

**Collaborating to mobilize
the power of intellectual property
for global health**

Our vision

Improved global health through innovation that mobilizes intellectual property and the power of private and public sector collaborations.

Our mission

Accelerate the discovery and development of technologies for neglected tropical diseases, malaria and tuberculosis by sharing intellectual property with the global health research community, catalyzing and fostering global health collaborations, and contributing to capacity-building in developing countries.

WIPO Re:Search aims to catalyze the development of medical products for neglected tropical diseases, malaria and tuberculosis through innovative research partnerships and knowledge sharing. Our expanding membership includes over 130 institutions from around the world – pharmaceutical companies, universities, research institutions, non-profits and more.

- Access our online resource platform for assets (compounds, data/reagents, samples, technologies and assays, expertise, and facilities) shared by our Members, and for information on collaborations and outcomes within the WIPO Re:Search consortium.
- Have your organization become a Member and benefit from the services of the Partnership Hub, which actively facilitates collaborations that further your research.
- Take advantage of our supporting services – fellowship opportunities, publications, workshops, training, databases, and more.
