PREAMBLE

This Manual is prepared in response to a recommendation made by Member States of the World Intellectual Property Organization (WIPO) at the Eleventh Session of the Committee on Development and Intellectual Property (CDIP) which called for more transparency in the delivery of WIPO technical assistance and requested WIPO to compile existing technical assistance related materials into a comprehensive Manual on delivery of technical assistance.¹

The Manual seeks to serve as a portal to technical assistance activities and services offered by WIPO. It is addressed to Member States, institutions and individuals interested in WIPO technical assistance programs in developing countries, least developed countries and countries in transition.

The Manual is presented in a single user-friendly document.

In its introduction, it highlights the overriding goal of technical assistance and the WIPO Development Agenda principles guiding technical assistance delivery.

The first section gives an overview of the main features of technical assistance policies and processes that have been put in place to facilitate technical assistance delivery, monitoring and evaluation.

Lastly, the Manual highlights the main areas of technical assistance and related activities to enable interested individuals and institutions make informed choices as regards WIPO technical assistance programs.

The Manual’s content is drawn from WIPO reports and materials on development tools and services, WIPO Program and Budget, Program performance reports, and various internal notes on technical assistance and capacity building.

CONTENTS

INTRODUCTION

I. OBJECTIVES AND DEVELOPMENT AGENDA PRINCIPLES

II. MAIN FEATURES OF WIPO TECHNICAL ASSISTANCE
   (a) WIPO Technical Assistance Policies and Guidelines
   (b) Delivery Strategy
   (c) Beneficiaries
   (d) Sources of Funds:
      (i) Regular budget
      (ii) Funds-in-Trusts
      (iii) Voluntary contributions

III. DELIVERY OF TECHNICAL ASSISTANCE, FEATURES AND PROCESSES
   (a) Modes of Cooperation
   (b) Processes for:
      (i) Developing Country Plans and National Intellectual Property Strategies
      (ii) Monitoring and Evaluation of Development Cooperation Activities
      (iii) Requesting Assistance
   (c) Criteria for Approval of the Assistance and Time-Frame for its Delivery
   (d) Guidelines for Collaboration with Partners
      (i) Timeframe for Program and Budget Planning
      (ii) Rules and Procedures for Organizing Events in collaboration with WIPO
      (iii) Rules for Engaging Speakers and Lecturers
      (iv) Travel Procedures
   (e) Process for Engaging other Providers in Delivery of Development Cooperation Activities
   (f) Development-related databases:
      (i) Technical assistance database (TAD)
      (ii) Roster of consultants (ROC)
      (iii) Matchmaking database

IV. DEVELOPMENT COOPERATION PROGRAMS AND ACTIVITIES

   Part 1: Main areas of activities and related tools

   (Title of each program/activity, brief description, service provider and partners, focal point within WIPO, and web site link)

   (a) Designing and implementation of national, institutional and sectoral IP strategies
   (b) Enhancing access to knowledge and exchange of technologies:
      (i) Infrastructure creation (TISC, )
      (ii) Online Databases (Patentscope, IP Advantage, ARDI, ASPI)
      (iii) Platforms such as Re-Search, WIPO-Green
      (iv) Patent information services (State of the art search, Patent landscape reports)
   (c) Enhancing technical and knowledge infrastructure:
      (i) IPAS
      (ii) Work-sharing platforms (regional/sub-regional)
(d) Providing legislative assistance and policy advice
   (i) Industrial property
   (ii) Copyright

(e) Providing support and advice for the protection of traditional knowledge, traditional cultural expressions and genetic resources

(f) Use of IP tools for branding and adding value to local products

(g) Capacity Building for:
   (i) Industrial property administration and management
   (ii) Copyright administration and management
   (iii) IP assets creation, use and management by small and medium-sized enterprises (SMEs), universities and research and development institutions (RDIs)
   (iv) IP rights enforcement

(h) IP teaching at the national and regional levels:
   (i) National and Regional IP Academies, Master of Laws in IP, Start-up Academies, Colloquium for teachers of IP, Distance Learning, Summer school, Training of trainers
   (ii) Enhancing the inclusion of IP in national innovation systems
   (j) Strengthening interregional, regional and sub-regional cooperation
   (k) Partnerships with the United Nations Agencies and Intergovernmental Organizations (IGOs)
   (l) Arbitration and mediation related services
   (m) Enhancing public awareness about IP
   (n) Tools for countries in transition
   (o) Economic studies
   (p) Providing support and advice in mobilizing resources and partnerships for IP

Part 2: Assistance to Least Developed Countries (LDCs)

ANNEXES

1. Summary by the Chair of the Eleventh Session of the Committee on Development and Intellectual Property (CDIP) with annexed Recommendations of the Joint Proposal by the Development Agenda Group and the Africa Group on WIPO Technical Assistance in the Area of Cooperation for Development.

3. List of principles, recommendations and WIPO instructions guiding provision of technical assistance.
INTRODUCTION

I. OBJECTIVES AND DEVELOPMENT AGENDA PRINCIPLES

Technical assistance stems from the initial mandate of the World Intellectual Property Organization (WIPO) which is, *inter alia*, to promote the protection of intellectual property (IP) throughout the world through cooperation among States and, where appropriate, in collaboration with any other international organization. To achieve this mandate, the Convention establishing WIPO specified in its article 4 (v) that the Organization shall offer its cooperation among States requesting legal-technical assistance in the field of technical assistance. This role was re-emphasized by the Agreement signed in 1974 between the United Nations and WIPO which called for cooperation in providing technical assistance for development in the field of intellectual creation and promoting and facilitating transfer of technology to developing countries.

In 2007, the Assembly of WIPO Member States adopted the Development Agenda which led to the mainstreaming of development into the work of the Organization and set as guiding principles that cooperation activities should be:

- development-oriented;
- demand-driven;
- transparent;
- country-specific; and

should take into account special needs, priorities, and different levels of development of Member States, with particular attention to the least developed countries (LDCs).

In the light of the above-mentioned mandate and Development Agenda principles, the primary objectives of WIPO technical assistance are to:

- Help developing countries to reap the benefits of the IP system
- Reduce the knowledge gap between developed and developing countries; and
- Enhance the participation of developing countries in the global innovation economy; and their use of IP for development.

