Validation of priority claims

PRIORITY CLAIMS

Prevents filing: [US - 01 Mar 2020 - 61/111,999] Priority claim is not valid: the filing date of the earlier application is outside the 12 months priority period and also outside the 2 months that follow the expiration of that period.

PRIORITY CLAIMS

Will require correction but does not prevent filing: [US - 01 May 2020 - 61/11,999] The priority claim is eligible for restoration. The filing date of the earlier application is outside the 12 months priority period but within the 2 months that follow the expiration of that period. IMPORTANT: You may wish to consider requesting the receiving Office to restore the right of priority in relation to this earlier application (PCT Rule 26bis.3). If you choose not to request restoration of the right of priority at this stage, or if your request for restoration of the right of priority is refused by the receiving Office, it is important to note that all PCT time limits will nevertheless be calculated from the date of the earliest indicated priority claim, even if that date is outside the 12 months priority period but within the 2 months that follow the expiration of that period.

Real time look-up in DAS validates the priority claim data against the access code (also useful in detecting typos)

Filing Date * 30/06/2020 filing date does not match for US - 61/111,444 in DAS.	DAS access code * 111	
Application number * 61/111,444	access code incorrect.	WIPO PCT The Internationa
