

Global Innovation Index 2023

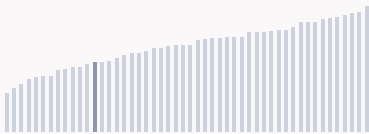

The Global Innovation Index (GII) **ranks world economies according to their innovation capabilities**. Consisting of **roughly 80 indicators**, grouped into innovation inputs and outputs, the GII **aims to capture the multi-dimensional facets of innovation**.

Croatia ranking in the Global Innovation Index 2023

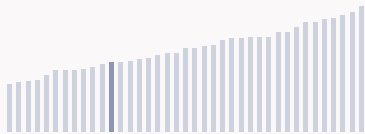

> Croatia ranks **44th** among the 132 economies featured in the GII 2023.

> Croatia ranks **38th** among the 50 high-income group economies.

> Croatia ranks **28th** among the 39 economies in Europe.

> Croatia GII Ranking (2020-2023)

The table shows the rankings of Croatia over the past four years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Croatia in the GII 2023 is between ranks 42 and 44.

	GII Position	Innovation Inputs	Innovation Outputs
2020	41st	44th	43rd
2021	42nd	41st	48th
2022	42nd	45th	40th
2023	44th	43rd	44th

Croatia performs worse in innovation outputs than innovation inputs in 2023.

This year Croatia ranks 43rd in innovation inputs. This position is higher than last year.

Croatia ranks 44th in innovation outputs. This position is lower than last year.

Global Innovation Index 2023

→ Expected vs. observed innovation performance

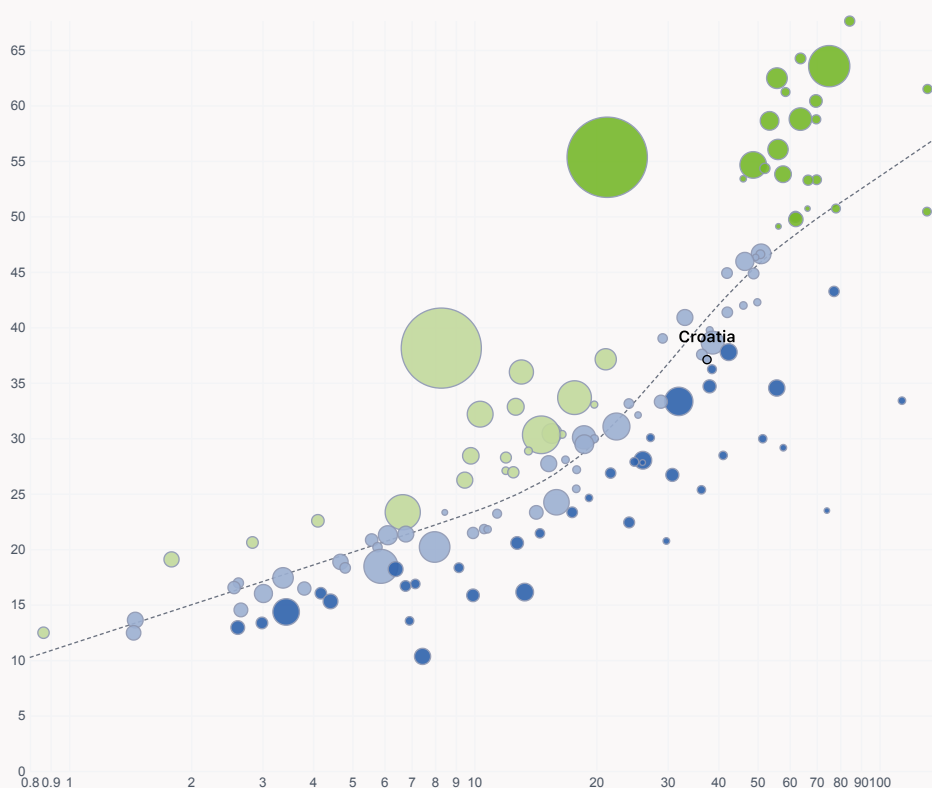

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

> Relative to GDP, Croatia's performance is at expectations for its level of development.