II. MAIN FEATURES OF WIPO TECHNICAL ASSISTANCE

(a) WIPO Technical Assistance Policies and Guidelines

The main characteristic of WIPO technical assistance, since inception in the 70’s is that technical assistance policies have continuously evolved to adjust to the changing intellectual property challenges on the global market. In the early years and in accordance with the mandate of the Organization, the focus of technical assistance was on provision of legal support towards the establishment of appropriate intellectual property infrastructure and administration in the Member States. The main thrust of the assistance was to build an adequate intellectual property legal and administrative infrastructure in all developing countries.

---

1 WIPO Article 3(i) of the Convention establishing the World Intellectual Property Organization.
The globalization of trade and the adoption of the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) in 1994 with the establishment of the World Trade Organization (WTO) in 1995 and the digital revolution in the nineties brought fundamental transformations in the economic, social and cultural environment which resulted in a major shift in WIPO technical assistance. At the request of Member States, WIPO technical assistance changed its focus to take into account the challenges resulting from the membership in WTO, which implied the acceptance of specific norms contained in the TRIPS Agreement. WIPO technical assistance priority became to help developing and least developed countries understand their international obligations and make informed policy choices as regards TRIPS implementation. To this end, WIPO and WTO signed in 1995 a cooperation agreement that enabled the two organizations to provide coordinated legal and legislative support to their respective Member States with a view to raising awareness on TRIPS international obligations, and jointly conducting capacity building programs at the national, sub-regional, regional and inter-regional levels. Concurrently, WIPO engaged in the modernization of IP offices with a view to improving IP services to users.

In the late nineties, WIPO, as part of its drive to demystify IP, gradually broadened the scope of its technical assistance program to embrace new and emerging issues such as IP and electronic commerce, IP and small and medium sized enterprises, IP and biotechnology, the protection of traditional knowledge, genetic resources and traditional cultural expressions of folklore, IP and creative industries. In so doing, WIPO also aimed to enhance developing countries’ capacity to harness the potentials of their IP systems. Consequently, technical assistance gained in visibility and the demand for assistance increased tremendously.

The adoption of the Millennium Development Goals (MDGs) by the United Nations General Assembly in 2000 marked another milestone in IP policies. The MDGs brought to focus the concept of sustainable development in the assistance provided by United Nations organizations and agencies to developing and least developed countries. This meant for IP the introduction of the concept of balancing the protection of IP and the benefits to society and social development. While continuing to provide the traditional legal and capacity-building assistance, emphasis moved to raising awareness on TRIPS flexibilities, developing the capacity of Member countries to create, own, manage and commercially exploit their IP assets, and on the formulation and implementation of national and institutional IP policies and strategies as frameworks for coherent, strategic and effective use of IP for development.

Since 2008, at the request of the Committee on Development and Intellectual Property (CDIP), WIPO engaged a process of mainstreaming development considerations into all its activities and debates. This last shift has resulted in the formulation and implementation of concrete and impactful projects and the development of various tools and services aimed at enhancing capacity to use and leverage IP for economic, socio-cultural and technological development.

(b) Delivery Strategy

The strategy for delivery of technical assistance seeks to:
– develop sustained countries’ capacity in formulation and implementation of national IP policies and strategies that provide coherent framework for enhancing the use of IP for development;
– create a reservoir of specialized human capital among policy makers, IP administrators, law practitioners, technology managers, the judiciary, IP stakeholders and creators and copyright and related right users in creative industries. This is mainly addressed through the WIPO Academy;
– assist in building institutions that support IP assets creation and management in universities, research and development institutions, small and medium-sized enterprises and creative industries;
– establish modern IP business infrastructure to reinforce and improve the quality and efficiency of service delivery to the IP stakeholders and users, including knowledge transfer to local staff;
– create partnerships at national and regional levels to expand the programs reach. This is done through cooperation agreements and Memoranda of understanding with various partner institutions and organizations such as the African Regional Intellectual Property Organization (ARIPO), the African Intellectual Property Organization (OAPI), the ASEAN Working Group on Intellectual Property Cooperation, the BIMST Economic Cooperation, the Pacific Islands Forum Countries, the Andean Community of Nations, the Caribbean Community, the Common Market of the South, the Organization of Eastern Caribbean States, the Secretariat for Central American Integration, various universities, national and regional IP Academies; and
– foster the participation of developing Member countries, LDCs and countries in transition in international IP debates, and create platforms for dialogue and sharing of experiences to enhance intra and inter regional cooperation, including South-South cooperation.

In delivering technical assistance and upon request, WIPO:

– provides legal, policy, and technical expert advice at institutional, national and regional levels;
– conducts distance learning and face-to-face training programs, and provides fellowships for Masters in IP Law;
– organizes study visits for training of officials in various aspects of IP administration and governance of copyright management organizations, on-the-job training of IP officials in more advanced IP offices;
– organizes workshops, seminars, high-level conferences, symposia and colloquia on various IP issues of relevance to developing countries and LDCs;
– conducts studies and enables access to various technical and scientific databases to enhance the knowledge of IP and inform on policy choices; and
– develops infrastructure and provides technical support as part of infrastructure development projects which are often subject to signing of service level agreements between WIPO and beneficiary countries or organizations to ensure ownership and commitment of the country or organization concerned in the implementation process.

In so doing, WIPO addresses country needs and priorities, keeps regional balances and, through its focal points, maintains continuous dialogue with national IP Offices and regional IP organizations to ensure ownership of the activities. The same principles apply to Development Agenda projects and activities carried out under the Funds-in-trust.
The beneficiaries of WIPO technical assistance are 87 developing countries, 49 least developed countries and 33 countries in transition in Europe and Asia, making a total of 169 countries.

Governments are the primary beneficiaries of WIPO technical assistance which is particularly directed to different governmental departments, policy and decision-makers, parliamentarians, the academia, IP rights holders, potential creators and innovators, research and development centers, agencies responsible for building respect of IP, small and medium and large sized enterprises and industries, consumers, and the civil society.

WIPO conducts programs aimed at improving the youth’s knowledge and understanding of IP and its challenges on the global market.

Intergovernmental and non-governmental organizations which have signed cooperation agreements with WIPO also benefit from its technical assistance through exchange of information on issues of mutual interest, IP legal and policy advice, exposure to IP through study visits or training courses and participation in WIPO meetings and other activities.

WIPO is a self-financed Organization. Ninety three percent of the total budget for 2012/13 was self-financed.

Technical assistance activities and services are funded from the regular budget and voluntary contributions channeled through Funds-in trust arrangements with bilateral donors and development agencies. A third source of funds is financial or in-kind voluntary contributions made by bilateral donors, inter-governmental and non-governmental organizations to cover specific activities.

