* This list includes all the entities to which the Madrid Agreement (Marks) has been declared applicable. It does not imply any expression of opinion as to the legal status of any country or territory or of its authorities.

¹ All the States have declared, under Article 3*bis* of the Nice or Stockholm Act, that the protection arising from international registration shall not extend to them unless the proprietor of the mark so requests (the dates in parentheses indicate the effective date of the declaration in respect of each State): Algeria (July 5, 1972), Austria (February 8, 1970), Belgium (December 15, 1966), Czechoslovakia (April 14, 1971), Democratic People's Republic of Korea (June 10, 1980), Egypt (March 1, 1967), France (July 1, 1973), German Democratic Republic (October 25, 1967), Germany (Federal Republic of) (July 1, 1973), Hungary (October 30, 1970), Italy (June 14, 1967), Liechtenstein (January 1, 1973), Luxembourg (December 15, 1966), Monaco (December 15, 1966), Morocco (December 18, 1970), Netherlands (December 15, 1966), Portugal (December 15, 1966), Romania (June 10, 1967), San Marino (August 14, 1969), Soviet Union (July 1, 1976), Spain (December 15, 1966), Switzerland (January 1, 1973), Tunisia (August 28, 1967), Viet Nam¹¹ (May 15, 1973), Yugoslavia (June 29, 1972).

² The Madrid Agreement (Marks) previously applied, from various dates, on the territories of what are now Algeria and Viet Nam.¹¹

³ As from January 1, 1971, the territories in Europe of Belgium, Luxembourg and the Netherlands are, for the application of the Madrid Agreement (Marks), to be deemed a single country.

⁴ These are the alternative dates of entry into force which the Director General of WIPO communicated to the States concerned.

⁵ Including all Overseas Departments and Territories.

⁶ Date on which the accession by the Reich took effect.

⁷ The instrument of ratification of the Stockholm Act (1967) was deposited for the Kingdom in Europe.

⁸ Including the Azores and Madeira.

⁹ In accordance with Article 14(2)(d) and (f), the Soviet Union declared that the application of the Stockholm Act (1967) was limited to marks registered from the date on which its accession entered into force, that is, July 1, 1976.

¹⁰ Spain declared that it no longer wished to be bound by instruments earlier than the Nice Act. This declaration became effective on December 15, 1966. The Madrid Agreement (Marks) was thus not applicable between Spain and the following States between December 15, 1966, and the date indicated for each State: Austria (February 8, 1970), Hungary (March 23, 1967), Liechtenstein (May 29, 1967), Morocco (December 18, 1970), Tunisia (August 28, 1967), Viet Nam¹¹ (May 15, 1973).

* This list includes all the entities to which the Hague Agreement has been declared applicable. It does not imply any expression of opinion as to the legal status of any country or territory or of its authorities.

¹ The Hague Act (1960) is not yet in force. The following States have ratified or acceded to this Act: Belgium, France, Liechtenstein, Luxembourg, Netherlands (as far as the Kingdom in Europe is concerned), Suriname and Switzerland.

² The Additional Act of Monaco (1961) is in force in respect of the following States as from the dates indicated: France (December 1, 1962), Germany (Federal Republic of) (December 1, 1962), Liechtenstein (July 9, 1966), Monaco (September 14, 1963), Netherlands (as far as the Netherlands Antilles are concerned) (September 14, 1963), Spain (August 31, 1969), Suriname (November 25, 1975) and Switzerland (December 21, 1962). See also footnote 3.

³ Belgium had withdrawn from the Hague Union with effect from January 1, 1975. The Netherlands had denounced, in respect of the Kingdom in Europe and with effect from January 1, 1975, the Hague Agreement (1925) and the subsequent Acts to which the Netherlands had adhered, specifying that the said Agreement and Acts—London Act (1934) and Additional Act of Monaco (1961)—would remain in force in respect of the Netherlands Antilles and Suriname. As a result of their ratification of the Protocol of Geneva (1975) and its entry into force on April 1, 1979, Belgium and the Netherlands became, again, as from that date, members of the Hague Union.