> Innovation overperformers relative to their economic development

↑ GI Score

- Innovation leader
- Performing above expectations for level of development
- Performing at expectations for level of development
- Performing below expectations for level of development

Global Innovation Index 2023

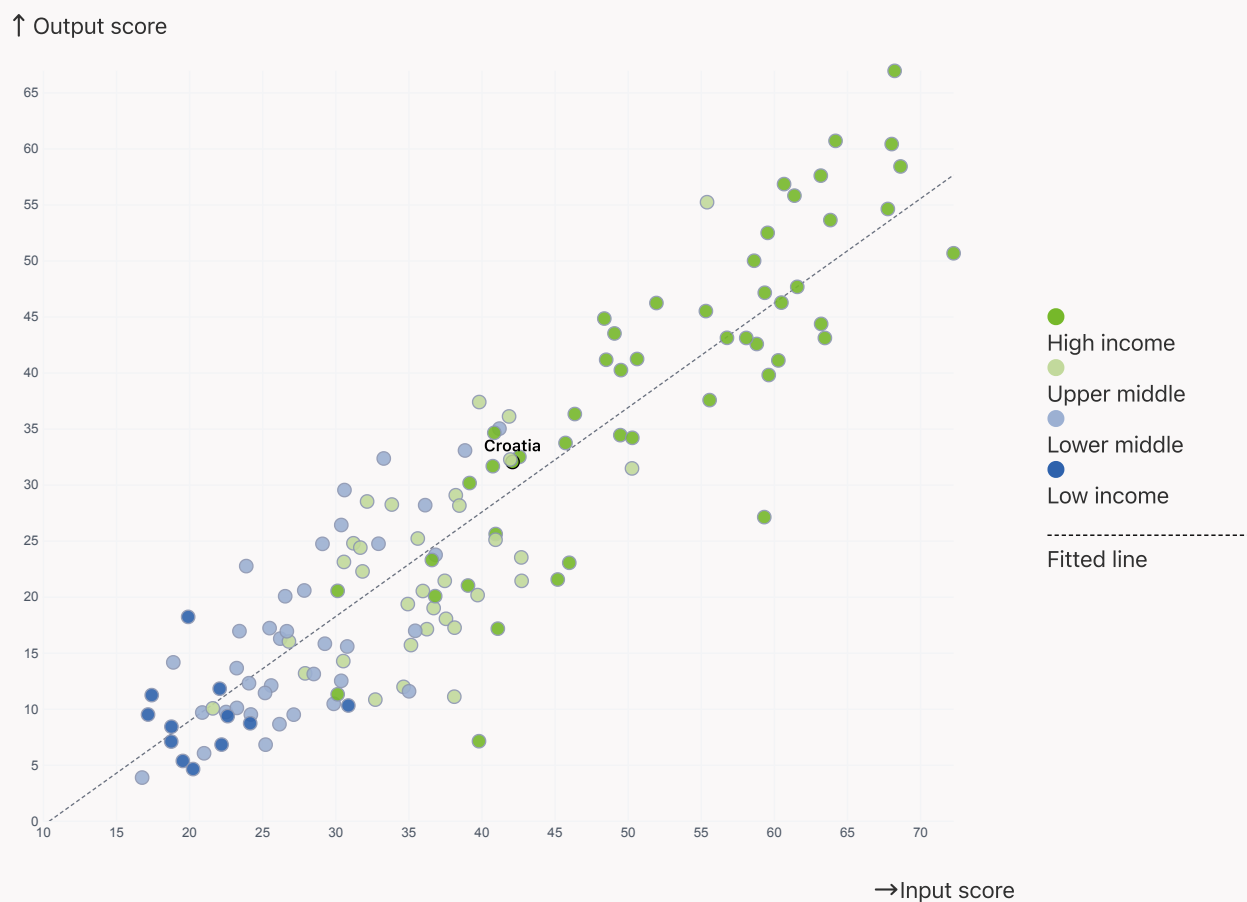

→ Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

> Croatia produces less innovation outputs relative to its level of innovation investments.

> Relationship between innovation inputs and outputs

Global Innovation Index 2023

→ About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a “tool for action” for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
