

Calendar Dates 2022

Response ID:34 Data

1. Identification page

Please enter the ST.3 code and name of the member state or international organization you represent.

FR - France

Please enter the name of the office or organization you represent. For instance, Canadian Intellectual Property Office. If your organization name is the same as your ST.3 code name, you may put "n/a".

Institut national de la propriété industrielle (INPI)

Please enter your email address so we can contact you if we have questions about your response.

2. Questions page

1. How does your office order calendar date components in published documents when using dates consisting only of numbers? Select all that apply.

Day first, such as 01.09.1997 (DD.MM.CCYY)

Comments:

2. How does your office separate date components in published documents? Select all that apply.

dot, as in CCYY.MM.DD

dash, as in CCYY/MM/DD

Comments:

3. Are leading zeroes omitted from any date components?

Consider the date September 1, 1997. Select all that apply.

No omissions, leading zeroes are always included in the date, such as 1997.09.01

Comments:

4. Does your office ever spell out the names of months in published dates? Select all that apply.

Yes, we use full month names such as September 1, 1997

Comments: Dans le Bulletin Officiel de la propriété industrielle (BOPI) pour les brevets, marques et dessins et modèles

5. If your office spells out months, which languages do you use for month names? Select all that apply. If a language has multiple variations of month names, indicate in the comments which variation your office uses.

French

Comments:

6. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Year first

	Separator(s)					Used for
	dot	dash	slash	space	none	
CCYY.MM.DD (e.g. 1997.09.01)						
CCYY.(M)M.(D)D (e.g. 1997.9.1)						
YY.MM.DD (e.g. 97.09.01)						
YY.(M)M.(D)D (e.g. 97.9.1)						

Comments:

7. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Day first

	Separator(s)					Used for
	dot	dash	slash	space	none	
DD.MM.CCYY (e.g. 01.09.1997)			X			For the online search service : https://data.inpi.fr and for some dates in the BOPI (Bulletin)
DD.MM.YY (e.g. 01.09.97)	X					For publication of patent applications and patents
(D)D.MM.YY (e.g. 1.09.97)						
(D)D.(M)M.YY (e.g. 1.9.97)						

Comments:

8. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Month names

	Name format		Used for
	full month name	abbreviated	
DD [month] CCYY (e.g. 01 September 1997)	X		Bulletin officiel de la propriété industrielle (BOPI) for the patents marques et dessins et modèles
(D)D [month] CCYY (e.g. 1 September 1997)	X		Bulletin officiel de la propriété industrielle (BOPI) for trademarks an designs
[month] DD CCYY (e.g. September 01, 1997)			
[month] (D)D CCYY (e.g. September 1, 1997)			
Other format - specify using C, Y, M, D, and [month] (specify in comments)			

Comments:

9. In your IT systems, what format(s) are dates for IP documents and data stored in?

Please select all formats used by your various IT systems for dates related to IP documents and data.

As Epoch time / Unix time / Posix time – a timestamp representing the number of seconds (or milliseconds) since a fixed point in time (the epoch). Often measured from 1 January 1970 00:00 UTC but sometimes from another starting point.

Comments: Nos applications métiers PI gèrent la date en format timestamp, les ihms de ces applications convertissent le timestamp en objet date.

10. What is the maximum year your systems are capable of storing? If your systems use multiple digital date storage formats, select all that apply.

Note - when the “maximum date” is exceeded in affected systems, the date rolls back to the beginning of the time period, such as January 1, 1970. The result is similar to Y2K issues. For references on this topic, see

https://en.wikipedia.org/wiki/Time_formatting_and_storage_bugs.

No practical limit. The maximum year has no practical limit, such as 9999 (database 4-digit year fields) or beyond (64-bit timestamps in seconds).

Comments: La limite est celle de la machine

11. Are there any other considerations that users should be aware of with dates in your published documents? If so, please provide an explanation and examples. For instance, Japanese documents often indicate the year of the Emperor’s reign, as explained in the [current Part 7.1](#).

12. Optional - If you wish to provide any file attachments with examples from your other answers (such as question 11), please do so here.

4. Thank You!
