positions of said at least one suspension ropeway vehicle [15] along said traffic section are transmitted to a control unit and processed therein, as well as stored therein, and by means of located on said at least one support [12] suspension **cableway** device input into control unit is entered a signal that on this support [12] suspension **cableway** is maintenance work, respectively, installation work. At that, by means of control unit at approach of **cable car** [15] of aerial ropeway to suspension **rope** road [12] support drive for movement of said at least one vehicle [15] of aerial ropeway is adjusted in the sense that the suspension **cableway** vehicle [15] in the area of suspension [12] of the aerial ropeway with a speed which is considerably reduced relative to the operating speed is moved, respectively, delayed. EFFECT: as a result, safety of ropeway, including safety of installation and repair works, is increased. 4 cl, 3 dwg

IPC Green Inventory

The "IPC Green Inventory", developed by the [IPC Committee of Experts](#), facilitates searches for patent information relating to Environmentally Sound Technologies (ESTs), as listed by the [United Nations Framework Convention on Climate Change \(UNFCCC\)](#). ESTs are currently scattered widely across the IPC in numerous technical fields. The Inventory attempts to collect them in one place.

For more information about how to use the IPC Green Inventory please click [here](#).

The Inventory does not purport to be fully exhaustive in its coverage

1. [02214949](#) SPACECRAFT SOLAR BATTERY

RU - 27.10.2003

Int.Class [B64G 1/44](#) ? Appl.No 2002118071/28 Applicant Gosudarstvennyj nauchno-proizvodstvennyj raketno-kosmicheskij tsentr "TsSKB-Progress" Inventor Kislinskij G.G.

FIELD: space engineering; designing extension structures for spacecraft, mainly solar batteries. SUBSTANCE: proposed solar battery includes frame rigidly secured on drive and upper and lower doors which are connected in pairs by means of hinges; frame is secured on spacecraft case by means of pyrotechnic means. Mounted on inner end faces of upper doors are brackets which are connected with clamping bands passing through pyrotechnic means rigidly secured of solar battery frame. Mounted on outer end faces of upper doors are hooks whose surfaces are engageable with axles of spring-loaded clamping members articulated on spacecraft case. Axes of clamping members are shifted outside relative to axes of hinges connecting the upper and lower doors. Ball supports engageable with spacecraft case are rigidly secured on lower doors. EFFECT: enhanced reliability of separation and opening of doors. 3 dwg

2. [94030359](#) DEVICE FOR REDUCTION OF EFFECT OF OSCILLATIONS OF SOLAR-BATTERY PANELS ON ANGULAR MOTION OF ARTIFICIAL EARTH SATELLITE

RU - 27.08.1996

Int.Class [B64G 1/44](#) ? Appl.No 94030359/11 Applicant Voennaja inzhenerno-kosmicheskaja akademija im.A.F.Mozhajsogo Inventor Pozdnjakov S.V.

FIELD: space engineering. SUBSTANCE: device has two-coordinate drive for orientation of solar-battery panels relative to casing of artificial earth satellite and circular frame to which housing of one of drives is rigidly secured. Housings of drives of proposed device are rigidly interconnected excluding degrees of freedom of these housings relative to each other. Rotor of drive whose output shaft is rigidly connected with flexible member of structure is not kinematically linked with this output shaft. Frame is secured to casing of artificial earth satellite by means of two spherical joints and has one degree of freedom relative to casing of artificial earth satellite. Due to rigid connection of frame with drive, "frame - drive" system has degree of freedom of rotation relative to casing of artificial earth satellite. Device operates as follows: during rotation of rotor and action of moment on side of flexible member of structure, precession effect of frame articulated on casing of artificial earth satellite arises. Articulated joint transmits moment from side of flexible member of structure to casing of artificial earth satellite. EFFECT: reduction of effect of oscillations of flexible member on angular motion of casing of artificial earth satellite about its center of mass.

