

# Calendar Dates 2022

Response ID:94 Data

## 1. Identification page

---

Please enter the ST.3 code and name of the member state or international organization you represent.

ES - Spain

Please enter the name of the office or organization you represent. For instance, Canadian Intellectual Property Office. If your organization name is the same as your ST.3 code name, you may put "n/a".

Oficina Española de Patentes y Marcas

Please enter your email address so we can contact you if we have questions about your response.

## 2. Questions page

---

1. How does your office order calendar date components in published documents when using dates consisting only of numbers? Select all that apply.

Day first, such as 01.09.1997 (DD.MM.CCYY)

Year first, such as 1997.09.01 (CCYY.MM.DD)

Comments:

2. How does your office separate date components in published documents? Select all that apply.

dot, as in CCYY.MM.DD

dash, as in CCYY/MM/DD

other separator (specify in comments)

Comments: Se utilizan también guiones, en el Tomo 1 (marcas y signos distintivos) y 3 (diseños industriales) del BOPI (Boletín Oficial de Propiedad Industrial, y en la base de datos "Localizador de Marcas"

3. Are leading zeroes omitted from any date components?

Consider the date September 1, 1997. Select all that apply.

No omissions, leading zeroes are always included in the date, such as 1997.09.01

Comments:

4. Does your office ever spell out the names of months in published dates? Select all that apply.

No, we do not spell out month names in any dates

Comments:

5. If your office spells out months, which languages do you use for month names? Select all that apply. If a language has multiple variations of month names, indicate in the comments which variation your office uses.

Comments:

6. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Year first

	Separator(s)					Used for
	dot	dash	slash	space	none	
CCYY.MM.DD (e.g. 1997.09.01)					X	Fichero en formato xml de intercambio de información entre OEPM, OEP, OMPI y EUIPO, siguiendo los estándares de OMPI (authority file).
CCYY.(M)M.(D)D (e.g. 1997.9.1)						
YY.MM.DD (e.g. 97.09.01)						
YY.(M)M.(D)D (e.g. 97.9.1)						

**Comments:** También formato AACC-MM-DD para la base de datos de búsqueda de Marcas Nacionales e Internacionales "Localizador de Marcas".

**7. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.**

**Format - Day first**

	Separator(s)					Used for
	dot	dash	slash	space	none	
DD.MM.CCYY (e.g. 01.09.1997)	X					- Base de Datos INVENES (Invenciones en Español) - Base de datos DISEÑOS (Diseños Industriales) - Folletos de publicación de invenciones
DD.MM.YY (e.g. 01.09.97)			X			- Tomo 2 de BOPI: Boletín Oficial de Propiedad Industrial
(D)D.MM.YY (e.g. 1.09.97)						
(D)D.(M)M.YY (e.g. 1.9.97)						

**Comments:** También empleamos formato DD-MM-AACC, con guiones, en los tomos 1 y 3 del BOPI, como se ha indicado en la pregunta 2.

**8. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.**

**Format - Month names**

	Name format		Used for
	full month name	abbreviated	
DD [month] CCYY (e.g. 01 September 1997)			
(D)D [month] CCYY (e.g. 1 September 1997)			
[month] DD CCYY (e.g. September 01, 1997)			
[month] (D)D CCYY (e.g. September 1, 1997)			
Other format - specify using C, Y, M, D, and [month] (specify in comments)			

**Comments:** No usamos fechas con mes en primer lugar.

**9. In your IT systems, what format(s) are dates for IP documents and data stored in?**

**Please select all formats used by your various IT systems for dates related to IP documents and data.**

As a database field with a date or datetime datatype. This stores separate values for the full year, month, and day, sometimes with values for time components as well.

**Comments:**

**10. What is the maximum year your systems are capable of storing? If your systems use multiple digital date storage formats, select all that apply.**

**Note - when the “maximum date” is exceeded in affected systems, the date rolls back to the beginning of the time period, such as January 1, 1970. The result is similar to Y2K issues. For references on this topic, see**

**[https://en.wikipedia.org/wiki/Time\\_formatting\\_and\\_storage\\_bugs](https://en.wikipedia.org/wiki/Time_formatting_and_storage_bugs).**

No practical limit. The maximum year has no practical limit, such as 9999 (database 4-digit year fields) or beyond (64-bit timestamps in seconds).

**Comments:**

**11. Are there any other considerations that users should be aware of with dates in your published documents? If so, please provide an explanation and examples. For instance, Japanese documents often indicate the year of the Emperor’s reign, as explained in the [current Part 7.1](#).**

**12. Optional - If you wish to provide any file attachments with examples from your other answers (such as question 11), please do so here.**
