

SECTION G — PHYSICS

G08 SIGNALLING

G08G TRAFFIC CONTROL SYSTEMS (guiding railway traffic, ensuring the safety of railway traffic B61L; radar or analogous systems, sonar systems or lidar systems specially adapted for traffic control G01S 13/91, G01S 15/88, G01S 17/88; radar or analogous systems, sonar systems or lidar systems specially adapted for anti-collision purposes G01S 13/93, G01S 15/93, G01S 17/93; control of position, course, altitude or attitude of land, water, air or space vehicles, not being specific to a traffic environment G05D 1/00) [2]

Note(s) [7]

This subclass covers:

- identification of traffic offenders;
- indicating the position of vehicles for traffic control purposes;
- navigation systems for traffic control purposes, i.e. systems in which the navigation is not performed autonomously by or in the vehicles, but where the vehicles are guided by instructions transmitted to them;
- indication of free spaces in parking areas.

G08G

- 5/02

- Automatic landing aids, i.e. systems in which flight data of incoming planes are processed to provide landing data (landing aids fitted in or to aircraft, or safety measures fitted in or to aircraft to prevent collision with earth's surface B64D 45/04; visual or acoustic landing aids on the ground or on aircraft-carrier decks B64F 1/18) [1, 2006.01]
- 5/04

- Anti-collision systems [1, 2006.01]
- 5/06

- for control when on the ground [2, 2006.01]
- 7/00

Traffic control systems for simultaneous control of two or more different kinds of craft [2, 2006.01]
- 7/02

- Anti-collision systems [2, 2006.01]
- 9/00

Traffic control systems for craft where the kind of craft is irrelevant or unspecified [2, 2006.01]
- 9/02

- Anti-collision systems [2, 2006.01]
- 99/00

Subject matter not provided for in other groups of this subclass [2006.01]
