

Information on the topics indicated below.

Quality of patents:

Turkish Patent Institute (TPI) has been preparing search and examination reports for some ipc classes of patent applications since 2005. Other search and examination reports which are not prepared by TPI have been being prepared by other external offices that have an agreement with TPI such as EPO, Russian Patent Office, Swedish Patent Office. However, in 2016, we are planning to prepare search and examination reports for all ipc classes of patent applications .

However, TPI has not used any information on utilization of external search and examination results. But, TPI has been using the external databases such as epoq , espacenet for retrieving information like prior art during the search and examination.

Confidentiality of communications between clients and their patent advisors: We have no special provision on our laws and practises on , and experience relating to the issue of confidentiality of communications between clients and their patent advisors.

Technology Transfer: We have no special provision, practical examples and experiences on patent related incentives and impediments to transfer of technology.