⁴ The territories in Europe of Belgium, Luxembourg and the Netherlands are, for the application of the Hague Agreement, to be deemed a single country.

⁵ Including all Overseas Departments and Territories.

⁶ Date on which the ratification by the Reich took effect.

⁷ The Hague Agreement was previously applied, as from the dates indicated, on the territories of what are now Indonesia (June 1, 1928), Suriname (June 1, 1928) and Viet Nam⁸ (October 20, 1930).

⁸ The situation of Viet Nam in respect of the Hague Union is under examination.

⁶ According to information received from the Minister for Foreign Affairs of Madagascar concerning international applications designating Madagascar, the draft industrial property legislation, submitted to the competent authorities, provides, among other things, for the prolongation of the time limits under Articles 22 and 39 until the time at which the new patent legislation will, after its entry into force, permit the processing of patent applications in Madagascar. After the publication of the new law, the said prolonged time limits will be fixed by the competent authorities. The Government of Madagascar has expressed the desire that this information be conveyed to applicants using the PCT system and designating or electing Madagascar, or intending to do so, so that they may take cognizance of the possibility thus offered to them to validly designate or elect Madagascar and to wait with the action required to start the national phase under Articles 22 and 39 until after the new legislation has entered into force and the time limits to be observed under it have been determined.

Acquisition of the Status of International Depository Authority

A

AMERICAN TYPE CULTURE COLLECTION

The following written communication addressed to the Director General of WIPO by the Government of the United States of America under Article 7 of the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure was received on November 17, 1980, and is published by the International Bureau of WIPO pursuant to Article 7(2)(a) of the said Treaty:

“As provided in Article 7 of the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, my Government proposes as an international depository authority the American Type Culture Collection. We offer our assurances that the American Type Culture Collection can and will meet every requirement prescribed by the Treaty and Rules thereunder for international depository authorities. Accordingly, my Government requests that you, as soon as possible, take the steps necessary to confer this status on the American Type Culture Collection.

“The American Type Culture Collection is located in the United States at 12301 Parklawn Drive, Rockville, Maryland 20852. It has been in continuous existence as a culture collection for 55 years. Operating as a private non-profit corporation, the American Type Culture Collection has been chartered since its founding in 1925 to acquire, preserve, authenticate and distribute samples of bacteria, algae, protozoa, fungi, cell cultures and viruses (animal, bacterial, plant and fungal) to requesters around the world.

"It has an undisputed and world-wide reputation for scientific and administrative competence. Of its staff of more than 100 members, half or more possess university degrees (PhD, MS or BS) in pertinent scientific fields. Many of its staff have been continuously employed there for more than 15 years.

"Throughout its existence, the American Type Culture Collection has accepted microorganisms for deposit from any depositor under the same conditions. It will accept for deposit under the Budapest Treaty the following: algae, bacteria (including actinomycetes), bacteria containing plasmids (with the limitations noted below), bacteriophages, cell cultures (including hybridoma lines), fungi (including yeasts), protozoa and animal and plant viruses (with the limitations noted below).

"The American Type Culture Collection must be informed, in advance of accepting a deposit for a bacterium containing a plasmid, of the physical containment level required for experiments using the host vector system, as described in the 1980 National Institutes of Health Guidelines for Research Involving Recombinant DNA Molecules (i.e., P1, P2, P3 or P4 facility). The American Type Culture Collection, for the time being, will accept only those hosts containing plasmids which can be worked in a P1 or P2 facility.

"Certain animal viruses may require viability testing in an animal host, which the American Type Culture Collection may be unable to provide. In a case where it cannot provide viability testing, the deposit cannot be accepted. Plant viruses which cannot be mechanically inoculated also cannot be accepted.

"The American Type Culture Collection has been an acceptable depository for more than 20 years in connection with United States and foreign microbiological patents. In its long history, there has never been a failure to observe any requirement of a national patent law or to apply the highest administrative and scientific standards to deposits stored therein.

