2.1 – SEARCH AND EXAMINATION CAPACITY

Rules 36.1(i) and 63.1(i): The national Office or intergovernmental organization must have at least 100 full-time employees with sufficient technical qualifications to carry out searches and examinations.

The QMS Report provides information from the Authority on the infrastructure in place to ensure a sufficient quantity of technically qualified staff under paragraph 21.15(i) of the Guidelines, and on the training and development programs for staff involved in the search and examination process under paragraph 21.15(iv). The Authority also includes the following information on numbers of employees qualified to carry out search and examination.

The recruitment of highly skilled and technically qualified staff is key to ensuring the quality of search and examination processes. This section contains information on the number of examiners and their technical fields, and on the programs in place to train them and develop their skills.

(a) Employees qualified to carry out searches and examinations:

Following the appointment of the Authority as an International Searching and Preliminary Examining Authority and in accordance with the established plan, the recruitment and training of examiners has been completed. SAIP currently has 110 staff members capable of carrying out search and examination activities, with full-time employees working at several organizational levels. These examiners have the necessary scientific and technical qualifications to carry out examination work in their respective fields and all SAIP examiners have at least a Bachelor's degree; 57 per cent have higher degrees (Master's or PhD). On average, SAIP examiners have nine years' experience. Examiners are assigned to specialized technical centers in line with their professional specialization, with a view to deepening specific expertise and enhancing specialist efficiency. Which of the five technical centers they are assigned to depends on the specific technical field of each center. Examiners' functional grade reflects the number of years of experience they have.
