

Patent Cooperation Treaty (PCT) Working Group

Nineteenth Session
Geneva, February 2 to 6, 2026

COORDINATION OF TECHNICAL ASSISTANCE UNDER THE PCT

Document prepared by the International Bureau

PCT TECHNICAL ASSISTANCE ACTIVITIES

1. At its fifth session in 2012, the Working Group agreed that reports on technical assistance projects relating to the PCT should be included as a regular agenda item for future sessions of the Working Group (see paragraph 20 of document PCT/WG/5/21).
2. At each subsequent session of the Working Group, the International Bureau has submitted a working document containing information on PCT related technical assistance activities for developing countries that have a direct bearing on the use of the PCT.
3. This document provides an update on PCT technical assistance activities undertaken by the International Bureau that have a direct bearing on the use of the PCT by developing countries conducted within the Patents and Technology Sector, as well as on technical assistance related to the PCT carried out in other WIPO Sectors.

TECHNICAL ASSISTANCE ACTIVITIES THAT HAVE A DIRECT BEARING ON THE USE OF THE PCT BY DEVELOPING COUNTRIES

4. Information on technical assistance activities that have a direct bearing on the use of the PCT by developing countries carried out within the Patents and Technology Sector in 2025 is set out in the Annex to this document; all technical assistance activities have been included if at least one of the beneficiary countries is among the States eligible for PCT fee reductions in accordance with item 5 of the PCT Schedule of Fees that entered into force on January 1, 2025. For further background on the planning and delivery of this technical assistance, see paragraphs 5 to 11 of document PCT/WG/6/11.

5. In 2025, the International Bureau delivered more than 50 PCT-related technical assistance activities to over 65 countries that benefit from PCT fee reductions, attracting over 5,000 participants. The distribution between in-person and online delivery of activities in 2025 was around 60 per cent and 40 per cent respectively, carefully considering the specific needs of the beneficiaries of the technical assistance. In addition, the International Bureau, as part of its PCT outreach activities and to foster regional collaboration, participated in five large events organized in different regions - “VivaTech 2025” in France; “Third China International Supply Chain Expo (CISCE)” in China, “IP Week @ SG and Technical Assistance Providers in ASEAN” in Singapore; “XXIII Congress of the Inter-American Association of Intellectual Property (ASIPI)” in Argentina and “10th Istanbul International Inventions Fair – ISIF’25” in Türkiye.

6. In 2025, the International Bureau continued with PCT trainings to align receiving Office formalities examiners’ skills to required standards. Three joint PCT and Madrid System seminars were organized in different regions. In addition to the on-demand technical assistance delivery approach based on a single request from a PCT Contracting State, the project-based approach introduced in 2023 was further developed over the last three years for training and capacity building activities for Offices, users and related stakeholders. In this holistic approach, after evaluating the training needs of the IP Offices and users, a tailor-made project is planned, designed and implemented. The projects that were designed and implemented since 2023 are “PCT Curriculum”, “PCT and Youth”, “PCT-IP and Women”, “PCT Refresher and Clinics”, “PCT Finance” and “The Innovator’s Journey”.

PCT-RELATED TECHNICAL ASSISTANCE ACTIVITIES CARRIED OUT OUTSIDE THE PATENTS AND TECHNOLOGY SECTOR

7. As explained in paragraphs 12 and 13 of document PCT/WG/6/11, many technical assistance activities relating to developing the patent systems of developing countries, as envisaged by PCT Article 51, extend beyond activities that have a direct bearing on the use of the PCT by developing countries. These activities fall under the responsibility of WIPO Sectors other than the Patents and Technology Sector and are carried out under the supervision of other (non-PCT) WIPO bodies, notably the Committee on Development and Intellectual Property (CDIP), the Committee on WIPO Standards (CWS), and the WIPO General Assembly.