"My Government has further concluded that the American Type Culture Collection will store each deposit made in accordance with the Treaty with all the care necessary to keep it viable and uncontaminated for at least 30 years after deposit. There are sufficient safety measures in operation to minimize the risk of losing deposits of microorganisms; e.g., a 24-hour alarm to alert the staff of any electrical failure and a backup generator for emergency purposes. There is always a guard on duty to monitor these facilities.

"As required by Rule 3.1 (b) (iv), enclosed is the fee schedule for the American Type Culture Collection applicable to deposits made under the Budapest Treaty. These fees do not vary on account of the nationality or residence of the person paying them. Please be further advised, as required by Rule 3.1(b)(v), that it will conduct business in English in regard to these deposits.

"We request that this recognition be conferred as from the date of publication of this communication."

[Fee Schedule follows]

AMERICAN TYPE CULTURE COLLECTION
12301 Parklawn Drive
Rockville, Maryland 20852

FEE SCHEDULE

Fee for maintenance and availability of a culture for the period of time specified under the Budapest Treaty for all cultures acceptable is \$570.00.

Fee for Viability Testing Is:

Bacteria (without plasmids)	\$100.00
Fungi, including yeast	100.00
Protozoa	100.00
Algae	100.00
Animal Cell Cultures including hybridoma lines, animal and plant viruses*	Fee must be decided on an individual basis

Fee to inform depositors of requests for a strain for 30 years is \$300.00.

* Viability

The testing of some of these items may require testing in animals (i.e. horse) or other expensive procedures and cannot be predetermined until the nature of the material is known.

[End of text of Communication]

Pursuant to Article 7(2)(b) of the Budapest Treaty, the American Type Culture Collection acquires the status of international depository authority as from January 31, 1981 (date of the present publication).

Budapest Communication No.1 (this Communication is the subject of Budapest Notification No. 11, of December 3, 1980).

AGRICULTURAL RESEARCH CULTURE
COLLECTION

The following written communication addressed to the Director General of WIPO by the Government of the United States of America under Article 7 of the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure was received on December 2, 1980, and is published by the International Bureau of WIPO pursuant to Article 7(2)(a) of the said Treaty:

"As provided in Article 7 of the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, the United States proposes as an international depository authority the Agricultural Research Culture Collection. We offer our assurances that this Collection can and will meet every requirement of the Treaty and Rules thereunder for international depository authorities. Accordingly, my Government requests that you, as soon as possible, take the steps necessary to confer this status on the Agricultural Research Culture Collection.

"The Agricultural Research Culture Collection is located in the United States at 1815 North University Street, Peoria, Illinois 61604. It was the first United States depository to receive deposits in connection with patent applications, which it has done continuously since 1948. Its reputation for scientific and administrative competence is undisputed and world-wide.

"The Agricultural Research Culture Collection is a public depository operated by the United States Department of Agriculture. It contains what is believed to be the world's largest collection of living strains of agricultural and industrial microorganisms. Its collection is preserved almost entirely in freeze-dried form to provide stable viable microbial germ plasm.

"This Collection grows continuously in the number of microorganisms stored. The initial few thousand deposits of molds and yeasts have increased to about 28,000 strains of molds, 13,000 strains of yeasts, 8,000 strains of bacteria and 6,500 strains of actinomycetales. Several thousand new strains are received each year. A small but important group of these (about 200 per year) are deposited in connection with patents. The Collection's staff includes six microbiologists and five technical aides.

"We call your attention to the fact that this Collection has never failed to observe any requirement of a national patent law or to apply the highest scientific or administrative standards to the receiving, storing, testing and dispensing of deposits.

"The Collection has agreed to store deposits made under the Treaty for at least 30 years after deposit. My Government is completely convinced that the Collection has the capacity for doing so with the care needed to keep deposits viable and uncontaminated.

"Attached is the Collection's statement of the kinds of deposits that will be accepted under the Budapest Treaty. These will be accepted from all depositors under the same conditions, without regard to nationality.

