Considerations in GUI Design for Saudi Vision 2030

- Integrate Saudi heritage elements with futuristic aesthetics.
- Implement Arabic speech-to-text and text-to-speech for enhanced accessibility.
- Reflect Vision 2030's focus on AI, smart cities, and digital transformation.
- Use gamification elements to enhance engagement.
- Incorporate AI-driven personalisation for adaptive and dynamic user experiences.
- Integrate augmented reality and virtual reality experiences for immersive interactions.
- Support multilingual capabilities for international users and investors.

Thank You!
