

SECTION H — ELECTRICITY

H04 ELECTRIC COMMUNICATION TECHNIQUE

H04S STEREOPHONIC SYSTEMS [3]

Note(s) [3]

In this subclass, the following expression is used with the meaning indicated:

- "stereophonic systems" covers quadraphonic or similar systems.

1/00 Two-channel systems (H04S 5/00, H04S 7/00 take precedence) [3, 2006.01]

3/00 Systems employing more than two channels, e.g. quadraphonic (H04S 5/00, H04S 7/00 take precedence) [3, 2006.01]

- 3/02**
- of the matrix type, i.e. in which input signals are combined algebraically, e.g. after having been phase shifted with respect to each other [3, 2006.01]

5/00 Pseudo-stereo systems, e.g. in which additional channel signals are derived from monophonic signals by means of phase shifting, time delay or reverberation [3, 2006.01]

- 5/02**
- of the pseudo four-channel type, e.g. in which rear channel signals are derived from two-channel stereo signals [3, 2006.01]

7/00 Indicating arrangements; Control arrangements, e.g. balance control [3, 2006.01]
