

PATENTSCOPE: Latest Improvements

In order to improve your experience, we made some small changes to the PATENTSCOPE interface:

Using this button, you can refine the language of your query, the use of the stemming and the collections you are searching in.

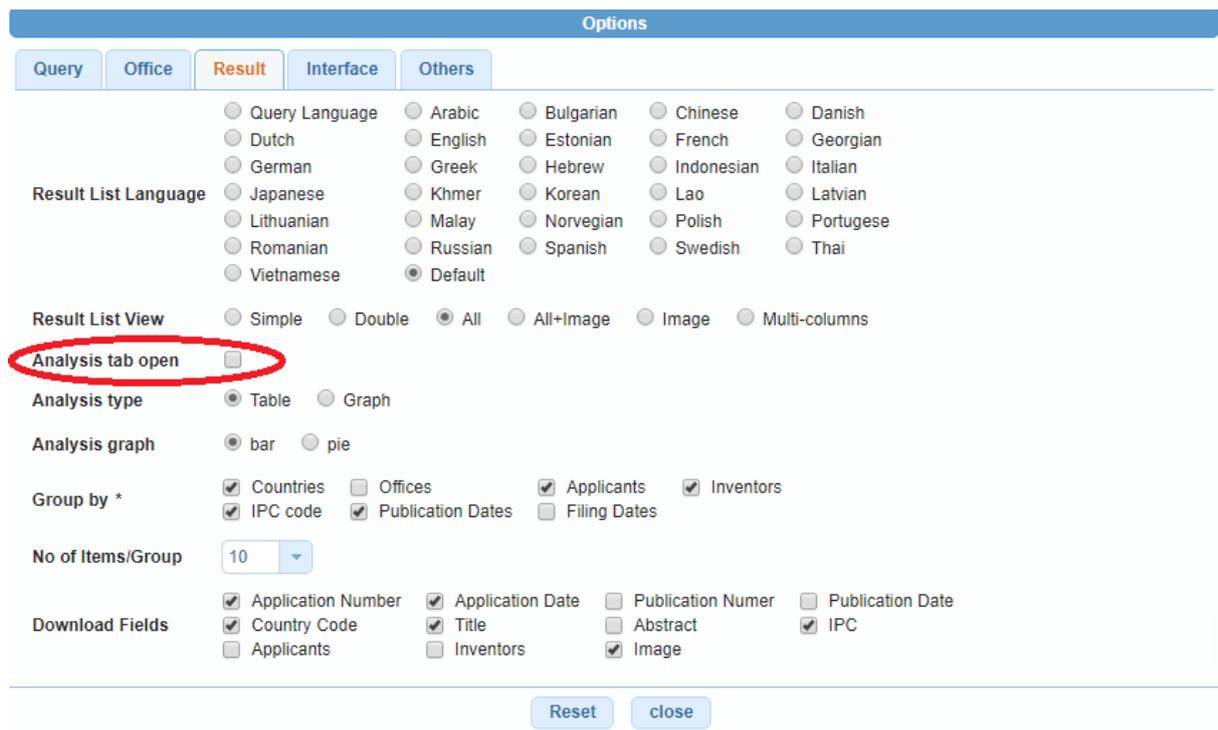

Use this button to go back to the *Refine search view*.

You can now get rid of the different filters one by one using the small cross contained in each filter.

The *Analysis* bar can be opened by default by ticking the box *Analysis tab open* in the *Results* tab in the *Options* menu.

The elements in the result list can now be viewed on one, two or three rows as well as the old *Image* view and *Multi-columns* view (formerly named as the *Translator* view). You can switch from one view to another in the result list itself or select your preferred view in the *Result* tab of the *Option* panel to have it open by default.

1. 20190207512	PMIC BOOT TIMING DETERMINATION METHOD	Xianming ZHANG	US	04.07.2019
16006630	SHENZHEN SEMICONDUCTOR TECHNOLOGY CO., LTD.		H02M 3/07	

The present disclosure provides a PMIC boot timing determination method. The circuit includes a PMIC, a first capacitor, a second capacitor, and a triode, wherein the first capacitor is connected to the direct current source, and the other end of the first capacitor is grounded; one end of the second capacitor is connected to one end of the direct current source, and the other end of the second capacitor is connected to the drain of the triode, the source of the triode is grounded, and the gate of the triode is connected to the PMIC. Compared with the related art, the circuit and the method provided by the present disclosure can achieve different timing generation and normal boot timing.

2. 20190200517	System and Method for Switching Between Seed Types During a Multi-Variety Seed Planting Operation	CHRISTOPHER SCHOENY	US	04.07.2019
16296824	CNH Industrial America LLC		A01C 21/00	

When performing a seed planting operation, a variety change distance may be calculated that corresponds to the distance from a variety zone boundary of a prescription map that a row unit of a planter must be located prior to initiating a variety change procedure for switching seed types. Once the row unit reaches a