According to the Annual financial report and financial statements for 2012, the total of contributions dedicated to technical assistance in the year 2012 amounted to 7.7 million Swiss francs, representing 2.3% of the total WIPO revenue.5

The table below shows the Development share of the 2014-2015 budget representing 22% of the total WIPO budget.

---

Development Share of 2014/2015 Budget by Strategic Goal
(in thousands of Swiss francs and as % of proposed budget per goal)

Source: Approved WIPO Program and Budget for the 2014/15 Biennium
(i) **Regular budget**

The regular budget constitutes the largest source of funds for WIPO technical assistance program. It covers a broad range of activities, including legal and legislative assistance, IP policies and strategies formulation, infrastructure development for modernization and efficient management of IP offices, institutional and human resources development with particular emphasis on enhancing innovation and creative capacity, and improving the use of IP by small and medium enterprises, research and development institutions, and creative industries to increase their competitiveness on the global market, as well as participation in various IP policy debates.

(ii) **Funds-in-Trusts (FITs)**

FITs constitute an important source of resources for technical assistance activities that complement those from the regular budget. In 2012-2013, WIPO managed trust funds from Brazil, Finland, France, Italy, Korea, Japan, Portugal, Spain, and the United States of America. They covered areas such as policy advice, South-South cooperation, modernization of IP infrastructure, developing partnerships and capacity-building in development and implementation of IP policies, innovation, technology transfer and management, use of IP tools for branding of local products and services, copyright, building respect for IP rights.

The FITs are administered by WIPO in accordance with the agreements signed between WIPO and the donors and in keeping with WIPO financial regulations and rules. The modus operandi differs from one donor to another. In general, preliminary consultations are held between WIPO and the donor to determine the objectives, the scope of FIT activities and the recipient countries. Once the agreement is signed and funds disbursed, WIPO undertakes, in close consultation with the donor and the beneficiary countries, the implementation of the projects and activities. Monitoring and evaluation of FIT activities is specified in the agreement.
Funds-in-Trust Contributions towards Programming in 2012/13
(by donor)

WIPO Program and Budget for the 2012/13 Biennium as approved by the Assemblies of the Member States of WIPO on September 29, 2011.
(iii) Other voluntary contributions

Another source of technical assistance resources is the voluntary contributions made available by Member States from developed and developing countries towards specific projects and activities. Some examples are the contribution of South Africa to the Voluntary fund for Accredited Indigenous and Local Communities established in 2005 to facilitate the participation of indigenous people in the Intergovernmental Committee on Traditional knowledge, genetic resources and folklore; the Swedish International Cooperation Agency (SIDA) funding for LDCs capacity building activities, and the China’s State Intellectual Property Office (SIPO) which finances various annual regional and inter-regional cooperation for development activities, as well as the contribution in kind arrangements that WIPO has with certain countries and institutions such as the Memorandum of understanding with Singapore and annual training program with the International Intellectual Property Training Institute (IIPPTI) of Korea.

III. DELIVERY OF TECHNICAL ASSISTANCE, FEATURES AND PROCESSES

(a) Modes of Cooperation

Country plans are the main delivery mode. Projects and activities agreed upon under Funds-in-Trust are the other modes of cooperation with WIPO.

The country plan approach was introduced in the 2012-2013 biennium as a tool for more efficient planning and delivery of technical assistance to developing, LDCs and countries in transition. The Plan is based on country needs, interests
and priority development goals identified through consultations with the countries concerned and internal Organization wide consultations. It spells out technical support to be provided by WIPO as one to individual countries, over a period of two years, with the objective of using IP to contribute to achieving the countries’ development goals. The implementation of the Plan is subject to an annual review and evaluation aligned with WIPO program performance reporting cycle.

Projects are generally designed to respond to specific needs expressed by Member States. As an example, a total of twenty seven projects worth US dollars 25.4 million Swiss Francs had been approved by Member States by 2012 under the WIPO Development Agenda as a response to recommendations from the CDIP and at the end of 2012 eleven projects were still under implementation. The projects address various policy, capacity-building, skills development and infrastructural issues and are implemented at country, regional or inter-regional levels.

Activities carried out under FITs and other voluntary contributions constitute another category. In this regard, the instrument of cooperation is an agreement or Memorandum of understanding or cooperation signed between WIPO and the partner State or Agency specifying the areas of interest and activities, expected results, the time-frame for implementation, recipient countries or region, resources and the schedule for monitoring and evaluation of its implementation. The activities under FITs and associated resources form part of the country plan.

(b) Processes for:

(i) Developing Country Plans and National Intellectual Property Strategies

The country plan is developed in close consultation with the Member State and all key players.

The process of developing a country plan involves:

– the identification of needs, priorities and objectives of the country;
– the identification of country’s expected results or deliverables, activities set to achieve the results, and performance indicators; and
– the identification of resources within WIPO and/or other regional/international organizations, where applicable.

The process is participatory. Each step of the process requires continuous dialogue with the country concerned and horizontal consultations with other WIPO divisions, sectors and programs involved in the implementation of the Plan. The process is driven by WIPO Regional Bureaus or the Department for Transition and Developed Countries considered as the custodian of the country Plan.

A template designed to facilitate and harmonize the processes is reproduced as Annex II.

---

6 WIPO Director General’s Report to the Eleventh Session of the CDIP on the implementation of the Development Agenda, May 2013, p. 14
The process of developing national intellectual property strategies has an equally participatory and all-inclusive approach.

The steps are as follows

- a needs assessment undertaken by local and international consultants and the establishment, by government authorities, of a Steering Committee to spearhead the formulation of the policy and strategy;
- organization of a stakeholders Forum for the validation of the report and conclusions of the needs assessment;
- based on the findings of the report, drafting of the policy and strategy by the drafting committee with the support of WIPO consultants, and submission of the draft text to WIPO for comments;
- review of the draft policy and strategy by WIPO and sending of comments to the drafting committee;
- finalization of the draft document and organization of a stakeholders’ validation Forum;
- submission of the text to government for cabinet approval;
- once adopted, organization of a Forum to raise awareness on the new policy and strategy and agree on the implementation plan; and
- hold further consultations to discuss WIPO possible support and follow-up, and where necessary assist in the identification of potential partners.

