INTRODUCTION

1. This recommendation is aimed at improving the access to information relating to marks in general and to the bibliographic content of (trademark) gazettes and certificates in particular.

2. This recommendation provides for codes whereby the various bibliographic data relating to marks, e.g., as given in (trademark) gazettes or certificates, can be identified without knowledge of the language used and the industrial property laws applied.

3. This recommendation further indicates the bibliographic data which as a minimum should be published in (trademark) gazettes.

DEFINITIONS

4. For the purpose of this recommendation the expression:

   (a) “mark” means a trademark, a service mark or another type of distinguishing sign according to the definition of the mark in the legislation concerned, including but not limited to collective marks, certification marks or guarantee marks;

   (b) “certificate” means the official document which is delivered to a mark owner certifying that his/her mark has been registered by the Office of the country/organization in question, or that such registration has been renewed or amended (this definition also covers “certificates” or “registry extracts” delivered by the Office, e.g., for the purposes of proceedings in court);

   (c) “gazette” means an official publication containing announcements relating to marks and made in accordance with requirements under national industrial property laws or international industrial property conventions or treaties;

   (d) “entry in a gazette” means a comprehensive announcement, including bibliographic data, made in a gazette regarding an application for the registration of a mark or a registration of a mark;

   (e) “INID” is an acronym for “Internationally agreed Numbers for the Identification of (bibliographic) Data.”

REFERENCES

5. The following WIPO Standards are of fundamental importance to this Standard:

   WIPO Standard ST.2 Standard Manner for Designating Calendar Dates by Using the Gregorian Calendar;

   WIPO Standard ST.3 Recommended Standard on Two-Letter Codes for the Representation of States, Other Entities and Intergovernmental Organizations.
IDENTIFICATION OF BIBLIOGRAPHIC DATA AND MINIMUM REQUIREMENTS

6. The list of definitions of bibliographic data with their corresponding INID codes is given in Appendix 1 to this recommendation and entitled “List of INID Codes.” To assist industrial property offices and users of industrial property documentation, Appendix 2 to this recommendation contains those INID codes, with their definitions and/or notes, which were used at a certain period of time but have either ceased to be available for use or have been amended.

7. The list of bibliographic data has been organized into categories (100 to 800) to facilitate grouping of related data. Each category has several subdivisions to each of which an INID code has been assigned. Category codes, ending in “0,” can themselves be used in one, or both, of the following situations:

(a) where several individual bibliographic data items of the same category are present and it is desired to present those individual data items together without using individual INID codes;

(b) where none of the specific INID codes can be assigned to one of the bibliographic data elements which clearly fall within the category definition.

Offices should clearly describe how they use category codes in each of the above situations.

8. The INID codes which are preceded by an asterisk (*) relate to those data elements which are considered to be the minimum elements which should appear in gazette entries and in certificates.

APPLICATION OF CODES

9. INID codes can be used in all entries in gazettes. However, as a minimum, if applied, they should be used in announcements regarding applications published for the first time, e.g., for opposition purposes, and announcements regarding registrations, if such announcements contain comprehensive entries.

10. INID codes can also be used in certificates. Since the language of the certificate is not always known to the user, the use of INID codes facilitates the recognition and understanding of the data.

11. The INID codes should be associated with the corresponding bibliographic data in so far as these data normally appear in gazettes.

12. Provided the presentation of bibliographic data in entries in a gazette is uniform, INID codes may be applied to the bibliographic data in a representative specimen entry in each issue of the gazette, instead of being included in each entry.

13. The INID codes should be printed in Arabic numerals, preferably within brackets (round or square) immediately before the corresponding bibliographic data element.

14. The presentation of calendar dates in any of the INID codes concerned should be in the sequence and format as recommended in WIPO Standard ST.2.

IMPLEMENTATION

15. If bibliographic data to which INID codes are assigned in accordance with this recommendation do not appear in an entry in a gazette—because they are not applicable (e.g., where no priority is claimed or for some other reason)—it is not necessary to call attention to the non-existence of such elements (e.g., by leaving a space or by providing the relevant INID code followed by a dash).

16. In order that the users of gazettes may be able to make maximum use of the INID codes, it is recommended that a list of the codes used or the complete standard be published at regular intervals in official publications, e.g., in the gazette.

17. Industrial property offices can start using this recommendation at any time. It is recommended that when implementing the INID codes an announcement be made as indicated above and the International Bureau of WIPO be informed, e.g., by being forwarded a sample of the gazette.

18. Industrial property offices can be advised and assisted by the International Bureau of WIPO if they encounter problems in implementing this Standard.

EXPLANATORY NOTES

Re: INID codes (111), (116), (210), (260) and (310)

By “serial” is meant the number of the application, registration or renewal in the applicable series of numbers.

Re: INID code (117)

Only applicable to offices which allot a new registration number when a registration is renewed.

Re: INID code (141)

By termination is meant any way provided for in the law for terminating the registration: e.g., cancellation by the holder, ex officio by the office, by court decision.

Re: INID code (170) vis-à-vis codes (171) and (176) and INID code (180) vis-à-vis codes (181) and (186), respectively

The codes (170) and (180) are to be used when an office does not differentiate between registrations and renewals.

Re: INID codes (171), (176) and (181), (186)

The “expected duration” is normally expressed in number of years: e.g., 10 years.

The “expected expiration date” is normally expressed by a date: e.g., 1998.11.11 or November 11, 1998. (See WIPO Standard ST.2.)