3. [02158702](#) TRANSMISSION FOR MOTION OF SOLAR-BATTERY PANELS ON SPACECRAFT

RU - 10.11.2000

Int.Class [B64G 1/44](#) ? Appl.No 98113150/28 Applicant Dajmler Krajsler AG [DE] Inventor Rene MOJREK [DE]

FIELD: space engineering; rope transmission for opening solar-battery panels. SUBSTANCE: proposed transmission is designed for opening pleated articulated panels. Pulleys placed in articulations are embraced by endless wire rope. Beyond area of pulleys, rope is provided with plastic envelope rigidly connected with it. EFFECT: agreement of temperature changes in length of panels and wire rope; enhanced rigidity of rope in tension. 10 cl. 3 dwg

4. [02123875](#) METHOD OF DEPLOYMENT OF MULTI-SECTIONAL STRUCTURES AND MULTI-SECTIONAL STRUCTURE USED FOR REALIZATION OF THIS METHOD

RU - 27.12.1998

Int.Class [B64G 1/44](#) ? Appl.No 93010564/28 Applicant Nauchno-proizvodstvennoe ob"edinenie prikladnoj mekhaniki Inventor Pokhabov Ju.P.

FIELD: deployment of space equipment, such as booms and solar batteries. SUBSTANCE: in deployment of multisectional structures, removal of main couplings used for rigid kinematic attachment of sections laid tightly together with bearing base, turning of sections according to programmed trajectory by means of drives and additional couplings limiting relative rotation of sections and fixation of sections in preset final position will be performed in such way that sections are turned in folded position by means of additional rigid couplings, after which sections are opened in succession by removing these couplings. Multisectional solar battery has bearing base, articulated sections and main holders used for application and removal of rigid fastenings of sections tightly folded with bearing base whose hinges are provided with additional retainers of relative position of sections. EFFECT: enhanced reliability. 3 cl. 4 dwg

5. [02167793](#) SPACECRAFT SOLAR BATTERY

RU - 27.05.2001

Int.Class [B64G 1/44](#) ? Appl.No 98111573/28 Applicant Gosudarstvennyj nauchno-proizvodstvennyj raketno-kosmicheskij tsentr "TsSKB-Progress" Inventor Kislinskij G.G.

FIELD: space engineering; spacecraft of various purposes. SUBSTANCE: solar battery includes frame, beam and upper and lower doors. Doors are secured on frame, beam and spacecraft case by means of pyro locks with pawls and are interconnected by means of retainers. Body of each pyro lock is additionally provided with pyro element independently engageable with pawl provided with second hole for additional axle. Articulated on lower door is latch whose one end is engageable with bracket rigidly secured on upper door and other end is engageable with end face of respective retainer. Pyro units are provided for securing the door stack to frame and beam, as well as for securing the frame and beam to spacecraft case. EFFECT: increased

Patent queries related to SDGs

IN PATENTSCOPE

**SUSTAINABLE
DEVELOPMENT
GOALS**

In today's global pursuit of sustainable development, patent documents offer a wealth of innovative solutions that can address pressing challenges outlined in the Sustainable Development Goals (SDGs).

These documents encapsulate groundbreaking technologies and methodologies across various sectors, from clean energy to healthcare and environmental conservation.

Thematic Indexes - SDGs

SDGs-related searches in PATENTSCOPE

Welcome to our curated collection of predefined patent searches aimed at uncovering innovative technologies that could drive progress towards achieving the Sustainable Development Goals (SDGs). Harnessing the power of patent data, we've carefully crafted searches to highlight inventions with the potential to address key challenges outlined in the SDGs.

Dive into our catalog of predefined patent searches, each meticulously designed to target specific areas of technological advancement aligned with the SDGs. From clean energy solutions to healthcare innovations, there's a wealth of knowledge waiting to be discovered.

Our predefined searches come with full transparency – you'll see exactly which keywords, IPC, and CPC codes were used to construct the search. This empowers you to tweak and refine the searches according to your specific interests and needs, ensuring you find the most relevant patent documents for your objectives.

While we strive for objectivity, it's important to acknowledge that the creation of these predefined searches involves some level of subjectivity. We recognize that not all SDGs may be equally represented, and some areas of innovation may be more challenging to capture. Nonetheless, we're committed to continually refining and expanding our collection to better serve your needs.

Want to tailor your patent searches to address specific SDGs or explore niche areas of innovation? Our [guide](#) on creating custom queries related to SDGs provides step-by-step instructions on leveraging keywords, IPC, and CPC codes to craft targeted searches that align with your sustainability goals. Empower yourself to unlock even more insights and possibilities in the realm of sustainable innovation.

Start exploring our predefined patent searches today and unlock the innovation that could shape tomorrow.

