III. Date on which the international registration produced the effect as a grant of protection (yyyy/mm/dd):

2019/11/29

IV. Date of the statement (yyyy/mm/dd):

2019/12/03

V. Information concerning the industrial design as accepted or, where applicable, amended and accepted:

(54) Indication of product:

Computer with a personalized medicine processing function

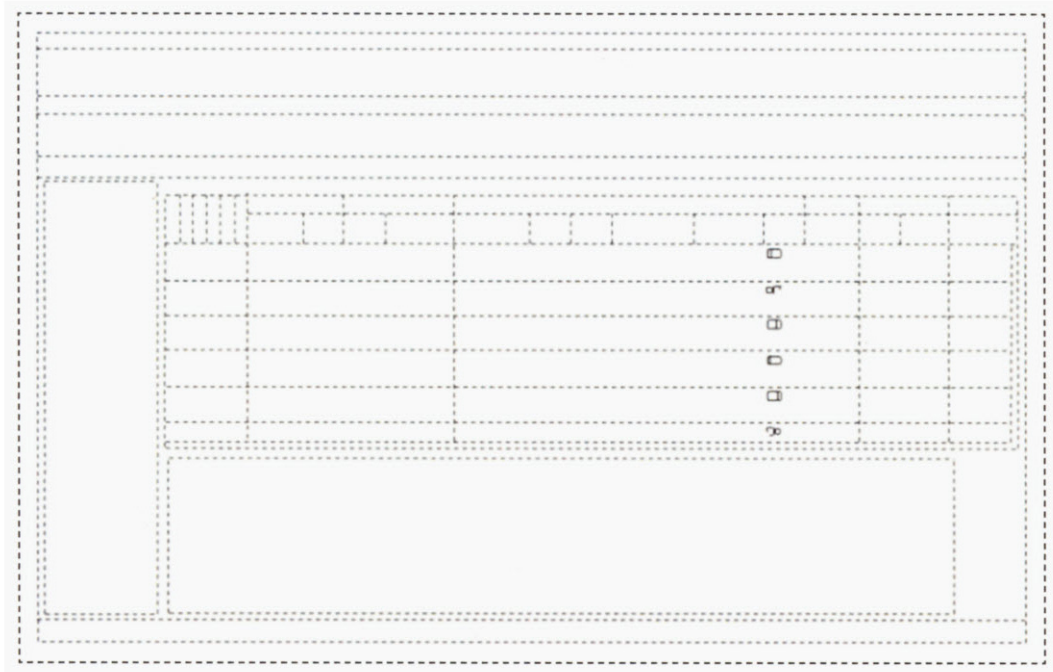

Partial Design

(57)(55) Description, Legends to indicate a specific view of the product:

The subject article is a computer with a personalized medicine processing function which is used to analyze a DNA sample of a patient and shows the exon position icons. The exon is generally defined as a part in which generic information is enclosed. In the drawings the each icon represents an exon. The position of the variant within the exon can be indicated by a border inside the icon. The perimeters of the underlying display screen or its portion and the graphical user interface are understood to be flushed. 1.1)Front view; 1.2)Left side view; 1.3)Top view; 1.4)Partial enlarged view of the display; 1.5)Enlarged view showing the top icon; 1.6)Enlarged view showing the third icon from the above. The part depicted by a solid line is a part to be registered as a partial design. The rear, bottom and right

side views are omitted since they do not show the part depicted by a solid line."