"The Collection will accept recombinant strains of microorganisms, excluding those listed as unacceptable, only (1) if the deposit documents accompanying the microbial preparation include a clear statement that progeny of the strain can be processed at a physical containment level of P1 or less and (2) all other criteria specified in the National Institutes of Health publication "Guidelines for Research Involving Recombinant DNA Molecules" and subsequent revisions of these Guidelines are complied with.

"At least for the time being, no fees will be imposed in connection with these deposits. Please be further advised that the Collection conducts business only in English.

"We request that recognition of the Agricultural Research Culture Collection as an international depository authority be conferred as of the date of publication of this communication."

[End of text of Communication]

Pursuant to Article 7(2)(b) of the Budapest Treaty, the Agricultural Research Culture Collection acquires the status of international depositary authority as from January 31, 1981 (date of the present publication).

Budapest Communication No. 2 (this Communication was the subject of Budapest Notification No. 12, of December 8, 1980).

II

Requirements Communicated Under Rule 6.3(b) of the Regulations Under the Budapest Treaty

AGRICULTURAL RESEARCH CULTURE COLLECTION

The depositor has the option of sending materials for deposit in the Agricultural Research Culture Collection (NRRL) in three ways:

1. Thirty lyophilized preparations, clearly labelled with the depositor's original strain designation and preferably in tubes of no greater dimensions than indicated in the drawings below:

One of these is checked for viability, the NRRL number is placed on each tube, and the supply of tubes stored at 3 to 5°C. *Bona fide* letter requests for progeny would be shipped from this stock.

The Agricultural Research Culture Collection (NRRL) will no longer accept materials for deposit under option 1 unless they meet the specifications cited above. Larger sized tubes greatly complicate storage.

2. One lyophilized preparation, clearly labelled with the depositor's original strain designation. On receipt, the microorganism is cultivated on appropriate agar media and 30 lyophilized preparations

made. One of these is checked for viability, the remainder handled as in option 1. This option, and option 3 below, is acceptable provided cultures submitted are not fastidious and do not require more than usual normal operating procedures.

3. One, or preferably two, agar slant cultures of the microorganism(s) growing on an appropriate me-

dium. Sufficient material is prepared by our curators to make 30 lyophilized preparations, check one for viability and handle the remainder as in options 1 and 2. If initial agar slant cultures deposited appear suitable, lyophilizations often are made from that material.

International Convention for the Protection of New Varieties of Plants

I. Ratification

NEW ZEALAND

The Government of New Zealand deposited, on November 3, 1980, its instrument of ratification of the International Convention for the Protection of New

Varieties of Plants (UPOV) of December 2, 1961, as revised at Geneva on November 10, 1972, and on October 23, 1978.

The date of entry into force of the said International Convention will be notified when the required number of ratifications, acceptances, approvals or acces-

sions is reached in accordance with Article 33(1) of the said International Convention.

UPOV Notification No. 16, of November 24, 1980.

II. Acceptance

UNITED STATES OF AMERICA

The Government of the United States of America deposited, on November 12, 1980, its instrument of acceptance of the International Convention for the Protection of New Varieties of Plants (UPOV).

At the time of depositing its instrument of acceptance of the said International Convention, the United States of America notified the Secretary-General that it will apply the provisions of Article 37, paragraphs (1) and (2), in regard to protection of the same genus or species under different forms and also in regard to the patentability criteria and period of protection applicable to normally asexually reproduced plant varieties.

The date of entry into force of the said International Convention will be notified when the required number of ratifications, acceptances, approvals or accessions is reached in accordance with Article 33(1) of the said International Convention.

News from Industrial Property Offices

AUSTRIA

Activities of the Patent Office during 1979*

Legislative and International Matters

The main focus of legislative work was on patent activities. An amendment to the Patent Law constituted a start on the preliminary work for harmonizing Austrian patent legislation with European patent law.

In the field of designs, the preparatory work begun already in 1978 for a complete overhaul of the Designs Law, which is basically over 150 years old and therefore no longer in step with current requirements, was pursued.

