

LITHUANIA

39th

Lithuania ranks 39th among the 132 economies featured in the GII 2022.

The Global Innovation Index (GII) ranks world economies according to their innovation capabilities. Consisting of roughly 80 indicators, grouped into innovation inputs and outputs, the GII aims to capture the multi-dimensional facets of innovation.

The following table shows the rankings of Lithuania over the past three years, noting that data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Lithuania in the GII 2022 is between ranks 37 and 40.

Rankings for Lithuania (2020–2022)

GIIYR	GII	Innovation inputs	Innovation outputs
2020	40	36	42
2021	39	35	43
2022	39	34	47

- Lithuania performs better in innovation inputs than innovation outputs in 2022.
- This year Lithuania ranks 34th in innovation inputs, higher than both 2021 and 2020.
- As for innovation outputs, Lithuania ranks 47th. This position is lower than both 2021 and 2020.

35th

Lithuania ranks 35th among the 48 high-income group economies.

25th

Lithuania ranks 25th among the 39 economies in Europe.

EXPECTED VS. OBSERVED INNOVATION PERFORMANCE

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

Relative to GDP, Lithuania's performance is below expectations for its level of development.

The positive relationship between innovation and development

EFFECTIVELY TRANSLATING INNOVATION INVESTMENTS INTO INNOVATION OUTPUTS

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

Lithuania produces less innovation outputs relative to its level of innovation investments.

Innovation input to output performance

Income ● High income ● Upper middle ● Lower middle ● Low income — Fitted line

BENCHMARKING AGAINST OTHER HIGH-INCOME GROUP ECONOMIES AND EUROPE

The seven GII pillar scores for Lithuania

High-income group economies

Lithuania performs below the high-income group average in all GII pillars.

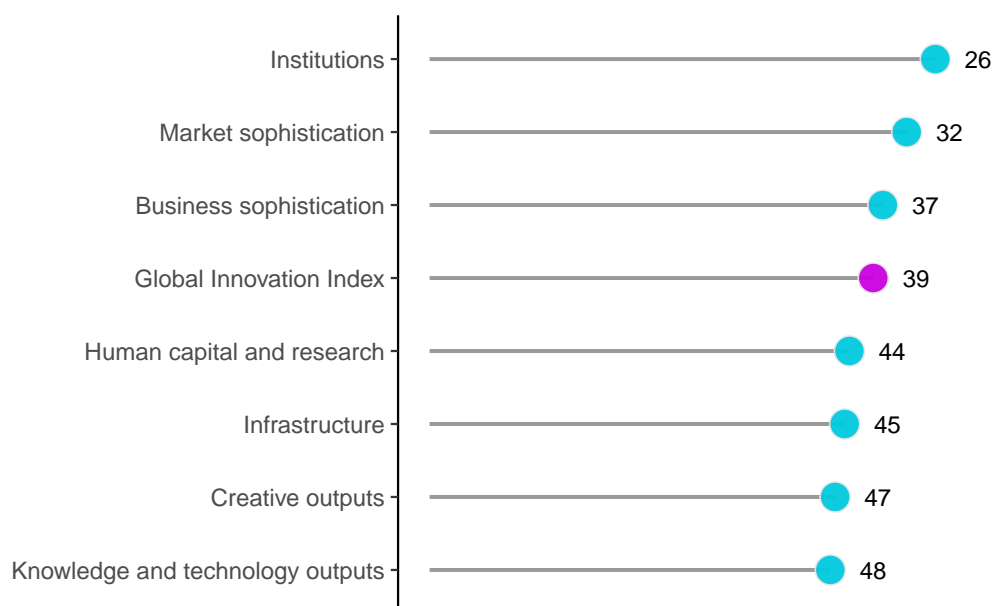

Europe

Lithuania performs above the regional average in two pillars, namely: Institutions; and, Market sophistication.

OVERVIEW OF RANKINGS IN THE SEVEN GII 2022 AREAS

Lithuania performs best in Institutions and its weakest performance is in Knowledge and technology outputs.

The seven GII pillar ranks for Lithuania

Note: The highest possible ranking in each pillar is 1.

The full WIPO Intellectual Property Statistics profile for Lithuania can be found at:

https://www.wipo.int/ipstats/en/statistics/country_profile/profile.jsp?code=LT.

INNOVATION STRENGTHS AND WEAKNESSES

The table below gives an overview of the indicator strengths and weaknesses of Lithuania in the GII 2022.