If current trends continue, by 2023, 575 million people will still be living in extreme poverty. LDCs, SIDs and LLDCs face higher vulnerability to disasters according to the SDG1 overview
source [Goal 1 | Department of Economic and Social Affairs \(un.org\)](#)

According to WHO, Diabetes is a chronic, metabolic disease characterized by elevated levels of blood glucose [or blood sugar], which leads over time to serious damage to the heart, blood vessels, eyes, kidneys and nerves. About 422 million people worldwide have diabetes, the majority living in low-and middle-income countries, and 1.5 million deaths are directly attributed to diabetes each year. Both the number of cases and the prevalence of diabetes have been steadily increasing over the past few decades

source <https://www.who.int/health-topics/diabetes>

Malaria is a life-threatening disease spread to humans by some types of mosquitoes. It is mostly found in tropical countries. It is preventable and curable. The infection is caused by a parasite and does not spread from person to person. According to the latest World malaria report, there were 249 million cases of malaria in 2022 compared to 244 million cases in 2021. The estimated number of malaria deaths stood at 608 000 in 2022 compared to 610 000 in 2021

source <https://www.who.int/health-topics/malaria>

A woman dies every 2 minutes from preventable cases related to pregnancy and childbirth [2020]. 25 million children missed out on important routine immunization in 2021

source [Goal 3 | Department of Economic and Social Affairs \(un.org\)](#)

Many mental health conditions can be effectively treated at relatively low cost, yet health systems remain significantly under-resourced and treatment gaps are wide all over the world. Mental health care is often poor in quality when delivered. People with mental health conditions often also experience stigma, discrimination and human rights violations

1. [113270204](#) METHOD FOR PREDICTING INITIAL DOSE OF INSULIN PUMPInt.Class [G16H 70/40](#) Appl.No 202110624360.9 Applicant RONG XI Inventor RONG XI

The invention provides a method for predicting the initial dose of an insulin pump, and belongs to the crossing field of a [diabetes](#) treatment technology and a computer technology. The method comprises the steps: the data cleaning, data conversion and data correction are carried out based on a large amount of clinical data of a [diabetes](#) patient receiving the treatment of the insulin pump and a machine learning technology, a reasonable training set and a reasonable test set are established, supervised machine learning is carried out by using an error back propagation neural network algorithm to establish prediction models under different application scenes, the initial use dosage of the insulin pump can be accurately predicted through the prediction models, the accuracy can reach 90% or above, the problems that in the conventional medical technologies, an insulin pump is high in professional threshold in use, the initial dose of the insulin pump is calculated only according to personal experience of clinicians, and accurate estimation is difficult are solved, and beneficial contributions are made for fine adjustment of blood glucose of [diabetic](#) patients and popularization of insulin pump enhanced blood glucose reduction treatment.

CN - 17.08.2021

2. [101138582](#) USE OF COMPOUND RED SAGE ROOT TABLET FOR PRODUCING MEDICINE FOR PREVENTING AND TREATING [DIABETES](#) CHRONIC COMPLICATIONInt.Class [A61K 36/537](#) Appl.No 200610037513.5 Applicant Institute of Tropical Medicine of Guangzhou University of Traditional Chinese Me Inventor Jiang Dongxu

The invention discloses a compound danshen tablet applied in preparing drugs for preventing and curing [diabetic](#) retinopathy, [diabetic](#) nephropathy and [diabetic](#) neuropathy. Animal experiment show that the compound danshen tablet can inhibit both aldose reductase activity and formation of glycosylated end products, and also has new pharmacological effects of increasing SOD activity and decreasing serum lipoprotein. Based on these new discovered pharmacological effects, the compound danshen tablet can completely used for preventing and curing [diabetic](#) chronic complications, including [diabetic](#) retinopathy, [diabetic](#) nephropathy and [diabetic](#) neuropathy. In addition, the compound danshen tablet is a Chinese medicine with long history, accurate curative effect, less side effects, high safety, abundant resources, simple production, stable and controllable quality.

CN - 12.03.2008

3. [110785170](#) TREATMENT OF ADIPOCYTESInt.Class [A61K 31/495](#) Appl.No 201880023995.X Applicant MELIOR PHARMACEUTICALS I, INC. Inventor REAUME ANDREW G.

The present disclosure provides compositions comprising a lyn kinase activator and TRPM8 agonist, and to methods of: reducing blood glucose levels, weight gain, or fat depot levels; treating metabolic syndrome, Syndrome X, obesity, prediabetes, type II [diabetes](#), type I [diabetes](#); treating hypercholesterolemia, hypertension, coronary heart disease, [diabetic](#) neuropathy, lipodystrophy, [diabetic](#) retinopathy, erectile dysfunction, kidney disease, dyslipidemia, dyslipoproteinemia, a peroxisome proliferator activated receptor-associated disorder, septicemia, a thrombotic disorder, or pancreatitis; inducing the being of adipocytes; and preventing pancreatic beta cell degeneration.