The draft of an amendment to the Federal Law on Unfair Competition was submitted for general comment. Following the very comprehensive and substantively divergent remarks received, the draft was correspondingly recast. In the meantime, the Unfair Competition Law Amendment entered into force on April 1, 1980.

The draft of a new (consolidated) Ordinance under Section 35 of the Unfair Competition Law was submitted for general comment. The Ordinance itself entered into force on March 1, 1980.

In addition, notifications by the Federal Minister for Commerce, Trade and Industry on the conferring of preferential treatment to priority protection for inventions, marks and designs were drafted and, finally, the text was drafted of the Ordinance on formal requirements for translations to be filed under the Law adopting the Patent Treaties.

At the international level, efforts were pursued within the framework of WIPO towards preparing the revision of the Paris Convention.

Bilateral cooperation between the Austrian Patent Office and the Patent Offices of other countries was continued. In this context, an Austrian-Polish expert group for industrial property met in September 1979. The cooperation between the Austrian Patent Office and the Institute for Inventions and Rationalizations of the People's Republic of Bulgaria was also placed on a contractual basis. In July 1979, the eighth meeting of the Joint Austrian-Soviet Working Group on Patents and Licenses was held. Agreement was

reached on the wording of a governmental agreement which is expected to achieve an improvement in the legal situation of certain Austrian patent applicants in the Soviet Union.

In 1979, four announcements were published in the official journal (*Bundesgesetzblatt*) in respect of the protection of State emblems under Article 6ter of the Paris Convention and an announcement on reciprocity in respect of marks (Afghanistan). During the report year, the Agreement on the Implementation of the Treaty between the Republic of Austria and the Czechoslovak Socialist Republic on the Protection of Indications of Source, Appellations of Origin and other Designations Denoting the Origin of Agricultural and Industrial Products was signed and the ratification procedure in respect of the Treaty and the relevant Protocol was initiated.

On April 23, 1979, the Patent Cooperation Treaty and its Regulations entered into force in respect of Austria. In addition, on May 1, 1979, the European Patent Convention entered into force in respect of Austria. Since the provisions of the European Convention relating to the Formalities required for Patent Applications did not in all cases correspond with the formal requirements of the European Patent Convention, that Convention, together with its annexes, was denounced by Austria.

In February 1979, an agreement was concluded between the Federal Minister for Commerce, Trade and Industry of Austria and the International Bureau of WIPO on the appointment and tasks of the Austrian Patent Office as an International Searching Authority and an International Preliminary Examining Authority under the Patent Cooperation Treaty.

In May 1979, an agreement was signed between the European Patent Organisation and the Central Authority for the Protection of Industrial Property of Austria concerning the transfer of the independent execution of various tasks in favor of developing countries within the framework of the Patent Cooperation Treaty.

An agreement was concluded with the African Intellectual Property Organization (OAPI) under which the Austrian Patent Office acts as International Searching Authority and International Preliminary Examining Authority for international applications under the PCT that are filed in an OAPI member State, subject to the International Bureau of WIPO appointing the Austrian Patent Office as an appropriate authority.

* This report is excerpted from the Annual Report 1979 issued by the Austrian Patent Office.

Yet another agreement was concluded with the National Institute of Industrial Property of Brazil, under which the Austrian Patent Office acts as the international administration for international applications filed in Brazil. Finally, the Austrian Patent Office was entrusted under the European Patent Convention with carrying out searches for European patent applications.

Austria's accession to the European Patent Convention and its ratification of the PCT also resulted in a number of organizational changes. It became necessary to adapt the activities of the Austrian Patent Office in the field of electronic data processing to the new circumstances. In addition, various changes and organizational measures resulted from converting the Austrian Trademark Gazette from conventional printing to photocomposition.

During the report year, work continued on the international unification of patent documentation. In particular, three Austrian experts participated in work on the final phase of the third edition of the International Patent Classification.

During the year also, the Austrian Patent Office again hosted a training course, organized jointly with WIPO, for specialists in patent documentation from developing countries.

