Note: The rankings are based on total number of applications by origin. Patent data refer to the number of equivalent patent applications. Trademark data refer to the number of equivalent trademark applications based on class count (i.e., the number of classes specified in applications). Industrial design data refer to the number of equivalent industrial design applications based on design count (i.e., the number of designs contained in applications). D.P.R. of Korea = Democratic People's Republic of Korea. The table reports origins for which at least two types of IP data are available.

(1) 2010 patent data.

(2) 2010 trademark data.

(3) 2010 industrial design data.

(4) Data on patent applications at the national IP office are not available; however, applications at regional IP offices are included.

(5) Data on trademark applications at the national IP office are not available; however, applications at regional IP offices are included.

(6) Data on industrial design applications at the national IP office are not available; however, applications at regional IP offices are included.

(7) Trademark data are estimated.
