

The Global Innovation Index (GII) ranks world economies according to their innovation capabilities.

Consisting of **roughly 80 indicators**, grouped into innovation inputs and outputs, the GII **aims to capture the multi-dimensional facets of innovation**.

# Jamaica ranking in the Global Innovation Index 2023

comparisons of the GII rankings. The statistical confidence interval for the

**Innovation Inputs** 

ranking of Jamaica in the GII 2023 is between ranks 72 and 82.

This year Jamaica ranks 82nd in innovation inputs. This position is higher than last year.

Jamaica ranks 69th in innovation outputs. This position is lower than last year.

### → Expected vs. observed innovation performance

> Innovation overperformers relative to their economic development

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

> Relative to GDP, Jamaica is performing above expectations for its level of development.

 Innovation leader
 Performing above expectations for level of development
 Performing at expectations for level of development
 Performing below expectations for level of development

### → Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

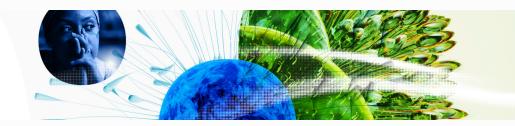

### → Overview of Jamaica's rankings in the seven areas of the GII in 2023

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Jamaica are those that rank above the GII (shown in blue) and the weakest are those that rank below.

### Benchmark of Jamaica against other country groupings for each of the seven areas of the GII Index

The charts shows the relative position of Jamaica (blue bar) against other country groupings (grey bars), for each of the seven areas of the GII Index.

### Strengths

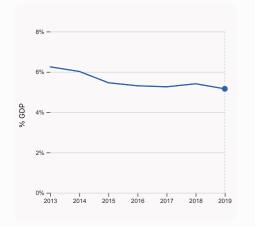

#### Weaknesses

### → Jamaica's innovation system

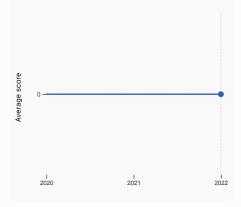

As far as practicable, the plots below present unscaled indicator data.

### > Innovation inputs in Jamaica

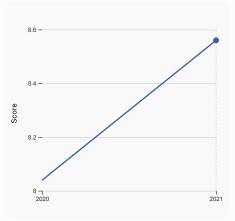

#### 2.1.1 Expenditure on education, % GDP

was equal to 5.16% GDP in 2019, down by 0.25 percentage points from the year prior – and equivalent to an indicator rank of 33.

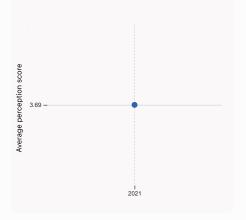

#### 2.3.4 QS university ranking, top 3

was equal to an average score of 0 for the top 3 universities in 2022, equivalent to an indicator rank of 71.

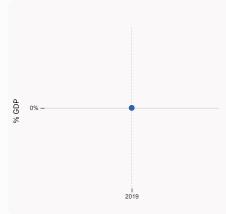

#### 3.1.1 ICT access

was equal to a score of 8.56 in 2021, up by 6.47% from the year prior – and equivalent to an indicator rank of 78.

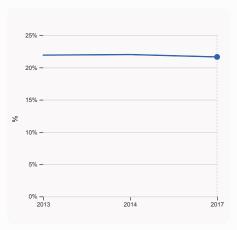

### 4.1.1 Finance for startups and scaleups

was equal to an average perception score of 3.69 in 2021, equivalent to an indicator rank of 69.

4.2.4 VC received, value, % GDP was equal to 0 % GDP in 2019.

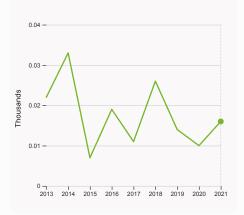

#### 5.1.1 Knowledge-intensive employment, %

was equal to 21.64% in 2017, down by 0.37 percentage points from the year prior – and equivalent to an indicator rank of 71.

