

**LIST OF CLASSES OF GOODS AND SERVICES
WITH EXPLANATORY NOTES**

GUIDANCE FOR THE USER

1. The indications of goods or services appearing in the List of Classes are general indications relating to the areas to which the goods or services in principle belong.

2. For ascertaining the exact classification of each individual product or service, the Alphabetical List and the Explanatory Notes which accompany the List of Classes should be consulted.

3. If a product cannot be classified with the aid of the List of Classes, the Explanatory Notes or the Alphabetical List, the General Remarks give the criteria of classification that should be applied.

4. The Alphabetical List of Goods and Services is reproduced in two sets of five columns on each page:

the first column gives the numbers of the classes in which the goods or services are placed;

the second column gives the serial numbers of the indications of goods or services in English;

the third column gives the indications of goods or services in English;

the fourth column gives the serial numbers of the corresponding French indications of goods or services;

the fifth column gives the basic numbers* of the indications of goods or services.

5. The fact that a general term is given in the Alphabetical List of Goods and Services in relation to a particular class of goods or services does not rule out the possibility of that term appearing also in connection with other classes, depending on the way in which it is qualified. In such cases the general term is marked with an asterisk in the Alphabetical List.

6. For the purposes of the registration of marks, it is highly recommended to use terms appearing in the Alphabetical List as indications of goods or services, with the exception of general terms which are not further qualified.

7. The fact that a product or service indication figures in the Alphabetical List does not in any way prejudice the decisions of national industrial property offices as to the possibility of registering a mark for that product or service (see Article 2(1) of the Nice Agreement).

* While the serial number of a given product or service (see second and fourth columns) is specific to each language of the Classification, its basic number is the same for every language version of the Classification published by or in collaboration with WIPO.

The basic numbers allow translations of the indications of goods or services appearing in the Alphabetical List to be found in other language versions. For this purpose it is necessary to consult the "Cross-Reference Table" (WIPO publication N°500.4) and the editions of the Classification in the languages concerned.

LIST OF CLASSES OF GOODS AND SERVICES WITH EXPLANATORY NOTES

GENERAL REMARKS

The indications of goods or services appearing in the List of Classes are general indications relating to the field to which, in principle, the goods or services belong. The Alphabetical List should therefore be consulted in order to make sure of the classification of each specific product or service.

Goods

(1) If a product cannot be classified in accordance with the List of Classes or with the Alphabetical List, the following remarks indicate the criteria to be applied:

(a) Finished products are classified, in principle, according to their function or purpose; if that criterion is not provided for in the List of Classes, finished products are classified by analogy with other comparable finished products contained in the Alphabetical List. If none is found, other subsidiary criteria such as that of the material of which the goods are made or the mode of operation are applied.

(b) Finished products, which are multipurpose composite objects (e.g. clocks incorporating radios), may be classified in all the classes that correspond to each of their functions or intended purposes. If those criteria are not provided in the List of classes, then other criteria indicated under (a) are to be applied.

(c) Raw materials, unworked or semi-worked, are classified, in principle, according to the material of which they consist.

(d) Goods intended to form part of another product are, in principle, classified in the same class as that product only in cases where the same type of goods cannot normally be used for another purpose. In all other cases, criterion (a) applies.

(e) Where goods, whether finished or not, are classified according to the material of which they are made and where they are made of different materials, such goods are in principle classified according to the material which predominates.

(f) Cases adapted to the product they are intended to contain are classified, in principle, in the same class as the product.

Services

(2) If a service cannot be classified in accordance with the Alphabetical List, the following remarks indicate the criteria to be applied:

(a) Services are classified, in principle, according to the branches of activity specified in the headings of the service classes and their Explanatory Notes or, subsidiarily, by analogy with other comparable services contained in the Alphabetical List.

(b) Rental services are classified, in principle, in the same classes as the services provided by means of the rented objects (e.g. Rental of telephones, Cl. 38).

(c) Services that cannot be classified according to the criteria indicated under (a) are classified, in principle, in Class 42.
