## NOTIFICATION OF REFUSAL

(Rule 18 of the Common Regulations under the Hague Agreement/ 37 CFR 1.1063)

Applicant must file any reply to this communication directly with the United States Patent and Trademark Office. Applicant may **NOT** file such reply through the International Bureau.

This refusal relates to all the industrial designs that are the subject of the international registration

Art Unit: 2919

### **DETAILED ACTION**

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

#### **Title Objection**

The title is objectionable. The title of the design must designate the particular article so that the formal claim will be directed to the ornamental design for the article. 37 CFR 1.153 and 35 U.S.C. 171. Therefore, the title must be amended throughout the application, original declaration excepted, to read:

--Display Screen or Portion Thereof with Graphical User Interface--

#### **35 U.S.C. 171**

The claim is rejected under 35 U.S.C. 171 as being directed to nonstatutory subject matter. 35 U.S.C. 171 defines the proper subject matter for a design patent:

Whoever invents any new, original and ornamental design for an article of manufacture may obtain a patent therefor, subject to the conditions and requirements of this title.

To be considered statutory subject matter under 35 U.S.C. 171, a claimed design must be embodied in "an article of manufacture."<sup>1</sup> The phrase "an article of manufacture" has been interpreted to be a tangible object or physical substance.<sup>2</sup>

A design may be embodied in an article of manufacture (1) as a configuration for an article of manufacture, (2) as a surface ornamentation for an article of manufacture, or (3) a

combination of both. *Gorham v. White*, 81 U.S. 511, 525 (1871); *In re Schnell*, 46 F.2d 203, 209 (CCPA 1931); MPEP § 1502.

Pursuant to the guidelines for examination of design patent applications for computer generated icons,<sup>3</sup> a design for a computer-generated icon may be considered statutory subject matter if the following conditions are present:

- 1) The computer screen, monitor, other display panel, or portion thereof is shown in broken or solid lines with the icon displayed on it, and
- 2) The claim is directed to the subject matter as embodied in an article of manufacture.

Applicant's claim refers to the portion of a display screen in which the computer-generated image is embodied. However, it is unclear if the portion of a display screen is not shown in the drawing or if the portion of a display screen is shown underlying the image. The computer-generated image must comply with the "article of manufacture" requirement of 35 USC 171. The title of the claimed design suggests that the article of manufacture is the display screen.

It may be possible for applicant to show a portion of a display screen in broken line without introducing new matter. For example, applicant may include a broken line immediately adjacent to the outer edge perimeter of the graphical user interface to represent a portion of a display screen (see D567,249 for an example of an immediately adjacent broken line). Note that if a broken line is added to the drawing, a special description must be inserted into the specification.

If applicant prepares new drawings, care must be exercised to avoid introduction of anything which could be construed to be new matter prohibited by 35 U.S.C. 132 and 37 CFR 1.121.

---

<sup>3</sup> 1185 O.G. 60, 61 F.R. 11380 (1996).

Art Unit: 2919

### **Conclusion**

The claim stands rejected under 35 USC 171.

Applicant is reminded that any reply to this Refusal must be signed either by a patent practitioner (i.e., a patent attorney or agent registered to practice before the United States Patent and Trademark Office) or by the applicant. If the applicant is a juristic entity, the reply must be signed by a patent practitioner. See 37 CFR 1.33(b).

Traveling is one of the most rewarding things one can do, be it for business or leisure. One thing that will probably hinder the traveler in you is not only the hotel accommodation but also the cost of the flights.

**easyJet** (<https://play.google.com/store/apps/details?id=com.mttnow.droid.easyjet>) may just be one app that can solve the problem of expensive airplane tickets. Searching and booking for cheap flights have been made easier with this app and aside from letting you do so, the app can also help you manage your flights. You can add your passport details to the flights you have booked and add or change a flight using the same app.

Although the app is limited to searching for cheap flights only throughout Europe, coming updates will probably extend its service to more locations. Download easyJet and take it wherever you go.

**Hipmunk Hotel & Flight Search** (<https://play.google.com/store/apps/details?id=com.hipmunk.android>) really feels for its customers. Please note that in this list, we'll be tackling jRPGs and "standard" RPGs. Other types have been covered in other lists. Enjoy!

