

Calendar Dates 2022

Response ID:112 Data

1. Identification page

Please enter the ST.3 code and name of the member state or international organization you represent.

HR - Croatia

Please enter the name of the office or organization you represent. For instance, Canadian Intellectual Property Office. If your organization name is the same as your ST.3 code name, you may put "n/a".

State Intellectual Property Office of the Republic of Croatia

Please enter your email address so we can contact you if we have questions about your response.

2. Questions page

1. How does your office order calendar date components in published documents when using dates consisting only of numbers? Select all that apply.

Day first, such as 01.09.1997 (DD.MM.CCYY)

Comments: or D.M.CCYY or (dot at the end) such as DD.MM.CCYY. and D.M.CCYY.

2. How does your office separate date components in published documents? Select all that apply.

dot, as in CCYY.MM.DD

other separator (specify in comments)

Comments: Dash as in DD-MM-CCYY Slash as in DD/MM/CCYY (for decisions on TM IR sent to WIPO)

3. Are leading zeroes omitted from any date components?

Consider the date September 1, 1997. Select all that apply.

Leading zeroes omitted for both day DD and month MM, such as 1997.9.1

No omissions, leading zeroes are always included in the date, such as 1997.09.01

Comments: - depends on type of IP document - leading zeros omitted for day in date format where full month name is used!

4. Does your office ever spell out the names of months in published dates? Select all that apply.

Yes, we use full month names such as September 1, 1997

Comments: for example 1. rujan 1997. (names of months in croatian language)

5. If your office spells out months, which languages do you use for month names? Select all that apply. If a language has multiple variations of month names, indicate in the comments which variation your office uses.

Other (specify in comments)

Comments: Croatian

6. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Year first

	Separator(s)					Used for
	dot	dash	slash	space	none	
CCYY.MM.DD (e.g. 1997.09.01)						
CCYY.(M)M.(D)D (e.g. 1997.9.1)						
YY.MM.DD (e.g. 97.09.01)						
YY.(M)M.(D)D (e.g. 97.9.1)						

Comments: N/A

7. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Day first

	Separator(s)					Used for
	dot	dash	slash	space	none	
DD.MM.CCYY (e.g. 01.09.1997)		X				receiving office (stamp on the first page of received document in paper)
DD.MM.YY (e.g. 01.09.97)						
(D)D.MM.YY (e.g. 1.09.97)						
(D)D.(M)M.YY (e.g. 1.9.97)	X					Important. Year is always in format CCYY Date formats such as (D)D.(M)M.CCYY or (D)D.(M)M.CCYY. (dot at the end) used for Official Gazzete, online search and all other croatian official documents

Comments: slash such as DD/MM/CCYY for all decisions on TM IR sent to WIPO via Input MECA system

8. Please select all the date formats used by your office below. If multiple formats or separators are selected, indicate what types of documents or data use each one.

Format - Month names

	Name format		Used for
	full month name	abbreviated	
DD [month] CCYY (e.g. 01 September 1997)			
(D)D [month] CCYY (e.g. 1 September 1997)			
[month] DD CCYY (e.g. September 01, 1997)			
[month] (D)D CCYY (e.g. September 1, 1997)			
Other format - specify using C, Y, M, D, and [month] (specify in comments)	X		(D)D. [month] CCYY. (dot at the end) for official documents in croatian language

Comments:

9. In your IT systems, what format(s) are dates for IP documents and data stored in?

Please select all formats used by your various IT systems for dates related to IP documents and data.

As a database field with a date or datetime datatype. This stores separate values for the full year, month, and day, sometimes with values for time components as well.

Comments:

10. What is the maximum year your systems are capable of storing? If your systems use multiple digital date storage formats, select all that apply.

Note - when the "maximum date" is exceeded in affected systems, the date rolls back to the beginning of the time period, such as January 1, 1970. The result is similar to Y2K issues. For references on this topic, see

https://en.wikipedia.org/wiki/Time_formatting_and_storage_bugs.

No practical limit. The maximum year has no practical limit, such as 9999 (database 4-digit year fields) or beyond (64-bit timestamps in seconds).

Comments:

11. Are there any other considerations that users should be aware of with dates in your published documents? If so, please provide an explanation and examples. For instance, Japanese documents often indicate the year of the Emperor's reign, as explained in the [current Part 7.1](#).

N/A

12. Optional - If you wish to provide any file attachments with examples from your other answers (such as question 11), please do so here.

4. Thank You!