1. **216422632** MULTIFUNCTIONAL HAIR TRIMMER SET CAPABLE OF BEING USED ON WHOLE BODY

Int.Class [B26B 19/38](#) ⓘ Appl.No 202122735308.9 Applicant SHENZHEN YAI SCIENCE AND TECHNOLOGY CO., LTD Inventor LIANG YUBIAO

The utility model provides a multifunctional hair trimmer set capable of being used on the whole body. The multifunctional hair trimmer set comprises a trimmer body, a haircutting head and a shaving head. The shaving head is installed at the upper end of the trimmer body in a replaceable mode, connecting blocks are installed at the lower end of the haircutting head and the lower end of the shaving head, a connecting body, a fixing assembly is arranged in the connecting groove, the connecting blocks are movably connected with the connecting groove, a fixing hole is formed in the connecting groove, and the haircutting head or the shaving head is provided with a fixing hole, the fixing assembly is matched with the fixing hole to fix the hair cutting head or the shaving head, the trimmer is provided with a limiting groove, and the unlocking assembly acts on the fixing assembly and is used for disassembling the hair cutting head or the shaving head. The hairdressing head or the shaving head can be replaced through the fixing assembly and the unlocking assembly, replacement is convenient, and the hairdressing and shaving effects are achieved.

CN - 03.05.2022

... or the shaving head is installed on the front face of the trimmer body through the fixing hole. The hairdressing assembly is installed in the limiting groove and assembled through the unlocking assembly.

2. **201979543** 手机剃须刀

Int.Class [B26B 19/48](#) ⓘ Appl.No 201020684836.5 Applicant 李龙华 Inventor 李龙华

手机剃须刀, 属于通讯工具, 主要解决随着生活节奏的加快, 对于男士来说, 往往匆忙而忘记剃须, 对个人形象造成不好的影响的问题。它包括手机主体, 手机主体上设有显示屏和按键, 剃须刀刀头, 电动剃须刀刀头的外侧罩有网罩, 所述电动剃须刀刀头的工作开关设在手机主体的侧面, 电动剃须刀刀头、工作开关和手机主体的蓄电池电连接; 在手机主体上设有显示屏和按键的同一侧, 剃须刀刀头和工作开关能相结合, 如果出门忘记剃须, 可以找任意一个空闲时间进行剃须, 方便实用。

CN - 21.09.2011

... 没有有一个电动剃须刀刀头, 手机和剃须刀的实用功能相结合, 如果出门忘记剃须, 可以找任意一个空闲时间进行剃须, 方便实用。

3. **201808077** 旋转式电动剃须刀刀头组件

Int.Class [B26B 19/14](#) ⓘ Appl.No 201020568845.8 Applicant 浙江光科电器有限公司 Inventor 包伟光

本实用新型涉及一种旋转式电动剃须刀刀头组件, 包括刀头盖、切刀组件以及安置切刀组件的刀头底座, 所述刀头底座的侧面开有让剃须残渣排出的槽或者孔, 这种旋转式电动剃须刀刀头组件具有不需要打开刀头盖能自行排出剃须残渣的特点。

CN - 27.04.2011

4. **1636686** DRY SHAVER

CN - 13.07.2005

Int.Class [B26B 19/12](#) ⓘ Appl.No 200410104864.4 Applicant Matsushita Electric Works Ltd. Inventor Tsushio Toshiyuki

A dry shaver with a swingable shaving head which is capable of following a user's skin smoothly while keeping an optimum pressing relation with the skin. The shaver includes a grip and a shaving head mounted on top of the grip. The shaving head has a cutting face on its top and has a pair of support points through which the shaving head is supported to the grip. A linkage mechanism is provided to couple the shaving head to the grip for allowing the shaving head to swing relative to the grip. The linkage mechanism includes a pair of cranks each connected at its one end to each one of the support points and connected at the other end to each one of the anchor points on the side of the grip. A frame projects on top of the grip in an overlapping relation with the shaving head to give the anchor points which are positioned upwardly of the support points with respect to a height axis of the grip for suspending the shaving head on top of the grip by the frame. Accordingly, the shaving head is enabled to swing only accompanied with a small vertical displacement of the cutting face from the skin, but with a sufficient angular displacement of the cranks about the anchor points, thereby keeping an optimum contacting pressure against the skin, yet swinging the shaving head to smoothly follow the skin.

