

The Global Innovation Index (GII) ranks world economies according to their innovation capabilities.

Consisting of **roughly 80 indicators**, grouped into innovation inputs and outputs, the GII **aims to capture the multi-dimensional facets of innovation**.

Nepal ranking in the Global Innovation Index 2023

The table shows the rankings of Nepal over the past four years. Data availability and changes to the GII model framework influence year-onyear comparisons of the GII rankings. The statistical confidence interval for the ranking of Nepal in the GII 2023 is between ranks 103 and 110.

	GII Position	Innovation Inputs	Innovation Outputs
2020	95th	89th	106th
2021	111st	99th	116th
2022	111st	106th	111st
2023	108th	106th	103rd

Nepal performs better in innovation outputs than innovation inputs in 2023.

This year Nepal ranks 106th in innovation inputs. This position is the same as last year.

Nepal ranks 103rd in innovation outputs. This position is higher than last year.

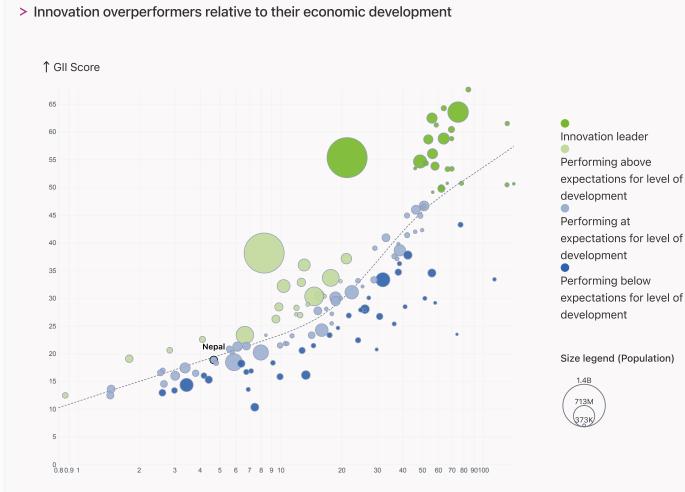

→ Expected vs. observed innovation performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

> Relative to GDP, Nepal's performance is at expectations for its level of development.

 \rightarrow GDP per capita, PPP logarithmic scale (thousands of \$)

→ Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

→ Overview of Nepal's rankings in the seven areas of the GII in 2023

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Nepal are those that rank above the GII (shown in blue) and the weakest are those that rank below.

Benchmark of Nepal against other country groupings for each of the seven areas of the GII Index

The charts shows the relative position of Nepal (blue bar) against other country groupings (grey bars), for each of the seven areas of the GII Index.

> Lower-Middle-Income economies

Nepal performs below the lower-middle-

income group average in Knowledge and technology outputs, Creative outputs, Human capital and research, Infrastructure, Institutions.

> Central And Southern Asia

Nepal performs below the regional average in Knowledge and technology outputs, Creative outputs, Human capital and research, Infrastructure, Institutions.

Creative outputs

Top 10 | 56.09

Central and Southern Asia | 17.93

Lower middle income | 16.35

→ Innovation strengths and weaknesses in Nepal

The table below gives an overview of the indicator strengths and weaknesses of Nepal in the GII 2023.

Nepal's main innovation strengths are Loans from microfinance institutions, % GDP (rank 1), Gross capital formation, % GDP (rank 5) and High-tech imports, % total trade (rank 18).

Rank Code Indicator name Code Indicator name Rank Loans from microfinance institutions, % GDP 1 4.1.3 129 5.3.3 ICT services imports, % total trade Gross capital formation, % GDP 5 3.2.3 125 4.3.1 Applied tariff rate, weighted avg., % 5.3.2 6.3.3 18 High-tech imports, % total trade 124 High-tech exports, % total trade 36 4.1.2 Domestic credit to private sector, % GDP 121 6.2.3 Software spending, % GDP Labor productivity growth, % 2.1.5 38 6.2.1 121 Pupil-teacher ratio, secondary 42 7.2.2 National feature films/mn pop. 15-69 95 5.2.5 Patent families/bn PPP\$ GDP 7.3.4 Mobile app creation/bn PPP\$ GDP 74 7.1.3 Global brand value, top 5,000 51 56 7.1.2 Trademarks by origin/bn PPP\$ GDP 71 2.3.4 QS university ranking, top 3 4.3.2 Domestic industry diversification 6.2.2 Unicorn valuation, % GDP 58 48 2.3.3 69 6.1.4 Scientific and technical articles/bn PPP\$ GDP 40 Global corporate R&D investors, top 3, mn US\$

Strengths

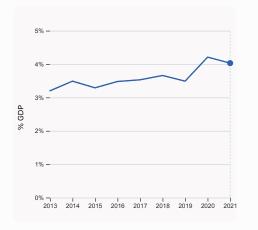

Weaknesses

→ Nepal's innovation system

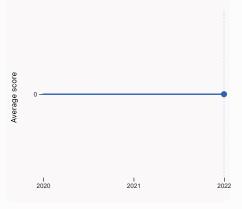

As far as practicable, the plots below present unscaled indicator data.

