

## **RAW Life PRIMU - Project Summary**

RAW Life PRIMU is a global initiative to ensure healthy physical development of children through state-supported, orthopedic school shoes integrated with smart sensors. Our mission is to establish a medically approved, mandatory school shoe program based on biomechanical, neurodevelopmental, and social responsibility principles.

As a founder-led innovation, we emphasize domain name protection and IP security at early stages to safeguard mission-driven projects. We seek to contribute to global discourse on digital identity and responsible domain management through the UDRP framework.