(ii) Monitoring and Evaluation of Development Cooperation Activities

The monitoring and evaluation tasks are carried out through the internal oversight coordinated by the Internal Audit Oversight Division (IAOD) and the WIPO Independent Advisory Oversight Committee (IAOC) which assists Member States with oversight of WIPO operations. The main functions of the IAOD are to examine and evaluate, in an independent manner, WIPO’s operations and processes; to bring a systematic approach to evaluate and improve effectiveness; and determine whether expected results have been achieved. The IAOC is composed by seven members representing the seven geographical regions of WIPO Member States.

On a global scale, WIPO engages independent experts for evaluation. Evaluation of extra budgetary activities is carried out at the request of, and in cooperation with concerned parties. In 2010, an Independent External Evaluation of WIPO Technical Assistance in the Area of Cooperation for Development was conducted at the request of the Member States. The report is available on www.wipo.int/about-WIPO/en/oversight/.

Additionally, under the Strategic Realignment Program (SRP), WIPO has put in place a result-based framework that has improved strategic and operational planning of development activities and enhanced self-evaluation capacity. The framework is a valuable tool for providing Member States with better quality performance information on business and other services provided by WIPO. The evaluation is conducted at the end of each year to inform planning for the following year. Evaluation of extra budgetary activities is conducted at the request of, and in cooperation with concerned parties.

Feedback or views related to WIPO technical assistance should be addressed to:
(iii) Requesting Assistance

All requests for assistance should be addressed to:

The Director General
World Intellectual Property Organization (WIPO)
34, Chemin des Colombettes
CH-1211 Geneva 20
Switzerland

Procedures for submitting requests for assistance vary depending on the type of activity as specified below:

- A country or institution interested in WIPO technical assistance should send a letter indicating the type of assistance required, the purpose, the link, if any, to the country’s development goals, the expected outcome, the number and profile of beneficiaries and the most appropriate period for the activity.

- A country or institution interested in participating in a new or an on-going project should send a letter of interest indicating the project concerned, the rationale for the request, the link to the country’s development goals, expected benefits or impact, the beneficiaries, possible local partners (if applicable), the country or institution’s readiness for the support, the most appropriate time-frame.

- Individuals interested in the WIPO Academy courses should complete the application form and submit it to WIPO before the deadline. A catalogue of the annual program and the application form are available on the website of WIPO Academy: [www.wipo.int/academy/en](http://www.wipo.int/academy/en)

It is important to note that countries (developing or least developed) should contact their respective Regional Bureaux (Africa, Arab countries, Asia and the Pacific countries, Latin America and the Caribbean countries) for preliminary and informal consultations, follow-up and/or any information related to WIPO’s technical assistance. In this regard, WIPO Focal points are:

The Regional Director
Regional Bureau for Africa/Arab countries/Asia and the Pacific countries/Latin America and the Caribbean countries
World Intellectual Property Organization (WIPO)
34, Chemin des Colombettes
CH-1211 Geneva 20
Switzerland

Additionally:
WIPO Focal point for assistance related to special needs of the LDCs is:
The Director
Division for Least Developed Countries (LDCs)
WIPO
34, Chemin des Colombettes
CH-1211 Geneva 20
Switzerland

WIPO Focal point for countries in transition in Europe and Asia is:
The Director
Department for Transition and Developed Countries (DTDC)
World Intellectual Property Organization (WIPO)
34, chemin des Colombettes
Ch-1211 Geneva 20
Switzerland

(c) Criteria for Approval of the Assistance and Time Frame for Delivery

Requests for assistance received by WIPO are examined by the relevant Regional Bureau or Sector/Division/Section using the following criteria:

- a formal request must be received by WIPO;
- the activity should be part of the country plan or national IP strategy, a WIPO project or initiative; and
- the activity should address the country’s needs and be in line with its development goals. Technical assistance needs and expectations are identified through systematic needs assessment and/or consultations with the national authorities concerned prior to the formulation of the annual work plan and earmarking of the required budget.

Other criteria include:

- The readiness of the recipient country or institution to receive the support at a mutually agreed time. The extent of preparedness is ascertained through facts finding/needs assessment missions; and
- the availability of resources. Prioritization is done in the process of finalization of the annual work plan and earmarking of budget taking due account of the importance of the activities and the available budget.

All requests for assistance are subject to consultations with relevant Sectors/Divisions within WIPO and with partner institutions.

Applications for participation in the training courses of WIPO Academy should be submitted not later than the deadlines indicated on the website of WIPO Academy, www.wipo.int/academy/en. Requests related to other activities should be submitted at least 14 weeks before the expected date of regional and interregional events, and 10 weeks for national events to allow sufficient time for consultations with key players and internal approval processes.
(d) **Guidelines for Collaboration with Partners**

The delivery of technical assistance program requires collaboration with many partners. Below are some key points for a more efficient planning and implementation of technical assistance activities:

(i) **Timeframe for Program and Budget Planning**

In the framework of the biennial programming cycle, the WIPO annual program and budget covers the period January to December. The Program and Budget planning is conducted between September and November in line with instructions from the WIPO Financial Controller. The planning steps include consultations with beneficiary countries and institutions as well as partner States and organizations mostly during the September/October Assemblies of Member States, within WIPO consultations between sectors, formulation of the program and budget and country plans, and its consideration and approval by the Director General.

It should be noted that formal consultations meetings with partner States and organizations are regularly organized at mutually agreed periods to review the state of cooperation and plan for the following year.

(ii) **Rules and Procedures for Organizing Events in Collaboration with WIPO**

Within the framework of its technical assistance program, WIPO organizes numerous national, sub-regional, regional and interregional events in cooperation with partner States and/or organizations. These events are generally conferences, colloquia, symposia, fora, meetings, training workshops, courses and seminars, study visits that should part of the approved program and budget or on-going projects. Any ad hoc event should fit in the country plan, country IP strategy or cooperation agreement with partner States or organizations.

Most technical assistance events are held outside WIPO headquarters in collaboration with the host country and/or one or more partner State or organization. In this case, organizing the event requires a formal letter of invitation or request for assistance from the host country or institution and intense consultations with all the parties. Once consultations are completed and the event approved by WIPO Director General, a formal letter confirming the event is sent by WIPO to the host. In parallel, invitation letters are sent to participants, resource persons and cooperating partners and travel and logistic arrangements are made accordingly.

It is worth noting that, subject to approval, WIPO finances costs related to the participation of foreign participants and resource persons and, where needed, contributes to the cost of logistic arrangements.