8. While a detailed listing of all such activities and projects would go beyond the scope of the present document, the following paragraphs provide examples of such activities and projects. Further information on current and forthcoming work is described in the Program of Work and Budget for the 2026/27 biennium with reference to Expected Results under the Medium-Term Strategic Plan 2022-26 and the United Nations 2030 Agenda for Sustainable Development. The WIPO Intellectual Property Technical Assistance Database (IP-TAD) <https://www.wipo.int/tad/en/index.jsp> also contains information on technical assistance activities undertaken by the Organization where one or more beneficiary countries are either a developing or a least developed country or a country in transition.

9. In relation to WIPO Standards under the responsibility of the Infrastructure and Platforms Sector, the Report on the provision of technical advice and assistance for capacity building to IP Offices to the thirteenth session of the Committee on WIPO Standards (CWS) that took place in November 2025 (document CWS/13/21) provides information on recent technical assistance activities relating to WIPO Standards.

10. To ensure that IP is truly a tool accessible to all, work continued with Least Developed Countries (LDCs) in assisting their preparation for graduation through “WIPO’s Graduation Support Package for LDCs” under the responsibility of the Regional and National Development Sector. Paragraph 10 of the Director General’s Report on Implementation of the Development Agenda for 2024 (document CDIP/34/2) provides further information on support for LDCs.

WIPO TECHNICAL ASSISTANCE IN THE AREA OF COOPERATION FOR DEVELOPMENT

11. Discussions have continued in the CDIP under the sub-agenda item “WIPO Technical Assistance in the Area of Cooperation for Development”. At its thirty-fifth session in November 2025, the discussions under this sub-agenda item (item 4(i) in the Agenda for the session) are summarized as follows (see paragraph 5 of the Summary by the Chair of the session):

“5. Under Agenda Item 4 (i), the Committee discussed the following:

5.1 Compilation of Topics Proposed by the Secretariat for Future Webinars on Technical Assistance contained in document CDIP/35/INF/2. The Committee welcomed the two proposed topics for convening webinars in 2026.

5.2 Independent External Review of WIPO’s Technical Assistance in the Area of Cooperation for Development contained in documents CDIP/33/4 and CDIP/33/4 CORR., Secretariat’s Response on the Status of Recommendations of the Independent External Review of WIPO’s Technical Assistance contained in document CDIP/34/8, and Member States’ Response on the Recommendations of the Independent External Review of WIPO’s Technical Assistance contained in document CDIP/35/14. The Committee took note of the information contained in the documents and requested the Secretariat to continue its work in this area.

5.3 Report on the Webinars on Technical Assistance contained in document CDIP/35/8. Delegations expressed appreciation for the successful convening of the two webinars. The Committee took note of the information provided in the report.”

12. The document CDIP/30/8 Rev. on future webinars on Technical Assistance adopted at the thirtieth session of the CDIP sets out the principles for guiding future webinars and the strategy for them. The strategy includes the process for selection of topics and the scope, which focuses on conducting effective technical assistance. For selection of topics, every year, during the second half, the Secretariat shares with Member States, through Group Coordinators, a list of proposed topics for webinars for the following year, indicating the objectives(s) and target audience(s). Based on responses of Group Coordinators, the Secretariat establishes a roster of topics on a dedicated web page. In 2025, the Secretariat organized two Webinars, endorsed by CDIP at its thirty-third session in December 2024, offering a comprehensive view of the challenges and opportunities related to the delivery of Technical Assistance and Capacity Building: (a) Maximizing impact: Strategic Planning for Technical Assistance and Capacity Building, and (b) Quantifying Impact: Strategies for Monitoring and Evaluating Technical Assistance and Capacity Building. The report on these two webinars is contained in document CDIP/35/8. The Annex to document CDIP/35/INF/2 provides details of two topic proposals for future webinars from the Secretariat and welcomed by the Committee for convening in 2026: (a) Innovative Technical Assistance: Emerging Technologies and Approaches for Evolving Development Needs, and (b) Sustainability of Results in Technical Assistance Programs.

13. Discussions under the sub-agenda item “WIPO Technical Assistance in the Area of Cooperation for Development” will continue at future sessions of the CDIP.

