

Romanian State Office for Inventions and Trademarks  
Irina Babaligea, Biochem.,  
Examiner, Chemistry-Pharmacy Examination Division

## ***Practical Examination Case in Biotechnology***

### Summary

The presentation illustrates an example of substantive examination procedure, at the Romanian Patent Office, of a typical patent application in the field of biotechnology.

There are reviewed:

- the originally claimed objects;
- the Romanian legal provisions for the examination procedure regarding
  - patentability
  - clarity and completeness of disclosure
  - unity of invention
- analysis of the first group of inventions which fulfills the unity criterion;
- granted protection.