(<https://play.google.com/store/apps/developer?id=Beamdog>)**Baldur's Gate I and II and Icewind Dale**

Price: \$9.99 each

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DEVELOPER?ID=BEAMDOG](https://play.google.com/store/apps/developer?id=Beamdog))Download

Beamdog is a developer that specializes in porting old PC RPGs. So far they have done Baldur's Gate I and II along with Icewind Dale. These are huge games with dozens of hours of story line each. Additionally, they feature deep character building, difficult quests, and a complex game world. They're old school RPGs. That means they're deep, time consuming, and complex. However, those looking for a more casual experience should likely steer clear. Additionally, we recommend you play these on tablets because the controls can be a bit cramped for smartphones. They're \$9.99 each. A couple of them have in-app purchases, but it's for in-game content like voice packs.

(<https://play.google.com/store/apps/details?id=com.inxile.bardtale>)**The Bard's Tale**

Price: \$2.99 with in-app purchases

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?id=com.inxile.bardtale))

The Bard's Tale was one of the first really good RPG experiences on mobile and continues to be one of the best even now. It's a remake of the classic game from the mid 1980's that helped define the RPG genre as a whole. You'll be going on quests, upgrading your character, and engaging in all kinds of delightful tomfoolery. You'll find a lot of quirk and bluntness from the dialog. That means you can look forward to plenty

of comedy. It also comes with Google Play Games achievements and cloud saving. It has some in-app purchases that gives you in-game perks to make the game easier. They're optional and don't affect the game that much.

**Advanced**

Price: \$2.99

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?)

Doom and Destiny Advanced is the sequel, prequel, and reboot for the original Doom and Destiny. Its predecessor was on o RPGs for a couple of years. The game features a lot of the same characters and premise as the original but in a completely d (and even dimension), according to the developers. It boasts 15 hours of content with free content being added, plenty of dungeons and secrets to find, tons of monsters, and even online co-op mode. It's a lot of game to play and it's perfect for retro fans.

(<https://play.google.com/store/apps/details?id=com.makingfun.mageandminions>) **Eternium: Mage and Minions**

Price: Free with in-app purchases

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?id=com.makingfun.mageandminions)

Mage and Minions is a free to play RPG. It can also be played offline. It's one of the few RPGs that can. It has a variety of story lines and concepts and you'll be battling robots, skeletons, beasts, demons, aliens, and many others. Of course, there are plenty of things for you to find and gather. It is a little bit more hack-and-slash than it is an RPG, but the elements are definitely there. Like most freemium games, the repetitiveness will become tedious after a while. However, it's fun while it lasts.

(<https://play.google.com/store/apps/details?id=net.fdgames.ek.android>) **Exiled Kingdoms**

Price: Free / \$4.99

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?)

Exiled Kingdoms is a single player action RPG. It's one of the few in this genre that isn't also a freemium game. It features a story where you have to save the world from horrors that were leftover from a previous cataclysm. The graphics aren't the best part of the game, but they do get the point across and the menu system is easy enough to understand. Like most RPGs, you'll have to upgrade your character as you progress through the story, and explore the world around you. The free version gives you a fairly large trial with two character types of play which eventually unlocks everything.

Price: \$4.99

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?)

Evoland is a quirky and fun RPG that borrows from a ton of different games in a very unique way. It's set up to have you play through the history of action-adventure games and includes both 2D and 3D environments. You'll also get to do turn-based combat as well as hack-n-slash

combat. As you progress, you'll unlock new types of combat and new environments that literally take you through the ages of gaming. It's a really neat concept. The only potential downside is that this is one of the shorter RPGs on this list.