Strengths and weaknesses for Lithuania

Strengths			Weaknesses		
Code	Indicator name	Rank	Code	Indicator name	Rank
1.1.1	Political and operational stability	10	2.1.2	Government funding/pupil, secondary, % GDP/cap	75
2.1.5	Pupil-teacher ratio, secondary	8	2.3.3	Global corporate R&D investors, top 3, mn USD	38
3.1.1	ICT access	14	3.2.1	Electricity output, GWh/mn pop.	89
3.3.3	ISO 14001 environmental certificates/bn PPP\$ GDP	12	3.2.3	Gross capital formation, % GDP	121

NOTES: ● indicates a strength; ○ a weakness; ◆ an income group strength; ◇ an income group weakness; * an index; † a survey question. ○ indicates that the economy's data are older than the base year; see appendices for details, including the year of the data, at https://www.wipo.int/global_innovation_index/en/2022. Square brackets [] indicate that the data minimum coverage (DMC) requirements were not met at the sub-pillar or pillar level.

DATA AVAILABILITY

The following tables list indicators that are either missing or outdated for Lithuania.

Missing data for Lithuania

Code	Indicator name	Economy year	Model year	Source
4.1.3	Loans from microfinance institutions, % GDP	n/a	2020	International Monetary Fund, Financial Access Survey (FAS)
4.2.1	Market capitalization, % GDP	n/a	2020	World Federation of Exchanges
6.1.3	Utility models by origin/bn PPP\$ GDP	n/a	2020	World Intellectual Property Organization
7.2.3	Entertainment and media market/th pop. 15–69	n/a	2021	PwC, GEMO

Outdated data for Lithuania

Code	Indicator name	Economy year	Model year	Source
2.1.1	Expenditure on education, % GDP	2018	2020	UNESCO Institute for Statistics
4.3.2	Domestic industry diversification	2013	2019	United Nations Industrial Development Organization
6.2.5	High-tech manufacturing, %	2013	2019	United Nations Industrial Development Organization

LITHUANIA'S INNOVATION SYSTEM

As far as practicable, the plots below present unscaled indicator data.

Innovation inputs

2.1.1 Expenditure on education was equal to 3.9% GDP in 2018—up by 2 percentage points from the year prior—and equivalent to an indicator rank of 81.

2.2.2 Graduates in science and engineering was equal to 26.0% of tert. grads in 2020—down by 5 percentage points from the year prior—and equivalent to an indicator rank of 34.

2.3.1 Researchers was equal to 3.7 FTE/thsd pop. in 2020—up by 7 percentage points from the year prior—and equivalent to an indicator rank of 28.

2.3.2 Gross expenditure on R&D was equal to 1.2% GDP in 2020—up by 16 percentage points from the year prior—and equivalent to an indicator rank of 35.

2.3.4 QS university ranking was equal to 19.4 in 2021—down by 2 percentage points from the year prior—and equivalent to an indicator rank of 52.

3.1.1 ICT access was equal to 9.4 in 2020 and equivalent to an indicator rank of 14.

4.2.4 Venture capital received was equal to 0.4 bn USD in 2021—up by 4460 percentage points from the year prior—and equivalent to an indicator rank of 20.

4.3.2 Domestic industry diversification was equal to 0.2 in 2013—up by 3 percentage points from the year prior—and equivalent to an indicator rank of 59.

5.1.1 Knowledge-intensive employment was equal to 620.1 thsd people in 2021—up by 4 percentage points from the year prior—and equivalent to an indicator rank of 22.

Innovation outputs

6.1.1 Patents by origin was equal to 145.0 in 2020—up by 22 percentage points from the year prior—and equivalent to an indicator rank of 57.

6.1.5 Citable documents H-index was equal to 265.0 in 2021—up by 20 percentage points from the year prior—and equivalent to an indicator rank of 60.

6.2.5 High-tech manufacturing was equal to 17.0% of mfg. output in 2013—down by 6 percentage points from the year prior—and equivalent to an indicator rank of 69.

6.3.1 Intellectual property receipts was equal to 8.3 mn USD in 2020—down by 88 percentage points from the year prior—and equivalent to an indicator rank of 61.

6.3.2 Production and export complexity was equal to 0.8 in 2019—down by 6 percentage points from the year prior—and equivalent to an indicator rank of 33.

6.3.3 High-tech exports was equal to 2.6 bn USD in 2020—up by 4 percentage points from the year prior—and equivalent to an indicator rank of 28.

7.1.1 Intangible asset intensity was equal to 28.2% of total value in 2021 and equivalent to an indicator rank of 68.

7.1.3 Global brand value was equal to 0.0 mn USD in 2021—down by 100 percentage points from the year prior—and equivalent to an indicator rank of 77.

7.2.1 Cultural and creative services exports was equal to 336.8 mn USD in 2020—up by 18 percentage points from the year prior—and equivalent to an indicator rank of 35.

ABOUT THE GLOBAL INNOVATION INDEX

The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.

Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a “tool for action” for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