14. The Working Group is invited to note the contents of this document.

[Annex follows]

TECHNICAL ASSISTANCE ACTIVITIES THAT HAVE A DIRECT BEARING ON THE PCT
(*carried out in 2025*)

This Annex contains a comprehensive list of all technical assistance activities that have a direct bearing on the use of the PCT by developing countries undertaken in 2025, categorized according to the contents of the technical assistance activity undertaken, as follows:

- (a) General Patent Related Information (denoted “A” in the tables). Activity involving provision of information on patent protection and the international patent system in general covers events where talks are delivered on aspects of the patent system not exclusively concerning the PCT. This may include introductory material on the patent system like how to apply for patent, the main legal requirements for an invention to be patentable, the benefits of patent protection, and possible alternatives such as utility models and safeguarding confidential business information as a trade secret. Other subjects include national patent and regional patent systems, the importance and role of patent information including initiatives to facilitate access to technical information, and more detailed subjects like patent drafting. In some events, information is included on the strategic protection of inventions and the role of patents in technology transfer delivered together with speakers from other organizations who can offer insight into local issues of concern to recipients.
- (b) Detailed PCT Related Information (denoted “B” in the tables). Detailed PCT seminars provide comprehensive coverage of the PCT. In terms of formal requirements and the processing by the receiving Office, subjects covered include the elements required in an international patent application, the different filing methods available, the fees payable during the application process, making priority claims, correction of defects, rectification of obvious mistakes, recording of changes, and withdrawals. The role and functions of the International Bureau and of the International Searching and Preliminary Examining Authorities are other key parts of a PCT seminar. This covers international publication of the application, establishment of the international search report and international preliminary report on patentability, and options such as supplementary international search, amendments under Article 19 and the international preliminary examination procedure under Chapter II. PCT seminars also discuss entry to the national phase, showing the acts performed by the International Bureau and those required by the applicant, and pointing out specific national requirements like translations and priority documents. Furthermore, PCT seminars will often include a description of the services available through ePCT, the PATENTSCOPE database and references to further information sources on the WIPO website.
- (c) PCT Related Training of Office Officials (denoted “C” in the tables). Assistance to officials in Offices working under the PCT will cover parts of the PCT relevant to recipient Offices, whether acting in the capacity as a receiving Office, International Searching Authority, International Preliminary Examining Authority or designated/elected Office. For example, assistance to Offices acting as both a receiving and designated Office will deal with processing applications prior to transmission to the International Bureau and on national phase entry. With regard to national phase processing, activities also relate to capacity building for examination of applications in the national phase. This assistance also provides the opportunity for Offices to raise specific issues with the International Bureau.

(d) ICT Related Assistance (denoted “D” in the tables). Activity related to installation and technical assistance on use of ICT infrastructure covers the installation and training of staff on PCT IT tools and services, including the PCT Electronic Data Interchange system (PCT-EDI) and ePCT. An integral part of this assistance will involve demonstrations of the systems and practical hands-on assistance to enable users to become proficient and derive full benefit from these tools.

(e) Assistance to Countries Considering Accession to the PCT (denoted “E” in the tables). The International Bureau provides special assistance to countries considering accession to the PCT and to new Contracting States. This includes providing information to countries interested in becoming a member of the PCT and advising them on modifications to national law prior to their accession. The International Bureau also provides a post-accession training program to a new Contracting State. This involves the International Bureau visiting the country to raise awareness and explain the PCT and patent system to the legal profession, research institutions and businesses, and to provide assistance to the national Office towards full implementation of the PCT and to begin functioning as a receiving Office. Another part of the post-accession program is for officials from new Contracting States to receive practical training at WIPO in Geneva.

(f) Assistance to International Authorities (denoted “F” in the tables). Finally, the International Bureau provides technical assistance to States on operating as an International Search and Preliminary Examining Authority. This includes visiting an Office considering applying to become an International Authority to explain the procedure and requirements for appointment and to indicate areas where further technical work could be undertaken prior to making a formal application. Following appointment, technical assistance can be provided to train officials prior to commencing operations.