(iii) **Rules for Engaging Speakers and Lecturers**

Foreign and local speakers and lecturers are often called upon for participation in WIPO events and sharing their knowledge and expertise in their area of specialization. For cost efficiency, the current rule is to engage one foreign speaker for national events and not more than two foreign speakers for regional and inter-regional events.
Speakers and lecturers are engaged under WIPO Special Service Agreement based on specific terms of reference and the program of the event agreed upon with the co-organizers of the event. The speakers and lecturers are identified by the Division/Bureau concerned from the WIPO Roster of Consultants or other relevant WIPO and partners’ databases, in consultation with the technical assistance recipient country/institution and the co-organizers of the event. Upon written confirmation of acceptance of the invitation and related terms of reference, a formal agreement is signed between WIPO and the speaker/lecturer.

(iv) Travel Procedures

Countries or individuals travelling on a WIPO-financed mission should receive an invitation letter with detailed instructions related to travel arrangements.

In this regard, the countries invited to participate in a WIPO event should generally receive a Nomination Form to be filled by the nominated participant, signed by the designating authority and returned to WIPO within a given timeframe.

Speakers and lecturers are only required to confirm in writing their acceptance of the invitation and their consent to publish their profile and the text of their presentation on WIPO Website.

Travel arrangements are thereafter made directly by WIPO or, where applicable, through local United Nations Development Program (UNDP) Offices. In either case, the procedure should include: flight bookings; seeking the United Nations security clearance for anyone travelling to places where security restrictions apply; and arranging with the host country facilitation of issuance of entry visa.

It is therefore important for each WIPO-sponsored participant, speaker and lecturer to carefully follow the instructions contained in the letter of invitation in order for travel arrangements to be made smoothly in the most efficient and timely manner.

(e) Process for Engaging other Providers in Delivery of Development Cooperation Activities

The implementation of technical assistance projects and activities related to infrastructure development and institutions building often require the engagement of other service providers. The service provider may be a private sector company or a partner organization. The engagement of such provider is subject to formal contracts and/or agreements that institutionalize the relationship in line with WIPO financial regulations and rules.

The first step in the process of engaging service providers in delivery of development cooperation activities consists in designing terms of reference in consultation with concerned partners and seeking their approval and that of the costs estimation. Depending on the type of services, the identification and selection of the service provider is thereafter conducted in accordance with WIPO procurement rules and procedures. Lastly, the contract or agreement is signed by WIPO and the selected service provider for service delivery.
(f) Development related Databases

Within the framework of the Development Agenda, the following searchable databases have been established to facilitate the delivery of technical assistance to Member States and inform the public, thus increasing transparency in delivery of technical assistance:

(i) Intellectual Property Technical Assistance Database (IP-TAD):  
TAD contains information on technical assistance activities undertaken in developing countries, LDCs and countries in transition. The information is drawn from reports received by WIPO. Details can be found on: www.wipo.int/tad/en

(ii) Roster of Consultants (ROC):  
ROC is a searchable database established in 2009 at the request of the CDIP. It contains useful information on consultants and experts engaged by WIPO to carry out specific IP technical assistance activities at the national and regional levels. The database seeks to bring more transparency in expertise used in technical activities in developing countries, LDCs and countries in transition. More details are available on: www.wipo.int/roc/en

(iii) Matchmaking Database:  
An on-line tool for matching specific IP-related development needs, through which:
– Developing countries, LDCs and countries in transition formulate their needs
– Potential donors offer resources
– WIPO assesses ideas and matches them with appropriate partners. 
Details are available on: www.wipo.int/dmd/en
III. DEVELOPMENT COOPERATION PROGRAM AND ACTIVITIES

Part 1: Main areas of activities and related tools

WIPO technical assistance covers a broad range of areas of activities whose main pillars are: the development of IP policies and strategies, the establishment of IP regulatory and policy framework, the development of IP infrastructure and a specialized human resource, enhancing IP Office service to users and promoting innovation and creativity. This part provides insight into these main areas and related tools and activities.

(a) Designing and implementation of national, institutional and sectoral IP strategies:

WIPO is engaged in a vast program of assisting its Member States and institutions in developing intellectual property policies and strategies which support cultural, educational and research institutions and industry. The national and institutional IP policies and strategies seek to build national capacity to create, own IP assets and use them for economic gains and social benefit.

<table>

(b) **Enhancing access to knowledge and exchange of technologies:**

Most developing countries continue to face inadequate research infrastructure, low levels of investment in and knowledge of IP, lack of legal, financial and professional support for utilization of the IP system nationally and internationally, as well as serious brain drain and resource constraints. This program targets research, academic and business institutions with high potential for generating intellectual property assets, and offers access to the following WIPO-managed IP data bases and platforms with a view to enhancing access to scientific and technical information, including protected patents and state-of-the-art technologies.

(f) **Use of IP tools for branding and adding value to local products:**

WIPO support in the field is aimed at developing Member States’ capacity to use IP tools such as collective marks, certification marks, to add value to local products and increase their competitiveness on the global market. Development Agenda pilot projects carried out in Thailand, Panama and Uganda have helped to develop a WIPO methodology and shown the need for creating partnerships that would take the projects beyond WIPO’s mandate. The projects are aimed at identifying local products with high potential for value addition and increased competitiveness on the through the use of IP using a WIPO methodology.

## Title Description Contact points/Links

### The Executive Program
The program provides short and intensive courses for business managers and senior executives in the private sector, particularly those involved in the development and management of new products and processes.

### Start-up Academies
The project consists in the establishment of IP academies in IP training institutions and universities to meet the increasing demand for IP specialists and professionals. The assistance comprises: the identification and training of the IP coordinator, establishment of a reference IP library, participating in two pilot courses, training of a core group of five trainers. To-date, the project covered: Colombia, Dominican Republic, Egypt, Ethiopia, Peru and Tunisia.

Partnerships with the United Nations Agencies, Intergovernmental organizations (IGOs) and Non-governmental organizations:

One of the major challenges faced by WIPO technical assistance is the constantly increasing demand for assistance and rising Member States' expectations. Partnerships with United Nations Agencies and Organizations, intergovernmental and non-governmental organizations help broaden the scope and outreach of its support to developing countries, least developed countries and countries in transition.