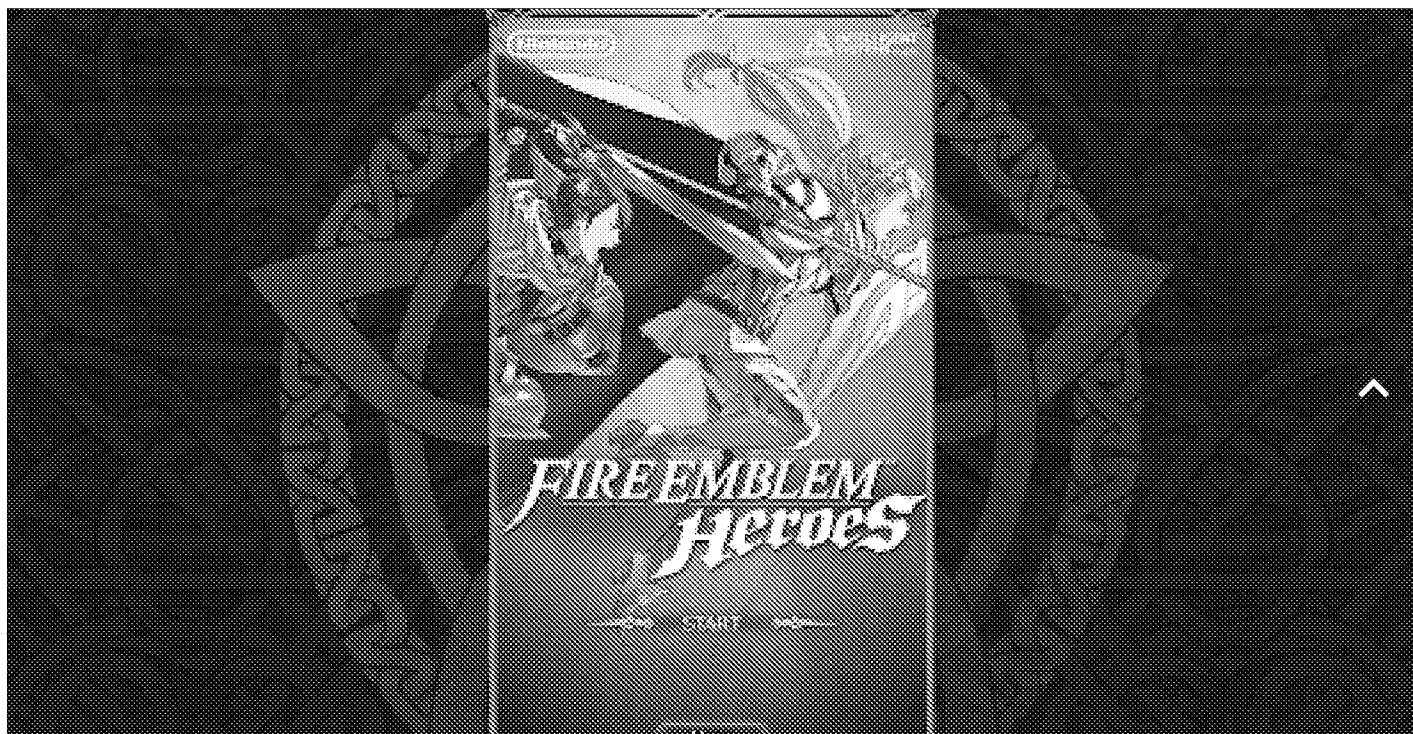

(<https://play.google.com/store/apps/details?id=com.nintendo.zaba>) **Fire Emblem Heroes**

Price: Free with in-app purchases

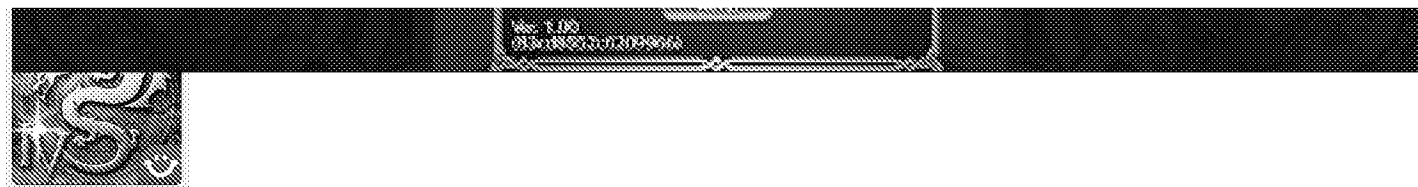

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?id=com.nintendo.zaba)

Fire Emblem Heroes is a strategy RPG from Nintendo. You start out by collecting some heroes and then you go through the gacha game which means you'll spend most of your in-game currency trying to collect more powerful characters. It features characters from prior Fire Emblem games and the story line is completely separate from the other universes. It's a shockingly smooth and probably the best in its genre. Just look out for the usual freemium pitfalls while playing.