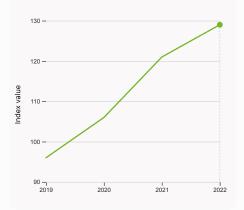

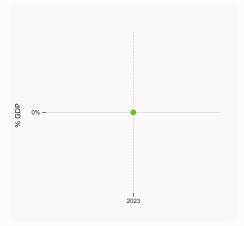

### > Innovation outputs in Jamaica

#### 6.1.1 Patents by origin

was equal to 0.016 Thousands in 2021, up by 60% from the year prior - and equivalent to an indicator rank of 78.

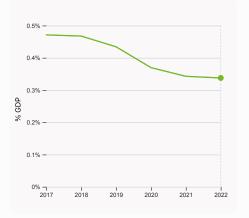

was equal to an index value of 129 in 2022, up by 6.61% from the year prior - and equivalent to an indicator rank of 105.

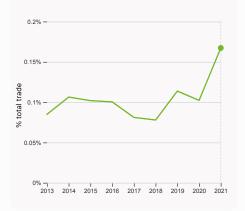

#### 6.2.2 Unicorn valuation, % GDP

was equal to 0 % GDP in 2023 - and equivalent to an indicator rank of 48.

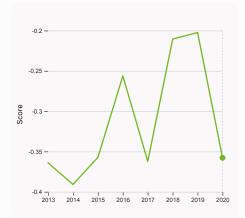

6.2.3 Software spending, % GDP

was equal to 0.338% GDP in 2022, down by 0.0051 percentage points from the year prior and equivalent to an indicator rank of 29.

#### 6.3.1 Intellectual property receipts, % total trade

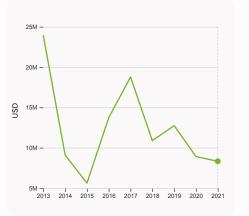

was equal to 0.167% total trade in 2021, up by 0.065 percentage points from the year prior and equivalent to an indicator rank of 51.

#### 6.3.2 Production and export complexity

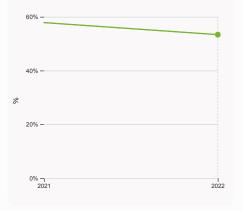

was equal to a score of -0.358 in 2020, down by 76.73% from the year prior - and equivalent to an indicator rank of 82.

#### 6.1.5 Citable documents H-index

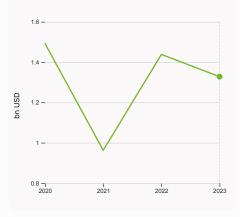

#### 6.3.3 High-tech exports

was equal to 8,325,844 USD in 2021, down by 6.48% from the year prior – and equivalent to an indicator rank of 114.

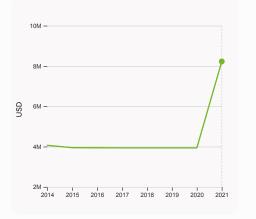

#### 7.1.1 Intangible asset intensity, top 15, %

was equal to 53.37% in 2022, down by 4.48 percentage points from the year prior – and equivalent to an indicator rank of 45.

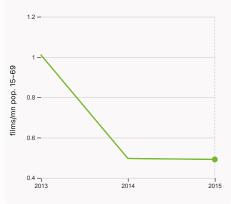

7.1.3 Global brand value, top 5,000

was equal to 1.328 bn USD in 2023, down by 7.67% from the year prior – and equivalent to an indicator rank of 25.

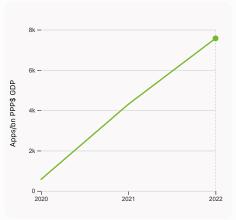

#### 7.2.1 Cultural and creative services exports

was equal to 8,228,000 USD in 2021, up by 108.94% from the year prior – and equivalent to an indicator rank of 77.

#### 7.2.2 National feature films/mn pop. 15-69

was equal to 0.492 films/mn pop. 15–69 in 2015, down by 0.94% from the year prior – and equivalent to an indicator rank of 71.

#### 7.3.4 Mobile app creation/bn PPP\$ GDP

was equal to 7,570.66 Apps/bn PPP\$ GDP in 2022, up by 76.1% from the year prior – and equivalent to an indicator rank of 103.

### → About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a "tool for action" for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