The codes (171) and/or (176), on the one hand, and (181) and/or (186), on the other hand, are mutually exclusive.

Re: INID code (190)

This code is mainly intended for use in mark databases and in certificates where the identification of the authority registering the mark is indispensable; for gazettes, the authority publishing them is normally already mentioned on the cover page.

Re: INID code (220)

By “date of filing” is meant the date of filing as allotted to the application by the Office.

Re: INID code (230)

It is possible to indicate various data here such as place, dates of the exhibition; “exhibition” is defined as in Article 11 of the Paris Convention or according to the applicable law.

Re: INID code (260)

This code is essential for countries such as Japan and the Republic of Korea, which publish applications after examination in a number series different from the number series referred to in INID code (210).

Re: INID codes (300) plus (310), (320) and (330)

If multiple priorities are invoked, these INID codes can have multiple occurrences of at least the serial number and the date.
Re: INID codes (340), (350) and (360)
These codes are essential for Offices such as the Office for Harmonization in the Internal Market (Trade Marks and Designs) to indicate certain data related to national applications or registrations in respect of community trademarks.

Re: INID codes in category (400)
By “making available to the public” is also meant making available for the purposes of opposition.

Re: INID codes (511) and (512)
These codes may be used to identify either (a) a class (or classes) only, or (b) list of goods and/or services only, or (c) both a class (or classes) and list of goods and/or services.

Re: INID codes (512) and (532)
These codes should be preceded in parentheses by the two-letter code (WIPO Standard ST.3) identifying the country whose national classification is used.

Re: INID codes (526), (527) and (529)
Normally to be used for indications in text form concerning certain limitations regarding the use of the mark or part of the mark, concerning geographical limitations, etc.
The code (527) may be used not only for indications relating to actual use but also for indications to intention to use the mark.

Re: INID codes (540) vis-à-vis (541) and (546)
The code (540) is to be used when an office does not want to differentiate between code (541) and code (546).

Re: INID code (541)
This code is normally to be used when the mark is considered to be a word mark.

Re: INID code (546)
This code is normally to be used when the mark contains figurative elements.

Re: INID code (550)
This code is provided to allow the grouping of the data elements corresponding to codes (551) to (558).

Re: INID code (600)
Category code (600) should be used by countries which were previously part of another entity for identifying bibliographic data elements relating to applications or registrations of marks which data had initially been announced by the industrial property office of that entity.

Re: INID codes (641) and (646)
These data are different from those referred to in INID code (161). They relate, e.g., to associated marks, divisional applications and partial assignments.
Re: INID codes (730), (731), (732), (770) and (791)
These codes also cover several applicants, holders, representatives or licensees.

Re: INID codes (730) vis-à-vis (731) and (732)
The code (730) is to be used when an office does not want to differentiate between code (731) and code (732).

Re: INID codes (730), (731) and (732) vis-à-vis (770) and (771)
The codes (730), (731) and (732) should also be used to identify the name and address of the new applicant or holder in case of change in ownership, and the new name and address of the applicant or holder in case of no change in ownership.

Re: INID codes (812) and (813)
Only applicable where the address of the holder (or of one of the holders) is not in the territory of the Contracting Party whose Office is the Office of origin or, where a change in the ownership of the international registration has been recorded in the International Register, where the address of the transferee (or of one of the transferees) is not in the territory of the Contracting Party (or of one of the Contracting Parties) in respect of which the transferee fulfills the conditions to be the holder of an international registration.

Re: INID codes (821) and (822)
In some cases (e.g., where a country which has become party to the Protocol still applies the single class application system), the international application (exclusively governed by the Protocol) can be based on one or more basic applications (code (821)) and basic registrations (code (822)) if the international registration covers several classes of goods and/or services.

Re: INID codes (831) to (834)
No INID codes are provided for where a change affects all the designated Contracting Parties (in the case of total change in ownership (transfer)).

Re: INID codes (831), (832) and (834)
By “designation” is meant a territorial extension made in the international application or subsequent to the international registration. Code (831) and/or code (832) and/or code (834) will be used in the publication of international registrations, subsequent designations, renewals and partial changes in ownership.

Re: INID code (833)
This code will be used in the publications of renunciations, limitations and partial cancellation.

Re: INID codes (841) and (842)
The information covered by these codes is optional for the purposes of international registration and is intended to comply with requirements under the laws of some designated Contracting Parties.

Re: INID codes (843) to (845)
The provisions regarding ‘requests for review or appeal’ were in force for the period April 1, 1996 to March 31, 2002. They do not form part of the current regulations.
Appendix 1, page 8

Re: INID code (851)
This code will be used where a limitation of the list of goods and services is included in an international application or in a subsequent designation.

Re: INID code (852)
This code will be used where a partial cancellation of the list of goods and services covered by the international registration has been recorded.

Re: INID code (868)
When this code is used, the data should also include the date on which the Grant of Protection was received by WIPO.

Re: INID code (869)
This code will be used where protection is accepted, with the reserve that some elements of the mark itself are not protected.

Re: INID code (871)
In the case of a partial assignment of the international registration, the assigned part (recorded in the name of the transferee) will bear the same number as the international registration concerned, followed by a capital letter.

Re: INID code (894)
The provisions regarding ‘confirming the refusal of protection’ were in force for the period April 1, 1996 to March 31, 2002. They do not form part of the current regulations.
