### "MINIMUM DOCUMENTATION" UNDER RULE 34.1(b)(iii) OF THE REGULATIONS UNDER THE PATENT COOPERATION TREATY (PCT)

#### Draft Amendments

The International Searching Authorities have agreed that, for the purposes of PCT Rule 34.1(b)(iii), the published items of non-patent literature to be included in the PCT "minimum documentation" should be the items published in the periodicals listed below during the five-year period preceding the time at which an international search report is established, it being understood that an International Searching Authority (ISA) would not be precluded from consulting issues of the said periodicals published prior to the beginning of the said five-year period. It has been agreed by the PCT Committee for Technical Cooperation that the periodicals need be consulted by the ISA only in respect of issues published after the effective inclusion of such periodicals in the list. The list is preceded by explanatory notes facilitating an understanding of the indications contained therein.

The list was originally agreed upon at a meeting held in Geneva on April 12, 1978. The present list was agreed upon by the International Searching Authorities by correspondence in October 1998, with effect from January 1, 1999. This list replaces the list published in a Special Issue of the *PCT Gazette* No. 48/1997, dated November 6, 1997, and in the WIPO *Handbook on Industrial Property Information and Documentation* (pages 4.2.1 to 4.2.52 of the November 1997 issue).

### Explanatory Notes

1. Each entry of the list contains one periodical only and gives information for each of the 134 periodicals by using letter codes "A" to "I" as defined below:

- A – PCT identification number
- B – Title of the periodical
- C – Publisher's name and address
- D – Abbreviated title of the periodical according to the ISDS Register, disc No. 10, May 1994<sup>1</sup>
- E – ISSN Number
- F – Indication of language of the periodical by using the following symbols:

"de" for German	"pt" for Portuguese
"en" for English	"ru" for Russian
"fr" for French	"es" for Spanish
"ja" for Japanese	

G – Year when the periodical was first included in the list

H – Comments

I – Sequence number of periodical in this list.

2. The titles of the periodicals are arranged in ascending order of the PCT identification number, subject to the following:

- (i) when several editions of a periodical exist in different languages (e.g., by cover-to-cover translation), the periodical is listed according to the title of the English edition, if any, together with the original title in parentheses. If no English edition exists, the original title is used for the purposes of the list;
- (ii) where the title of a periodical has changed, both the new title and the former title (in parentheses) are indicated in the list, the PCT identification number allotted to the periodical remaining unchanged.

3. The names of Japanese publishers are indicated in English, followed by transliteration of the Japanese name into Latin characters in parentheses.

4. The names and addresses of the publishers of the original editions of Russian periodicals are indicated below the names and addresses of the publishers of cover-to-cover translations into English. The language of each edition of the periodical is indicated, in this case, according to the respective publishers.

5. Whenever the periodical contains, in addition to full-text articles in the language, or languages, in which it is published, translations of abstracts, or of abstracts and part of the text, into other languages, this fact is indicated by an asterisk next to the indication of the languages.

6. For reference purposes, Appendix 1 to the current list of periodicals contains all the periodicals which have been deleted from the original list, including those journals for which publication has been discontinued. The year of deletion or discontinuation is given under letter code "H" of each entry. Appendix 2 contains an alphabetical index in order to facilitate the location of "active" periodicals and their abbreviated titles for which the PCT identification number is not immediately known.

<sup>1</sup> The International Serials Data System (ISDS) is a world-wide network responsible for the assignment, registration and control of the International Standard Serial Number (ISSN) and for the creation and maintenance of a comprehensive register of world serial publications. The purpose of the ISDS Register is to provide a comprehensive list of ISSNs, corresponding key titles and records of the serials processed by the ISDS network. The ISDS Register is the ISSN authority file. It is kept continually up to date. The register is a quarterly publication listing more than 80,000 new and amended records per year. It is available on three different media: on MAGNETIC TAPE, MICROFICHE or CD-ROM.

7. Further information on the selection of abbreviations for the titles of periodicals not found in this list can be obtained through consulting the "List of Serial Title Word Abbreviations." The list containing over 42,000 words and their abbreviations is a machine-readable file (CD-ROM "ISSN Compact") of words and abbreviations maintained by the ISDS International Centre in Paris. It includes words from about 50 languages. The words are abbreviated in accordance with the International Standard ISO 4:1984, "Documentation – Rules for the Abbreviation of Title Words and Titles of Publications".<sup>2</sup> The abbreviations may also be used for titles of non-serial publications.

<sup>2</sup> ISO 4:1984 is currently under revision. ISO/DIS 4 is available at the International Bureau.