> Innovation inputs in Nepal

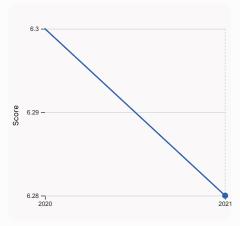

2.1.1 Expenditure on education, % GDP

was equal to 4.03% GDP in 2021, down by 0.18 percentage points from the year prior – and equivalent to an indicator rank of 69.

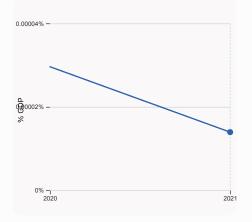

2.3.4 QS university ranking, top 3

was equal to an average score of 0 for the top 3 universities in 2022, equivalent to an indicator rank of 71.

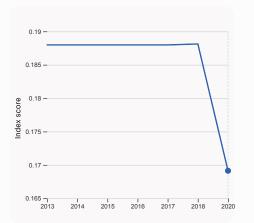

3.1.1 ICT access

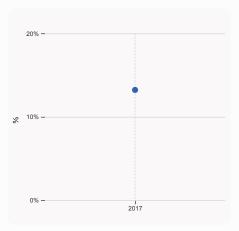

was equal to a score of 6.28 in 2021, down by 0.32% from the year prior – and equivalent to an indicator rank of 116.

4.2.4 VC received, value, % GDP

was equal to 0.00001% GDP in 2021, down by 0.000016 percentage points from the year prior – and equivalent to an indicator rank of 94.

4.3.2 Domestic industry diversification

was equal to an index score of 0.169 in 2020, down by 10.099% from the year prior – and equivalent to an indicator rank of 58.

5.1.1 Knowledge-intensive employment, %

was equal to 13.23 % in 2017, equivalent to an indicator rank of 98.

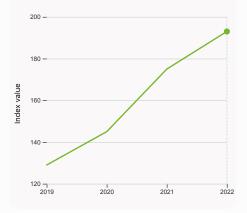

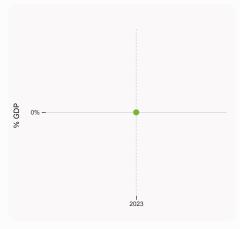

> Innovation outputs in Nepal

6.1.1 Patents by origin

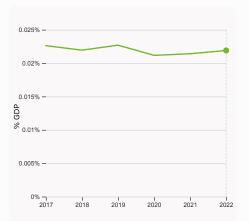

was equal to 0.02 Thousands in 2017, up by 81.82% from the year prior – and equivalent to an indicator rank of 101.

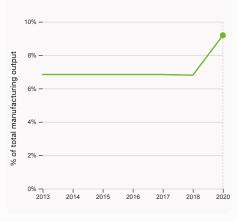

6.2.2 Unicorn valuation, % GDP

was equal to 0 % GDP in 2023 – and equivalent to an indicator rank of 48.

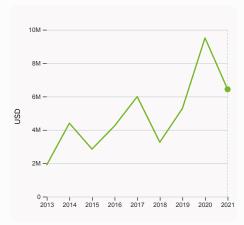

6.2.3 Software spending, % GDP

was equal to 0.022% GDP in 2022, up by 0.00049 percentage points from the year prior – and equivalent to an indicator rank of 121.

6.2.4 High-tech manufacturing, %

was equal to 9.19% of total manufacturing output in 2020, up by 2.39 percentage points from the year prior – and equivalent to an indicator rank of 94.

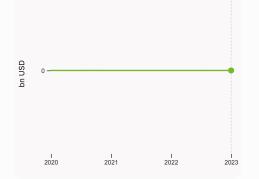

6.3.3 High-tech exports

was equal to 6,433,373 USD in 2021, down by 32.38% from the year prior – and equivalent to an indicator rank of 124.

6.1.5 Citable documents H-index

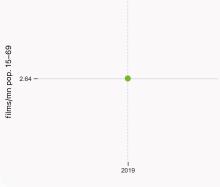

was equal to an index value of 193 in 2022, up by 10.29% from the year prior – and equivalent to an indicator rank of 86.

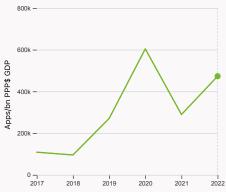

7.1.3 Global brand value, top 5,000

was equal to 0 bn USD in 2023 – and equivalent to an indicator rank of 74.

was equal to 2.64 films/mn pop. 15–69 in 2019 – and equivalent to an indicator rank of 42.

7.3.4 Mobile app creation/bn PPP\$ GDP

was equal to 473,073.12 Apps/bn PPP\$ GDP in 2022, up by 63.44% from the year prior – and equivalent to an indicator rank of 51.

→ About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a "tool for action" for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