1. [216422632](#) MULTIFUNCTIONAL HAIR TRIMMER SET CAPABLE OF BEING USED ON WHOLE BODY

CN - 03.05.2022

Int.Class [B26B 19/38](#) [?](#) Appl.No 202122735308.9 Applicant SHENZHEN YAI SCIENCE AND TECHNOLOGY CO., LTD Inventor LIANG YUBIAO

The utility model provides a multifunctional hair trimmer set capable of being used on the whole body. The multifunctional hair trimmer set comprises a trimmer body, a haircutting head and a shaving head. The haircutting head or the shaving head is installed at the upper end of the trimmer body in a replaceable mode. connecting blocks are installed at the lower end of the haircutting head and the lower end of the shaving head, a connecting groove is formed in the upper end face of the trimmer body, a fixing assembly is arranged in the connecting groove, the connecting blocks are movably connected with the connecting groove, a fixing hole is formed in the connecting groove, and the fixing assembly is arranged in the fixing hole. The hair cutting head or the shaving head is provided with a fixing hole, the fixing assembly is matched with the fixing hole to fix the hair cutting head or the shaving head, the trimmer is provided with a limiting groove, an unlocking assembly is installed in the limiting groove, and the unlocking assembly acts on the fixing assembly and is used for disassembling the hair cutting head or the shaving head. The hairdressing head or the shaving head can be rapidly disassembled and assembled through the fixing assembly and the unlocking assembly, replacement is convenient, and the hairdressing and shaving effects are achieved.

2. [201979543](#) MOBILE PHONE SHAVER

CN - 21.09.2011

Int.Class [B26B 19/48](#) [?](#) Appl.No 201020684836.5 Applicant 李龙华 Inventor 李龙华

The mobile phone shaver belongs to a communication tool, and mainly solves the problems that as the life rhythm is accelerated, for men, for men, shaving is often forgotten, and bad influences are caused to personal images. An electric shaver head is arranged at one end of the mobile phone main body. A net cover covers the outer side of the electric shaver head. A working switch of the electric shaver head is arranged on the side face of the mobile phone main body. The electric shaver head, the working switch and a storage battery of the mobile phone main body are electrically connected. A protective cover is arranged on the side, provided with the display screen and the key, of the mobile phone main body. According to the present utility model, the practical functions of the mobile phone and the shaver are combined, and if the user forgets shaving, any idle time can be found for shaving, which is convenient and practical.

3. [201808077](#) ROTARY ELECTRIC SHAVER HEAD ASSEMBLY

CN - 27.04.2011

Int.Class [B26B 19/14](#) [?](#) Appl.No 201020568845.8 Applicant 浙江光科电器有限公司 Inventor 包伟光

The rotary electric shaver head assembly comprises a cutter head cover, a cutter assembly and a cutter head base for containing the cutter assembly, wherein a groove or a hole for discharging shaving residues is formed in the side face of the cutter head base, and the rotary electric shaver head assembly has the characteristic that the shaver head cover does not need to be opened, so that shaving residues can be automatically discharged.

4. [1636686](#) DRY SHAVER

CN - 13.07.2005

Int.Class [B26B 19/12](#) [?](#) Appl.No 200410104864.4 Applicant Matsushita Electric Works Ltd. Inventor Tsushio Toshiyuki

A dry shaver with a swingable shaving head which is capable of following a user's skin smoothly while keeping an optimum pressing relation with the skin. The shaver includes a grip and a shaving head mounted on top of the grip. The shaving head has a cutting face on its top and has a pair of support points through which the shaving head is supported to the grip. A linkage mechanism is provided to couple the shaving head to the grip for allowing the shaving head to swing relative to the grip. The linkage mechanism includes a pair of cranks each connected at its one end to each one of the support points and connected at the other end to each one of the anchor points on the side of the grip. Int.Class [B81B 12/00](#) Appl.No 1020207003221 Applicant 인노바파트너스 게엠베하 Inventor 호프마이어 크리스토프

케이블카의 차량이 **케이블카**의 스테이션에 진입할 때 잠재적 위험을 보다 확실하게 평가하고 이에 대응할 수 있도록 하기 위해, 스테이션 입구 이전의 차량(4)의 편향이 센서(12)에 의해 측정되고, **케이블카** 제어 유닛(8)으로 전송되며, 동시에 **케이블카** 제어 유닛(8)에 의해 스테이션 입구(9) 이전의 들뜸(B)의 발생이 검출되고, **케이블카** 제어 유닛(8)은 전송된 편향(α) 및 검출된 들뜸(B)의 함수로서 **케이블카** 드라이브(7)를 제어하는 것이 제공된다.