WIPO has signed Memoranda of understanding (MOUs) and cooperation agreements with United Nations Agencies and other organizations to institutionalize their cooperation around IP issues related to their respective mandate. These UN and other international organizations include the United Nations Food and Agriculture Organization (FAO), the International Telecommunications Union (ITU), the United Nations Educational, Scientific and Cultural Organization (UNESCO), the United Nations Environment Program (UNEP), the World Health Organization, the United Nations Industrial Development Organization (UNIDO), the five United Nations Regional Commissions, namely the Economic Commission for Africa (ECA), the Economic Commission for Europe (ECE), the Economic Commission for Latin America and the Caribbean (ECLAC), the Economic Commission for Asia and the Pacific (ESCAP), the Economic and Social Commission for Western Asia (ESCWA), the International Trade Centre (ITC), the United Nations Conference on Trade and Development (UNCTAD), the World Trade Organization (WTO).

WIPO has also developed working relationships with many IGOs and NGOs engaged in the field of IP at the national, regional and international levels with a view to creating synergies and having a greater impact in the Member States. These partnerships involve regular consultations and establishment of cooperation arrangements. In this regard, activities undertaken are summarized below:
<table>
<thead>

Part 2: Assistance to Least Developed Countries (LDCs)

In line with the Development Agenda and in the framework of Strategic Goal III: Facilitating the use of IP for development, WIPO technical assistance pays attention to the special needs of the 49 LDCs, 30 countries from Africa, 4 from the Arab region, 14 from Asia and the Pacific and one from Latin America and the Caribbean countries. The LDCs are among the beneficiaries of the traditional legislative, infrastructure and capacity building support in addition to specific projects and activities specially designed to meet the needs of LDCs and coordinated and spearheaded by the Division for Least Developed Countries. Committee on Development and Intellectual Property (CDIP)

Eleventh Session
Geneva, May 13 to 17, 2013

SUMMARY BY THE CHAIR

1. The eleventh session of the CDIP was held from May 13 to 17, 2013. The session was attended by 94 Member States and 37 Observers.

2. The Committee re-elected Ambassador Mohamed Siad DOUALEH, Permanent Representative of Djibouti as Chair, and elected Mrs. Ekaterina EGUTIA, Deputy Head, National Intellectual Property Center (SAKPATENTI), Georgia, as Vice-Chair.

3. The Committee adopted the Draft Agenda as proposed in document CDIP/11/1 Prov. 2.

4. Under Agenda Item 4, the Committee adopted the draft report of the tenth session of the CDIP (CDIP/10/18 Prov.).

5. Under Agenda Item 5, the Committee listened to general statements from Group Coordinators. Individual delegations were requested to submit their statements in writing.

6. Under Agenda Item 6, the Committee considered document CDIP/11/2. The Director General introduced his Report on the Implementation of the Development Agenda during 2012. Delegations appreciated the commitment of the Director General in providing annual reports. A number of observations were made on the Report and clarifications were sought, in particular with regard to Country Plans and WIPO’s participation in the Rio+20 process and the MDGs Task Force. The Deputy Director General, Mr. Geoffrey Onyeama, and Director of the WIPO New York Office, replied to the observations and agreed to introduce enhancements in future reports. It was agreed that the Secretariat would organize briefings to the Member States on WIPO’s contribution to the work of other United Nations entities.

7. Under Agenda Item 7, the Committee considered a work program for the implementation of some adopted recommendations, as follows:

   (a) The Committee took note of the report on the Feasibility of Integration of Millennium Development Goals (MDGs) Related Needs/Outcomes into WIPO’s Biennial Results Framework (CDIP/11/3), prepared by the Evaluation Consultant, and the additional clarifications provided by the Secretariat on this matter. The Committee recognized that WIPO should contribute to the implementation of the MDGs, but
expressed different views on whether further steps were needed to further integrate the MDGs into the objectives of the Organization. Some delegations proposed developing specific indicators to measure WIPO’s contribution to MDGs, while other delegations did not support this proposal. The Secretariat was requested, using existing internal resources, to prepare a compilation of the practices by which other United Nations agencies, in particular the other specialized United Nations agencies, measure their contribution to the MDGs, and to provide a brief report to the next session of the Committee as to how WIPO has contributed to the MDGs to date, drawing upon the existing studies commissioned on this matter including, but not limited to, document CDIP/11/3. This brief report could include information on WIPO’s contribution to the six targets under MDGs 1, 6 and 8, using the methodology provided in document CDIP/11/3, and should also include an assessment in narrative form as to how WIPO is contributing to the other five MDGs, although at this time not necessarily using the methodology used in document CDIP/11/3.

(b) The Committee discussed the External Review of WIPO Technical Assistance in the Area of Cooperation for Development (CDIP/8/INF/1) and a number of related documents, namely:

(i) Management Response to the External Review of WIPO Technical Assistance in the Area of Cooperation for Development (CDIP/9/14);

(ii) Report of the Ad Hoc Working Group of an External Review of WIPO Technical Assistance in the Area of Cooperation for Development (CDIP/9/15);

(iii) Joint Proposal by the Development Agenda Group (DAG) and the Africa Group on WIPO’s Technical Assistance in the Area of Cooperation for Development (CDIP/9/16); and

Recognizing the Secretariat’s ongoing work on the recommendations, and the need to take further actions, the Committee requested the Secretariat to continue its work and take further actions on the following three proposals, taking into account the comments made by the delegations, and provide a report to the next session of the CDIP:

(i) To compile existing materials into a comprehensive Manual on the delivery of technical assistance, in line with recommendation A(2)(a) in document CDIP/9/16;

(ii) To ensure that WIPO’s website is upgraded to serve as a more effective, accessible and up-to-date resource for communicating information about development cooperation activities, in line with recommendation F(1)(a) and (b) in document CDIP/9/16; and

(iii) To examine the Technical Assistance Database (TAD) with a view to facilitate searching capabilities, and ensuring the regular updating of the TAD with information on technical assistance activities, in line with recommendation G(1) in document CDIP/9/16.

It was agreed that the Committee would continue discussions at its next session on Member State proposals on this topic.
(c) The Committee considered document CDIP/11/5 on the organization of the International Conference on Intellectual Property and Development. It was agreed that the Secretariat would draw up a list of speakers for the Conference, and circulate it to Group Coordinators for endorsement.

(d) The Committee discussed the Feasibility Assessment on Possible New WIPO Activities Related to Using Copyright to Promote Access to Information and Creative Content (CDIP/11/6). Some delegations expressed support for the proposals presented in the document and provided a number of comments and suggestions. Other delegations requested the Secretariat to prepare a more detailed implementation plan, including information on financial and human resource implications, to be considered at the next session of the Committee.

