NOTE CONCERNING THE USE
OF THE INDEXES

There are five indexes in all: two indexes to the Patent Cooperation Treaty and the Regulations under the Treaty, one index to the States represented at the Conference, one index to the Organizations represented at the Conference and one index to the participants in the Conference.

The first of the two indexes to the Treaty and Regulations thereunder lists each Article and Rule; the second is a catchword (subject matter) index. These two indexes refer to particular Articles and Rules by their number as found in the final text. Where a given Article or Rule was numbered differently in earlier documents referred to in an index, an appropriate notation is given indicating the number of the Article or Rule in that document. Anyone using these two indexes may refer either directly to a particular Article or Rule as found in the first index or may consult the second index with a catch-word or subject matter indication to determine the relevant Article and Rule citations to be used in consulting the first index.

Throughout the indexes, with the exception of the Catchword Index, which cites Articles and Rules, all numbers refer to page numbers unless they are italicized, in which case the number refers to the paragraph number of the verbatim For summary minutes. Page numbers given for the signed text of the Treaty, the final text of the Regulations, or the drafts (PCT/DC/4, 5, 11, 12), refer to the page where a given Article or Rule appears, whereas page numbers referred to in regard to other documents refer to the page on which the text of the document begins.