The United Nations Conference on Science and Technology for Development, held in late summer 1979 in Vienna, saw considerable involvement on the part of the Austrian Patent Office. The Technical Vice-President of the Patent Office acted as Chairman of a scientific preparatory meeting devoted to the subject of information systems in science and technology.

An important event for the Austrian Patent Office was the celebration of its 80 years of existence. The Austrian Patent Office began its work on January 1, 1899. This anniversary was commemorated in February 1979 by two events in particular: an exhibition at the Technical Museum, which presented the achievements of Austrian inventors since the inception of patent protection in Austria, and a cycle of lectures.

A symposium entitled "Innovation and Patents" was held on February 21, 1979, in the lecture hall of the Federal Chamber of Commerce with the participation of well-known specialists from the Federal Republic of Germany, France, Poland, Switzerland, the Soviet Union and Austria.

Patent Activities

The number of patent applications compared with 1978 continued to fall (1978: 9,384; 1979: 8,216). Grants of patents, on the other hand, showed a slight upward trend (1978: 6,487; 1979: 6,500). The drop in patent applications may be explained, in part, by

the opening of the European Patent Office at Munich.

Trademark Activities

Compared with 1978, there was an increase in the number of applications for the registration of trademarks (1978: 3,299; 1979: 3,477). The number of trademarks registered fell slightly (1978: 2,944; 1979: 2,666). International trademark registrations based on Austrian initial deposits also fell somewhat (1978: 233; 1979: 218). The number of international marks effective for Austria on the basis of foreign preliminary registrations, however, increased (1978: 7,074; 1979: 7,141).

Designs Activities (Central Designs Archive)

The number of designs deposited again rose in comparison with the preceding year (1978: 5,250; 1979: 6,040). This trend also applies to depositors having their place of residence or business in Austria (1978: 3,369; 1979: 4,024). For the deposit of designs, the three-year term of protection is still requested in most cases. In operating the Central Designs Archive, attention has therefore to be given to the fact that almost all designs need to be stored and kept available to the public for a period of three years.

Documentation

New acquisitions of books, journals and bound patent documents in the Library of the Patent Office amounted to 8,358 copies in 1979. During the year, a total of 499 rolls of microfilm of patent documents were produced. The library of microfilm rolls available for public access in the Library reading room now therefore totals 11,736 rolls.

The number of journals and other periodicals regularly received and made available to the public in the Library amounted to 382 (1978: 374), including 273 foreign titles (1978: 274). The technical divisions of the Patent Office also had available for the preliminary examination of patent applications all periodicals laid down as minimum documentation by unanimous decision of the Interim Committee for Technical Cooperation under the Patent Cooperation Treaty (PCT).

A total of 1,166,162 (1978: 1,130,861) patent documents were acquired under the documentation exchange with other patent offices during 1979. Of these, 308,220 documents were incorporated in the classified examination files (1978: 268,696). The overall number of documents contained in the exam-

ination files now therefore amounts to over 12 million.

The number of bound patent documents has grown by 4,806 volumes (1978: 4,241 volumes). The total holdings of books (volumes) reached 246,114 in 1979 (1978: 234,378). The Library of the Austrian Patent Office thus constitutes one of the largest libraries in Austria. The sorting work in connection with the production of an "international class copy" for general access (a copy of the patent documents acquired, arranged in accordance with the printed symbols of the International Patent Classification kept for the use of the public) was continued.

Staffing

The overall number of staff remained practically the same as in 1978. Of the 269 employees of the Patent

Office on active service on December 1, 1979, 137 belonged to the legal and senior technical services of the Patent Office. 125 of the graduate employees are to be found in the senior technical service and 19 in the legal service.

Financial Management

Staff expenditure in the report year amounted to 70.5 million schillings. Material expenditure amounted to 34.3 million schillings (1978: 35.6). The total expenditure of 106.1 million schillings is to be set off against revenue of 153.1 million schillings, the result being that the report year closed with a surplus of 47 million schillings.