**(<https://play.google.com/store/apps/details?id=com.com2us.inotia4.normal.freefull.google.global.android>)  
and Zenonia**

**Price:** Free with in-app purchases

([HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?](https://play.google.com/store/apps/details?)

Inotia and Zenonia are two of the oldest RPGs on Android. Each franchise has about half a dozen games, each with their own story that set it apart from others in the series. That means you have a lot of options. However, Inotia 4 and forward along with Zenonia 4 forward have been updated relatively recently. That's a good three or four RPGs that are worth trying out. Both games are available for free and have tons of content that'll keep you playing for a while. They're also freemium games for what it's worth.

**Price:** Varies

Before Square Enix started launching ports of its classic JRPGs, there was only one really good JRPG developer on Android and that was Kemco. The studio specializes in RPGs and they currently have dozens of games in their repertoire. Some of their more popular options include Symphony or Origin, Machine Knight, Covenant of Solitude, the Alphadia saga, and many more. Most of the games cost under \$5. There are even a few that are free. None of them are bad, but you may or may not like them based on your preferences. You can click the button above to view their entire collection.

(HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?)

Knights of Pen and Paper is a unique concept because it's a little bit of a game inside of a game. You'll be playing warriors in an RPG world as they control their own characters and you'll even get to play as the dungeon master. This gives you control over whether or not you want to fight a battle. It's a unique premise with tons of content to enjoy. The +1 edition adds some extra content to round up an already pleasant experience. It's one of the most unique RPGs on the list.

Pixel Dungeon is an open source RPG. That means its game code is published for all to see. As a result, there are several variants available on Google Play. Some of the better variants are Yet Another Pixel Dungeon, Shattered Pixel Dungeon, and Remixed. Of course, the original is fun as well. We're not going to lie to you. These are some challenging RPGs. They're dungeon crawlers where you explore, find treasure, and more. The games are all free with optional donations if you want to show your support. Sorcery is a series of highly rated RPGs. They are pseudo-text based in nature and they have been compared to playing along with a graphic novel which is a fair assessment. It features an open world that you can explore as you see fit and you can even time travel if you want to. You'll also be making plenty of decisions that determine how the game turns out. There is a ton of stuff to do and it's definitely one of the more unique experiences on mobile. There are four games in total. Each one costs about \$4.99 and have no in-app purchases.

Square Enix has been working hand-over-fist to release their collection of RPGs on Android over the last few years. Fortunately, they have some fantastic RPGs. Some of the stuff you can find is Final Fantasy I-VII (and IX), Dragon Quest I-VI (and VIII), Secret of Mana, and many others. They also have made for mobile games like Final Fantasy Brave Exvius and Mobius Final Fantasy. You can also find strategy RPGs like Heavenstrike Rivals and Final Fantasy Tactics: War of the Lion. Their collection is extensive and you can find games anywhere from freemium to pay-once. Seriously, they have a lot of great stuff.

(https://play.google.com/store/apps/details?id=com.aspyr.swkotor) **Star Wars: Knights of the Old Republic**

Price: \$9.99

(HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?)

Star Wars: Knights of the Old Republic (stylized as KOTOR) is an adventure RPG that takes place long before the events of the original Star Wars Trilogy. You'll play as a young Jedi as you advance through the story and make decisions that ultimately affect whether or not you remain a Jedi or become a Sith Lord. There are over 40 powers, tons of items to craft, and plenty of things to do. It shares a lot of game play elements with RPG epics like Fallout so a lot of players should feel right at home. The only downside is that it doesn't lend itself to a casual gaming experience. This is a deep, in-depth game.

### (https://play.google.com/store/apps/details?id=com.dotemu.titanquest)Titan Quest

Price: \$8.99

(HTTPS://PLAY.GOOGLE.COM/STORE/APPS/DETAILS?)

Titan Quest is a port of an excellent action RPG from back in the day. This one features a decently long story line. Additionally, there are 80 bad guys, 1200 items, 30 different character classes, and 150 different character skills. The game itself is themed around several different ancient civilizations.