3. [1020190133814](#) **케이블카**의 비상탈출장치

KR - 04.12.2019

Int.Class [B81B 12/00](#) Appl.No 1020180058390 Applicant 주식회사 호산 Inventor 조현득

본 발명은 **케이블카**의 운행 중 발생하는 **케이블카**의 정지에 대해 **케이블카**에서 승객을 안전하게 대피시키기 위한 **케이블카**의 비상탈출장치에 관한 것이다. 이를 위해 **케이블카**의 비상탈출장치는 **케이블카**의 전정부에 구비되고 원치케이블이 풀림 또는 감김 가능하도록 권취되는 원치유닛과, 원치유닛과 마주보도록 **케이블카**의 바닥부에 관통 형성되는 개폐홀 및 개폐홀을 개폐하도록 **케이블카**의 바닥부에 결합되는 바닥뚜껑을 포함한다.

4. [WO/2012/057414](#) CONVEYING WIRE FOR A CABLE CAR

WO - 03.05.2012

Int.Class [B81B 12/02](#) Appl.No PCT/KR2011/001690 Applicant COREA LADVENTURE CO., LTD Inventor PARK, Pyeong-Soo

The present invention relates to a conveying wire for a cable car, which connects existing pulleys provided at certain distances apart from one another, and rotates in one direction to enable a cable car to move together with the wire according to the position of the wire, in order to enable each cable car to independently operate under its own power.

5. [1020130125541](#) CABLE CAR PLATFORM HAVING SAFETY FOOTHOLD

KR - 19.11.2013

Int.Class [B81B 1/02](#) Appl.No 1020120049145 Applicant KIM, JONG CHAN Inventor KIM, JONG CHAN

The present invention relates to a cable car platform having a safety foothold, which prevents the space between the platform and a cable car when passengers get on/off the cable car by installing an opening and closing type safety foothold in the cable car platform, reduces the anxiety of the passengers, and prevents safety accidents. The cable car platform, which enables the passengers to easily get on/off the cable car (10), enables the rotation of the safety foothold (20) by forming the safety foothold (20) for preventing the interval with the cable car (10) in the platform (50) to be rotated by a hinge shaft (21) and connecting a drive cylinder (30) on one side of the safety foothold (20). PATENTSCOPE PRACTICAL EXERCISES

This query `EN_AB:(electri* OR electrica* OR electrici* OR support* OR stand* or carry* OR foundat* OR electron*)` cannot be run in PATENTSCOPE why?

- The use of the operator OR is incorrect
- The use of the parentheses is incorrect
- There are too many wildcards

Which query will return results for the search term solar or the combination of search terms wind/turbine in the English description?

- `EN_DE:(solar OR (wind AND turbine))`
- `EN_DE:(solar OR wind AND turbine)`
- `EN_DE:(solar OR ((wind AND turbine)))`

Practical exercises: booklets

PATENTSCOPE exercise booklet

NOVEMBER 2023

Solutions

I. OPERATOR EXERCISES

1. B
A query with the operator OR will return documents having the keyword tennis or the keyword ball or both keywords.
2. AND; OR; ANDNOT; NOT; BEFORE; NEAR
3. No: query A will return documents having both keyword electric and bicycle with no more than 9 words between them and query B will return documents having the keyword electric before bicycle with no more than 9 words between the 2 keywords. In query B the order of words is taken into account whereas in query A the order is not relevant.
4. To search for an exact term or phrase, use quotation marks.
5. The operator NEAR allow to make sure that 2 keywords or more are close to each other in the result list. If no number is specified after near, the default maximum number of words is 5, the equivalent of NEAR5.
6. Query A as the operator NEAR makes sure that the 2 keywords appear close to each other, in this case no more than 4 words in between the 2 keywords.
7. Documents about microwave ovens will not be included.

II. FIELD EXERCISES

1.
 - a. retrieve documents in Japanese: JA (JA_AB; JA_TI...)
 - b. search information in all the parts of Chinese documents: ZH_ALL