(e) The Committee considered a Project Proposal from the Republic of Korea on Intellectual Property (IP) and Design Creation for Business Development in Developing and Least Developed Countries (LDCs) (CDIP/11/7). Delegations expressed appreciation for the proposal and thanked the Republic of Korea for this initiative. The Republic of Korea was requested to work with the Secretariat to further develop the proposal into a CDIP project document, bearing in mind the observations made from the floor, including by the LDC Group, and present it to the next session of the Committee for consideration.

(f) The Committee discussed the Independent Review of the Implementation of the Development Agenda Recommendations as requested under the Coordination Mechanism and Monitoring, Assessing and Reporting Modalities. Recalling the related decision of the General Assembly, the Committee took note of the Joint Proposal on Terms of Reference and Methodology for the Independent Review of the Implementation of the Development Agenda Recommendations submitted by the African Group and Development Agenda Group. The Committee agreed to devote sufficient time for discussion on this matter at its next session with a view to implementing the General Assembly's decision that the Review should be undertaken by the end of the 2012/2013 biennium. To that end, the Committee agreed to hold one informal meeting prior to its next session.

(g) The Committee discussed the following documents and took note of their contents:

(i) Potential Impact of Intellectual Property Rights on the Forestry Chain in Uruguay (CDIP/11/INF/2);

(ii) Intellectual Property and Socio-Economic Development – Country Study Brazil (CDIP/11/INF/3);

(iii) Intellectual Property (IP) and Socio-Economic Development in Chile (CDIP/11/INF/4); and

Some delegations supported the proposal for a standing agenda item to address case studies on IP, while other delegations objected to the proposal. It was agreed that future studies under the project on Intellectual Property and Socio-Economic Development (CDIP/5/7) would be discussed by the Committee in its future sessions.
The Committee continued discussions on Future Work on Patent-Related Flexibilities in the Multilateral Legal Framework (CDIP/10/11 and CDIP/10/11 Add.). The Committee requested the Secretariat to undertake work on the following flexibilities:

(i) the scope of the exclusion from patentability of plants (TRIPS Art.27); and

flexibilities in respect of the patentability, or exclusion from patentability, of software-related inventions (TRIPS Art.27).

The Secretariat should use existing internal resources to prepare a factual document on the implementation in national laws of these flexibilities and avoiding duplication with other work taking place at WIPO while building on work being undertaken by the Standing Committee on the Law of Patents. The document should be presented to a future session of the Committee. The Committee would continue discussions on further work on flexibilities at its next session.

(i) The Committee discussed a Proposal for a CDIP New Agenda Item on Intellectual Property (IP) and Development (CDIP/6/12 Rev.). Different views were expressed on the proposal. Member States were invited by the Chair to provide more details on the proposal to facilitate future discussions. The discussion on this agenda item will continue at the next session.

8. Under Agenda Item 8 on Future Work, the Committee discussed a number of proposals and agreed upon a list of issues/documents for the next session.

9. The Committee noted that the Draft Report of the eleventh session would be prepared by the Secretariat and communicated to the Permanent Missions of the Member States, and would also be made available to Member States, IGOs and NGOs, in electronic form, on the WIPO website. Comments on the Draft Report should be communicated in written form to the Secretariat, preferably eight weeks before the next meeting. The Draft Report will then be considered for adoption at the twelfth session of the Committee.

10. This Summary will constitute the Committee’s report to the General Assembly.

[End of the Summary by the Chair]
Joint Proposal by the Development Agenda Group and the Africa Group on WIPO’s Technical Assistance in the Area of Cooperation for Development

Recommendations

1. Development cooperation must be based on a dialogue in the context of national development needs and strategies and WIPO’s obligations to advance the Development Agenda. The focus of WIPO’s development cooperation activities should go beyond ‘responding to requests’, and promote a dialogue with and among member states about needs and priorities and the appropriateness of different kinds of assistance given a country’s level of development, preparedness, absorptive capacity and risks, as well as the competing demands on WIPO’s resources and its obligations to advance the WIPO Development Agenda.7

2. WIPO staff should address obstacles and risks frankly with national authorities so that expected outcomes and results are realistic.8

3. Stronger efforts should be made to identify options and discuss alternatives where activities are beyond the scope of those WIPO is in a position to undertake.9

4. Greater attention to development cooperation activities that enable South-South cooperation should be a priority. For instance, the sharing of experiences and expertise among developing countries could be enhanced as a way to deliver more development-oriented and efficient activities.10

5. WIPO should improve efforts to better tailor its development cooperation activities to national development objectives and circumstances. A development-oriented approach must consistently integrate and acknowledge the importance of the social and economic context, national development goals and priorities, and the broader regulatory and institutional environment of the country.11

6. WIPO should assist countries to undertake and update national needs assessment for IP-related development cooperation activities informed by national IP and development policies or strategies.12

7. Needs assessments should be used to improve country-level planning of development cooperation activities that are linked to clear expected results, targets and performance indicators.13

8. The WIPO Secretariat and beneficiaries must pursue a more meaningful dialogue on preparedness, challenges and risks. The WIPO Secretariat should make greater up-front efforts to inform countries of the demands development cooperation activities may place on national resources – institutional, human and financial – from the needs assessments phase through to the design and implementation of country plans. The Secretariat should tailor, adjust or postpone proposed activities based on an assessment of internal

resources available in beneficiary countries. The country planning process should be a tool for building mutual understanding of resource constraints and the need for priority-setting.  

9. WIPO should at the request of a Member state support efforts to establish national committees on development and IP involving the full range of relevant government agencies working on public policy in areas impacted by IP reforms (such as health, education, cultural, agricultural and industrial agencies) including providing support for public consultation and engagement in the formulation of country plans and the design and delivery of IP-related development assistance.

10. WIPO should ensure a balance of perspectives and diversity of stakeholders and experts involved in the provision of technical assistance.

11. Greater attention is needed to ensuring the development-orientation, internal and external peer-review, quality, communication strategy and availability of research and studies conducted by WIPO.

12. WIPO should support efforts to build knowledge and expertise within and beyond the organization on the relationship between various IP systems, rules, policies and practices and their development impacts at varying levels and for different sectors. This would then form an important basis for understanding the degree to which WIPO’s development cooperation activities contribute to particular development outcomes.

13. WIPO should invest greater attention to its own gathering and systematization of data used to measure its performance. This must be complemented by support for Member States to also gather data relevant to measuring the relationship between IP policy, legal and regulatory frameworks and various development outcomes, and the impact of WIPO’s development cooperation activities. At the outset of major activities, WIPO staff and local authorities should agree on how progress and success of the activity will be measured, and the process for gathering the data needed to make such assessments.

