The Global Innovation Index (GII) ranks world economies according to their innovation capabilities. Consisting of roughly 80 indicators, grouped into innovation inputs and outputs, the GII aims to capture the multi-dimensional facets of innovation.

### Costa Rica ranking in the Global Innovation Index 2023

- **Costa Rica ranks 74th** among the 132 economies featured in the GII 2023.

- **Costa Rica ranks 19th** among the 33 upper-middle-income group economies.

- **Costa Rica ranks 7th** among the 19 economies in Latin America and the Caribbean.

### Costa Rica GII Ranking (2020-2023)

The table shows the rankings of Costa Rica over the past four years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Costa Rica in the GII 2023 is between ranks 65 and 78.

<table>

</table>

Costa Rica performs worse in innovation outputs than innovation inputs in 2023.

- This year Costa Rica ranks 66th in innovation inputs. This position is higher than last year.
- Costa Rica ranks 81st in innovation outputs. This position is lower than last year.
→ Expected vs. observed innovation performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

> Relative to GDP, Costa Rica’s performance is below expectations for its level of development.

→ Innovation overperformers relative to their economic development

---

→ GDP per capita, PPP logarithmic scale (thousands of $)
Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

Costa Rica produces less innovation outputs relative to its level of innovation investments.

Overview of Costa Rica’s rankings in the seven areas of the GII in 2023

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Costa Rica are those that rank above the GII (shown in blue) and the weakest are those that rank below.

**Highest rankings**
Costa Rica ranks highest in Institutions (48th), Infrastructure (62nd), Business sophistication (63rd) and Knowledge and technology outputs (70th).

**Lowest rankings**
Costa Rica ranks lowest in Market sophistication (90th), Creative outputs (89th) and Human capital and research (79th).

The full WIPO Intellectual Property Statistics profile for Costa Rica can be found on [this link](#).
Benchmark of Costa Rica against other country groupings for each of the seven areas of the GII Index

The charts show the relative position of Costa Rica (blue bar) against other country groupings (grey bars), for each of the seven areas of the GII Index.

> Upper-Middle-Income economies
Costa Rica performs below the upper-middle-income group average in Knowledge and technology outputs, Creative outputs, Business sophistication, Market sophistication, Human capital and research.

> Latin America And The Caribbean
Costa Rica performs above the regional average in Knowledge and technology outputs, Business sophistication, Human capital and research, Infrastructure, Institutions.

Costa Rica's innovation system

As far as practicable, the plots below present unscaled indicator data.

Innovation inputs in Costa Rica

2.1.1 Expenditure on education, % GDP
was equal to 6.65% GDP in 2020, down by 0.09 percentage points from the year prior – and equivalent to an indicator rank of 9.

2.2.2 Graduates in science and engineering, %
was equal to 15.89% of total tertiary graduates in 2021, down by 0.34 percentage points from the year prior – and equivalent to an indicator rank of 95.

2.3.1 Researchers, FTE/mn pop.
was equal to 345.04 FTE/mn pop. in 2018, down by 9.3% from the year prior – and equivalent to an indicator rank of 78.

2.3.2 Gross expenditure on R&D, % GDP
was equal to 0.371% GDP in 2018, down by 0.054 percentage points from the year prior – and equivalent to an indicator rank of 68.

2.3.4 QS university ranking, top 3
was equal to an average score of 11.97 for the top 3 universities in 2022, up by 3.19% from the year prior – and equivalent to an indicator rank of 62.

3.1.1 ICT access
was equal to a score of 9.08 in 2021, down by 0.55% from the year prior – and equivalent to an indicator rank of 44.
4.2.4 VC received, value, % GDP
was equal to 0.00015% GDP in 2022, up by
0.00012 percentage points from the year prior – and equivalent to an indicator rank of 84.

4.3.2 Domestic industry diversification
was equal to an index score of 0.227 in 2020, down by 10.14% from the year prior – and equivalent to an indicator rank of 78.

5.1.1 Knowledge-intensive employment, %
was equal to 21.38% in 2022, down by 0.58 percentage points from the year prior – and equivalent to an indicator rank of 72.
Global Innovation Index 2023

> Innovation outputs in Costa Rica

**6.1.1 Patents by origin**
was equal to 0.015 Thousands in 2021, up by 25% from the year prior – and equivalent to an indicator rank of 108.

**6.1.5 Citable documents H-index**
was equal to an index value of 232 in 2022, up by 8.41% from the year prior – and equivalent to an indicator rank of 75.

**6.2.2 Unicorn valuation, % GDP**
was equal to 0 % GDP in 2023 – and equivalent to an indicator rank of 48.

**6.2.3 Software spending, % GDP**
was equal to 0.33% GDP in 2022, down by 0.005 percentage points from the year prior – and equivalent to an indicator rank of 32.

**6.2.4 High-tech manufacturing, %**
was equal to 12.95% of total manufacturing output in 2020, down by 0.82 percentage points from the year prior – and equivalent to an indicator rank of 83.

**6.3.1 Intellectual property receipts, % total trade**
was equal to 0.03% total trade in 2021, down by 0.0049 percentage points from the year prior – and equivalent to an indicator rank of 80.
6.3.2 Production and export complexity
was equal to a score of 0.303 in 2020, down by 23.92% from the year prior – and equivalent to an indicator rank of 48.

6.3.3 High-tech exports
was equal to 1,457,227,943 USD in 2021, up by 40.3% from the year prior – and equivalent to an indicator rank of 30.

7.1.3 Global brand value, top 5,000
was equal to 0 bn USD in 2023 – and equivalent to an indicator rank of 74.

7.2.1 Cultural and creative services exports
was equal to 144,568,000 USD in 2021, up by 9.11% from the year prior – and equivalent to an indicator rank of 47.

7.2.2 National feature films/mn pop. 15–69
was equal to 1.6 films/mn pop. 15–69 in 2021, up by 196.95% from the year prior – and equivalent to an indicator rank of 51.

7.3.4 Mobile app creation/bn PPP$ GDP
was equal to 60,717 Apps/bn PPP$ GDP in 2022, down by 21.74% from the year prior – and equivalent to an indicator rank of 77.

Global Innovation Index 2023

→ About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.

- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a “tool for action” for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