14. WIPO should improve its support to developing countries for the formulation of national IP strategies that address development priorities. WIPO’s assistance in the area of IP policies and strategies must be based on tools and methodologies that have been thoroughly evaluated, refined and validated.

15. To facilitate the critical review and improvement of WIPO’s tools and methodologies used to inform IP strategies, these should be made publicly available on WIPO’s website.

16. Member states requesting assistance for the formulation of IP strategies should be informed about the tools and methodologies produced by WIPO and by other actors in the field.

22 See pg. 87 of the External Review
17. The objective of WIPO’s legislative assistance should be to serve the developmental objectives of the beneficiary country.\textsuperscript{23}

18. Before responding to a request for legislative assistance, WIPO should work with the country to investigate its development priorities, its sector-by-sector needs (e.g. agriculture, health, education, information technology, etc.), and its relevant international commitments\textsuperscript{24}

19. WIPO should present developing countries the range of options and flexibilities available in international laws. It should also explain and/or share experiences of how different options may hinder or advance their pursuit of development targets.\textsuperscript{25}

20. WIPO should support Members to evaluate the costs and benefits of acceding to WIPO Treaties.\textsuperscript{26}

21. IP education should not be pursued in isolation, but linked to other areas of education and broader public policy issues such as innovation policy, science and technology, education, cultural industries, etc.\textsuperscript{27}

22. Greater attention should be paid to up-front assessment of risks and to dialogue with beneficiary countries on the conditions for success of IP Office modernization projects and ongoing follow up and commitment required by beneficiary countries.\textsuperscript{28}

23. WIPO should ensure a greater balance between its support for traditional users of the IP system (rightholders) and for users of IP-protected products and services (researchers, libraries, students, citizens seeking access to technology).\textsuperscript{29}

24. Even where there is high demand by Member States for WIPO’s activities for users, such as for TISCs, the success of pilot projects already underway should be evaluated before their expansion. The evaluation could then serve as a basis for applying lessons to any future work in this area; assessing how the activities could be best mainstreamed or integrated with WIPO’s other development cooperation activities; and prioritizing the requests of countries in line with national IP strategies, needs assessments and country plans for WIPO assistance.\textsuperscript{30}

25. WIPO’s activities on innovation and creativity must be informed by broader debates and experience on innovation systems, development strategies and public policy goals, such as access to knowledge. WIPO’s role should be to build understanding of where and how IP-related mechanisms and strategies may or may not assist developing countries to advance progress in these areas and place that analysis and assistance more firmly in the context of the range of other policy measures and institutional actions needed.\textsuperscript{31}

Annex II

Country Plan Template: a Tool for Planning and Delivery of WIPO Technical Assistance

Basic Principles and Process

1. The Country Plan will provide a tailored and comprehensive framework for planning and delivering WIPO’s technical assistance to a country. The Country Plan will take into account the national development goals of the country based on its national development plans, including where available, IP and innovation strategies and policies, and will reflect how WIPO will support the country to use IP to contribute to the attainment of those development goals.

2. The architecture of the Plan will take into account the WIPO organizational planning context, i.e. the Expected Results of the Program and Budget\(^{32}\).

3. The Plan will be a two-year plan based on at least three levels of consultations:
   i) between Regional Bureaus/Division for Least Developed Countries and countries;
   ii) internally within WIPO, i.e. Regional Bureaus with other sectors/programs in WIPO
   iii) between Regional Bureaus and countries (validation); and
   iv) between WIPO and other regional/international organizations, if applicable.

It is expected that the country will agree to the Plan before start of implementation.

4. The planning and delivery process will be based on:
   i) identification of needs, priorities and objectives;
   ii) identification of expected results and performance indicators or deliverables;
   iii) implementation of an accepted methodology or a set of activities to achieve the results over the period of the Plan; and
   iv) available resources (Regional Bureaus, Division for LDCs and other WIPO sectors/programs).

5. Implementation of the Plan will be subject to an annual review and evaluation to be aligned with the annual program performance reporting. Adjustments may be made to the Plan during implementation as well as after such review and evaluation.

6. All sectors of WIPO involved in development activities will contribute their inputs to the Plan based on the above principles and process. At the beginning of the country planning exercise, and thereafter as required, the relevant sectors of WIPO shall forward their inputs to the Regional Bureaus for appropriate inclusion in the Plan. The Regional Bureaus will drive the process, ensure inclusive consultation and monitor the delivery of results.

\(^{32}\) For the planning period 2012/13, please refer to the Program and Budget 2012/13.
WIPO – [Name of Country] Plan 2012/13

Agreed to between WIPO and Country – [Date]

I. Planning context – Linkages to: existing national IP policies and strategies, S&T policies and strategies, innovation strategy, Culture and creativity policy and strategy, medium term development plan, vision statements, industrial strategies and plans.

II. Consultation process – Bureaus - country; Internal (WIPO); Validation (Bureaus-country); Others

**SG IV: Coordination & Development of Global IP Infrastructure**

| Enhanced access to, and use of, IP information and knowledge by IP institutions and the public to promote innovation and increased access to protected creative works and creative works in the public domain |  |
| Increased dissemination of digitized patent and trademark collections of national/regional offices of WIPO Member States |  |
| Enhanced technical and knowledge infrastructure for IP Offices and other IP institutions leading to better business solutions services (cheaper, faster, higher quality) to their stakeholders |  |

**SG VI: International Cooperation on Building Respect for IP**

| Progress in the international policy dialogue among WIPO Member States on building respect for IP, guided by Recommendation 45 of WIPO Development Agenda |  |

[Annex III follows]
Annex III

List of principles, recommendations and WIPO instructions guiding provision of technical assistance

- The Convention establishing the World Intellectual Property Organization (WIPO), 1970
- Agreement between the United Nations and the World Intellectual Property Organization, December 1974 (Articles 9 and 10 related to the provision of technical assistance for development in the field of intellectual creation and promoting and facilitating transfer of technology to developing countries, respectively)
- WIPO Development Agenda Recommendations adopted in October 2007
- Roadmap for WIPO Strategic Realignment Program (SRP), April 2010, updated in 2011
- Recommendations of the External Review of WIPO Technical Assistance in the area of Cooperation for Development, August 2011
- WIPO Code of Ethics, 2012
